In *Mysterious America*, a fun and compulsively readable guidebook to America's most popular local legends, he prepares readers for their own adventure -- where to find the unbelievable spectacles on their journey, including: Phantom panthers haunting eastern North America Bay State ghosts and spirits Mad gassers in Illinois Champ, the famous Lake Champlain monster The Minnesota Iceman The Missouri Momo and the infamous Eastern Bigfoot And many more! Coleman's witty insight and astonishing experiences will captivate followers of Charles Fort and just-plain-curious readers alike. For, as Coleman frankly reveals, these strange creatures and unimaginable wonders may lie just beyond your own backyard.... The first book to fully explore and explain the concept of yin yang, breaking it down in easy-to-follow terms for all those interested in Daoism, alternative medicine, martial arts and other Eastern fields of study. Illustrated with striking red/black graphics that make the concepts more accessible. The

concept of yin yang can be found in some of the oldest writing in the world. It is fundamental to Chinese thought and the route to understanding most Chinese practices, from Traditional Chinese Medicine to Daoism and feng shui. It also offers us ways of enhancing our own lives, establishing greater balance not only in our own environment but also in the wider world if we can work with other people to follow nature's flow. The central question of the book is "What is yin yang?" Step by step, with plenty of helpful illustrations and graphics, it explores the history and changing uses of yin yang - not forgetting the pronunciation and spelling (why yinyang is actually better than yin yang). The book also makes suggestions for working with yin yang, from observing the landscape to get a sense of the ebb and flow of energy through the world, to studying the patterns of nature in order to take what you need but not too much, to approaching sex as a cosmic ritual. After reading this book, readers will understand how to position themselves so that yin yang fills their lives with abundance - how to be in the right place at the right time. This unique and timely book won't tell you what to think—that's up to you!—but it will show you how to think more deeply about your own life and current events. Covering a wide range of subjects affecting the world today, including human and animal rights, social media, cyber bullying, the refugee crisis, and more, THINK FOR YOURSELF will help you to learn how to ask questions, analyze evidence, and use logic to draw conclusions, so you can solve problems and make smart decisions. Each chapter of the book covers one key step in the critical thinking process, and includes a real-world example to help convey the importance and relevance of every step: Ask Questions: If you want to

be a critical thinker, it helps to be curious. It's normal to wonder about the world around us. Some questions are big, and some are small. Sometimes questions can spark debate and argument. All critical thinking starts with at least one question. Gather Evidence: First, find information—from making observations to interviewing experts to researching a topic online or in books. Then make connections and draw conclusions. Evaluating Evidence: Smart thinkers evaluate the importance, accuracy and relevancy of the information they gather. Getting Curious: Consider other points of view, examine your own point of view, understand the power of emotion, and practice empathy. Draw Conclusions: The final step in the critical thinking process, this is based on reason and evidence. Revisit your original question, review the evidence and what you've learned, and consider your values. And remember: critical thinking doesn't stop when you've reached a decision. Learn how to discuss and debate other points of view. Then keep growing. Sometimes you might change your mind—that's OK, too! Featuring profiles of real-life inspiring young critical thinkers from around the world, checklists, quizzes, and activities, THINK FOR YOURSELF is a clever and fun illustrated guide that teaches middle schoolers that even young people can make a difference in the world just by thinking smart and understanding. INCLUDES: Your Turn: activities to help connect ideas to readers' lives Quizzes Profiles of inspiring young critical thinkers A Reading List for Young Thinkers Teacher's guides Plus a table of contents, index, and glossary for easy searching Backcountry Adventures: Utah provides detailed directions for 175 backcountry roads throughout Utah, all suitable for stock sport utility
