**Psychology and Geriatrics** Mar 11 2021 Psychology and Geriatrics demonstrates the value of integrating psychological knowledge and insight with medical training and geriatric care. Leading physician and geropsychologist contributors come together to share their collective wisdom about topics that are as emotionally uncomfortable as they are universally relevant. As the world struggles to respond to unprecedented gains in life expectancy and an explosion of new retirees living with chronic health conditions, this collaboration could not be more timely. This exceptional resource is, itself, evidence that physicians and psychologists can work together to optimize truly patient-centered geriatric care. Here at last is a scientifically rigorous, evidence-based response to the aging mind and body from those most expertly trained. Illustrates why and how psychologists must assume a more integrated role in meeting the health care needs of older patients Confronts emotionally laden topics such as cognitively impaired driving, caregiver burden, end-of-life communication, suicide, and systemic issues such as bias, payment, and the culture of medicine Challenges decades-long barriers to integration, from both physician and psychologist perspectives, suggesting how they can finally be overcome Provides an innovative, practical response to academic medicine's growing emphasis on psychological and behavioral science Demonstrates how health care reform creates a behavioral health niche that clinical psychologists are uniquely qualified to fill

**Brocklehurst's Textbook of Geriatric Medicine and Gerontology E-Book** Jul 15 2021 The leading reference in the field of geriatric care, Brocklehurst's Textbook of Geriatric Medicine and Gerontology, 8th Edition, provides a contemporary, global perspective on topics of importance to today's gerontologists, internal medicine physicians, and family doctors. An increased focus on frailty, along with coverage of key issues in gerontology, disease-specific geriatrics, and complex syndromes specific to the elderly, makes this 8th Edition the reference you'll turn to in order to meet the unique challenges posed by this growing patient population. Consistent discussions of clinical manifestations, diagnosis, prevention, treatment, and more make reference quick and easy. More than 250 figures, including algorithms, photographs, and tables, complement the text and help you find what you need on a given condition. Clinical relevance of the latest scientific findings helps you

easily apply the material to everyday practice. A new chapter on frailty, plus an emphasis on frailty throughout the book, addresses the complex medical and social issues that affect care, and the specific knowledge and skills essential for meeting your patients' complex needs. New content brings you up to date with information on gerontechnology, emergency and pre-hospital care, HIV and aging, intensive treatment of older adults, telemedicine, the built environment, and transcultural geriatrics. New editor Professor John Young brings a fresh perspective and unique expertise to this edition.

**Ethical Considerations and Challenges in Geriatrics** May 13 2021 This book is designed to present an overview of common geriatrics ethical issues that arise during patient care and research activities. Each chapter includes a case example and practical learning pearls that are useful in day-to-day patient care. Coverage includes a brief overview of geriatric epidemiology, highlighting the high rates of dementia, use of surrogate decisions makers at the end-of-life, relocation from home to long-term care facilities, and low health literacy in the geriatrics population. Sections are devoted to issues around capacity, surrogate decision making, end-of-life care, hemodialysis in the elderly, and futility as well as challenges presented by independence questions, such as dementia care, driving, feeding, and intimacy in nursing homes. The text also addresses questions around recognizing, reporting, and treating elder abuse and self-neglect, ethics related to research and technology in the geriatric population, and the use of e-mail, Facebook, and open notes. Written by experts in the field, *Ethical Considerations and Challenges in Geriatrics* is a valuable tool for trainees at a variety of levels including medical students, residents, and fellows. In addition, it provides practical guidance and a useful reference for practicing geriatricians, primary care physicians, geriatric nurses, social workers, nursing home workers, hospice care employees, and all medical health professionals working with the elderly.

**Integrative Geriatric Medicine** Nov 06 2020 Integrative geriatrics is a new field of medicine that advocates for a whole-person, patient-centered, primarily non-pharmacological approach to medical care of the elderly. Most current geriatric practices overprescribe medications and procedures and underutilize non-pharmacological, low-cost, high-touch methods. Patients, however, often show reluctance towards these standard practices, as the interventions they rely upon are often invasive. The practice of integrative geriatrics is rooted in lifestyle interventions, such as nutrition, movement therapies, and mind-body and spirituality approaches, that allow patients to have different path to their healthcare-one that utilizes pharmaceuticals and invasive procedures only when safer integrative approaches are not available or not effective. This first definitive textbook of this new field presents detailed, evidence-based information for all healthcare providers and advocates who work with geriatric population. It is intended not only for providers in outpatient settings, but also to those who work in nursing homes, assisted and independent living facilities, and senior community centers. In addition, *Integrative Geriatric Medicine* will provide valuable information for leaders and politicians who are involved with implementing policies and procedures for care of elderly patients looking for safer, less costly, and more patient-centered approaches.

