Shows you how to do everything from formatting text to enhancing documents with graphics to publishing on the Web. This work is a KWIC (key-word-in-context) concordance and prosopography of the Aramaic documents from ancient Egypt as published in the four-volume edition edited by B. Porten and A. Yardeni: Textbook of Aramaic Documents from Ancient Egypt. Most of the documents indexed here are from the Persian period; they are legal, epistolary, and administrative. This comprehensive concordance will prove very useful to students of Aramaic who wish to have access to the collocations presented, students of the society and history of Persian-era Egypt, as well as those interested in personal names and their contribution to our understanding of both history and language. Published by Eisenbrauns for the Comprehensive Aramaic Lexicon project. Write on with Microsoft Word! But what about Word's sophisticated design, review, and collaboration tools? Microsoft Word In 30 Minutes will get you up to speed with Word 2016 and Word Online and help you create professional-looking documents for work, school, or home use.

bookdown: Authoring Books and Technical Documents with R Markdown presents a much easier way to write books and technical publications than traditional tools such as LaTeX and Word. The bookdown package inherits the simplicity of syntax and flexibility for data analysis from R Markdown, and extends R Markdown for technical writing, so that you can make better use of document elements such as figures, tables, equations, theorems, citations, and references. Similar to LaTeX, you can number and cross-reference these elements with bookdown. Your document can even include live examples so readers can interact with them while reading the book. The book can be rendered to multiple output formats, including LaTeX/PDF, HTML, EPUB, and Word, thus making it easy to put your documents online. The style and theme of these output formats can be customized. We used books and R primarily for examples in this book, but bookdown is not only for books or R. Most features introduced in this book also apply to other types of publications: journal papers, reports, dissertations, course handouts, study notes, and even novels. You do not have to use R, either. Other choices of computing languages

include Python, C, C++, SQL, Bash, Stan, JavaScript, and so on, although R is best supported. You can also leave out computing, for example, to write a fiction. This book itself is an example of publishing with bookdown and R Markdown, and its source is fully available on GitHub.

Microsoft Word is a full-featured Word Processor used to create and design documents such as letters and memos. Since it is a tool we use on a daily basis, it is important to take advantage of time-saving tips and ways to improve efficiency. Using Microsoft Word to its fullest extent can provide a professionally structured layout to communicate messages with creditability and accuracy. Furthermore, effective documents must have a professional look and layout. Therefore, if you are building a large document containing Chapters, Table of Contents, Index, and Legal Citations, this Step-By-Step Workbook will provide the knowledge necessary to implement capabilities for communicating effective messages. The book is divided into two sections: Creating A Document Chapters 1-14 will help you understand features needed to enhance a

document. This manual will cover in-depth how to manipulate text using Characters, Paragraphs, Indenting, Date, Time, Number, and Bullets. You will also be able to edit documents, as well as enhance their appearance and print them in a variety of formats. Additionally, creating a new document using a Template is a quick method to get started. Plus, using different viewing layouts and methods of navigating will increase productivity and learning. This manual will also demonstrate diverse ways to insert and use graphic images within a text. Applying Word Wrap features will also allow text to flow around images. Finally, you can use Spell Check, Grammar, Contextual, Smart Lookup spelling tools to find and correct wording and spelling issues.

Large Documents Because there are unique challenges faced with very large documents due to the consistency of Headers, Footers, Chapter Names, Indexes, Table of Contents, and many other Large Document challenges. Chapters 15-24 will allow you to enter special commands and build a long document structure. You will also learn how to create Tables, insert rows/columns, add borders, backgrounds, merge cells, combine cells, and convert text to a Table. As text is entered, a Page will Break automatically, or you can insert a specific code to Break the Page such as Section Break, Odd Page Break, and Column Break. Placing Headers and Footers on each page can finalize a document for printing, but you may want the chapter header to be different for each chapter. Therefore, this manual will cover how to use Page Breaks to stop formatting between pages to allow

one page for Landscape and the next page to switch back to Portrait. Also, specific pages can be split into Multiple Columns to provide a Newsletter Style layout. We will also explain how to use the Draft View and Show/Hide marks to see hidden codes such as Page Breaks and Index markers. Furthermore, Styles will allow you to define a specific format in order to create titles, generate a Table Of Contents, and provide consistency for text. We will also cover adding an Index and other References for legal documents at the end of a document. Also, Quick Parts will allow you to store Watermarks, Cover Pages, and other objects in a library to provide quick and consistent layouts. Finally, the final project will focus on creating Large Documents including Table Of Contents, Index, Section Breaks, etc. We have also added several optional special topics to the Appendix such as Forms, Macros, and Mail Merge. How the Workbook is Designed This Workbook contains over 200+ step-by-step practice exercises to help you get up to speed quickly and understand each concept. The commands and features are very similar to previous versions and differences are documented where appropriate. The following link is a Video Clip explaining how the courseware has been designed and how to use it most effectively.
