Death and illness touch us all, but even the everyday sufferings of loneliness and fear are traumatic. In *The Trauma of Everyday Life* renowned psychiatrist and author of *Thoughts Without a Thinker* Mark Epstein uncovers the transformational potential of trauma, revealing how it can be used for the mind's own development. Epstein finds throughout that trauma, if it doesn't destroy us, wakes us up to both our minds' own capacity and to the suffering of others. It makes us more human, caring and wise. It can be our greatest teacher, our freedom itself, and it is available to all of us. Western psychology teaches that if we understand the cause of trauma, we might move past it while many drawn to Eastern practices see meditation as a means of rising above, or distancing themselves from, their most difficult emotions. Both, Epstein argues, fail to recognize that trauma is an indivisible part of life and can be used as a tool for growth and an ever deeper understanding of change. When we regard trauma with this perspective, understanding that suffering is universal and without logic, our pain connects us to the world on a more fundamental level. Guided by the Buddha's life as a profound example of the power of trauma, Epstein's also closely examines his own experience and that of his psychiatric patients to help us all understand that the way out of pain is through it. On her tenth birthday, Leah receives a surprise gift from glamorous Aunt Olivia, Mama's only sister, who lives in Los Angeles. It is a red rose box. Not many people in 1958 Louisiana have seen such a beautiful traveling case, covered with red roses, filled with

jewelry, silk bedclothes, expensive soaps...and train tickets to California. Soon after, Leah and her sister, Ruth, find themselves in Hollywood, far away from cotton fields and Jim Crow laws. To Leah, California feels like freedom. But when disaster strikes back home, Leah and Ruth have to stay with Aunt Olivia permanently. Will freedom ever feel like home? A concise and accessible guide to techniques for detecting doctored and fake images in photographs and digital media. Stalin, Mao, Hitler, Mussolini, and other dictators routinely doctored photographs so that the images aligned with their messages. They erased people who were there, added people who were not, and manipulated backgrounds. They knew if they changed the visual record, they could change history. Once, altering images required hours in the darkroom; today, it can be done with a keyboard and mouse. Because photographs are so easily faked, fake photos are everywhere—supermarket tabloids, fashion magazines, political ads, and social media. How can we tell if an image is real or false? In this volume in the MIT Press Essential Knowledge series, Hany Farid offers a concise and accessible guide to techniques for detecting doctored and fake images in photographs and digital media. Farid, an expert in photo forensics, has spent two decades developing techniques for authenticating digital images. These techniques model the entire image-creation process in order to find the digital disruption introduced by manipulation of the image. Each section of the book describes a different technique for analyzing an image, beginning with those requiring minimal technical expertise and advancing to those at intermediate and higher levels. There are techniques for, among other things, reverse image searches, metadata analysis, finding image imperfections introduced by JPEG compression, image cloning, tracing pixel patterns, and detecting images that are computer generated. In each section, Farid describes the techniques, explains when they should be applied, and offers examples of image analysis. "In these tales the reader can observe Anne's

writing prowess grow from that of a young girl's into the observations of a perceptive, edgy, witty and compassionate woman"--Jacket flaps. "A remarkable piece of invention, a flight from the world of the familiar and the real into the exotic universe of dream and desire." —New York Times Book Review

When a light aircraft crashes into the Thames at Shepperton, the young pilot who struggles to the surface minutes later seems to have come back from the dead. Within hours everything in the dormitory suburb is transformed. Vultures invade rooftops, luxuriant tropical vegetation overruns the quiet avenues, and the local inhabitants are propelled by the young man's urgent visions through ecstatic sexual celebrations toward an apocalyptic climax. In this characteristically inventive novel Ballard displays to devastating effect the extraordinary imagination that has established him as one of the twentieth century's most visionary writers. Get up to speed with the most essential tips, tricks, and shortcuts for the iPhone 3G S

