In *Black Feminism Reimagined* Jennifer C. Nash reframes black feminism's engagement with intersectionality, often celebrated as its primary intellectual and political contribution to feminist theory. Charting the institutional history and contemporary uses of intersectionality in the academy, Nash outlines how women's studies has both elevated intersectionality to the discipline's primary program-building initiative and cast intersectionality as a threat to feminism's coherence. As intersectionality has become a central feminist preoccupation, Nash argues that black feminism has been marked by a single affect—defensiveness—manifested by efforts to police intersectionality's usages and circulations. Nash contends that only by letting go of this deeply alluring protectionist stance, the desire to make property of knowledge, can black feminists reimagine intellectual production in ways that unleash black feminist theory's visionary world-making possibilities. A reinterpretation of the history of the American women's movement. The book traces the intellectual roots of the women's movement, revealing how it took on racial overtones and demonstrating that white, middle-class women laid the intellectual groundwork for the social movements that followed. A collection of classic texts and new black feminist scholarship that traces the crucial developments and debates of the last twenty years. It is the first volume entirely dedicated to the writings of black women in a British context. How have research agendas on race and ethnic relations changed over the past two decades and what new developments have emerged? *Theories of Race and Ethnicity* provides a comprehensive and cutting-edge collection of theoretically grounded and empirically informed essays. It covers a range of key issues in race and ethnicity studies, such as genetics and race, post-race debates, racial eliminativism and the legacy of Barack Obama, and mixed race identities. The contributions are by leading writers on a range of perspectives employed in studying ethnicity and race, including critical race feminism, critical rationalism, psychoanalysis, performativity, whiteness studies and sexuality. Written in an authoritative yet accessible style, this volume is suitable for researchers and advanced students, offering scholars a survey of the state of the art in the literature, and students an overview of the field. From the nineteenth century articulations of Sojourner Truth to

contemporary thinkers like Patricia J. Williams, Black feminists have always recognized the mutual dependence of race and gender. Detailing these connections, *Not Just Race, Not Just Gender* explores the myriad ways race and gender shape lives and social practices. Resisting essentialist tendencies, Valerie Smith identifies black feminist theorizing as a strategy of reading rather than located in a particular subjective experience. Her intent is not to deny the validity of black women's lived experience, but rather to resist deploying a uniform model of black women's lives that actually undermines the power of black feminist thought. Whether reading race or gender in the Central Park jogger case or in contemporary media, like *Livin' Large*, Smith displays critical rigor that promises to change the way we think about race and gender. "Informed in 1944 that she was 'not of the sex' entitled to be admitted to Harvard Law School, African American activist Pauli Murray confronted the injustice she called 'Jane Crow.' In the 1960s and 1970s, the analogies between sex and race discrimination pioneered by Murray became potent weapons in the battle for women's rights, as feminists borrowed rhetoric and legal arguments from the civil rights movement. Serena Mayeri's *Reasoning from Race* is the first book to explore the development and consequences of this key feminist strategy. Mayeri uncovers the history of an often misunderstood connection at the heart of American antidiscrimination law. Her study details how a tumultuous political and legal climate transformed the links between race and sex equality, civil rights and feminism. Battles over employment discrimination, school segregation, reproductive freedom, affirmative action, and constitutional change reveal the promise and peril of reasoning from race--and offer a vivid picture of Pauli Murray, Ruth Bader Ginsburg, and others who defined feminists' agenda. Looking beneath the surface of Supreme Court opinions to the deliberations of feminist advocates, their opponents, and the legal decisionmakers who heard--or chose not to hear--their claims, *Reasoning from Race* showcases previously hidden struggles that continue to shape the scope and meaning of equality under the law"--Publisher description A classic anthology of writings on the legal status and lived experiences of women of color Now in its second edition, the acclaimed anthology *Critical Race Feminism* presents over 40 readings on the legal status of women of color by leading authors and scholars such as Anita Hill, Lani Guinier, Kathleen Neal Cleaver, and Angela Harris. The collection gives voice to Black, Latina, Asian, Native American, and Arab women, and explores both straight and queer perspectives. Both a forceful statement and a platform for