*Advanced Calculus* Aug 09 2021 An authorised reissue of the long out of print classic textbook, *Advanced Calculus* by the late Dr Lynn Loomis and Dr Shlomo Sternberg both of Harvard University has been a revered but hard to find textbook for the advanced calculus course for decades. This book is based on an honors course in advanced calculus that the authors gave in the 1960's. The foundational material, presented in the unstarred sections of Chapters 1 through 11, was normally covered, but different applications of this basic material were stressed from year to year, and the book therefore contains more material than was covered in any one year. It can accordingly be used (with omissions) as a text for a year's course in advanced calculus, or as a text for a three-semester introduction to analysis. The prerequisites are a good grounding in the calculus of one variable from a mathematically rigorous point of view, together with some acquaintance with linear algebra. The reader should be familiar with limit and continuity type arguments and have a certain amount of mathematical sophistication. As possible introductory texts, we mention *Differential and Integral Calculus* by R Courant, *Calculus* by T Apostol, *Calculus* by M Spivak, and *Pure Mathematics* by G Hardy. The reader should also have some experience with partial derivatives. In overall plan the book divides roughly into a first half which develops the calculus (principally the differential calculus) in the setting of normed vector spaces, and a second half which deals with the calculus of differentiable manifolds.

Beyond Global Warming Aug 29 2020 Syukuro Manabe is perhaps the leading pioneer of modern climate modeling. Beyond Global Warming is his compelling firsthand account of how the scientific community came to understand the human causes of climate change, and how numerical models using the world's most powerful computers have been instrumental to these vital discoveries. Joined here by atmospheric scientist Anthony Broccoli, Manabe shows how climate models have been used as virtual laboratories for examining the complex planetary interactions of atmosphere, ocean, and land. Manabe and Broccoli use these studies as the basis for a broader discussion of human-induced global warming--and what the future may hold for a warming planet. They tell the stories of early trailblazers such as Svante Arrhenius, the legendary Swedish scientist who created the first climate model of Earth more than a century ago, and provide rare insights into Manabe's own groundbreaking work over the past five decades. Expertly walking readers through key breakthroughs, they explain why increasing atmospheric carbon dioxide has caused temperatures to rise in the troposphere yet fall in the stratosphere, why the warming of the planet's surface differs by hemisphere, why drought is becoming more frequent in arid regions despite the global increase in precipitation, and much more.

*The Secrets of the Federal Reserve -- The London Connection* Jun 07 2021 From the Foreword. In 1949, while I was visiting Ezra Pound who was a political prisoner at St. Elizabeth's Hospital, Washington, D.C. (a Federal institution for the insane), Dr. Pound asked me if I had ever heard of the Federal Reserve System. I replied that I had not, as of the age of 25. He then showed me a ten dollar bill marked ""Federal Reserve Note"" and asked me if I would do some research at the Library of Congress on the Federal Reserve System which had issued this bill. Pound was unable to go to the Library himself, as he was being held without trial as a political prisoner by the United States government. After he was denied broadcasting time in the U.S., Dr. Pound broadcast from Italy in an effort to persuade people of the United States not to enter World War II. Franklin D. Roosevelt had personally ordered Pound's indictment, spurred by the demands of his three personal assistants, Harry Dexter White, Lauchlin Currie, and Alger Hiss, all connected with Communist espionage.

**The H. L. Hunley** Jun 19 2022 On the evening of February 17, 1864, the Confederacy's H. L. Hunley sank the USS Housatonic and became the first submarine in world history to sink an enemy ship. Not until World War I—half a century later—would a submarine again accomplish such a feat. But also perishing that moonlit night, vanishing beneath the cold Atlantic waters off Charleston, South Carolina, was the Hunley and her entire crew of eight. For generations, searchers prowled Charleston's harbor, looking for the Hunley. And as they hunted, the legends surrounding the boat and its demise continued to grow. Even after the submarine was definitively located in 1995 and recovered five years later, those legends—those barnacles of misinformation—have only multiplied. Now, in a tour de force of document-sleuthing and insights gleaned from the excavation of this remarkable vessel, distinguished Civil War—era historian Tom Chaffin presents the most thorough telling of the Hunley's story possible. Of panoramic breadth, this Civil War saga begins long before the submarine was even assembled and follows the tale into the boat's final hours and through its recovery in 2000. Beyond his thorough survey of period documents relating to the submarine, Chaffin also conducted extensive interviews with Maria Jacobsen, senior archaeologist at Clemson University's Warren Lasch Conservation Center, where the Hunley is now being excavated, to complete his portrait of this technological wonder. What emerges is a narrative that casts compelling doubts on many long-held assumptions, particularly those concerning the boat's final hours. Thoroughly engaging and utterly new, *The H. L. Hunley* provides the definitive account of a storied craft.

