The Hack Mechanic Guide to European Automotive Electrical Systems Aug 08 2021 Electrical issues in European cars can be intimidating. The Hack Mechanic Guide to European Automotive Electrical Systems shows you how to think about electricity in your car and then take on real-world electrical problems. The principles discussed can be applied to most conventional internal-combustion-engined vehicles, with a focus on European cars spanning the past six decades. Drawing on The Hack Mechanic's wisdom and experience, the 38 chapters cover key electrical topics such as battery, starter, alternator, ignition, circuits, and relays. Through a practical and informal approach featuring hundreds of full-color illustrations, author Rob Siegel takes the fear-factor out of projects like making wire repairs, measuring voltage drops, or figuring out if you have a bad fuel pump relay. Essential tools such as multimeters (DVOM), oscillosopes, and scan tools are discussed, with special attention given to the automotive multimeter needed to troubleshoot many modern sensors. You'll get step-by-step troubleshooting procedures ranging from safely jump starting a battery to diagnosing parasitic current drain and vehicle energy diagnosis. And you'll find detailed testing procedures for most problematic electrical components on your European car such as oxygen sensors, crankshaft and camshaft sensors, wheel speed sensors, fuel pumps, solenoids, and actuators. Reading wiring diagrams and decoding the German DIN standard are also covered. Whether you are a DIY mechanic or a professional technician, The Hack Mechanic Guide to European Automotive Electrical Systems will increase your confidence in tackling automotive electrical problem-solving. My Mercedes Is Not for Sale Oct 30 2020 "My Mercedes Is Not for Sale" is a rollicking, witty and insightful tale of an innocent abroad which captures the high-spirited adventure of a young journalist and paints a vivid portrait of West Africa through a surprise-filled journey into its thriving car cult. "My Mercedes is Not for Sale" has all the wit and charm of John Mole's bestselling "Its All Greek to Me!" and Peter Allison's "Don't Run, Whatever You Do" and the philosophical underpinnings of Robert Pirsig's "Zen and the Art of Motorcycle Maintenance". Dutch journalist Jeroen van Bergeijk came up with what seemed like a great scheme for making a quick profit: buy an old banger in Amsterdam and resell it in the Third World, where a market for clapped-out cars still thrives. His chariot of choice is a rusty 1988 Mercedes 190D with 140,000 miles on the clock; his route takes him from Holland through Morocco, across the Sahara, and into some of the least trodden parts of Africa. Van Bergeijk finds himself facing a driving challenge akin to a Dakar Road Rally but encounters obstacles never dreamed of by race-car drivers: active minefields, occasional banditry-mostly by the border guards - and a teenaged, chain-smoking desert guide with a fondness for Tupac lyrics. Food and water are scarce, sandstorms are frequent, and all he has to patch up his many car breakdowns thousands of miles from civilization is a bar of soap, some duct tape, and a pair of women's tights. Then there's the coup he lived through. "My Mercedes Is Not for Sale" captures more than the adventure - it vividly portrays the impact of globalization on Africa through an adventurous and sometimes dangerous journey into its thriving car culture.