change, the anthology addresses an ambitious range of subjects, from life in the workplace and motherhood to sexual harassment, domestic violence, and other criminal justice issues. Extending beyond national borders, the volume tackles global issues such as the rights of Muslim women, immigration, multiculturalism, and global capitalism. Revealing how the historical experiences and contemporary realities of women of color are profoundly influenced by a legacy of racism and sexism that is neither linear nor logical, *Critical Race Feminism* serves up a panoramic perspective, illustrating how women of color can find strength in the face of oppression. Inspired by the idealism of the civil rights movement, the women who launched the radical second wave of the feminist movement believed, as a bedrock principle, in universal sisterhood and color-blind democracy. Their hopes, however, were soon dashed. To this day, the failure to create an integrated movement remains a sensitive and contested issue. In *The Trouble Between Us*, Winifred Breines explores why a racially integrated women's liberation movement did not develop in the United States. Drawing on flyers, letters, newspapers, journals, institutional records, and oral histories, Breines dissects how white and black women's participation in the movements of the 1960s led to the development of separate feminisms. Herself a participant in these events, Breines attempts to reconcile the explicit professions of anti-racism by white feminists with the accusations of mistreatment, ignorance, and neglect by African American feminists. Many radical white women, unable to see beyond their own experiences and idealism, often behaved in unconsciously or abstractly racist ways, despite their passionately anti-racist stance and hard work to develop an interracial movement. As Breines argues, however, white feminists' racism is not the only reason for the absence of an interracial feminist movement. Segregation, black women's interest in the Black Power movement, class differences, and the development of identity politics with an emphasis on "difference" were all powerful factors that divided

white and black women. By the late 1970s and early 1980s white feminists began to understand black feminism's call to include race and class in gender analyses, and black feminists began to give white feminists some credit for their political work. Despite early setbacks, white and black radical feminists eventually developed cross-racial feminist political projects. Their struggle to bridge the racial divide provides a model for all Americans in a multiracial society. Jane Flax argues that a reciprocal relationship exists between unconscious processes and race/gender domination and that unless we attend to these unconscious processes, no adequate remedy for the malignant consequences of our current race/gender practices and relations can be devised. Flax supports her arguments using a variety of sources. A groundbreaking anthology of essays providing commentary on gender and sexuality inclusion in the antiracist movement In late 1995, the Million Man March drew hundreds of thousands of black men to Washington, DC, and seemed even to skeptics a powerful sign not only of black male solidarity, but also of black racial solidarity. Yet while generating a sense of community and common purpose, the Million Man March, with its deliberate exclusion of women and implicit rejection of black gay men, also highlighted one of the central faultlines in African American politics: the role of gender and sexuality in antiracist agenda. In this groundbreaking anthology, a companion to the highly successful *Critical Race Feminism*, Devon Carbado changes the terms of the debate over racism, gender, and sexuality in black America. The essays cover such topics as the legal construction of black male identity, domestic abuse in the black community, the enduring power of black machismo, the politics of black male/white female relationships, racial essentialism, the role of black men in black women's quest for racial equality, and the heterosexist nature of black political engagement. "Featuring work by Cornel West, Huey Newton, Henry Louis Gates, Jr., A. Leon Higginbotham, Jr., Houston Baker, Marlon T. Riggs, Dwight McBride, Michael Awkward, Ishmael Reed, Derrick Bell, and many others, Devon Carbado's anthology stakes out new territory in the American racial landscape."—*Critical America*, A series edited by Richard Delgado and Jean Stephancic This book gives voice to the experiences of women of color--women of African, Native American, Latina, East Indian, Korean and Japanese descent--as students pursuing terminal degrees and as faculty members navigating the Academy, grappling with the dilemmas encountered by others and themselves as they exist at the intersections of their work and identities. Women of color are frequently relegated--on account both of race and womanhood--into monolithic categories that perpetuate oppression, subdue and suppress conflict, and silence voices. This book uses critical race feminism (CRF) to place women of color in the center, rather than the margins, of the discussion, theorizing, research and praxis of their lives as they co-exist in the dominant culture. The