**The  
Transformation of  
the International  
Order of Asia Apr  
16 2022** In Asia the  
1950s were

dominated by  
political  
decolonization and  
the emergence of  
the Cold War  
system, and newly  
independent  
countries were able  
to utilize the  
transformed  
balance of power  
for their own  
economic  
development  
through economic  
and strategic aid  
programmes. This  
book examines the  
interconnections  
between the  
transfer of power  
and state  
governance in Asia,  
the emergence of  
the Cold War, and  
the transfer of  
hegemony from the  
UK to the US, by  
focusing specifically  
on the historical  
roles of  
international  
economic aid and  
the autonomous

response from  
Asian nation states  
in the immediate  
post-war context.  
The Transformation  
of the International  
Order of Asia offers  
closely interwoven  
perspectives on  
international  
economic and  
political relations  
from the 1950s to  
the 1960s, with  
specific focus on  
the Colombo Plan  
and related aid  
policies of the time.  
It shows how the  
plan served  
different purposes:  
Britain's aim to  
reduce India's  
wartime sterling  
balances in London;  
the quest for India's  
economic  
independence  
under Jawaharlal  
Nehru; Japan's  
regional economic  
assertion and its  
endeavour to  
improve its

international status; Britain's publicity policy during the reorganization of British aid policies at a time of economic crisis; and more broadly, the West's desire to counter Soviet influence in Asia. In doing so, the chapters explore how international economic aid relations became reorganized in relation to the independent development of states in Asia during the period, and crucially, the role this transformation played in the emergence of a new international order in Asia. Drawing on a wide range of international contemporary and archival source materials, this book

will be welcomed by students and scholars interested in Asian, international, and economic history, politics and development studies. *Routledge Handbook of Families in Asia* Nov 23 2022 Research on the family has expanded considerably across Asia but studies tend to be fragmented, focusing on narrow issues within limited areas (cities, towns, small communities) and may not be accessible to international readers. These limitations make it difficult for researchers, students, policy makers, and

practitioners to obtain the information they need. The *Routledge Handbook of Families in Asia* fills that gap by providing a current and comprehensive analysis of Asian families by a wide range of experts in a single publication. The thirty-two chapters of this comparative and multi-disciplinary volume are organized into nine major themes: conceptual approaches, methodological issues, family life in the context of culture, family relationships across the family life cycle, issues of work and income, stress and conflict, family diversity, family policy and laws,

and environmental setting of homes. Each chapter examines family life across Asian countries, studying cultural similarities and differences and exploring how families are changing and what trends are likely to develop in the future. To provide a fruitful learning experience for the reader, each chapter offers examples, relevant data, and a comprehensive list of references. Offering a complete interdisciplinary overview of families in Asia, the Handbook will be of interest to students, academics, policy makers and practitioners across the disciplines of Asian Studies, Sociology,

Demography, Social Work, Law, Social Policy, Anthropology, Geography, Public Health and Architecture.

**Japan in Asia** Sep 09 2021

*Taking in a Game* May 17 2022 The author follows the exportation of baseball to Asia, revealing its deepening roots in Korea, the Philippines, mainland China, and Taiwan. Winner of the Jerry Malloy Book Prize.

*By More Than Providence* Jan 01 2021 Soon after the American Revolution, ?certain of the founders began to recognize the strategic significance of Asia and the Pacific and the vast material and cultural resources at stake there. Over the coming generations, the United States continued to ask how best to expand trade with the region and whether to partner with China, at the center of the continent, or Japan, looking toward the Pacific. Where should the United States draw its defensive line, and how should it export democratic principles? In a history that spans the eighteenth

century to the present, Michael J. Green follows the development of U.S. strategic thinking toward East Asia, identifying recurring themes in American statecraft that reflect the nation's political philosophy and material realities. Drawing on archives, interviews, and his own experience in the Pentagon and White House, Green finds one overarching concern driving U.S. policy toward East Asia: a fear that a rival power might use the Pacific to isolate and threaten the United States and prevent the ocean from becoming a conduit for the westward free flow of trade, values,

and forward defense. By More Than Providence works through these problems from the perspective of history's major strategists and statesmen, from Thomas Jefferson to Alfred Thayer Mahan and Henry Kissinger. It records the fate of their ideas as they collided with the realities of the Far East and adds clarity to America's stakes in the region, especially when compared with those of Europe and the Middle East. Peace Psychology in Asia Aug 28 2020 In recent years, peace psychology has grown from a utopian idea to a means of transforming

