Finalist for the Lincoln Prize! Traditional histories of the Civil War describe the conflict as a war between North and South. Kenneth W. Noe suggests it should instead be understood as a war between the North, the South, and the weather. In *The Howling Storm*, Noe retells the history of the conflagration with a focus on the ways in which weather and climate shaped the outcome of battles and campaigns. He further contends that events such as floods and droughts affecting the Confederate home front constricted soldiers' food supply, lowered morale, and undercut the government's efforts to boost nationalist sentiment. By contrast, the superior equipment and open supply lines enjoyed by Union soldiers enabled them to cope successfully with the South's extreme conditions and, ultimately, secure victory in 1865. Climate conditions during the war proved unusual, as irregular phenomena such as El Niño, La Niña, and similar oscillations in the Atlantic Ocean disrupted weather patterns across southern states. Taken into account these meteorological events, Noe rethinks conventional explanations of battlefield victories and losses, compelling historians to reconsider long-held conclusions about the war. Unlike past studies that fault inflation, taxation, and logistical problems for the Confederate

defeat, his work considers how soldiers and civilians dealt with floods and droughts that beset areas of the South in 1862, 1863, and 1864. In addition, he addresses the foundational causes that forced Richmond to make difficult and sometimes disastrous decisions when prioritizing the needs of the home front or the front lines. *The Howling Storm* stands as the most comprehensive examination of weather and climate during the Civil War. Its approach, coverage, and conclusions are certain to reshape the field of Civil War studies.

The 1973 oil crisis forced the American automotive industry into a period of dramatic change, marked by stiff foreign competition, tougher product regulations and suddenly altered consumer demand. With gas prices soaring and the economy in a veritable tailspin, muscle cars and the massive "need-for-speed" engines of the late '60s were out, and fuel efficient compacts were in. By 1980, American manufacturers were churning out some of the most feature laden, yet smallest and most fuel efficient cars they had ever built. This exhaustive reference work details every model from each of the major American manufacturers from model years 1973 through 1980, including various "captive imports" (e.g. Dodge's Colt, built by Mitsubishi.) Within each model year, it reports on each manufacturer's significant news and details every model offered: its specifications, powertrain offerings, prices, standard features, major options, and production figures, among other facts. The work is heavily illustrated with approximately 1,300 photographs. Please note that the content of this book primarily consists of articles available from Wikipedia or other free sources online. Pages 60.

Excerpt: The Oldsmobile 88 (a.k.a. Eighty-Eight) was a full-size car sold

by the Oldsmobile division of General Motors and produced from 1949 until 1999. From 1950 to 1974 the 88 was the division's top-selling line, particularly the entry-level models such as the 88 and Dynamic 88. The series was also an image leader for Oldsmobile, particularly in the early years (1949-51) when it was one of the best performing automobiles thanks to its relatively small size, light weight and advanced overhead-valve high-compression V8 engine originally designed for the larger and more luxurious 98 series but dropped into the smaller six-cylinder Oldsmobile 76 body, creating what was considered the predecessor of musclecars of the 1960s. A large number of variations in nomenclature were seen over this long model run-Delmont, Delta, Dynamic, Jetstar, Starfire, Super, Holiday, L/S, LSS, Celebrity, and Royale were used at various times with the 88 badge, and Fiesta appeared on some station wagons in the 1950s and 1960s. The name was more commonly shown as numbers in the earlier years ("Delta 88," for example) and was changed to spell-out "Eighty Eight" starting in 1989. The Oldsmobile Eighty Eight was produced in Wentzville, Missouri; Flint, Michigan; and Lake Orion, ...