first part of the book addresses the issues faced on the way to achieving a terminal degree: the struggles encountered and the lessons learned along the way. Part Two, "Pride and Prejudice: Finding Your Place After the Degree" describes the complexity of lives of women with multiple identities as scholars with family, friends, and lives at home and at work. The book concludes with the voices of senior faculty sharing their journeys and their paths to growth as scholars and individuals. This book is for all women of color growing up in the academy, learning to stand on their own, taking first steps, mastering the language, walking, running, falling and getting up to run again--and illuminates the process of self-definition that is essential to their growth as scholars and individuals. During the past decade, feminism and women's studies have been forced to acknowledge the diversities of women's experiences, as well as the patriarchal oppression that they share. The emphasis on difference has shattered the illusion of homogeneity and sisterhood which previously characterized white, middle-class Westernized feminist politics and analysis.; There is relatively little work which concentrates on the inter-relationships of race and gender in general, and the consequences of racism, for women of different backgrounds, in particular. "The Dynamics of Race and Gender" aims to contribute to the debate and understanding in this area. Emphasis has been given to age, class, disability, race and sexuality. The contributors to this volume are from different religious, cultural and ethnic backgrounds, giving a balanced and broad ranging perspective on this important social question.;

Organized around three main themes, which are; issues of theory and method, questions of identity, racism and sexism at work, the chapters of this

book indicate how the processes of race and gender interrelate in highly complex and contradictory ways. Demonstrating the benefits to be gained from analysing the interplay of various axes of differentiation in specific empirical and historical locations, and in doing so, under-scoring the point that diversity among women cannot be seen as a static phenomenon. Since her late-1990s debut as a member of the R&B trio Destiny's Child, Beyonce Knowles has garnered both praise and criticism. While some consider her an icon of female empowerment, others see her as detrimental to feminism and representing a negative image of women of color. Her music has a decidedly pop aesthetic, yet her power-house vocals and lyrics focused on issues like feminine independence, healthy sexuality and post-partum depression give her songs dimension and substance beyond typical pop fare. This collection of new essays presents a detailed study of the music and persona of Beyonce--arguably the world's biggest pop star. Topics include the body politics of respectability; feminism, empowerment and gender in Beyonce's lyrics; black female pleasure; and the changing face of celebrity motherhood. Instructors considering this book for use in a course may request an examination copy here. This study reinterprets a crucial period (1870s-1920s) in the history of women's rights, focusing attention on a core contradiction at the heart of early feminist theory. At a time when white elites were concerned with imperialist projects and civilizing missions, progressive white women developed an explicit racial ideology to promote their cause, defending patriarchy for "primitives" while calling for its elimination among the "civilized." By exploring how progressive white women at the turn of the century laid the intellectual groundwork for the feminist social movements that followed, Louise Michele Newman speaks directly to contemporary debates about the effect of race on current feminist scholarship. "White Women's Rights is an important book. It is a fascinating and informative account of the numerous and complex ties which bound feminist thought to the practices and ideas which shaped and gave meaning to America as a racialized society. A compelling read, it moves very gracefully between the general history of the feminist movement and the particular histories of individual women."--Hazel Carby, Yale University "This brilliant and timely collection takes us far in documenting the complex intrapsychic worlds and intersubjective relations of race, gender, and culture. Questions concerning how race and ethnicity create and refract unconscious fantasy and self-construction must be at the forefront of contemporary psychoanalytic thinking."—Nancy J. Chodorow, author of *The Reproduction of Mothering* "Bold. Daring. Provocative. This collection of essays emphatically demonstrates that rhetorical meaning, constituted in the text and the world, evolves from mediations of the psychical and the material, the personal and the social. The critical models displayed so forcefully here will not only influence psychoanalytic and feminist discourses but literary and cultural studies as well."