societies worldwide. Yet at the same time peacebuilding enjoys global appeal, the diversity of nations and regions demands interventions reflecting local cultures and realities. Peace Psychology in Asia shows this process in action, emphasizing concepts and methods diverging from those common to the US and Europe. Using examples from China, India, Indonesia, the Philippines, and elsewhere in the region, chapter authors illuminate the complex social, political, and religious conditions that have fostered war, colonialism,

dictatorships, and ethnic strife, and the equally intricate personal and collective psychologies that need to be developed to encourage reconciliation, forgiveness, justice, and community. **Peace Psychology in Asia: Integrates** psychology, history, political science, and local culture into concepts of peace and reconciliation. Highlights the indigenous aspects of peace psychology. Explains the critical relevance of local culture and history in peace work. Blends innovative theoretical material with empirical evidence supporting peace interventions.

Balances its coverage among local, national, regional, and global contexts. Analyzes the potential of Asia as a model for world peace. As practice-driven as it is intellectually stimulating, **Peace Psychology in Asia** is vital reading for social and community psychologists, policy analysts, and researchers in psychology and sociology and international studies, including those looking to the region for ideas on peace work in non-Western countries. **British Romanticism in Asia** Mar 03 2021 This book examines the reception of British Romanticism in India and East Asia

(including China, Japan, Korea and Taiwan). Building on recent scholarship on “Global Romanticism”, it develops a reciprocal, cross-cultural model of scholarship, in which “Asian Romanticism” is recognized as itself an important part of the Romantic literary tradition. It explores the connections between canonical British Romantic authors (including Austen, Blake, Byron, Shelley, and Wordsworth) and prominent Asian writers (including Natsume Sōseki, Rabindranath Tagore, and Xu Zhimo). The essays also challenge Eurocentric assumptions about

reception and periodization, exploring how, since the early nineteenth century, British Romanticism has been creatively adapted and transformed by Asian writers. The United States in Asia Feb 26 2023 Shavit's historical dictionary addresses the critical need in academic libraries for reference sources that provide undergraduate and beginning graduate students of American foreign policy with introductory information on the persons, events, and institutions that have influenced US relations with other nations. . . . a useful dictionary. Choice

Contact between the United States and Asia began in the 17th century when several Americans went to India as employees of the East India company. A myriad of sea captains and merchants, missionaries, consuls and diplomats, travelers, journalists, businessmen, engineers, naturalists, educators, and authors and artists followed, establishing a gamut of relationships between the United States and Asia. This volume provides, in alphabetical format, information about those individuals, institutions, and events that most

affected the relationships between the United States and Asia. The dictionary focuses on individuals who contributed in a significant way to U.S.-Asian relations, especially those who left a written record of their experiences. The book covers all countries of Asia, except those of the Middle East, which are in a separate volume by Shavit. Shavit has succeeded in making the information highly accessible as well as comprehensive. The front matter includes a list of abbreviations, place names, and a chronology. A short introduction then leads into the dictionary itself.

References at the end of each entry note whether the subject is covered in general biographical dictionaries and list books and articles on the subject. A system of asterisks cross-references people, events, and institutions that have their own entries in the dictionary. Two appendixes--a list of the chiefs of American diplomatic missions to Asia from 1843 to 1989, and a list of individuals organized by profession and occupation--are added handy reference materials. A bibliographical essay and index complete the book. This impressive new historical dictionary is a

useful reference guide for any student of American relations with Asia.

### **Television Histories in Asia**

Oct 10 2021 This book presents an analysis of television histories across India, China, Taiwan, Singapore, Indonesia, Japan, Hong Kong, the Philippines, Malaysia and Bhutan. It offers a set of standard data on the history of television's cultural, industrial and political structures in each specific national context, allowing for cross-regional comparative analysis. Each chapter presents a case study on a salient aspect of contemporary television culture of the nation in

question, such as analyses of ideology in television content in Japan and Singapore, and transformations of industry structure vis-à-vis state versus market control in China and Taiwan. The book provides a comprehensive overview of TV histories in Asia as well as a survey of current issues and concerns in Asian television cultures and their social and political impact.