*Geriatric Nursing* Dec 28 2019 - This book presents a mode of care relevant and essential to good practice-based approach to nursing profession - It explains specifically about special needs arising due to the changes in aging - A unique kind of proficiency is expected in dealing with the aged and elderly people both by medicos and nursing professionals - In a non-technical style, this book offers practical guidance on ethical approach for health care of elderly people. Gives tips and hints to tackle day-to-day problems to perform responsibility towards caring for the aged in whatever setting they are and how to behave and act accordingly - An empathetic and sensitive heart and mind only can do justification to handle cases of

health care of elderly people

**Handbook of Geriatric Care Management** May 05 2023 Handbook of Geriatric Care Management, Fourth Edition is a comprehensive and practical guide for care managers that addresses the multiple needs of aging adults and their families. An ideal teaching tool, it guides students and professionals along the journey of becoming a successful care manager. New to this edition are two new chapters on working with older veterans and helping clients with depression. Completely updated and revised, the Fourth Edition provides updated ethics and standards, a focus on credentialing and certification, numerous case studies, sample forms and letters, and tips for building and growing a care manager business.

**Primary Care Geriatrics** Sep 28 2022 Accompanying CD-ROM contains video learning modules on gait and balance and dizziness, a dermatology quiz, and downloadable cognitive assessment tools, to hone clinical skills. File formats include QuickTime movies, PDFs, and HTML documents.

Patients in Peril Nov 18 2021

**Handbook of Geriatric Nursing Care** Apr 23 2022 The Second Edition of this A-to-Z guide covers a wide range of areas of concern pertaining to the growing geriatric population. Completely reviewed, updated and expanded, it includes more than 150 illustrations and charts. This text invites readers to investigate more than 200 disorders and age-oriented issues, such as lab value changes, sexuality, grief and loss, alternative therapies and cultural influences on compliance, self-care and recovery. Comprehensive and easy-to-use, this manual covers Alzheimer's, cataract removal treatments, and many other new and expanded topics.

Essentials of Clinical Geriatrics May 01 2020 Essentials of Clinical Geriatrics is an engagingly written, up-to-date introductory guide to the core topics in geriatric medicine. Since 1984, its goal has remained unchanged: to help clinicians do a better job of caring for their older patients. You will find thorough and authoritative coverage of all the important issues in geriatrics, along with concise, practical guidance on the diagnosis and treatment of the diseases and disorders most commonly encountered in an elderly patient. Presented in full-color, this classic features a strong focus on the field's must-know concepts, from the nature of clinical aging to differential diagnosis of important geriatric syndromes to drug therapy and health services. The Eighth Edition has been completely revised to provide the most current updates on the assessment and management of geriatric care.

Age-Friendly Health Systems Feb 07 2021 According to the US Census Bureau, the US population aged 65+ years is expected to nearly double over the next 30 years, from 43.1 million in 2012 to an estimated 83.7 million in 2050. These demographic advances, however extraordinary, have left our health systems behind as they struggle to reliably provide evidence-based practice to every older adult at every care interaction. Age-Friendly Health Systems is an initiative of The John A. Hartford Foundation and the Institute for Healthcare Improvement (IHI), in partnership with the American Hospital Association (AHA) and the Catholic Health Association of the United States (CHA), designed Age-Friendly Health Systems to meet this challenge head on. Age-Friendly Health Systems aim to: Follow an essential set of evidence-based practices; Cause no harm; and Align with What Matters to the older adult and their family caregivers.

Fundamentals of Geriatric Medicine Dec 08 2020 This book distills the wealth of knowledge contained in the classic text, Geriatric Medicine: An Evidence-Based Approach, 4/e into a practical guide for primary care, family medicine, and internal medicine residents. Written by top experts in the field, the book offers a detailed, compact overview of geriatric care. It addresses geriatric pharmacology, Medicare and Medicaid, and numerous other subjects unique to older adults. The case-based instructional approach helps readers navigate the complexity of prevention, presentation, and treatment for conditions such as depression, dementia, and

hypertension. Graphs and tables aid the reader in determining the proper courses of treatment.

*The Encyclopedia of Elder Care, Fourth Edition* Mar 03 2023 This interdisciplinary clinical reference encompasses hundreds of current entries on a broad range of topics related to geriatrics and geriatric care across multiple health care disciplines. It contains the updated, evidence-based contributions of more than 250 nationally recognized geriatric healthcare professionals regarding elder-care concerns relating to society, community, caregiving, and the individual.

Elder Care Made Easier Feb 19 2022 Do You Find Yourself in the Role of Caregiver? If you are caring for an aging parent, spouse, or other loved one, you are not alone. Statistics show that nearly 25 percent of all households in the United States are providing care for an elderly person. Although you may be willing to help, you may find the task comes with unexpected challenges. Matters you never thought about are now your responsibility--healthcare, housing, financial and legal matters, as well as day-to-day issues involving nutrition, medications, and personal safety. You may find yourself worried, overworked, and exhausted. Over the past thirty years, Doctor Marion Somers, a leading geriatric specialist, has helped thousands of individuals and their families with these matters. Now, in "Elder Care Made Easier," she draws from those decades of experience to offer 10 practical steps to help you navigate your caregiver's journey: - Communicate openly - Put safety first - Improve the lifestyle - Make life easier with adapted equipment - Manage financial issues - Take care of legal matters - Find mobility in disability - Find the right housing - Hire help when it's needed - Learn to let go Doctor Marion Will Save You Time, Money, and Heartache

