The Hollow Years May 18 2022 Competitive intellectual preening grew more vapid, competitive political aspersions more scurrilous. The general public grumbled, tightened belts, struck, rioted, and, when all else failed, rounded on immigrants: "unwanted strangers, intruders, parasites, speaking in strange accents and cooking with strange smells."

The Nickel and Dime Decade Dec 21 2019 This study shows that, despite numerous surface similarities, the popular culture of the 1930s was different from that of the 1920s in a variety of ways, and not only because of the Great Depression. It was a period of quiet desperation and shifting values, one in which nickels and dimes replaced dollars as the currency of

popular culture, and in which the emphasis was on finding methods to occupy idle time and idle minds. Popular culture during the 1930s is important for understanding not only how Americans coped, but why they did so with such good humor and so little of the discontent visible elsewhere in the world. An appreciation of popular culture during the 1930s is essential to understanding other aspects of the decade.

*Chronology of Classic Horror Films: The 1930s Feb 15 2022 Chronology of Classic Horror Films: the 1930s is an affectionate, thoughtful, and sometimes provocative re-examination of virtually every American horror feature from 1929 to 1939. Donald Willis takes the films, image-by-image, in the introduction, film-by-film, in the text, and year-by-year, in the highlights pages, which precede the reviews of each year's pictures. The introductory Itinerary ("Oh, the places you'll go!") chronologically "maps" the sites of the movies covered in the text, from 1929 to 1949, from Woodford's Theatre, New York City (*The Last Warning*), to the Forsythe estate (*Master Minds*). Willis makes the movies you've always known and loved spring to life again. *The Mummy* "It's either Now (Helen) or Forever (Imhotep), though her 'dreadful modern Cairo' comment hints at some backward-looking wistfulness on her part." *Bride of Frankenstein* "The power now belongs to Pretorius, in effect a mocking mirror reflecting back to Henry his original enthusiasm, and underlining the strain of callousness in the latter."*

Holding Their Own Jul 20 2022 "Holding Their Own provides a lively

overview of the often unrecognized contributions and experiences of American women during the Depression. Harvard historian Susan Ware analyzes the survival of feminism, the impact of popular culture, and the changing role of women at home and at work, and considers the achievements of such extraordinary women as Amelia Earhart, Lillian Hellman, Clare Boothe and Emma Goldman in the context of their time."--Book cover.

The Twilight Years Jul 28 2020 Book Review Paris lost none of its magical allure for artists and expatriates in the 1930s. Jazz orchestrated Parisian nights, surrealism flourished, haute couture reinvented itself. James Joyce redefined modern literature with Finnegans Wake and at her cabaret Josephine Baker redefined the derriere. At salons and galleries, palaces and cafes, Henry Miller, Helena Rubinstein, Anais Nin, Coco Chanel, Salvador Dali, Elsa Schiaparelli, T.S. Eliot, and Katherine Anne Porter joined illustrious exiles of the twenties like Gertrude Stein, Sylvia Beach, Pablo Picasso, Janet Flanner, and Man Ray. The Twilight Years tells their story, and the city's. Jauntily narrated and lavishly illustrated with a superb selection of period photographs, it chronicles the decade that continued to foster the brilliant creative revolution of the expatriate era - an era that ended with perhaps the grimmest event in modern French history: the fall of Paris and the Nazi occupation in 1940.

Between Two Fires Sep 22 2022 Auden called it the "low dishonest decade"; it was a "no man's land ... between two fires," and in this book 1930s Europe comes to life in all its fear, corruption, violence, and trampled ideals. Vivid narrative portraits of events in France, Austria, Germany, Italy, Spain, Great Britain, and the Soviet Union combine to show Europe on the path to war. These fateful events range from the "Sasha" Stavisky scandal, which fragmented French society, to Austria's bloody civil war, which paved the way for the German Anschluss, as well as the "night of the long knives," the vicious purge of rebellious SA brownshirts by Hitler's SS. David Clay Large also depicts Mussolini's brutal invasion of Ethiopia, the destruction of Guernica during the Spanish Civil War, and Stalin's assault

on truth through the show trials of his Great Purge. Finally, in Munich, the book's characters and themes come together on the threshold of World War II. - Back cover.

The 1930s Nov 24 2022 Series discusses the political, economic and cultural life of the United States in the 20th century.