The popularity of the first generation of iPhone was unarguably impressive. Then came the iPhone 3G (third generation) with its support for faster broadband wireless networks, built-in GPS capabilities, and better battery life—and it didn't disappoint. Then this is the guide for you! This book of photography represents National Geographic's Photo Ark, a major cross-platform initiative and lifelong project by photographer Joel Sartore to make portraits of the world's animals -- especially those that are endangered. His message: to know these animals is to save them. Sartore intends to photograph every animal in captivity in the world. He is circling the globe, visiting zoos and wildlife rescue centers to create studio portraits of 12,000 species, with an emphasis on those facing extinction. He has photographed more than 6,000 already and now, thanks to a multi-year partnership with National Geographic, he may reach his goal. This book showcases his animal portraits: from tiny to mammoth, from the Florida grasshopper sparrow to the greater one-horned rhinoceros. Paired with the prose of veteran wildlife writer Douglas Chadwick, this book presents an argument for saving all the species of our planet. Named by *Garden & Gun* as one of the best books of 2018, *For the Love of the South* captures the essence of Southern culture—a deep devotion to family, friends, and food—in a charming cookbook featuring delicious, comforting recipes, her recollections of growing up on the bayous of Louisiana, and more than 100 full-color and black-and-white photographs. Amber Wilson's popular blog, *For the Love of the South*, reflects the generosity, cordiality, and sense of tradition that are the heart of Southern culture. In her engaging posts, she shares personal, entertaining stories about her childhood in the deep South, pays tribute to her heritage, and presents mouthwatering recipes that showcase the best of the region's cooking, accompanied by gorgeous photos. In this first book, drawn from her popular website, she brings together 100 delectable, accessible, and easy-to-make recipes for Southern classics, and mixes them with delightful family anecdotes, which convey her love and respect for

her roots. A terrific cook and captivating writer, Amber is also an accomplished photographer. *For the Love of the South* showcases 100 of her pictures—both black-and-white and color images of ingredient prep and finished dishes, as well as photos that evoke quintessential Southern life. No matter where in the country you live, no matter if you've barely used a stove or are an old hand around the kitchen, Amber teaches you how to master a host of Southern dishes, from starters to desserts. The recipes use inexpensive, readily available ingredients and come with instructive, encouraging directions. Learn to make a roux, perfect the popover, fry okra, lattice a piecrust, and create irresistible gumbos and jambalayas like a true Southerner. From Pain Perdu, Pimento Hushpuppies, Corn Bisque, and Spicy Oven-Roasted Okra to Tomato and Bacon Sandwich with Chipotle Mayonnaise, Nashville Hot Chicken, Cajun Jambalaya, and Bacon-Latticed Apple Pie, there's something tasty for everyone. Amber offers a pantry-full of time- and money-saving kitchen tips—from storing and freezing bacon to prolonging fresh berries in the fridge, seasoning cast-iron skillets, and making vanilla extract—and provides helpful do-ahead and leftover-saving tips for many recipes as well. Grab a chair, sit down for a spell, and enjoy a taste of Southern life and food with *For the Love of the South*.

Art & Fear is about the way art gets made, the reasons it often doesn't get made, and the nature of the difficulties that cause so many artists to give up along the way. Drawing on the authors' own experiences as two working artists, the book delves into the internal and external challenges to making art in the real world, and shows how they can be overcome every day. First published in 1994, *Art & Fear* quickly became an underground classic, and word-of-mouth has placed it among the best-selling books on artmaking and creativity. Written by artists for artists, it offers generous and wise insight into what it feels like to sit down at your easel or keyboard, in your studio or performance space, trying to do the work you need to do. Every artist, whether a

