**It was 6 AM and the New Orleans Hilton lobby was dotted with young neurologists in suits wandering aimlessly, many mumbling to themselves, all with the eyes of a rough night on call. This was the morning of my Oral Board examination. Despite three years as a neurology resident, additional time as a fellow, and the experience of having performed probably more than 1000 neurological examinations by this time, I was deathly afraid of what this day would bring. The exam organizers had met with us the day before and given the overwhelming message to "RELAX." Certainly, this is sound advice prior to any examination, but the requisite for passing is knowing the material. This requires preparation, as well as practice. An excellent first step is to use Eroboghene Ubogu's Neurology Oral Boards Review in the months before you begin studying for the Boards in earnest. A quick read will provide an internal assessment of your strengths and weaknesses, which should guide the study plan. The major neurology textbooks, which anyone sitting for the Boards should already have in their possession, should be studied. Finding a senior faculty member to quiz you is very helpful. There is no substitute for finding one of your former residency supervisors or a senior colleague in your group practice to perform a simulated Oral Board session.**