Cultural Encounters Mar 04 2021 The 1930s were one of the most important decades in defining the history of the twentieth century. It saw the rise of right-wing nationalism, the challenge to established democracies and the full force of imperialist aggression. Cultural Encounters makes an important contribution to our understanding of the ideological and cultural forces which were active in defining notions of national identity in the 1930s. By examining the work of writers and journalists from a range of European countries who used the medium of travel writing to articulate perceptions of their own and other cultures, the book gives a comprehensive account of the complex intellectual climate of the 1930s.

American Culture in the 1930s Oct 11 2021 A clear overview of the major cultural forms of 1930s America: literature and drama, music and radio, film and photography, art and design, and case studies of influential texts and practitioners of the decade.

A Researcher's Guide to Sources on Soviet Social History in the 1930s Dec 13 2021 The Stalin era has been less accessible to researchers than either the preceding decade or the postwar era. The basic problem is that during the Stalin years censorship restricted the collection and dissemination of information (and introduced bias and distortion into the statistics that were published), while in the post-Stalin years access to archives and libraries remained tightly controlled. Thus it is not surprising that one of the main manifestations of glasnost has been the effort to open up records of the 1930s. In this volume Western and Soviet specialists detail the untapped potential of sources on this period of Soviet social history and also the hidden traps that abound. The full range of sources is covered, from memoirs to official documents, from city directories to computerized data bases.

Weathering the Storm Oct 31 2020 The principal cause of the 1930s depression in Southeast Asia lay outside the region _ through a sharp contraction in demand for the region's major commodity exports. But it had important internal causes too: an oversupply of primary commodities and an increasing scarcity of new agricultural land leading to higher rents and lower wages, rising indebtedness and increasing landlessness. This work thoroughly analyses the pre-war depression. It also looks at the changes in the basic structures of...

*The Grapes of Wrath Jun 26 2020 'To the red country and part of the gray country of Oklahoma, the last rains came gently, and they did not cut the scarred earth.' Drought and economic depression are driving thousands from Oklahoma. As their land becomes just another strip in the dust bowl, the Joads, a family of sharecroppers, decide they have no choice but to follow. They head west, towards California, where they hope to find work and a future for their family. But while the journey to this promised land will take its inevitable toll, there remains uncertainty about what awaits their arrival . . . Winner of the Pulitzer Prize, *The Grapes of Wrath* is an epic human drama. Of this novel, Steinbeck himself said- 'I've done my damndest to rip a reader's nerves to rags, I don't want him satisfied.'*

Decoding the Movies Mar 24 2020 This book "decodes" 1930s Hollywood movies and explains why they looked and behaved in the way they did. Organized through a series of related case studies, the book exposes Classical Hollywood movies to a detailed analysis of their historical, industrial and cultural contexts. In the process it utilizes industry data, aesthetic analysis and the insights of New Cinema History to explain why

and how these movies assumed their familiar forms. The book represents the summation of Richard Maltby's four decades of scholarship in the field of Hollywood cinema. The essays presented here share an assumption that has increasingly informed the author's critical method over the years: that any historical understanding of the films of this period requires a deep contextualization in the social circumstances surrounding both their production and consumption. In this way, the book introduces an innovative, overarching research methodology that synthesizes branches of research that are typically employed in isolation, including production, distribution, reception, film aesthetics, and cultural and historical context. Of the book's nine chapters, three are presented here for the first time, and four have been substantially revised and extended from their original publication.

Everyday Stalinism Dec 25 2022 Focusing on urban areas in the 1930s, this college professor illuminates the ways that Soviet city-dwellers coped with this world, examining such diverse activities as shopping, landing a job, and other acts.