### **Public Interest Litigation in Asia**

Jan 21 2020 This edited volume is a timely and insightful contribution to the growing discourses on public law in Asia. Surveying many important jurisdictions in Asia including mainland

China, Hong Kong, India, Malaysia, Singapore, South Korea and Taiwan, the book addresses recent developments and experiences in the field of public interest litigation. The book offers a comparative perspective on public law, asking crucial questions about the role of the state and how private citizens around Asia have increasingly used the forms, procedures and substance of public law to advance public and political aims. In addition to addressing specific jurisdictions in Asia, the book includes a helpful and introduction that highlights regional trends in Asia. In the

jurisdictions profiled, transnational public interest litigation trends have commingled with local dynamics. This volume sheds light on how that commingling has produced both legal developments that cut across Asian jurisdictions as well as developments that are unique to each of the jurisdictions studied. *Power Transition in Asia* Jun 18 2022 Current preoccupations with the 'rise of Asia' attest to the nascent contestation of the very idea of what the pattern of international politics should look like and how it should be practiced. In this

respect, the growing reference to a 'shift to the East' in global politics has become a popular shorthand for the nascent 'power transition' in world affairs. This volume offers a detailed conceptual and empirical investigation of the dynamics of power transition in Asia and details the accommodation strategies and coping mechanisms of different small and middle powers in Asia and, importantly, China's responses to these approaches. **Women and the Media in Asia** Oct 30 2020 At a time of significant change in the precarious world of female individualization,

this collection explores such phenomena by critically incorporating the parameters of popular media culture into the overarching paradigm of gender relations, economics and politics of everyday life.

**In the Dragon's Shadow** Dec 20 2019 A timely look at the impact of China's booming emergence on the countries of Southeast Asia Today, Southeast Asia stands uniquely exposed to the waxing power of the new China. Three of its nations border China and five are directly impacted by its claims over the South China Sea. All dwell in the

lengthening shadow of its influence: economic, political, military, and cultural. As China seeks to restore its former status as Asia's preeminent power, the countries of Southeast Asia face an increasingly stark choice: flourish within Beijing's orbit or languish outside of it. Meanwhile, as rival powers including the United States take concerted action to curb Chinese ambitions, the region has emerged as an arena of heated strategic competition. Drawing on more than a decade of on-the-ground experience, Sebastian Strangio explores the impacts of China's

rise on Southeast Asia, the varied ways in which the countries of the region are responding, and what it might mean for the future balance of power in the Indo-Pacific. *Political Change in Southeast Asia* Feb 02 2021 A powerful new survey of political change in Southeast Asia, exploring why some countries have become democratic while others remain authoritarian. **Corruption in Asia, the Human Cost** Jul 07 2021 **Peace, Politics & Economics in Asia** Aug 08 2021 [Ethnic and Racial Minorities in Asia](#) May 25 2020 Ethnic and Racial Minorities in Asia explores the relationship

between ethnic minority rights and citizenship in Asia. Occupying a prominent place on the global map of conflict, Asia is one of the most ethnically diverse and racially divided regions in the world. It is also the scene of some of the most contrasting state responses to ethnic and racial conflicts, ranging from violent military repression and coercion on the one hand, to offers of autonomy and other forms of self-rule aimed at granting minorities more equal and inclusive citizenship on the other. This volume combines conceptual debates about citizenship with case studies of ethnic minorities

from across the Asian region, with a particular emphasis on Southeast Asia. The contributing authors question the nature of citizenship in the broader sense of identity, belonging, and the rights and responsibilities of ethnic minorities in relation to sovereign nation-states. They examine a wide range of key issues including minority rights claims, ethnic and racial conflict, citizenship, constructions and representations of identity, post-colonialism and human security. This book was originally published as a special issue of *Ethnic and Racial Studies*.

**Globalization and  
Democratization  
in Asia** Apr 28  
2023 An  
interdisciplinary  
text, this volume  
shows how  
simplified views of  
globalization, that  
define it as either  
good or bad, are  
unhelpful when  
analysing the  
impact globalizing  
forces are having  
on Asian societies.  
Asia in Washington  
Jan 25 2023 For  
several centuries,  
international  
relations has been  
primarily the  
purview of nation-  
states. Key powers  
have included at  
various times Great  
Britain, France,  
Japan, China,  
Russia (then the