—Claudia Tate, George Washington University This book explores storytelling as an innovative means of improving understanding of Indigenous people and their histories and struggles including with the law. It uses the Critical Race Theory ('CRT') tool of 'outsider' or 'counter' storytelling to illuminate the practices that have been used by generations of Aboriginal women to create an outlaw culture and to resist their invisibility to law. Legal scholars are yet to use storytelling to bring the experiential knowledge of Aboriginal women to the centre of legal scholarship and yet this book demonstrates how this can be done by way of a new methodology that combines elements of CRT with speculative biography. In one chapter, the author tells the imagined story of Eliza Woree who featured prominently in the backdrop to the decision of the Supreme Court of Queensland in *Dempsey v Rigg* (1914) but whose voice was erased from the judgements. This accessible book adds a new and innovative dimension to the use of CRT to examine the nexus between race and settler colonialism. It speaks to those interested in Indigenous peoples and the law, Indigenous studies, Indigenous policy, Aboriginal and Torres Strait Islander history, feminist studies, race and the law, and cultural studies. What is a Canadian critical race feminism? As the contributors to this book note, the interventions of Canadian critical race feminists work to explicitly engage the Canadian state as a white settler society. The collection examines Indigenous peoples within the Canadian settler state and Indigenous women within feminism; the challenges posed by the settler state for women of colour and Indigenous women; and the possibilities and limits of an anti-colonial praxis. Critical race feminism, like critical race

theory more broadly, interrogates questions about race and gender through an emancipatory lens, posing fundamental questions about the persistence if not magnification of race and the “colour line” in the twenty-first century. The writers of these articles whether exploring campus politics around issues of equity, the media’s circulation of ideas about a tolerant multicultural and feminist Canada, security practices that confine people of colour to spaces of exception, Indigenous women’s navigation of both nationalism and feminism, Western feminist responses to the War on Terror, or the new forms of whiteness that persist in ideas about a post-racial world or in transnational movements for social justice insist that we must study racialized power in all its gender and class dimensions. The contributors are all members of Researchers and Academics of Colour for Equity. For bell hooks, the best cultural criticism sees no need to separate politics from the pleasure of reading. *Yearning* collects together some of hooks's classic and early pieces of cultural criticism from the '80s. Addressing topics like pedagogy, postmodernism, and politics, hooks examines a variety of cultural artifacts, from Spike Lee's film *Do the Right Thing* and Wim Wenders's film *Wings of Desire* to the writings of Zora Neale Hurston and Toni Morrison. The result is a poignant collection of essays which, like all of hooks's work, is above all else concerned with transforming oppressive structures of domination. An anthology containing some 30 essays which focus on topics including a critique of American feminist legal scholarship; motherhood and work in cultural context; Josephine Baker and the Cold War; the campaign against female circumcision; violence against Aboriginal women in Australia; and "marketization" and the status of women in China. Includes a foreword by social justice activist and professor at the U. of California-Santa Cruz, Angela Y. Davis. Annotation copyrighted by Book News Inc., Portland, OR This volume represents the strength as well as diversity of writings which discuss race and feminism showing how these two areas, usually considered to be distinct and therefore discrete from each other, have developed. Second Wave feminism collapsed in the early 1980s when a universal definition of women was abandoned. At the same time, as a reaction to the narcissism of white middle class feminism, "intersectionality" led to many different feminisms according to race, sexual preference and class. These ongoing segregations make it impossible for women to unite politically and they have not ended exclusion and discrimination among women, especially in the academy. In *Inclusive Feminism*, Naomi Zack provides a universal, relational definition of women, critically engages both Anglo and French feminists and shows how women can become a united historical force, with the political goal of ruling in place of men. This collection demonstrates the diversity of women's struggles against problems such as racism, violence, homophobia, focusing on the complex ways that gender, culture, race-ethnicity and class shape women's political consciousness in the US. "Sex, Race, and God is the impassioned manifesto of a white feminist's reckoning with the meaning of race-including her own whiteness-in doing theology. We should be discussing, and acting on many of Thistlethwaite's insights for quite some time. She has made a vital contribution to the feminist theological enterprise and to the critical relationship between black and white women in it." -Carter Heyward "Sex, Race, and God is a sincere attempt to listen to and learn from African-American women. . . a serious and largely successful effort to create a method