*Fighting Authoritarianism Sep 10 2021 During the Great Depression, young radicals centered in New York City developed a vision of and for America, molded by their understanding of recent historical events, in particular the Great War and the global economic collapse, as well as by the events unfolding both at home and abroad. They worked to make their vision of a free, equal, democratic society based on peaceful coexistence a reality. Their attempts were ultimately unsuccessful but their voices were heard on a number of important issues, including free speech, racial justice, and peace. A major contribution to the historiography of the era of the Great Depression, *Fighting Authoritarianism* provides a new and important examination of U.S. youth activism of the 1930s, including the limits of the New Deal and how youth activists continually pushed FDR, Eleanor Roosevelt, and other New Dealers to do more to address economic distress, more inclusionary politics, and social inequality. In this study, author Britt Haas questions the interventionist versus isolationist paradigm in that young people sought to focus on both domestic and international affairs. Haas also*

explores the era not as a precursor to WWII, but as a moment of hope when the prospect of institutionalizing progress in freedom, equality, and democracy seemed possible. Fighting Authoritarianism corrects misconceptions about these young activists' vision for their country, heavily influenced by the American Dream they had been brought up to revere: they wanted a truly free, truly democratic, and truly equal society. That meant embracing radical ideologies, especially socialism and communism, which were widely discussed, debated, and promoted on New York City college campuses. They believed that in embracing these ideologies, they were not turning their backs on American values. Instead, they believed that such ideologies were the only way to make America live up to its promises. This study also outlines the careers of Molly Yard, Joseph Lash, and James Wechsler, how they retracted (and for Yard and Lash, reclaimed) their radical past, and how New York continued to hold a prominent platform in their careers. Lash and Wechsler both worked for the New York Post, the latter as editor until 1980. Examining the Depression decade from the perspective of young activists highlights the promise of America as young people understood it: a historic moment when anything seemed possible.

Decade of Betrayal Feb 27 2023 Examines the social and economic effects on the migrant Mexican families subjected to forced relocation by the United States during the 1930s.

In the Shadow of War Apr 17 2022 Prize-winning historian Michael S. Sherry shows how war has defined modern America and argues that militarization has reshaped every facet of American life--its politics, economics, culture, social relations, and place in the world. 17 illustrations.

Clark Gable in the 1930s Apr 05 2021 The 1930s represented the strongest and most significant decade in Clark Gable's career. Later known as The King of Hollywood, Gable started out as a journeyman actor who quickly rose to the level of star, and then icon. With his ruggedly attractive looks and effortless charisma, Gable was the sort of manly romantic lead that bolstered features alongside the likes of Jean Harlow, Joan Crawford, and Spencer Tracy. The decade culminated with Gable's most noted movie, Gone

With the Wind. This book traces Gable's early career, film-by-film, offering background information and a critical assessment of each of his movies released during the 1930s,

Harnessing the Technicolor Rainbow Feb 21 2020 Like Dorothy waking up over the rainbow in the Land of Oz, Hollywood discovered a vivid new world of color in the 1930s. The introduction of three-color Technicolor technology in 1932 gave filmmakers a powerful tool with which to guide viewers' attention, punctuate turning points, and express emotional subtext. Although many producers and filmmakers initially resisted the use of color, Technicolor designers, led by the legendary Natalie Kalmus, developed an aesthetic that complemented the classical Hollywood filmmaking style while still offering innovative novelty. By the end of the 1930s, color in film was thoroughly harnessed to narrative, and it became elegantly expressive without threatening the coherence of the film's imaginary world. *Harnessing the Technicolor Rainbow* is the first scholarly history of Technicolor aesthetics and technology, as well as a thoroughgoing analysis of how color works in film. Scott Higgins draws on extensive primary research and close analysis of well-known movies, including *Becky Sharp*, *A Star Is Born*, *Adventures of Robin Hood*, and *Gone with the Wind*, to show how the Technicolor films of the 1930s forged enduring conventions for handling color in popular cinema. He argues that filmmakers and designers rapidly worked through a series of stylistic modes based on the demonstration, restraint, and integration of color—and shows how the color conventions developed in the 1930s have continued to influence filmmaking to the present day. Higgins also formulates a new vocabulary and a method of analysis for capturing the often-elusive functions and effects of color that, in turn, open new avenues for the study of film form and lay a foundation for new work on color in cinema.

Daughters of the Great Depression Jan 26 2023 *Daughters of the Great Depression* is a reinterpretation of more than fifty well-known and rediscovered works of Depression-era fiction that illuminate one of the decade's central conflicts: whether to include women in the hard-pressed

workforce or relegate them to a literal or figurative home sphere. Laura Hapke argues that working women, from industrial wage earners to business professionals, were the literary and cultural scapegoats of the 1930s. In locating these key texts in the "don't steal a job from a man" furor of the time, she draws on a wealth of material not usually considered by literary scholars, including articles on gender and the job controversy; Labor Department Women's Bureau statistics; "true romance" stories and "fallen woman" films; studies of African American women's wage earning; and Fortune magazine pronouncements on white-collar womanhood. A valuable revisionist study, Daughters of the Great Depression shows how fiction's working heroines--so often cast as earth mothers, flawed mothers, lesser comrades, harlots, martyrs, love slaves, and manly or apologetic professionals--joined their real-life counterparts to negotiate the misogynistic labor climate of the 1930s.