**Retooling for an Aging America** Aug 16 2021 As the first of the nation's 78 million baby boomers begin reaching age 65 in 2011, they will face a health care workforce that is too small and woefully unprepared to meet their specific health needs. Retooling for an Aging America calls for bold initiatives starting immediately to train all health care providers in the basics of geriatric care and to prepare family members and other informal caregivers, who currently receive little or no training in how to tend to their aging loved ones. The book also recommends that Medicare, Medicaid, and other health plans pay higher rates to boost recruitment and retention of geriatric specialists and care aides. Educators and health professional groups can use Retooling for an Aging America to institute or increase formal education and training in geriatrics. Consumer groups can use the book to advocate for improving the care for older adults. Health care professional and occupational groups can use it to improve the quality of health care jobs.

*Evidence-Based Geriatric Nursing Protocols for Best Practice* Sep 16 2021 Named a 2013 Doody's Core Title! "The evidence-based protocols are designed as a primary reference and are useful, substantive, and timely...The broader contributions of useful format and succinct review of the evidence make it likely that this text will continue to be the leading resource in nursing education and practice."--The Gerontologist "Now more than ever, nurses are called upon to lead efforts to embed evidence-based practice in daily operations. As the IOM report states, 'nurses have key roles to play as team members and leaders for a reformed and better-integrated, patient-centered health care system.' The process of implementing sweeping change in health care will likely take years; however, nurses must start pragmatically and focus on these critically important protocols that have demonstrated improved outcomes for older adults. Simply stated, 'Pick this book up and use it.'" From the Foreword, Susan L. Carlson, MSN, APRN, ACNS-BC, GNP-BC, FNGNA President, National Gerontological Nursing Association "As a gerontological clinical educator/research nurse, I will often use this as a reference. The format and the content are good, and the explanations of how to best use the evidence simplify the process of sifting through mountains of information to figure the best practice." Score: 97, 5 Stars. --Doody's One of the premier reference books for geriatric nurses in hospital, long-

term, and community settings, this 4th edition has been thoroughly updated to provide the most current, evidence-based protocols for care of common clinical conditions and issues in elderly patients. Designed to improve the quality, outcomes, and cost-effectiveness of health care, these guidelines are the result of collaboration between leading practitioners and educators in geriatric nursing and New York University College of Nursing. Protocols for each clinical condition have been developed by experts in that particular area, and most have been systematically tested by over 300 participating hospitals in "Nurses Improving Care for Health System Elders" (NICHE). Evidence is derived from all levels of care, including community, primary, and long-term care. A systematic method in compliance with the AGREE appraisal process was used to rate the levels of evidence for each protocol. Protocols are organized in a consistent format for ease of use, and each includes an overview, evidence-based assessment and intervention strategies, and an illustrative case study with discussion. Additionally, each protocol is embedded within chapter text, which provides the context and detailed evidence for the protocol. Each chapter contains resources for further study. Key Features: Updated to provide a wide range of evidence-based geriatric protocols for best practices Contains new chapters on function-focused care, catheter-associated urinary tract infections, mistreatment detection, acute care models, and transitional care Illustrates application of clinical protocols to real-life practice through case studies and discussion Edited by nationally known leaders in geriatric nursing education and practice, who are endorsed by the Hartford Institute for Geriatric Nursing and NICHE Encompasses the contributions of 58 leading practitioners of geriatric care Written for nursing students, nurse leaders, and practitioners at all levels, including those in specialty roles

**Geriatric Care Plans** Dec 20 2021 Sample care plans, titled by medical diagnosis and organized primarily by body system, use the nursing process throughout. Each plan includes NANDA-approved nursing diagnoses with emphasis on patient goals, and provides medical diagnoses, etiology, assessment criteria, physical examination criteria, diagnostic studies and potential complications, nursing diagnoses with goals, signs and symptoms, interventions with rationales, outcome criteria, and nursing actions for various patient-care settings. Additional care plans cover chronic pain, cancer, and more.

**Social Work in Geriatric Home Health Care** Mar 23 2022 Explore how community-based networks can effectively meet the needs and problems of sick, elderly people and their caregivers! Social Work in Geriatric Home Health Care: The Blending of Traditional Practice with Cooperative Strategies explores how social workers, aides, nurses, administrators, and policy makers can cooperatively work by maintaining appropriate health records in order to keep the elderly living at home. Based on the author's twenty-five years of social work experience in geriatric home care case management, this book explores improved ways to organize home health care by use of cooperative strategies in order to assist older individuals in living independent lives at home. Complete with informative case studies and interviews, you will explore useful examples of geriatric social work practice through Concerned Home Managers for the Elderly, (COHME) a nonprofit, licensed home health care agency. Social Work in Geriatric Home Health Care examines many crucial geriatric care and case management issues of concern to geriatric social workers, including: offering meaningful and fulfilling work as a home health care aide providing high-quality training and ongoing education for home care aides creating a cooperative environment by encouraging staff, social workers, and nurses to share expertise with the case management coordinators who are responsible for placing the geriatric patient at home or in a special care facility involving the client in the management of his or her own health care creating concise, one-page reports for each home visit by using a "One-Sheet" to help you extract case assessments and plans for your geriatric client in a readily accessible format dealing with state regulatory