that addresses differences rather than proposing wishful commonalities. Many women of color will find it promising a basis for dialogue." -The Women's Review of Books "This pivotal book illuminates a significant ongoing debate at the intersection of two fields: contemporary theology and feminist studies." -Choice "Thistlethwaite does what so few white feminists have done: genuinely interact with (and learn from) the strong differences in experience and perspective between African -American women and European-American women." -The Other Side Critical Race, Feminism, and Education provides a transformative next step in the evolution of critical race and Black feminist scholarship. Focusing on praxis, the relationship between the construction of race, class, and gender categories and social justice outcomes is analyzed. An applied transdisciplinary model - integrating law, sociology, history, and social movement theory - demonstrates how marginalized groups are oppressed by ideologies of power and privilege in the legal system, the education system, and the media. Pratt-Clarke documents the effects of racism, patriarchy, classism, and nationalism on Black females and males in the single-

sex school debate. Revisiting the ways in which her own experiences as a Japanese-American woman have informed her approach to the law, Matsuda offers powerful insight into how our collective experiences inform our understanding of the law. From stories of the Japanese-American internment camps to her reactions to racist images in movies, she explores how our identity can contribute to a vision of a more just society. Matsuda also focuses on applying a new multicultural and feminist theory of jurisprudence to specific legal issues, weighing hate speech against academic freedom, considering how women are viewed by the criminal justice system, and setting an agenda for progressive civil liberties. A NEW YORK TIMES BESTSELLER “The fights against hunger, homelessness, poverty, health disparities, poor schools, homophobia, transphobia, and domestic violence are feminist fights. Kendall offers a feminism rooted in the livelihood of everyday women.” —Ibram X. Kendi, #1 New York Times-bestselling author of *How to Be an Antiracist*, in *The Atlantic* “One of the most important books of the current moment.” —Time “A rousing call to action... It should be required reading for everyone.” —Gabrielle Union, author of *We’re Going to Need More Wine* A potent and electrifying critique of today’s feminist movement announcing a fresh new voice in black feminism Today’s feminist movement has a glaring blind spot, and paradoxically, it is women. Mainstream feminists rarely talk about meeting basic needs as a feminist issue, argues Mikki Kendall, but food insecurity, access to quality education, safe neighborhoods, a living wage, and medical care are all feminist issues. All too often, however, the focus is not on basic survival for the many, but on increasing privilege for the few. That feminists refuse to prioritize these issues has only exacerbated the age-old problem of both internecine discord and women who rebuff at carrying the title. Moreover, prominent white feminists broadly suffer from their own myopia with regard to how things like race, class, sexual orientation, and ability intersect with gender. How can we stand in solidarity as a movement, Kendall asks, when there is the distinct likelihood that some women are oppressing others? In her searing collection of essays, Mikki Kendall takes aim at the legitimacy of the modern feminist movement, arguing that it has chronically failed to address the needs of all but a few women. Drawing on her own experiences with hunger, violence, and hypersexualization, along with incisive commentary on reproductive rights, politics, pop culture, the stigma of mental health, and more, *Hood Feminism* delivers an irrefutable indictment of a movement in flux. An unforgettable debut, Kendall has written a ferocious clarion call to all would-be feminists to live out the true mandate of the movement in thought and in deed. From one of our most important scholars and civil rights activist icon, a powerful study of the women’s liberation movement and the tangled knot of oppression facing Black women. “Angela Davis is herself a woman of undeniable courage. She should be heard.” —The New York Times Angela Davis provides a powerful history of the social and political influence of whiteness and elitism in feminism, from abolitionist days to the present, and demonstrates how the racist and classist biases of its leaders inevitably hampered any collective ambitions. While Black women were aided by some activists like Sarah and Angelina Grimke and the suffrage cause found unwavering support in Frederick Douglass, many women played on the fears of white supremacists for political gain rather than take an intersectional approach to liberation. Here, Davis not only contextualizes the legacy and pitfalls of civil and women’s rights activists, but also discusses Communist women, the murder of Emmitt Till, and Margaret Sanger’s racism. Davis shows readers how the inequalities between Black and white women influence the contemporary issues of rape, reproductive freedom, housework and child care in this bold