Excerpt from *How England Saved China* This book has been written with a purpose. The writer has been deeply affected by the fact that considerable numbers of Englishmen, merchants, scholars, working-men, &c., deliberately declare that missionaries ought not to be sent to the heathen. In saying this they fail to recognize how much the England of to-day owes to the missionaries who brought Christianity to it, when it was barbarous and uncivilized. Neither have they read the history of other lands and marked how some of them have been elevated by English missionaries, and how the English flag is looked upon as the symbol of freedom and justice, in a large measure through the heroic services of her sons. If Africa could speak to-day, she would declare that the horrors of the past have been swept away through the devotion of Livingstone, one of the most distinguished of

English missionaries, who gave his life for that dark continent. That many Christian men and members of Churches should speak in the same strain is still more distressing. "Looking Forward" by Arthur Bird is a book about the civilization of the United States in the 20th century. The author respectfully submits it as his firm and immovable conviction, that the United States of America, in years to come, will govern the entire Western Hemisphere. The purpose of this book is to clearly establish this important fact in the mind of every patriotic American. Our glorious, starry banner will rule the entire Western Hemisphere. It will be the emblem of Peace, Liberty, and Civilization, floating over a united America from Alaska to Patagonia. This is America's Destiny. The book serves to stimulate patriotic pride and strengthen respect for our liberty-loving flag. Growing up in London, Ekow Eshun never felt truly at home. Born in Britain to African parents, he found himself caught between two cultures without fully belonging to either. Plagued by the unease of dual identity, he travels to Africa to look for an idea of home - only to discover he's as much of a stranger there as in Britain. The result is a journey that crosses paths with nineteenth-century philosophy, twentieth-century black liberation movements and the psyche of modern, multicultural Britain; a book that combines the intimacy of confession with a sweeping tale of continents and generations - all in pursuit of the answer to the question: where are you from? This text replaces the belief that Europe is the natural home of freedom and democracy. It provides instead a far more sinister picture of a continent which has been both a breeding ground and an experimental farm for ideologies of extraordinary ferocity. A sweeping, illustrated history of Europe--a continent whose imperial ambitions, internal clashes, and existential threats are as vital today as they were during the conquests of Alexander the Great. In just a few hundred years, a modest peninsula off the northwest corner of Asia has seen the rise and fall of several empires; served as the crucible for scientific

dynamism, cultural innovation, and economic revolution; and witnessed cataclysms and bloodshed that have almost destroyed it several times over. This is Europe: a continent whose identity emerged not so much by virtue of geographic or ethnic continuity, but by a long and storied struggle for power. Studded with infamous figures--from Caesar to Charlemagne and Machiavelli to Marx--Simon Jenkins's history of Europe travels briskly from the Roman Empire, the Dark Ages, and the Reformation through the French Revolution, the World Wars, and the fall of the USSR. What emerges in this thrilling and expansive telling is a continent as defined by its continually clashing cultural identities and violent crises as it is by its tireless drive for a society based on the consent of the governed -- which holds true right up to the present day. There has been a recent shift in global Christianity from North to South. Christianity, particularly Pentecostalism, is growing day by day in the continents of Africa, Latin America and Asia whereas it is declining in the Western world. Africans are now bringing the Gospel back to Europe and other parts of the world. This reverse in missions has been a recent phenomenon and is the subject of this book. This book documents the history and contributions of European missions in Africa. It then chronicles the history and development of African Churches in Europe, focussing on the UK. It is passionately articulated that these Churches are certainly contributing positively to global and local Christianity. The historical development of Kingsway International Christian Centre (KICC) is documented to illustrate the impact African Churches are making in Europe. It is a book that is valuable to people interested in African Churches in the UK. "The presence of so many vigorous and committed black churches is one of the bright spots on the horizon of churches in the UK. This work is a pioneering contribution to understanding where these churches are coming from, how they understand their mission in and to the UK and how they are likely to shape the future of Christianity in these islands. It is very

welcome.” Dr Nigel Wright, Principal of Spurgeon’s College, London “Rev Israel has produced a winning combination of research, history and practical theology with this wonderful piece. I believe it is essential reading for every leader who is serious about contemporary cross cultural ministry and mission in 21st century Britain.” Dr Jonathan Oloyede, Convener Global Day of Prayer, London

The British Army's campaigns in Egypt and the Sudan from 1882 to 1899 were among the most dramatic and hard-fought in British military history. In 1882, the British sent an expeditionary force to Egypt to quell the Arabic Revolt and secure British control of the Suez Canal, its lifeline to India. The enigmatic British Major General Charles G. Gordon was sent to the Sudan in 1884 to study the possibility of evacuating Egyptian garrisons threatened by Muslim fanatics, the dervishes, in the Sudan. While the dervishes defeated the British forces on a number of occasions, the British eventually learned to combat the insurrection and ultimately, largely through superior technology and firepower, vanquished the insurgents in 1898.

British Operations in Egypt and the Sudan: A Selected Bibliography enumerates and generally describes and annotates hundreds of contemporary, current, and hard-to-find books, journal articles, government documents, and personal papers on all aspects of British military operations in Egypt and the Sudan from 1882 to 1899. Arranged chronologically and topically, chapters cover the various campaigns, focusing on specific battles, leading military personalities, and the contributions of imperial nations as well as supporting services of the British Army. This definitive volume is an indispensable reference for researching imperialism, colonial history, and British military operations, leadership, and tactics.

