like How to Draw Cute Stuff or How To Draw Almost Everything for Kids--you'll love The Drawing Book for Kids. Easy-to-follow book shows how to use basic geometric shapes to form 31 varieties of the toothy predators, from the great white and the hammerhead to the tiger, bull, and saw sharks. Blank practice pages. The 35th anniversary edition of the classic how-to book that has helped millions of artists learn to draw. When it was originally published in 1970, How to Draw What You See zoomed to the top of Watson-Guptill's best-seller list—and it has remained there ever since. “I believe that you must be able to draw things as you see them—realistically,” wrote Rudy de Reyna in his introduction. Today, generations of artists have learned to draw what they see, to truly capture the world around them, using de Reyna's methods. How to Draw What You See shows artists how to recognize the basic shape of an object—cube, cylinder, cone, or sphere—and use that shape to draw the object,

no matter how much detail it contains. "How to Draw Cool Stuff: Basics, Shading, Texture, Pattern and Optical Illusions" is the second book in the How to Draw Cool Stuff series. Inside you will find simple illustrations that cover the necessities of drawing cool stuff. Specific exercises are provided that offer step-by-step guidelines for drawing a variety of subjects. Each lesson starts with an easy-to-draw shape that will become the basic structure of the drawing. From there, each step adds elements to that structure, allowing the artist to build on their creation and make a more detailed image. Starting with the basic forms, the artist is provided a guide to help see objects in terms of simplified shapes. Instructions for shading to add depth, contrast, character and movement to a drawing are then covered. The varieties of texture and pattern that can be included in an artwork offer another layer of interest and depth to a design. These elements are necessary to indicate the way something looks like it feels in a

work (texture) or creating the repetition of shapes, lines or colors (patterns). Illustrated optical illusions involve images that are sensed and perceived to be different from what they really are, showing examples of how the mind and the eyes can play tricks on each other. All you need is a piece of paper, a pencil and an eraser and you are ready to draw cool stuff. Once the drawing is complete, it can be colored, shaded or designed in any way you like to make it original. Following these exercises is a great way to practice your craft and begin seeing things in terms of simple shapes within a complex object. With Drawing: Faces, learn to draw detailed, realistic human faces in graphite pencil from basic shapes. "Anyone can learn to draw" ... Anyone can learn to draw when drawing is presented as the visual language that it is. LEARNING TO DRAW/ DRAWING TO LEARN approaches learning to draw like learning a language. It presents the material in a manner that has one lesson building upon another in a logical progression and in segments that are small enough to be understood and big enough to maintain challenge and interest. Every lesson, and its assignments, is divided into the three basic components of a language: Craft, Concept, and Composition. In drawing the Craft is skill development, the variety of physical and mental aptitudes that are required in perception and hand-eye coordination. The Concept is the broad definition of what the drawing is about, its

content. From the Concept the specific (personal) idea, the one the drawing develops, is generated. Composition encompasses the many considerations that go into the way the drawing is ordered on the picture plane and the way that arrangement supports the idea. In the lessons, and from one lesson to another, the objectives of these components are concise, workable and grow from one to another in a sequence that makes learning both possible and desirable. The book is heavily illustrated in a way that visually describes and aids the drawer with the lessons at hand. They illustrate basic considerations as they relate to craft, composition, concept, and their application, giving the drawer the tools needed to develop their own images. Drawing and drawings.