authorities and the general trend in home health care to place the elderly in nursing homes paying careful attention to financial and administrative problems within your organization while striving to remain true to your original mission of providing at-home care Social Work in Geriatric Home Health Care will help you explore a different way of organizing home health care for the sick and elderly at a time when the percentage of people over sixty-five who will require care is rapidly increasing. This important book works to improve the case management of geriatric people and challenges home health care workers and legislators to become more progressive in their thinking about the direction in which geriatric health care should move at the turn of the century. With this vital book, you will gain insight into organized and cooperative methods of providing home health care for the elderly and find improved methods for managing your geriatric cases to give your clients optimum care.

**Stages of Senior Care: Your Step-by-Step Guide to Making the Best Decisions** Apr 11 2021 A USA Today BESTSELLER! "Informative. Complete. And practical. This book will guide family caregivers through the surprisingly complex world of senior care." -MEHMET OZ, M.D., New York Times bestselling coauthor of YOU: The Owner's Manual: The Complete All-in-One Care Guide Choosing the best care for your aging parents and other seniors in your life is not only complex, with multiple options available, it's also highly personal and often emotional. This essential resource-written by the founders of Home Instead Senior Care, the world's largest provider of nonmedical care for seniors-guides you through a comprehensive range of things to consider, step by step, so you can make better informed decisions and be confident that the senior in your life is receiving the best care possible. Checklists and diagnostics will help you: Decide if at-home care is the right choice for you and your loved ones Evaluate the pros and cons of retirement communities, adult care centers, nonmedical caregivers, assisted living facilities, nursing homes, and hospice Determine the costs of senior care options and find helpful support networks "This is not just another book about caring for aging parents. It's a great reference you'll use again and again. Stages doesn't shy away from the hard questions. Rather, it shows you how to confront them."-SUZANNE MINTZ, President/CEO, National Family Caregivers Association "Recognizing that there is no one-size-fits-all solution, this salient volume compassionately addresses a full range of hard-to-discuss subjects."--PUBLISHERS WEEKLY All of the authors' profits from the sale of this book will be donated to the Home Instead Senior Care Foundation. Paul and Lori Hogan founded Home Instead Senior Care in 1994. Now with 850 offices in 15 countries, Home Instead is recognized as a global leader and authority on senior care. Visit them at [www.stagesofseniorcare.com](http://www.stagesofseniorcare.com).

*Geriatrics Models of Care* Feb 28 2020 This book describes geriatrics practice models that are used to guide the care of older adults, allowing seniors to remain at home, prevent functional disability and preserve quality of life. The models include specific interventions which are performed by health care workers to address the needs of older persons and their caregivers. These models respect patient values, consider patient safety and appreciate psychosocial needs as well. Divided into six parts that discuss hospital-based models of care, transitions from hospital to home, outpatient-based models of care and emergency department models of care, this text addresses the needs of vulnerable patients and the community. Geriatric Models of Care is an excellent resource for health care leaders who must translate these programs to address the needs of the patients in their communities.

Evidence-Based Geriatric Nursing Protocols for Best Practice, Fifth Edition Jul 03 2020 This new edition of one of the premier references for geriatric nurses in hospital, long-term, and community settings delivers current guidelines, real-life case studies, and evidence-based protocols developed by master educators and practitioners. With a focus on improving quality of care, cost-effectiveness, and outcome, the fifth edition is updated to provide the most current information about

care of common clinical conditions and issues in older patients. Several new expert contributors present current guidelines about hip fractures, frailty, perioperative and postoperative care, palliative care, and senior-friendly emergency departments. Additionally, chapters have been reorganized to enhance logical flow of content and easy information retrieval. Protocols, systematically tested by more than 300 participating NICHE (Nurses Improving Care for Health system Elders) hospitals, are organized in a consistent format and include an overview, evidence-based assessment and intervention strategies, and an illustrative case study with discussion. Additionally, protocols are embedded within chapter text, providing the context and detailed evidence for each. Chapter objectives, annotated references, and evidence ratings for each protocol are provided along with resources for additional study. New to the Fifth Edition: Reorganized to enhance logical flow of information and ease of use Updated and revised Includes new contributions from expert educators and practitioners Provides new chapters on perioperative and postoperative care, general surgical care, care of hip fracture, palliative care, and the senior-friendly emergency department Key Features: Includes PowerPoints and a test bank for instructors Delivers evidence-based, current guidelines and protocols for care of common clinical conditions in the older person Illustrates the application of clinical protocols to real-life practice through case studies and discussion Edited by nationally known geriatric leaders who are endorsed by the Hartford Institute for Geriatric Nursing and NICHE Written for nursing students, nurse leaders, and practitioners at all levels, including those in specialty roles

