[Customs Law of the European Union Jun 03 2020](#) Today, global competition obliges companies dealing in international trade to modernize their procedures of delivery in order to minimize the customs burden and simplify the relation with customs authorities. Customs planning is the current option to be effective in the worldwide marketplace. However, customs officials are facing new challenges: they must ensure the smooth flow of trade while applying necessary controls on the one hand, while protecting the health and safety of the Community's citizens on the other. To achieve and maintain the correct balance between these demands, control methods are constantly evolving raising major challenges to those charged with planning and compliance. This book is a highly practical work dealing with the ins and outs of European Union (EU) customs law. Cases of study, jurisprudence and comparative law support the analysis of the different legal tools. The consolidated principles ruling the transactions within WTO Member States applied in EU law offer the readers the opportunity to understand how customs rules can be applied in any customs jurisdiction. Authored by an international tax lawyer with extensive experience enforcing EU customs law as a former member of Italy's financial police, this handy resource is designed to help the reader stay in compliance with the laws controlling EU importing and exporting while structuring transactions in a business-friendly manner.

Lemon-Aid New Cars and Trucks 2011 May 15 2021 As U.S. and Canadian automakers and dealers face bankruptcy and Toyota battles unprecedented quality-control problems, Lemon-Aid guides steer the confused and anxious buyer through the economic meltdown unlike any other car-and-truck books on the market. Phil Edmonston, Canada’s automotive "Dr. Phil" for more than 40 years, pulls no punches. In this all-new guide he says: Chrysler’s days are numbered with the dubious help of Fiat. Electric cars and ethanol power are PR gimmicks. Diesel and natural gas are the future. Be wary of "zombie" vehicles: Jaguar, Land Rover, Saab, and Volvo. Mercedes-Benz – rich cars, poor quality. There’s only one Saturn you should buy. Toyota – enough apologies: "when you mess up, 'fess up."

Subsidies in the Context of the WTO's Free Trade System Dec 22 2021 This book analyses subsidies from various perspectives and creates a model that determines whether or not their use is justified. Further, it analyses the various causes of trade distortion, trade-discriminatory practices, and other issues associated with unregulated subsidies. In addition, the book considers how these issues fall within the scope of subsidies described under the SCM Agreement. The primary discussion from the perspective of WTO objective concerns the trade practice of awarding subsidies, for exports and also for protectionist purposes. Here, the terms justifiable and non-justifiable are used as hypothetical parameters to determine the extent of state support, considering the country classification based on economic and technological criteria, and their objectives for development. These parameters are distinct from Prohibited, Actionable, and Non-Actionable subsidies, as classified under the SCM Agreement. Subsidies awarded for the purposes of development and for welfare are considered as justifiable, whereas subsidies for the promotion of exports or state measures adopted for protectionist purposes are non-justifiable. Lastly, the book addresses the implications of such subsidies on the core objectives of the WTO and in connection with fair trade values.

Value Creation in E-Business Management Nov 08 2020 Recent economic, political, and technological forces are changing the landscape of electronic business and electronic commerce. Although great strides have been made over the past in understanding, researching and advancing e-business, rarely have we witnessed its use so profound and yet its limitations so pronounced, than what has been on global public display for the past 18 months. As a result, new e-commerce strategies and techniques are emerging, collaborative value creation is essential and e-business models are being refined and developed, with special attention towards IS in financial markets, health care and related institutions. It is for these reasons (and many more) that we are so particularly excited and grateful for the collection of papers included in this Value Creation in e-Business Management LNBIP volume number 36. The papers selected in this volume address these emerging e-business issues and are organized into four research lines: Business Models for the Digital Economy, Electronic and Mobile Commerce Behavioral and Global Issues, IS in Financial Markets and Institutions, Web 2.0 and E-Commerce and Collaborative Value Creation. The first group, Business Models for the Digital Economy, provides a closer examination of business models from a rich mixture of segments in the IT industry. They include Hoyer and Stanoevska-Slabeva’s business model types for enterprise mashup intermediaries, Riehle’s ‘commercial’ open source business model, Chen’s interesting comparison between i-Phone versus Kindles in electronic book sales, and Lyons and coauthors business models in emerging online services.