**Guénonian Esoterism and Christian Mystery** Jan 02 2021 Rene Guenon's explication of the principles of an interior understanding of sacred forms has established his reputation in the West as the master theorist of esoterism. But till now his doctrine has not been the focus of thorough study in Christian circles, and this has had serious consequences. Guenonian Esoterism and Christian Mystery is the first major work to combine an analysis of Guenon's ideas about esoterism with a critical examination of their application to Christianity in terms of data provided by Christianity itself. But to accomplish this, such data cannot simply be surveyed superficially—it must be known firsthand; hence the abundance of citations and references in this text. Such an approach not only lets us decide about certain issues, but may also help us rediscover an all too misunderstood facet of the revelation of Christ. Jean Borella taught philosophy at the University of Nancy until 1995. A Platonist by formation, he has been strongly influenced by Guenon and Eastern metaphysics. But his deepest inspiration derives from unceasing meditation on the Christian faith, which led him to undertake the present searching critique of 'Guenonian Christianity'. A religious philosopher, he strives to hear the reverberations awakened in human thought by revelation. "Rene Guenon was one of the great metaphysical minds of the last few centuries, and it was a great loss to the Catholic Church when he converted to Islam. Prof. Borella shows in this landmark study exactly where Guenon's work remains of perennial value for Christians, but also demonstrates the limitations and personal idiosyncrasies which led Guenon to distort some of the most important elements of Catholic and Orthodox doctrine. Prof. Borella's book may well stimulate the recovery of authentic metaphysics within the Church for which Guenon longed, but which he despaired of seeing in his lifetime." -Stratford Caldecott Editor, Second Spring, Director (UK) of the G.K. Chesterton Institute for Faith & Culture"

**The Shark and the Sardines** Jun 26 2020 *The Shark and the Sardines* is a scathing allegorical short story by Juan José Arévalo Bermejo (1904-1990), who was the first of the reformist presidents of Guatemala (1944-1951). As a country that had seen a series of dictatorships following its independence from Spain, Arévalo's 1944 election is considered by historians to be the first fair and democratic election in Guatemala's republican history. Arévalo's administration was marked by unprecedented relatively free political life during his six-year term. An educator and philosopher, he understood the need for advancement in individuals, communities, and nations by practical means. "It appears to be a truism today that anything touching upon US-Latin American policy is bound to end either in histrionics or hysteria, whether of the Left or Right. And former president of Guatemala, Juan Jose Arevalo's *The Shark and the Sardines* is no exception. Free flowing, full of rhetoric at once both surly and suave, astream with shockers, statistics and stiletos, it promulgates what the blurbs dubb a "poetically tragic fable", depicting in iridescent black and white the tortured heart beating south of our border, wherein Uncle Sam emerges as the Shark and the mestiza have-nots, the poor Sardines."—KIRKUS Review

**The Immortal Life of Henrietta Lacks** Mar 16 2022 #1 NEW YORK TIMES BESTSELLER • “The story of modern medicine and bioethics—and, indeed, race relations—is refracted beautifully, and movingly.”—Entertainment Weekly NOW A MAJOR MOTION PICTURE FROM HBO® STARRING OPRAH WINFREY AND ROSE BYRNE • ONE OF THE “MOST INFLUENTIAL” (CNN), “DEFINING” (LITHUB), AND “BEST” (THE PHILADELPHIA INQUIRER) BOOKS OF THE DECADE • ONE OF ESSENCE’S 50 MOST IMPACTFUL BLACK BOOKS OF THE PAST 50 YEARS • WINNER OF THE CHICAGO TRIBUNE HEARTLAND PRIZE FOR NONFICTION NAMED ONE OF THE BEST BOOKS OF THE YEAR BY The New York Times Book Review • Entertainment Weekly • O: The Oprah Magazine • NPR • Financial Times • New York • Independent (U.K.) • Times (U.K.) • Publishers Weekly • Library Journal • Kirkus Reviews • Booklist • Globe and Mail Her name was Henrietta Lacks, but scientists know her as HeLa. She was a poor Southern tobacco farmer who worked the same land as her slave ancestors, yet her cells—taken without her knowledge—became one of the most important tools in medicine: The first “immortal” human cells grown in culture, which are still alive today, though she has been dead for more than sixty years. HeLa cells were vital for developing the polio vaccine; uncovered secrets of cancer, viruses, and the atom bomb’s effects; helped lead to important advances like in vitro fertilization, cloning, and gene mapping; and have been bought and sold by the billions. Yet Henrietta Lacks remains virtually unknown, buried in an unmarked grave. Henrietta’s family did not learn of her “immortality” until more than twenty years after her death, when scientists investigating HeLa began using her husband and children in research without informed consent. And though the cells had launched a multimillion-dollar industry that sells human biological materials, her family never saw any of the profits. As Rebecca Skloot so brilliantly shows, the story of the Lacks family—past and present—is inextricably connected to the dark history of experimentation on African Americans, the birth of bioethics, and the legal battles over whether we control the stuff we are made of. Over the decade it took to uncover this story, Rebecca became enmeshed in the lives of the Lacks family—especially Henrietta’s daughter Deborah. Deborah was consumed with questions: Had scientists cloned her mother? Had they killed her to harvest her cells? And if her mother was so important to medicine, why couldn’t her children afford health insurance? Intimate in feeling, astonishing in scope, and impossible to put down, *The Immortal Life of Henrietta Lacks* captures the beauty and drama of scientific discovery, as well as its human consequences.