**Geriatric Medicine** Apr 04 2023 Written by international experts, this book presents chapters that cover common geriatric conditions including dementia, depression, delirium, falls, polypharmacy, incontinence, immobility, and medication-related issues, as well as neurological, cardiovascular, and endocrine diseases associated with old age. The book also discusses various aspects of ambulatory, residential, and palliative care for the elderly, in addition to ethical aspects of old age care, advance care planning and living wills. Geriatric medicine is a rapidly growing field in internal medicine. The majority of elderly people now live in developing countries, where there is an urgent need to up-skill healthcare professionals. By presenting problems as they arise and then discussing how to solve them, this book offers a valuable resource for all physicians interested in the care of older people.

*The Encyclopedia of Elder Care* Nov 30 2022 cs.nurse.gerontol

*Geriatric Home-Based Medical Care* Jan 09 2021 This book is a practical reference for any clinician who has struggled to care for an older adult in a home setting. The volume is written by experts in the field who describe fundamental principles and clinical approaches of geriatric home-based care and their application to specific diseases and conditions, including delirium, incontinence, falls, and chronic pain and disability. The book also details house calls for special populations, from the developmentally disabled to those afflicted with neurologic or psychiatric diseases. The volume explores house calls within the context of the US healthcare system. *Geriatric Home-Based Medical Care: Principles and Practice* is a valuable resource for geriatricians, geriatric nurses, primary care physicians, social workers, public health officials, and all medical professions who need tools to provide timely, compassionate, and high-quality care for their older adult patients.

**Elder Care in Occupational Therapy** Jun 25 2022

*Oxford Textbook of Geriatric Medicine* Jan 01 2023 Over the past two decades there has been a marked change in global age demographics, with the number of over-60s increasing by 82% and the number of centenarians by 715%. This new-found longevity is testament to the success of recent advances in medicine, but poses significant challenges to multiple areas of health care concerning older patients. Building upon its predecessor's reputation as the definitive resource on the subject, this new

edition of the Oxford Textbook of Geriatric Medicine offers a comprehensive and multinational examination of the field. Fully revised to reflect the current state of geriatric medicine, it examines the medical and scientific basis of clinical issues, as well as the ethical, legal, and socio-economic concerns for healthcare policy and systems. Over 170 chapters are broken up into 16 key sections, covering topics ranging from policy and key concepts through to infection, cancer, palliative medicine, and healthy ageing. New material includes focus on the evolving concepts of malnutrition, sarcopenia, frailty, and related geriatric syndromes and integration of geriatric principles from public health, primary and specialized care, and transitional stages from home to emergency, medicine and surgery, rehabilitation, and long term care. The Oxford Textbook of Geriatric Medicine brings together specialists from across the globe to provide every physician involved in the care of older patients with a comprehensive resource on all the clinical problems they are likely to encounter, as well as on related psychological, philosophical, and social issues.

Pathy's Principles and Practice of Geriatric Medicine Sep 04 2020 This new edition of the comprehensive and renowned textbook Principles and Practice of Geriatric Medicine offers a fully revised and updated review of geriatric medicine. It covers the full spectrum of the subject, features 41 new chapters, and provides up-to-date, evidence-based, and practical information about the varied medical problems of ageing citizens. The three editors, from UK, USA and France, have ensured that updated chapters provide a global perspective of geriatric medicine, as well as reflect the changes in treatment options and medical conditions which have emerged since publication of the 4th edition in 2006. The book includes expanded sections on acute stroke, dementia, cardiovascular disease, and respiratory diseases, and features a new section on end-of-life care. In the tradition of previous editions, this all-encompassing text continues to be a must-have text for all clinicians who deal with older people, particularly geriatric medical specialists, gerontologists, researchers, and general practitioners. This title is also available as a mobile App from MedHand Mobile Libraries. Buy it now from Google Play or the MedHand Store. Praise for the 4th edition: "...an excellent reference for learners at all clinical and preclinical levels and a useful contribution to the geriatric medical literature." –Journal of the American Medical Association, November 2006 5th edition selected for 2012 Edition of Doody's Core Titles™