British Fiction in the 1930s Jul 08 2021 British Fiction in the 1930s studies the literary climate of the British 1930s through a critical treatment of some of its influential and socially representative fiction. The works depict, in various ways, a culture under the stress of seemingly insoluble economic and intensifying international dilemmas, a culture that seems betrayed by the promise of its past and the paralysis of its present. The fiction considers transforming solutions, individual and sexual rebellions as well as the fears and attractions of social and political change.

Trade Policy Disaster Oct 23 2022 The extreme protectionism that contributed to a collapse of world trade in the 1930s is examined in light of the recent economic crisis. The recent economic crisis—with the plunge in the stock market, numerous bank failures and widespread financial distress, declining output and rising unemployment—has been reminiscent of the Great Depression. The Depression of the 1930s was marked by the spread of protectionist trade policies, which contributed to a collapse in world trade. Although policymakers today claim that they will resist the protectionist temptation, recessions are breeding grounds for economic nationalism, and countries may yet consider imposing higher trade barriers. In Trade Policy

Disaster, Douglas Irwin examines what we know about trade policy during the traumatic decade of the 1930s and considers what we can learn from the policy missteps of the time. Irwin argues that the extreme protectionism of the 1930s emerged as a consequence of policymakers' reluctance to abandon the gold standard and allow their currencies to depreciate. By ruling out exchange rate changes as an adjustment mechanism, policymakers turned instead to higher tariffs and other means of restricting imports. He offers a clear and concise exposition of such topics as the effect of higher trade barriers on the implosion of world trade; the impact of the Smoot-Hawley tariff of 1930; the reasons some countries adopted draconian trade restrictions (including exchange controls and import quotas) but others did not; the effect of preferential trade arrangements and bilateral clearing agreements on the multilateral system of world trade; and lessons for avoiding future trade wars.

Balancing Acts Aug 09 2021 The desire to move in all directions at once, simultaneously to live with and to resolve contradictions, appeared in the most sweeping public spheres and in the intimacy of nuclear families. Cooney examines the attitudes and ideas of intellectuals, the values and perceptions of ordinary citizens, and the directions of popular culture.

St. Augustine in the 1930s and 1940s May 06 2021 The Great Depression came early to St. Augustine with the end of the Florida land boom in 1926, followed by the stock market collapse in 1929. Hotels closed, a major bank failed, subdivisions folded, and tourism was reduced to a trickle. The city's main employer, the Florida East Coast Railway, went into receivership in 1931, and public works projects sought to bring relief to the unemployed. The economy slowly improved toward the end of the 1930s, but it was World War II that brought economic recovery to the town. Local hotels were taken over for military training, and servicemen on leave from nearby military bases flooded the town, bringing prosperity once again to the Ancient City.

Britain in the 1930s Jan 14 2022 Were the 1930s in Britain a decade of growing prosperity, unprecedented levels of ownership and sane, competent

government? Or was it a time of grinding poverty, long-term unemployment and political timidity? In this new book Andrew Thorpe cuts through the welter of dispute and mythology to provide fresh analysis of politics, economics and society in this most controversial of decades.

*Did a liberal central state emerge in the USA in the 1930s? Aug 21 2022
Essay from the year 2018 in the subject Politics - International Politics - Region: USA, grade: 67, University College London, language: English, abstract: The essay deals with the question as to what extent a liberal central state emerged in the US in the 1930s. While many scholars analyse the overall impact of New Deal programmes and agencies to examine US liberalism in the 1930s, this paper analyses them with a focus on race, especially African Americans. It is argued that while the New Deal was indeed an important factor for improving the lives of many Americans during the Great Depression, racial problems of African Americans remained unresolved and many aspects of the New Deal were therefore highly illiberal regarding black Americans. The paper focuses on the National Recovery Administration (NRA) (in conjunction with the National Industrial Recovery Act (NIRA)) and Social Security as well as the Agricultural Adjustment Act (AAA) in its analysis. After analysing these major aspects of the New Deal, it is concluded that their set-up and implementation permitted the discrimination and disadvantage of African Americans in the early 1930s.*

