Back in 1982, the Society for American Baseball Research was still young, barely a decade past its founding, and had grown to some 1600

members. One of their number, a "defrocked English Lit guy poking around in journalism," suggested to the board of directors that SABR, and the world, might benefit from a publication along the lines of *American Heritage*, only about baseball. Before long that member, John Thorn, found himself at the helm of the newly christened periodical, *The National Pastime: A Review of Baseball History*. The very first issue included names we think of today as luminaries in the field of baseball history and analysis: Harold Seymour, Lawrence S. Ritter, Pete Palmer, David Voigt, Bob Broeg, and more. Over the years the significance of that flagship issue has only grown, while the inventory has dwindled. SABR is pleased to present a replica edition here, with the addition of a new preface by John Thorn, now the official historian of Major League Baseball. This issue includes: Nate Colbert's Unknown RBI Record by Bob Carroll Nineteenth-Century Baseball Deserves Equal Time by Art Ahrens Dandy at Third: Ray Dandridge by John B. Holway How Fast Was Cool Papa Bell? by Jim Bankes The Field of Play by David Sanders Ladies and Gentlemen, Presenting Marty McHale by Lawrence S. Ritter Remembrance of Summers Past by Bob Broeg The Merkle Blunder: A Kaleidoscopic View by G. H. Fleming A Tale of Two Sluggers: Roger Maris and Hack Wilson, by Don Nelson Baseball's Misbegottens: Expansion Era Managers by David Voigt The Early Years: A Gallery by Mark Rucker and Lew Lipset The Egyptian and the Greyhounds by Lew Lipset All the Record Books Are Wrong by Frank J. Williams Goose Goslin's Induction Day by Lawrence S. Ritter The Great New York Team of 1927—and It Wasn't the Yankees by Fred Stein Modern Times: A Portfolio by Stuart Leeds Books Before Baseball: A Personal History by Harold Seymour, Ph.D. Ballparks: A Quiz by Bob Bluthardt Runs and Wins by Pete Palmer Baltimore, the Eastern Shore, and More by Al Kermisch David and Goliath: Figures by Ted DiTullio Double Joe Dwyer: A Life in the Bushes by Gerald Tomlinson Seafood lovers--and foodies concerned with sustainability--will welcome this third cookbook from the author of *For Cod and Country*. Taking an eco-friendly approach, Barton Seaver creates fresh-tasting and casual dishes featuring seafood that hasn't been overfished or caught in a destructive way. More than 150 new, utterly delicious recipes range from Chilled Oysters with Grilled Merguez Sausage to Zuppa di Pesce, Whole Skillet-Roasted

Fish, and Seafood Risotto. As clinicians begin to realize the important role of dose-finding in the drug development process, there is an increasing openness to "novel" methods proposed in the past two decades. In particular, the Continual Reassessment Method (CRM) and its variations have drawn much attention in the medical community, though it has yet to become a commonplace tool. To overcome the status quo in phase I clinical trials, statisticians must be able to design trials using the CRM in a timely and reproducible manner. A self-contained theoretical framework of the CRM for researchers and graduate students who set out to learn and do research in the CRM and dose-finding methods in general, *Dose Finding by the Continual Reassessment Method* features: Real clinical trial examples that illustrate the methods and techniques throughout the book Detailed calibration techniques that enable biostatisticians to design a CRM in timely manner Limitations of the CRM are outlined to aid in correct use of method This book supplies practical, efficient dose-finding methods based on cutting edge statistical research. More than just a cookbook, it provides full, unified coverage of the CRM in addition to step-by-step guidelines to automation and parameterization of the methods used on a regular basis. A detailed exposition of the calibration of the CRM for applied statisticians working with dose-finding in phase I trials, the book focuses on the R package 'dfcrm' for the CRM and its major variants. The author recognizes clinicians' skepticism of model-based designs, and addresses their concerns that the time, professional, and computational resources necessary for accurate model-based designs can be major bottlenecks to the widespread use of appropriate dose-finding methods in phase I practice. The theoretically- and empirically-based methods in *Dose Finding by the Continual Reassessment Method* will lessen the statistician's burden and encourage the continuing development and implementation of model-based dose-finding methods.