Relations with Continental Europe have been a central issue in British history. Several crucial questions can be identified: first, how similar or dissimilar was Britain, to other European countries in respect of its economy and political culture?; secondly, how far can similarity and difference be

understood in terms of convergence and divergence, or of roughly parallel tracks reflecting and sustaining longstanding differences?; thirdly, did British people feel themselves to be Europeans?; fourthly did the British people take an informed and sympathetic interest in what was happening on the Continent, or did their ignorance of Europe lead to insularity and xenophobia?; and fifthly, to what extent was the British stage, and Britain as a whole involved in the affairs of Europe, diplomatically, militarily, economically, culturally? This wide-ranging, thoughtful and provocative study tackles these questions from the late Iron Age to the current debate about European integration. It is at once an important contribution to British history and a crucial work for those seeking to understand Britain's past and present position in Europe. Chesterton: " Publisher: Kindle E-Book Edition: ISBN-13: 978-1-78379-139-2 When telling such lies as may seem necessary to your international standing, do not tell the lies to the people who know the truth. Do not tell the Eskimos that snow is bright green; nor tell the negroes in Africa that the sun never shines in that Dark Continent. Rather tell the Eskimos that the sun never shines in Africa; and then, turning to the tropical Africans, see if they will believe that snow is green. Similarly, the course indicated for you is to slander the Russians to the English and the English to the Russians; and there are hundreds of good old reliable slanders which can still be used against both of them.

There are probably still Russians who believe that every English gentleman puts a rope round his wife's neck and sells her in Smithfield. There are certainly still Englishmen who believe that every Russian gentleman takes a rope to his wife's back and whips her every day. But these stories, picturesque and useful as they are, have a limit to their use like everything else; and the limit consists in the fact that they are not true, and that there necessarily exists a group of persons who know they are not true. It is so with matters of fact about which you asseverate so positively to us, as if they were matters of opinion. "Publisher: " Catholic Way Publishing. This Paperback is the ideal small size of 5" x 8." Many outstanding men James Bruce, Richard Francis Burton, David Livingstone, Henry Morton Stanley, and others won lasting fame from their African journeys. Africa Explored collects their amazing tales of treks into the unknown. These tales of Europeans in Africa before the wave of colonialism mix exotic sights and startling customs with sympathetic meetings of Africa's people and scenes of sublime beauty. Africa Explored relates Mungo Park's being robbed and left for dead in the West African desert, then saved by repeated acts of kindness; Burton and Speke's search for the legendary Mountains of the Moon that fed the Nile; Alexander Laing's fatal voyage to Timbuktu; Livingston's journeys up the Zambezi River; German missionary Johannes Rebmann's astonishment at beholding the snow-capped peak of Kilimanjaro; and other incredible encounters with strange animals, the slave trade, crippling diseases, and desert nomads." This is the first full-length study of the connections between the English and Continental churches during the tenth and eleventh centuries. Ortenberg draws on a wide range of liturgical, art-historical, and documentary sources to establish the strong and continuing links between England and the countries of Christian Europe. Her analysis of successive areas of contact--including not only France and Flanders, but the German lands, Italy, and even Byzantium and beyond--reveals much about the

place of the English church in high medieval Christendom. Ortenberg's work places the later Anglo-Saxon church exactly where it saw itself belonging: in the mainstream of Continental culture. Handsomely illustrated with numerous plates, this is a work of wide-ranging scholarship, which makes an important contribution to our understanding of medieval religious and cultural relations. 'Fascinating. A compelling and intriguing volume.' Associated Press Scarcely over a hundred years ago, Africa was still the Dark Continent to Europeans—its geography and peoples largely unknown. The continent was Nature's last great fortress, made seemingly impregnable by disease, hostile tribes, dangerous animals, extremes of climate and an inhospitable terrain. However, the era of discovery eventually dawned: Africa was being opened up. Through the combination of individual endeavour and technological breakthrough, a handful of explorers began exploring and mapping Africa. Livingstone, Stanley, Burton, Speke, Baker, and others—these extraordinary characters risked their lives to uncover the mysteries of the Dark Continent. Frank McLynn proposes a thematic treatment of the subject; opening with an historical survey of the achievements and scope of the explorers, detailing the legendary search for the source of the Nile, the traversing of the Congo and Niger, and the recovery of Livingstone. The ensuing chapters deal then with different aspects of exploration over the period. The highly-praised *Hearts of Darkness* brings us the reality behind the myths and legends of England's first steps into the Dark Continent. Frank McLynn is a British author, biographer, historian and journalist. He is noted for critically acclaimed biographies of Napoleon Bonaparte, Robert Louis Stevenson, Carl Jung, Richard Francis Burton and Henry Morton Stanley. He is also the author of *Fitzroy Maclean, Villa and Zapata* and *Bipolar*, a novel about Roald Amundsen, published by Sharpe Books. Praise for Frank McLynn: 'A remarkable opus.' ALA Booklist 'An eye-opening safari into the history and psychobiography of Africa exploration.' Kirkus Reviews

'In sturdy, confident prose McLynn takes an intriguing tack by offering a thematic, comparative account of African exploration during the Victorian era.' Publishers Weekly 'A readable, well-written and worthwhile work.' Seattle Times 'A smoothly written account of African exploration during the Victorian era. [McLynn] presents fascinating details on everything from the eating habits of the black mamba to the ravages of the tsetse fly on the European travellers.' Tampa Tribune and Times