**Advanced Age Geriatric Care** Feb 02 2023 As the Baby Boomers age, concerns over healthcare systems' abilities to accommodate geriatric patients grow increasingly challenging. This is especially true with the population deemed to be "the oldest of the old," specifically those over the age of 85. Unlike any other time in history, this demographic is the fastest growing segment of most developed countries. In the United States the oldest old is projected to double from 4.3 million to 9.6 million by 2030. The increased life expectancy of the population since the early 1900s has been built on the improvement of living conditions, diet, public health and advancement in medical care. With this we have seen a steady decline in the age-specific prevalence of vascular and heart diseases, stroke and even dementia. Older persons are healthier today than their counterparts decades ago. More importantly than in any other age group, the care of the oldest old must be individualized; management decisions should be made taking into consideration the older persons' expressed wishes, quality of life, function and mental capacity. The inevitable consequence is that there will be an increase in the prevalence of older persons with chronic diseases, multiple co-existing pathologies and neuro-degenerative diseases. The oldest of the aging population are often excluded from drug trials and their treatments are largely based on findings extrapolated from that of the younger old. Furthermore, among the oldest old, physiologically they are more diverse than other segments of the population. Their demographic characteristics are unparalleled and different compared to that of the younger old. Several studies have drawn

attention to the differing attitudes among health professionals towards elderly people and many show prejudice because they are old. As a result, the use of age as a criteria in determining the appropriateness of treatment is of very limited validity, yet there are limited resources that guide physicians through these challenges. This book creates a greater awareness of these challenges and offers practical guidelines for working within the infrastructures vital to this demographic. This book is designed for geriatricians, primary care physicians, junior medical officers, specialty geriatrics nurses, and gerontologists. It is divided into 3 sections: General Considerations, Chronic diseases and Geriatric Syndromes. Each chapter provides a summary of important and essential information under the heading of Key Points. Case studies are included in some of the chapters to highlight the principles of management.

Elder Care Journey Jul 27 2022 Combining expert knowledge and first-hand experience, a noted elder care researcher confronts the long-distance care of her own mother. For millions of Americans caregiving is the "new normal." For Laura Katz Olson, a respected researcher of long-term care for the aging, *Elder Care Journey* chronicles the disruption of her world and how it is upended by the ever-increasing long-distance needs of her own mother. A healthy, Senior Olympics medal winner, Olson's mother is slowly and steadily incapacitated by Parkinson's disease and a gradual loss of vision. Thrust into a long-distance caregiving role, Olson finds her previous academic notions about assisting a frail parent increasingly at odds with the reality of the lived experience. In a narrative full of "ah-ha!" moments, tears, sighs, and outrage that will be familiar to many, Olson opens a window into the nursing home and home care industries that consume much in the way of taxpayer dollars, but often fail to deliver quality care. Olson's personal story vividly demonstrates not only the overwhelming bureaucratic barriers faced by care-dependent seniors but also their beleaguered adult children's attempts to ensure their parents' health, safety, and well-being. "After losing two siblings, Laura Katz Olson is left singularly responsible for her physically active and lively mother, Dorothy, a thousand miles away, both young at heart and eagerly bicycling everywhere, but increasingly limited by the normal process of aging. Being an expert on aging and health care, Olson is at first confident as she tries to let her mother 'age in place.' More than anyone, she believes, she should know what to do. Shuttling between Florida and Pennsylvania, Olson settles into a crushing routine, and with each visit she finds incremental downward change in her mother's health. Pulled by daughterly guilt at times, but also a wellspring of love, Olson is frank about the resentment she sometimes experiences. "With a unique perspective that links the systemic flaws in our policy approach to elder care to real-world experience, Olson exposes the challenges we all face or are likely to face. More than a personal story, but nevertheless an extremely compelling one, the book should be read by those confounded and frustrated, and by those without direct knowledge of what quietly repeats itself millions of times a day." – Miriam Laugesen, Department of Health Policy and Management, Columbia University "In *Elder Care Journey*, Laura Olson tells the riveting story of helping her aging, disabled mother navigate the system of long-term services and supports. A renowned scholar of aging and long-term care policy, Dr. Olson was nevertheless unprepared for the daily frustrations involved in confronting a bewildering array of obstacles, deceptions, burdensome and repetitive procedures and paperwork, and catch-22s, ranging from the annoying to the downright dangerous. She shows how well-intentioned policies can fall far short of meeting people's needs, especially for those in greatest need, in a system based on fragmented interests and private-sector profit maximization. Combining scholarly expertise with personal experience, she ends the book with a detailed but highly accessible analysis of the long-term care system and how it could be improved to the benefit of both taxpayers and beneficiaries. This book is a compelling read for policymakers and for students and scholars of health care and social welfare policy,

highly recommended for undergraduate and graduate courses. The author's experiences also provide helpful advice to caregivers on what to expect and how to deal with it, as well as reassurance that they are not alone." – Christine L. Day, University of New Orleans "If a society is judged by how well it treats its most vulnerable members, Laura Katz Olson, a prominent health policy scholar, demonstrates that we have a long way to go in how we serve frail and disabled elders in need of long-term services and supports at the end of their lives. Olson develops a compelling narrative that describes the subtle and not-so-subtle indignities imposed on elders and their caregivers navigating the complex maze of health and social service systems at their hour of greatest need. Even an expert such as Olson struggled in light of the challenges posed by these impediments. "By connecting her own personal journey to the larger societal challenges within which her struggles are embedded, Olson makes a significant contribution to the literature that should be required reading for scholars, practitioners, and policymakers looking to advance the welfare of the nation's most vulnerable citizens." – Edward Alan Miller, author of *Block Granting Medicaid: A Model for 21st Century Medicaid Reform?* "This page-turner is at once a tender tale of a daughter's devotion and a stinging indictment of the hugely complex and wholly inadequate American long-term care system. That an elder-care expert can barely navigate the Byzantine web of public and private insurance and services for her disabled mother is alarming enough. Truly horrific are the system's shortcomings and the increasing role that for-profit providers play, fleecing and even abusing their customers. A startling wake-up call." – Andrea Louise Campbell, author of *Trapped in America's Safety Net: One Family's Struggle*