*Strategic culture in the European Union.
Eugenic Design Apr 24 2020 In 1939, Vogue magazine invited commercial designer Raymond Loewy and eight of his contemporaries--including Walter Dorwin Teague, Egmont Arens, and Henry Dreyfuss--to design a dress for the Woman of the Future as part of its special issue promoting the New York World's Fair and its theme, The World of Tomorrow. While focusing primarily on her clothing and accessories, many commented as well on the future woman's physique, predicting that her body and mind would be perfected through the implementation of eugenics. Industrial designers' fascination with eugenics--especially that of Norman Bel Geddes--began during the previous decade, and its principles permeated their theories of the*

modern design style known as streamlining. In Eugenic Design, Christina Cogdell charts new territory in the history of industrial design, popular science, and American culture in the 1930s by uncovering the links between streamline design and eugenics, the pseudoscientific belief that the best human traits could--and should--be cultivated through selective breeding. Streamline designers approached products the same way eugenicists approached bodies. Both considered themselves to be reformers advancing evolutionary progress through increased efficiency, hygiene and the creation of a utopian ideal type. Cogdell reconsiders the popular streamline style in U.S. industrial design and proposes that in theory, rhetoric, and context the style served as a material embodiment of eugenic ideology. With careful analysis and abundant illustrations, Eugenic Design is an ambitious reinterpretation of one of America's most significant and popular design forms, ultimately grappling with the question of how ideology influences design.

San Diego in the 1930s Jan 22 2020 San Diego in the 1930s offers a lively account of the city's culture, roadside attractions, and history—from the days of the Spanish missions to the pre-Second World War boom. The guide is revealing both in the opinions it embodies and in the juicy details it records—tidbits such as the bloodiest and most incompetently fought battle of the Mexican-American War, Emma Goldman's abruptly terminated speech to local Wobblies in 1912, and even a delightfully anachronistic way to beat a San Diego speeding ticket. Brimming with tours that can prove challenging to retrace, this book reminds us of the changes wrought by seven decades of intervening war, peace, and biotechnology. Unlatching a remarkable trapdoor into the past, this compact and charming document of the Depression era invites repeated browsing and is generously illustrated with striking black-and-white photographs that bring the period to life.

Hollywood and the Great Depression Jun 19 2022 This volume examines how the political, economic and social changes of the Great Depression impacted on Hollywood and how it responded to them.

Latin America in the 1930s Mar 16 2022 This is the new edition of the highly acclaimed *Latin America in the 1930s*, a text which has proved invaluable for teachers, researchers and students alike. The second edition has been revised and updated, including a new preface and updated statistical material, to form the second volume in *An Economic History of Twentieth-Century Latin America*. This book confronts the puzzle of Latin America's rapid recovery from the collapse in world markets and capital flows in the late 1920s. It shows how far the safety valves which made recovery possible in the 1930s were not available fifty years later. It documents the impact of crisis on the changing role of the state and on institutional development. The Central American case studies have been updated with significantly improved data.

The Great Depression of the 1930s Aug 29 2020 Understanding the Great Depression has never been more relevant than in today's economic crisis. This edited collection provides an authoritative introduction to the Great Depression as it affected the advanced countries in the 1930s. The contributions are by acknowledged experts in the field and cover in detail the experiences of Britain, Germany, and, the United States, while also seeing the depression as an international disaster. The crisis entailed the collapse of the international monetary system, sovereign default, and banking crises in many countries in the context of the most severe downturn in western economic history. The responses included protectionism, regulation, fiscal and monetary stimulus, and the New Deal. The relevance to current problems facing Europe and the United States is apparent. The chapters are written at a level which will be comprehensible to advanced undergraduates in economics and history while also being a valuable source of reference for policy makers grappling with the current economic crisis. The book will be of interest to modern macroeconomists and students of interwar history alike and seeks to bring the results of modern research in economic history to a wide audience. The focus is not only on explaining how the Great Depression happened but also on understanding what eventually led to the recovery from the crisis. A key feature is that every chapter has a full list of

bibliographical references which can be a platform for further study.