and indispensable work. In the heated debates over identity politics, few theorists have looked carefully at the conceptualizations of identity assumed by all sides. *Visible Identities* fills this gap. Drawing on both philosophical sources as well as theories and empirical studies in the social sciences, Martyn Alcoff makes a strong case that identities are not like special interests, nor are they doomed to oppositional politics, nor do they inevitably lead to conformism, essentialism, or reductive approaches to judging others. Identities are historical formations and their political implications are open to interpretation. But identities such as race and gender also have a powerful visual and material aspect that eliminativists and social constructionists often underestimate. *Visible Identities* offers a careful analysis of the political and philosophical worries about identity and argues

that these worries are neither supported by the empirical data nor grounded in realistic understandings of what identities are. Martyn Alcoff develops a more realistic characterization of identity in general through combining phenomenological approaches to embodiment with hermeneutic concepts of the interpretive horizon. Besides addressing the general contours of social identity, Martyn Alcoff develops an account of the material infrastructure of gendered identity, compares and contrasts gender identities with racialized ones, and explores the experiential aspects of racial subjectivity for both whites and non-whites. In several chapters she looks specifically at Latino identity as well, including its relationship to concepts of race, the specific forms of anti-Latino racism, and the politics of mestizo or hybrid identity. Examining the development of ecofeminism from the 1980s antimilitarist movement to an internationalist ecofeminism in the 1990s, Sturgeon explores the ecofeminist notions of gender, race, and nature. She moves from detailed historical investigations of important manifestations of US ecofeminism to a broad analysis of international environmental politics. For well over a decade, critical race theory—the school of thought that holds that race lies at the very nexus of American life—has roiled the legal academy. In recent years, however, the fundamental principles of the movement have influenced other academic disciplines, from sociology and politics to ethnic studies and history. And yet, while the critical race theory movement has spawned dozens of conferences and numerous books, no concise, accessible volume outlines its basic parameters and tenets. Here, then, from two of the founders of the movement, is the first primer on one of the most influential intellectual movements in American law and politics. Ellen T. Armour shows how the writings of Jacques Derrida and Luce Irigaray can be used to uncover feminism's white presumptions so that race and gender can be thought of differently. In clear, concise terms she explores the possibilities and limitations for feminist theology of Derrida's conception of "woman" and Irigaray's "multiple woman," as well as Derrida's thinking on race and Irigaray's work on religion ... Vivian M. May explores the theoretical and political contributions of Anna Julia Cooper, a renowned Black feminist scholar, educator and activist whose ideas deserve far more attention than they have received. Drawing on Africana and feminist theory, May places Cooper's theorizing in its historical contexts and offers new ways to interpret the evolution of Cooper's visionary politics, subversive methodology, and defiant philosophical outlook. Rejecting notions that Cooper was an elitist duped by dominant ideologies, May contends that Cooper's ambiguity, code-switching, and irony should be understood as strategies of a radical methodology of dissent. May shows how across six decades of work, Cooper traced history's silences and delineated the workings of power and inequality in an array of contexts, from science to literature, economics to popular culture, religion to the law, education to social work, and from the political to the personal. May emphasizes that Cooper eschewed all forms of mastery and called for critical consciousness and collective action on the part of marginalized people at home and abroad. She concludes that in using a border-crossing, intersectional approach, Cooper successfully argues for theorizing from experience, develops inclusive methods of liberation, and crafts a vision of a fundamentally egalitarian social imaginary. Recently, Black women have taken the world stage in national politics, popular culture, professional sports, and bringing attention to racial injustice in policing and the judicial system. However, rarely are Black women acknowledged and highlighted for their efforts to understand the social problems confronting our generation and those generations that came before us. In the post-civil rights era, research faculty and theoreticians must acknowledge the marginalization of Black women scholars' voices in contemporary qualitative scholarship and debates. *Black Feminism in Qualitative Inquiry: A Mosaic for Writing our Daughter's Body* engages qualitative inquiry to center the issues and concerns of Black women as researcher(s) and the researched while simultaneously questioning the ostensible innocence of qualitative inquiry, including methods of data collection, processes of data analysis, and representations of human experiences and identities. The text centers "daughtering" as the onto-epistemological tool for approaches to Black feminist and critical race data analysis in qualitative inquiry. Advanced and novice researchers interested in decolonizing methodologies and liberatory tools of analysis will find the text useful for cultural, education, political, and racial critiques that center the intersectional identities and

