A New York Times Book Review Editors' Choice The first comprehensive biography of the most influential, controversial, and celebrated Palestinian intellectual of the twentieth century As someone who studied under Edward Said and remained a friend until his death in 2003, Timothy Brennan had unprecedented access to his thesis adviser's ideas and legacy. In this authoritative work, Said, the pioneer of postcolonial studies, a tireless champion for his native Palestine, and an erudite literary critic, emerges as a self-doubting, tender, eloquent advocate of literature's dramatic effects on politics and civic life. Charting the intertwined routes of Said's intellectual development, Places of Mind reveals him as a study in opposites: a cajoler and strategist, a New York intellectual with a foot in Beirut, an orchestra impresario in Weimar and Ramallah, a raconteur on national television, a Palestinian negotiator at the State Department, and an actor in films in which he played himself. Brennan traces the Arab influences on Said's thinking along with his tutelage under Lebanese statesmen, off-beat modernist

auteurs, and New York literati, as Said grew into a scholar whose influential writings changed the face of university life forever. With both intimidating brilliance and charm, Said melded these resources into a groundbreaking and influential countertradition of radical humanism, set against the backdrop of techno-scientific dominance and religious war. With unparalleled clarity, Said gave the humanities a new authority in the age of Reaganism, one that continues today. Drawing on the testimonies of family, friends, students, and antagonists alike, and aided by FBI files, unpublished writings, and Said's drafts of novels and personal letters, *Places of Mind* synthesizes Said's intellectual breadth and influence into an unprecedented, intimate, and compelling portrait of one of the great minds of the twentieth century. Tracing the precise contours of black migration to the suburbs over the course of the whole last century and across the entire United States, "Places of Their Own" is a foundational book for anyone interested in the African-American experience or the role of race and class in the making of America's suburbs. Publishes in-depth articles on labor subjects, current labor statistics, information about current labor contracts, and book reviews. Apparent and intermediate places of fundamental stars. What happened to the urban spaces of everyday life when the Soviet Union collapsed? And how may this change be understood? Based on long-term qualitative fieldwork in post-Soviet Russia, this study draws upon time-geographic, social and semiotic theory to formulate a model of how urban space is formed. Mirrored through the case of Ligovo/Uritsk, a high-rise residential district situated on the outskirts of Sankt-Peterburg (St Petersburg), the changing relation between the lifeworlds of people and the system of governance is highlighted with regard to the transformation of Soviet and Russian society over the last decades. The empirical material presented here documents a number of processes within urban identity formation, spatial representations and local politics. The resulting findings add both empirically and theoretically to the knowledge of urban cultural geography in Russia--a field of research that until recently was closed to Western researchers, and seems currently to be closing again. The book will be of interest to researchers with an interest in social, semiotic and geographic theory as well as to students and researchers of cultural and urban studies, urban life and Russian affairs. The study could be also helpful to professionals working in fields related to post-Soviet urban identity, spatial representations and local politics. The author tells the story of the men and women who shaped Iowa's park and preserve system since its inception. San Francisco: the home of hills and valleys, of dreamers and trailblazers, of hippies and hipsters. From the gold rush to the Golden Gate, the City by the Bay has always basked in the glow of its colorful and celebrated history and world-renowned landmarks. But for those who live and love on this compact seven-mile by seven-mile

metropolis, San Francisco is a treasure trove of unusual neighborhood sights and places that sparkle with the allure of hidden pleasures and local lore. Discover a stairway that transports you from the depths of the ocean to the heights of outer space; take a spin class amidst the grand elegance of a repurposed 1920s movie palace; or slide down a century-old sundial that sits at the center of what was once California's first racetrack for cars. This is the real San Francisco. Strung together, the 111 experiences gathered here tell the B-side story of the city once romantically known as the Paris of the West. Finalist for the National Book Award! In this beautifully wrought memoir, award-winning writer John Philip Santos weaves together dream fragments, family remembrances, and Chicano mythology, reaching back into time and place to blend the story of one Mexican family with the soul of an entire people. The story unfolds through a pageant of unforgettable family figures: from Madrina--touched with epilepsy and prophecy ever since, as a girl, she saw a dying soul leave its body--to Teofilo, who was kidnapped as an infant and raised by the Kikapu Indians of Northern Mexico. At the heart of the book is Santos' search for the meaning of his grandfather's suicide in San Antonio, Texas, in 1939. Part treasury of the elders, part elegy, part personal odyssey, this is an immigration tale and a haunting family story that offers a rich, magical view of Mexican-American culture. This annual bestseller ranks the hottest countries, regions and cities for 2020, and reveals how well-planned, sustainable travel can be a force for good.