U.S.S.R., and then  
Russia again), and  
the nation most  
influential in  
international  
relations for the  
past several  
decades has been  
the United States.  
But in a world  
growing smaller,  
with a globalizing  
system increasing  
in complexity by the  
day, the nation-  
state paradigm is  
not as dominant as  
it once was. In Asia  
in Washington,  
longtime Asia  
analyst Kent Calder  
examines the  
concept of "global  
city" in the context  
of international  
affairs. The term  
typically has been  
used in an  
economic context,  
referring to centers  
of international  
finance and  
commerce such as  
New York, Tokyo,

and London. But Calder extends the concept to political centers as well—particularly in this case, Washington, D.C. Improved communications, enhanced transportation, greater economic integration and activity have created a new economic village, and global political cities are arising within the new structure—distinguished not by their CEOs or stock markets but by their influence over policy decisions, and their amassing of strategic intelligence on topics from national policy trends to geopolitical risk. Calder describes the rise of Washington, D.C.,

as perhaps the preeminent global political city—seat of the world’s most powerful government, center of NGO and multilateral policy activity, the locale of institutions such as the World Bank and IMF, and home to numerous think tanks and universities. Within Washington, the role of Asia is especially relevant for several reasons. It represents the core of the non-Western industrialized world and the most challenge to Western dominance. It also raises the delicate issue of how race matters in international global governance—a factor crucially important during a

time of globalization. And since Asia developed later than the West, its changing role in Washington raises major issues regarding how rising powers assimilate themselves into global governance structure. How do Asian nations establish, increase, and leverage their Washington presence, and what is the impact on Washington itself and the decisions made there? Kent Calder explains it all in Asia in Washington. **Beyond the Final Score** Apr 04 2021 The Beijing Olympics will be remembered as the largest, most expensive, and most widely

watched event of the modern Olympic era. But did China present itself as a responsible host and an emergent international power, much like Japan during the 1964 Tokyo Games and South Korea during the 1988 Seoul Games? Or was Beijing in 2008 more like Berlin in 1936, when Germany took advantage of the global spotlight to promote its political ideology at home and abroad? *Beyond the Final Score* takes an original look at the 2008 Beijing games within the context of the politics of sport in Asia. Asian athletics are bound up with notions of national identity and nationalism,

refracting political intent and the processes of globalization. Sporting events can generate diplomatic breakthroughs (as with the results of Nixon and Mao's "ping-pong diplomacy") or breakdowns (as when an athlete defects to another country). For China, the Beijing Games introduced a liberalizing ethos that its authoritative regime could ignore only at its peril. Victor D. Cha former director of Asian affairs for the White House evaluates Beijing's contention with this pressure considering the intense scrutiny China already faced on issues of counterproliferation

, global warming, and free trade. He begins with the arguments that tie Asian sport to international affairs and follows with an explanation of athletics as they relate to identity, diplomacy, and transformation. Enhanced by Cha's remarkable facility with the history and politics of sport, *Beyond the Final Score* is the definitive examination of the events both good and bad that took place during the Beijing Olympics. [The Body in Asia](#) Nov 30 2020 The past few decades have seen growing interest in the study of the body, not least thanks to Michel Foucault's historical studies of medicine in the

1970s, which inspired the initial development of the contemporary study of the human body. However, the increasing number of exciting and influential publications has primarily, if not exclusively, focused on the body in Western cultures. The various works produced by Asian scholars remain largely unknown to Western academic debates even though Asia is home to a host of rich body cultures and religions. The peoples of Asia have experienced colonization, decolonization, and now globalization, all of which make the "body in Asia" a rewarding field of research. This volume is unique,

as it brings together into a single volume a number of scholars who work on East, Southeast and South Asia and presents original and cutting-edge research on the body in various Asian cultures.

#### **A History of Natural Resources in Asia**

Dec 12 2021 Much has been written about the wealth of nations, the history of unequal distribution and zones of affluence and deprivation within and between societies. This book explores why some Asian nations are more prosperous than others through an examination of how their interaction with and utilization of resources has

changed over the centuries.