interpretations of Black women and girls and other people of color. Daughtering as a tool of analysis in Black feminist qualitative inquiry is our own cultural and spiritual way of being, doing, and performing decolonizing work. In the critical essays collected in *Black Looks*, bell hooks interrogates old narratives and argues for alternative ways to look at blackness, black subjectivity, and whiteness. Her focus is on spectatorship—in particular, the way blackness and black people are experienced in literature, music, television, and especially film—and her aim is to create a radical intervention into the way we talk about race and representation. As she describes: "the essays in *Black Looks* are meant to challenge and unsettle, to disrupt and subvert." As students, scholars, activists, intellectuals, and any other readers who have engaged with the book since its original release in 1992 can attest, that's exactly what these pieces do. Sheds new light on women's differing responses to feminism according to factors of ethnicity and race

How to deal with gender, women, gender roles, feminism and gender equality in teaching practices? Following in the footsteps of the ATHENA thematic network, ATGENDER brings together specialists in women's and gender studies, feminist research, women's rights, gender equality and diversity. In the book series 'Teaching with Gender' the partners in this network have collected articles on a wide range of teaching practices in the field of gender. The books in this series address challenges and possibilities of teaching about women and gender in a wide range of educational contexts. The authors discuss pedagogical, theoretical and political dimensions of learning and teaching about women and gender. The books contain teaching material, reflections on feminist pedagogies, and practical discussions about the development of gender-sensitive curricula in specific fields. All books address the crucial aspects of education in Europe today: increasing international mobility, the growing importance of interdisciplinarity, and the many practices of life-long learning and training that take place outside the traditional programmes of higher education. These books will be indispensable tools for educators who take seriously the challenge of teaching with gender. *Teaching "Race" with a Gendered Edge* responds to the need to approach the idea of race from a feminist perspective. This collection of essays aims to broaden our understanding of both race and gender by highlighting the intersections and intertwinedness of race, gender, and other axes of inequality. The book also points to the importance of taking colonial legacies into account when it comes to the understanding of contemporary forms of racisms. In an increasingly globalised and interconnected world this perspective is essential for understanding the dynamics of identity politics but also for pointing towards possible ways of intervention and change. The essays in the book discuss historically contextualised examples of the intersections of race and gender from different localities in Europe and beyond and provide readers with a rich body of resources and teaching material. Selected essays on radical social change. In the 1960s thousands of poor women of color on the (post)colonial French island of Reunion had their pregnancies forcefully terminated by white doctors; the doctors operated under the pretext of performing benign surgeries, for which they sought government compensation. When the scandal broke in 1970, the doctors claimed to have been encouraged to perform these abortions by French politicians who sought to curtail reproduction on the island, even though abortion was illegal in France. In *The Wombs of Women*—first published in French and appearing here in English for the first time—Françoise Vergès traces the long history of colonial state intervention in black women's wombs during the slave trade and postslavery imperialism as well as in current birth control politics. She examines the women's liberation movement in France in the 1960s and 1970s, showing that by choosing to ignore the history of the racialization of women's wombs, French feminists inevitably ended up defending the rights of white women at the expense of women of color. Ultimately, Vergès demonstrates how the forced abortions on Reunion were manifestations of the legacies of the racialized violence of slavery and colonialism. Dhruvarajan and Vickers call into question feminism's presumed universality of gender analysis, and bring to the foreground the voices of marginalized women in Western society, and of women outside of the western world.