beginner or a prizewinner, a student or a teacher, faces the same fears - and this book illuminates the way through them. Paul Dirac was among the great scientific geniuses of the modern age. One of the discoverers of quantum mechanics, the most revolutionary theory of the past century, his contributions had a unique insight, eloquence, clarity, and mathematical power. His prediction of antimatter was one of the greatest triumphs in the history of physics. One of Einstein's most admired colleagues, Dirac was in 1933 the youngest theoretician ever to win the Nobel Prize in physics. Dirac's personality is legendary. He was an extraordinarily reserved loner, relentlessly literal-minded and appeared to have no empathy with most people. Yet he was a family man and was intensely loyal to his friends. His tastes in the arts ranged from Beethoven to Cher, from Rembrandt to Mickey Mouse. Based on previously undiscovered archives, *The Strangest Man* reveals the many facets of Dirac's brilliantly original mind. A compelling human story, *The Strangest Man* also depicts a spectacularly exciting era in scientific history. Rose Brownlee has lost more than most can endure. Now she must find a way to move on with her life. Will she bow to conventional wisdom or will she, like Abraham of old, choose to follow where God leads her ... even to a wild and strange land she does not know? Set in the American prairie of the late 1800s, this story of loss, disillusionment, rebirth, and love will inspire, challenge, and encourage you. It is true that book always enjoys more attention than its faithful supporter-bookshelf. This book, however, is a tribute to this essential piece of furniture in our life, presenting creative bookshelf designs from around the globe which would provide fresh ideas for readers. An illustrated foldout was carefully made to introduce a brief historical development of bookshelf Human civilizations' longest lasting artifacts are not the great Pyramids of Giza, nor the cave paintings at Lascaux, but the communications satellites that circle our planet. In a stationary orbit above the equator, the satellites that broadcast our TV

signals, route our phone calls, and process our credit card transactions experience no atmospheric drag. Their inert hulls will continue to drift around Earth until the Sun expands into a red giant and engulfs them about 4.5 billion years from now. The Last Pictures, co-published by Creative Time Books, is rooted in the premise that these communications satellites will ultimately become the cultural and material ruins of the late 20th and early 21st centuries, far outlasting anything else humans have created. Inspired in part by ancient cave paintings, nuclear waste warning signs, and Carl Sagan's Golden Records of the 1970s, artist/geographer and MacArthur "Genius" Fellow Trevor Paglen has developed a collection of one hundred images that will be etched onto an ultra-archival, golden silicon disc. The disc, commissioned by Creative Time, will then be sent into orbit onboard the Echostar XVI satellite in September 2012, as both a time capsule and a message to the future. The selection of 100 images, which are the centerpiece of the book, was influenced by four years of interviews with leading scientists, philosophers, anthropologists, and artists about the contradictions that characterize contemporary civilizations. Consequently, The Last Pictures engages some of the most profound questions of the human experience, provoking discourse about communication, deep time, and the economic, environmental, and social uncertainties that define our historical moment. For eight years, the American naval base at Guantanamo Bay on Cuba has been home to hundreds of men, all Muslim, all detained in the aftermath of the 9/11 and most guilty of nothing more than being in the wrong place at the wrong time. Through powerful imagery, Clark illustrates three experiences of the naval base, as a home to a US community, as a prison and as a memory to former detainees who, never having been charged, now have to rebuild their lives. This is an unsettling narrative evoking the disorientation central to Guantanamo incarceration and interrogation. Nearly 600 pages of content gets you up and running on your new iPhone. Award-winning photographer Matt Black traveled over 100,000 miles to chronicle the reality of today's unseen and forgotten America. When Magnum photographer Matt Black began exploring his hometown in California's rural Central Valley—dubbed “the other California,” where one-third of the population lives in poverty—he knew what his next project had to be. Black was inspired to create a vivid portrait of an unknown America, to photograph some of the poorest communities across the US. Traveling across forty-six states and Puerto Rico, Black visited designated “poverty areas,” places with a poverty rate above 20 percent, and found

that poverty areas are so numerous that they're never more than a two-hour's drive apart, woven through the fabric of the country but cut off from "the land of opportunity." American Geography is a visual record of this five-year, 100,000-mile road trip, which chronicles the vulnerable conditions faced by America's poor. This compelling compilation of black-and-white photographs is accompanied by Black's own travelogue—a collection of observations, overheard conversations in cafe's and public transportation, diner menus, bus timetables, historical facts, and snippets from daily news reports. A future classic of photography, this monograph is supported by an international touring exhibition and is a must-have for anyone with an interest in witnessing the reality of an America that's been excluded from the American Dream.