#### **Elections in Asia and the Pacific: A Data Handbook**

Mar 23 2020 This two-volume work continues the series of election data handbooks published by OUP. It presents a first-ever compendium of electoral data for all the 62 states in Asia, Australia and Oceania from their independence to the present. Following the overall structure of the series, an initial comparative introduction on elections and electoral systems is followed by chapters on each state in the region. Written by knowledgeable and renowned scholars, the contributions examine the

evolution of institutional and electoral arrangements, and provide systematic surveys of the up-to-date electoral provisions and their historical development. Exhaustive statistics on national elections and referendums are given in each chapter. Together with the other books of this series, *Elections in Asia and the Pacific* is a highly reliable resource for historical and cross-national comparisons of elections and electoral systems world-wide. The first volume of *Elections in Asia and the Pacific* includes a total of 32 independent states situated in

the three 'western' regions of the Asian continent: the countries of the Middle East (including Turkey); the post-Soviet states of Central Asia and the Caucasus; and the countries situated in South Asia (including Afghanistan and Myanmar). [Doing Business in Asia](#) Jul 19 2022 The Acclaimed Handbook to Doing Business in 19 Asian Countries Written by a seasoned expert on international business development, this marvelous guide distills a library's worth of essential knowledge into a single, practical volume. It allows readers to quickly acquaint

The book concludes with a discussion of politics, priorities, the private sector, and what role health departments should play to translate policy objectives into better health.

## **Learning from Leaders in Asia**

Dec 24 2022 More than ever, the world needs strong, effective and ethical leadership. Asia is the world's fastest growing region. Its success in the 21st century will depend largely on the quality of its leaders. Learning from Leaders in Asia captures the rich experiences of leaders operating in the region, identifies the key elements of leadership and offers practical advice on how to make a lasting impact. An important and timely book for all who want to seize the moment. Anson Chan, Former Chief Secretary for Administration, Hong Kong Special

Administrative Region Learning from Leaders in Asia provides a solid understanding of the challenges faced by leaders in Asia today and tomorrow. It provides real life insights by leaders across various disciplines in overcoming challenges such as talent acquisition and retention, China strategies and globalization to name but a few. An invaluable read. Chen Shaopeng, President, Lenovo Emerging Market Group, Senior Vice President, Lenovo Group Learning from Leaders in Asia is a must-read for any business person in the world who wants to gain perspectives from Asia-based

multinationals. It offers valuable insights as Asia's importance rises. William Fung, Group Managing Director, Li & Fung Ltd. Learning from Leaders in Asia presents a unique opportunity for readers to learn from the insights of the business executives who are part of one of the leading EMBA programs in the world. Having interacted with these talented men and women I can say with full confidence that they truly understand the issues of building and running a global business. That makes this book well worth reading and I highly recommend it. Jim Thompson,

Chairman, Crown Worldwide Holdings Ltd. Learning from Leaders in Asia cuts through the data and popular opinions to offer an on-the-ground view of the region's latest developments. Combining the acute perceptions and broad sweep of Leadership Experiences in Asia, this book examines the complex issues and offers fundamental insights into the business cultures of a host of countries. In lucid terms, it spells out the unprecedented opportunities and challenges facing companies wanting to devise a strategy that effectively adapts to the Asian reality. Marjorie

Yang, Chair, Esquel Group This extraordinary book is the sequel to Leadership Experiences in Asia, Dr. DeKrey's first effort to describe the functioning of leadership in the Asian contexts. There is no-one with better credentials for doing this than DeKrey, an American who has lived and worked in Hong Kong for more than two decades and who has experienced the very best examples of leadership both in the West as well as in Asia. There is no one whose leadership skills cannot be enhanced by the principles and illustrations laid out in this book. David M. Messick, Morris

and Alice Kaplan Professor Emeritus of Ethics and Decision in Management, Kellogg School of Management, Northwestern University This timely and highly relevant book tackles the critical issues that keep general managers awake at night as they strive to build a sustainable and profitable business in Asia and, in particular, China. The triple challenges of building talent, encouraging breakthrough innovation and ensuring strong governance may be global, but they face added urgency and complexity in Asia given the very high expectations for growth and

unique cultural challenges. The blend of theory, strategy and highly practical experience in this book provides invaluable advice for leaders who are determined to build a legacy in Asia. Ron McEachern, President, PepsiCo Asia

*The Process of Japanese Foreign Policy* Mar 15 2022

"In this diverse survey, leading experts from Japan, Europe and the USA explore recent developments in Japanese foreign policy, focusing on Japan's position in and towards the fast-changing Asia-Pacific region."