**Principles of Geriatric Medicine and Gerontology** Aug 04 2020 This comprehensive text continues its tradition of presenting the latest in diagnosis and management of disorders affecting the elderly. Featuring experts from geriatric medicine and gerontology, this text provides a uniquely holistic approach for elder care. The new Fifth Edition has been significantly reorganized to enhance geriatric assessment skills, general medical management, management of specific diseases, surgical management, gender issues in clinical geriatrics, and more.

Geriatric Medicine Jun 01 2020 Older adults represent the most rapidly growing demographic in the U.S. and in many developed countries around the world. The field of geriatric medicine is still relatively young, and is only recently seeing a significant increase in peer reviewed literature. Medicare and Medicaid expenditures related to older adults are nearly a trillion dollars/year in the US. How our healthcare system cares for older adults, and how those older adults navigate an increasingly complex system, is of the utmost importance. According to the Institute of Medicine, physicians and other healthcare professionals receive an inadequate amount of training in geriatric medicine. Geriatric medicine is based on the concept of delivering person centered care with a focus on function and quality of life. It is essential that physicians, nurse practitioners, physician assistants, pharmacists, social workers and other health care professionals all be knowledgeable about the geriatric approach to care. Geriatric medicine varies from most other fields in medicine. While many specialties function on the basis of evidence-based literature, geriatricians and other clinicians caring for older adults must integrate relatively limited evidence with variable physiological changes and complex psychosocial determinants. Geriatricians are used to caring for 90 year olds with multiple chronic illnesses. Their variable physiology leads to uncertain responses to pharmacotherapy, and their personal goals and wishes need to be incorporated into any plan of care. Practicing geriatric medicine requires the ability to see patterns. But it goes one step further, as the rules are constantly in flux. Every patient is an individual with particular needs and goals. In order to provide true person centered care to older adults, one has to incorporate these factors into the decision making process. The proposed handbook is designed to present a comprehensive and state-of-the-art update that incorporates existing

literature with clinical experience. Basic science and the physiology of aging create a background, but are not the main focus. This is because every chapter has been written through the lens of "person centered care." This book is about focusing on what matters to the person, and how that is not always about pathology and physiology. The reader generally will not find simple solutions to symptoms, diseases and syndromes. In fact, the key to caring for geriatric patients is the ability to think both critically and divergently at the same time. Geriatrics encompasses multiple disciplines and spans all of the subspecialties. It requires knowledge of working within an interdisciplinary team. It requires an appreciation of how quality of life varies with each individual and creates treatment and care plans that also vary. And most of all, it requires a firm commitment to first learning who the person is so that all of the necessary data can be analyzed and integrated into a true person centered plan of care. This book aims to serve as an unparalleled resource for meeting these challenges. Updated and revised from the previous edition, this text features over 40 new peer-reviewed chapters, new references, and a wide array of useful new tools that are updated on a regular basis by interdisciplinary and interprofessional experts in geriatric medicine.

**Geriatric Palliative Care** Oct 18 2021 The growing geriatric population in the United States has created an increasing need for palliative medicine services across the range of medical and surgical specialties. Yet, palliative medicine lacks the resources to carry such a workload itself. Geriatric Palliative Care addresses this need by encouraging individual specialties to "own" the management of elderly with the same vigor as they "own" other key management competencies within their specialty. This clinically focused and highly practical handbook, which compliments the more comprehensive text Geriatric Palliative Care by Sean Morrison and Diane Meier (Oxford University Press, 2003), encourages this process of learning and ownership across many medical specialties. Designed to be readable and easily accessible to a range of health care providers, Geriatric Palliative Care outlines specific strategies for caring for specific palliative care issues common in elderly patients. The handbook also provides evidence based advice for helping patients, relatives, and staff cope with such issues as polypharmacy, dementia and consent, multiple pathologies, home care, elderly caregivers, and supporting the elderly in the place where they would like to be.

**Ethical Dimensions of Geriatric Care** Oct 30 2022 There is both a timeliness and a transcendent 'rightness' in the fact that scholars, clinicians, and health professionals are beginning to examine the ethics-based components of decision making in health care of the elderly. Ethics - as the discipline concerned with right or wrong conduct and moral duty - pervades hospital rooms, nursing home corridors, physicians' offices, and the halls of Congress as decisions are made that concern the allocation of health-related services to individuals and groups in need. In particular, care of older persons recently has received disproportionate attention in discussions of ethics and clinical care. Age alone, of course, should not generate special focus on ill individuals about whom concerns arise based on value conflicts tacitly involved in the delivery of health care. Having said that age is not the principal criterion for attention to ethics-based concerns in health care, it must be acknowledged that old people have a high prevalence of conditions that provoke interest and put them in harm's way if value conflicts are not identified and seriously addressed. Issues that concern autonomy, the allocation of scarce resources, inter-generational competition and conflict, the withholding of treatment in treatable disease, and substitute and proxy decision making for the cognitively impaired all have special relevance for older persons.