Save American Jobs Sep 06 2020 Hope has always said to Americans tomorrow will be better than today. Always, until now. Because if you are a computer programmer, engineer, accountant, manager or a factory worker, you are filled with fear, instead of hope, for your job may disappear overnight. If you are a small sized entrepreneur, the big company you've serviced from the beginning of your existence may call in the middle of the night to inform you they will no longer buy from you; they are buying from overseas. And these are the stories unfolding in communities across America. Fear, not hope, is stalking many an American. The information superhighway that was supposed to have been the road to high-paying jobs for Americans has instead turned into one on which offshore outsourcing is killing many jobs. If it is allowed to continue, America's foundation built over many generations will be weakened. To save existing jobs in America and create new ones, Dr. Abraham Turkson has suggested new ideas to reduce costs to make businesses in America more competitive, provide private healthcare for all Americans, and stop oil imports. And none of the suggestions involves raising taxes. Hope must be reborn across America.

Car Leasing Done Right Aug 18 2021 Vehicle leasing is one of the most cost-effective ways of solving transportation needs in Canada. Still, it doesn't mean everybody does it right. It took more than 15 years to gather all the information provided in this book. It is a guide that will help anyone to confidently sign and satisfy his/her transportation needs with a lease contract. You will learn to easily understand the numbers. How to sign a contract that gives you peace of mind. How to transfer your lease without affecting your credit. You will learn the right way of leasing a car you can afford without hurting your finances. And many more other tips for your insurance, warranty, saving money and time. This book is divided into three main parts: Vehicle Leasing Basics, Lease Transfer & Takeover, and Car Leasing Statistics in Canada. If you are new to car leasing (or financing) or just want to get rid of all those doubts you may have regarding a vehicle purchase, Part One: Vehicle Leasing Basics, is a must-read. You will learn to understand all the way down from pricing, kilometers (km), term, agreement and all other factors that define a lease contract. You will come to understand these all in a way that won't make getting your next car a big deal. Simply put, leasing a vehicle will seem like the regular transaction it was always supposed to be. Additionally, you will learn about the coverage products that come along with your car. Those designed to cover the "unexpected" and give you peace of mind. Scratches, dents, and damage will always happen because your vehicle (and others) are on the go. It was designed and expected to receive damage, wear, and depreciation. You just need to be prepared for it! Next, in Part Two: Lease Transfer & Takeover, you will learn the perks of one of the most important components of a lease contract: the opportunity to terminate your contract by giving it away to someone else. You will learn about the process, the benefits, and the costs of doing this. Although we can all estimate how long we might need a car, life will always throw surprises at us and our loved ones: a newborn, a new work vehicle, new routes to a new office, downsizing, or any other major life change. After operating the LeaseCosts™ Lease Takeover Marketplace for years, I've learned so many things that would love to share with you here, from both the buyer and the seller perspective. And Part Three: Car Leasing Statistics in Canada, will give you a lot of new insights on how we Canadians consume our vehicles. You will also get a look into a deep 15-year study that involves over 23,000 vehicle leasing contracts cross-country that will help you understand things like: - How much Canadians pay per month on average on a car lease. - The average for each specific car make. - The most popular leasing terms by manufacturer. - The average down payment for Volkswagen, Audi, KIA, etc. and how many people make a down payment. - How many people actually take the Wear & Tear coverage [LA1] [JD2] and how it can impact on future unexpected events. - The kind of average payment you should expect for high-end vehicles compared to mass-market ones. - How much you should offer as an incentive if you need to transfer your lease. After finishing all three parts, you will walk away with a solid understanding of how car leasing works in Canada – and I guarantee that you will feel prepared and confident when considering and signing your new car lease.