"The authors assess the process and practice of foreign policy in the light of Japan's historical

legacy in Asia, the huge imbalance between its economic and military power, and its dependence on the US-Japan Security Alliance. The study includes analysis of the formal and informal institutions of policy-making, the impact of public opinion, and relations with the USA, Northeast and Southeast Asia."-- BOOK JACKET.Title Summary field provided by Blackwell North America, Inc. All Rights Reserved *The Book Worlds of East Asia and Europe, 1450-1850* Oct 22 2022 This volume provides the first comparative survey of the relations between the two most active book worlds in

Eurasia between 1450 and 1850. Prominent scholars in book history explore different approaches to publishing, printing, and book culture. They discuss the extent of technology transfer and book distribution between the two regions and show how much book historians of East Asia and Europe can learn from one another by raising new questions, exploring remarkable similarities and differences in these regions' production, distribution, and consumption of books. The chapters in turn show different ways of writing transnational comparative

history. Whereas recent problems confronting research on European books can instruct researchers on East Asian book production, so can the privileged role of noncommercial publications in the East Asian textual record highlight for historians of the European book the singular contribution of commercial printing and market demands to the making of the European printed record. Likewise, although production growth was accompanied in both regions by a wider distribution of books, woodblock technology's simplicity and mobility allowed for

a shift in China of its production and distribution sites farther down the hierarchy of urban sites than was common in Europe. And, the different demands and consumption practices within these two regions' expanding markets led to different genre preferences and uses as well as to the growth of distinctive female readerships. A substantial introduction pulls the work together and the volume ends with an essay that considers how these historical developments shape the present book worlds of Eurasia. "This splendid volume offers expert new insight into the ways of producing,

financing, distributing, and reading printed books in early modern Europe and East Asia. This is comparative history at its best, which leaves us with a better understanding of each context and of the challenges common to book cultures across space and time.” —Ann Blair, author of *Too Much to Know: Managing Scholarly Information before the Modern Age* and professor of history, Harvard University “This engrossing account of the history of the book by leading specialists on the European and East Asian publishing worlds takes stock of what we know—and how

much we still need to know—about the places that books had in the lives of our early modern forebears. Each chapter is masterful state-of-the-field coverage of its subject, and together they set a new standard for future studies of the book, East and West.” —Timothy Brook, author of *The Troubled Empire: China in the Yuan and Ming Dynasties* **Rethinking Security in East Asia** Feb 20 2020 Is East Asia heading towards war? This text makes a case for a new theoretical approach (called 'analytical eclecticism' by the authors) to the study of Asian security.

**Journalism and Democracy in Asia** May 05 2021 Journalism and Democracy in Asia addresses key issues of freedom, democracy, citizenship, openness and journalism in contemporary Asia, looking especially at China, Japan, Korea, Indonesia, the Philippines and India. The authors take varying approaches to questions of democracy, whilst also considering journalism in print, radio and new media, in relation to such questions as the role of social, political and economic liberalization in bringing about a blooming of the media, the relationship

between the media and the development of democracy and civil society, and how journalism copes under authoritarian rule. With contributions from highly regarded experts in the region examining a broad range of issues from across Asia, this book will be of high interest to students and scholars in political communications, journalism and mass communication and Asian studies.

**Routledge Handbook of Environment and Society in Asia** Jul 27 2020 Nowhere is the connection between society and the environment more evident and potentially more

harmful for the future of the world than in Asia. In recent decades, rapid development of Asian countries with very large populations has led to an unprecedented increase in environmental problems such as air and water pollution, solid and hazardous wastes, deforestation, depletion of natural resources and extinction of native species. This handbook provides a comprehensive survey of the cultural, social and policy contexts of environmental change across East Asia. The team of international experts critically examine a wide range of environmental

problems related to energy, climate change, air, land, water, fisheries, forests and wildlife. The editors conclude that, with nearly half of the human population of the planet, and several rapidly growing economies, most notably China, Asian societies will determine much of the future of human impacts on the regional and global environments. As climate change-related threats to society increase, the book strongly argues for increased environmental consciousness and action in Asian societies. This handbook is a very valuable companion for students, scholars, policy makers and

researchers working on environmental issues in Asia.

**Political Cultures in Asia and**

**Europe** Nov 11

2021 This book is a study of the attitudes to political and social life among the citizens of eighteen countries in Western Europe, East and Southeast Asia. Drawing on data from the

largest cross-national survey on political culture for the last half a century, this book assesses how political culture differs across the two regions and whether this can be drawn back to a profound difference in basic societal values, or 'Asian values'. Examining geographical, religious and socio-economic factors, the authors discuss whether there genuinely is a

common political value in the two regions or a profound difference as these countries move towards modernity. This original and comprehensive study of the values, norms and beliefs held by citizens of the East and West will appeal to students and scholars of political culture and comparative politics, as well as Asian and European politics.