Creating a Value Proposition for Geriatric Care Jan 21 2022 This book creates a value proposition in geriatric care - a promise of value to be delivered to improve care and to provide specific benefits to healthcare systems. It describes strategies and understanding of the incentives, barriers encountered in promoting changes in

the healthcare systems, and discusses numerous examples and outcomes. Drawn from many fields such as medicine and science, sociology, politics, business and economics, the book helps guide the introduction of geriatric principles into mainstream medical care with the goal of improving the care and quality of life of older persons in all healthcare systems.

Case Studies in Geriatric Medicine Jan 27 2020 This case-based approach to geriatric medicine is suitable for all health professionals and trainees who provide care for the elderly, including interns, residents, geriatric fellows, physicians in practice, and nurse practitioners. Illustrated with more than 40 cases based on the authors' experience in clinical practice, the examples range from the healthy elderly to those with advanced cognitive or physical impairments. Discussions are evidence-based with extensive references, emphasizing differential diagnosis, atypical presentations in late life, age-appropriate medical management, interdisciplinary methods and care in the context of different health care settings. The authors have distilled a wealth of practical and clinical experience in this area to produce a user-friendly guide to geriatric medicine. This is the ideal study guide for certifying examinations and highly suitable as a textbook for courses in geriatric medicine and gerontology.

*The Empowered Caregiver* Oct 06 2020 Taking responsibility for the healthcare, safety, and financial affairs of our parents as they near the end of their life is an immense undertaking and comes with challenges, logistics, and stresses that we don't always know how to navigate. We want to provide the best care we can and make the right decisions for our parents, but we need tips, tools, and education around this and help and encouragement as we do it. *The Empowered Caregiver* is a pocket support guide specifically designed to provide you with strategies and solutions for caring for your aging parents. It offers useful interventions to frame your thinking, help you manage difficult situations, and reduce your stress as your parents decline and need greater assistance. In this book, you'll find quick ideas that you can immediately apply, easy-to-view lists, scripts to use for tough conversations, examples of questions to ask doctors and lawyers, and other resources, all rooted in author Linda Fodrini-Johnson's deep understanding of aging and life transitions and her 30+ years as a therapist, counselor, and certified geriatric care manager. It's organized by topic, so you can quickly flip to the information you need most, and it covers all aspects of eldercare, answering questions you didn't even know you had with compassion and experience. Whether you're an adult child whose parents are aging, an eldercare beginner who doesn't know where to start, someone who is emotionally impacted by the decline of a loved one, a family member of an elder with dementia, or someone seeking expert advice on how to handle their parents' affairs, this book will empower you with the insights, advice, and support you need. *The Empowered Caregiver* is an essential companion you can keep at your side and a must-read for anyone with aging parents. You'll learn how to improve life for your parents, your family, and yourself.

*Handbook of Geriatric Medicine* Mar 30 2020 Geriatric medicine is aimed at the promotion of health in older adults. There is no particular age at which patients are placed under the care of a geriatrician. It depends on the patient's needs. Owing to a physiologic decline in organs, older adults develop certain diseases and complications from even minor problems. Sometimes, even multiple problems can compound, often leading to polypharmacy. This can lead to adverse drug reactions and drug interactions. Geriatric medicine can have several specializations, depending on the care provided to the elderly. Some of such specializations are geriatric nephrology, geriatric dentistry, geriatric rheumatology, geriatric urology, etc. This book provides comprehensive insights into the field of geriatric medicine. It presents researches and studies performed by experts across the globe. It will help the readers in keeping pace with the rapid changes in this field.

*Principles of Geriatric Critical Care* Jun 13 2021 Provides coverage of the issues

surrounding geriatric critical care, emphasising assessment and treatment.

**Legal Aspects of Elder Care** Aug 28 2022 A wide variety of legal issues surround caring for older individuals. Health and human service practitioners need to plan, provide and evaluate geriatric care, while also understanding public policies. Legal knowledge is an essential part of caring for the elderly. Students and professionals must be able to deliver appropriate care while also being aware of any legal, ethical and political issues that may arise. Legal Aspects of Elder Care provides a clear overview of geriatric policies and laws, enabling the reader to use informed decision-making with older clients.

*The Encyclopedia of Elder Care* May 25 2022 "The information [in this book] is amazing. I reviewed topics in which I have expertise and was very satisfied. This is an excellent addition to my library and I will refer to it often, much like a medical dictionary. Score: 90, 4 Stars.--Doody's Medical Reviews "The third edition of this encyclopedia provides 273 comprehensive, yet succinct, entries on a variety of topics related to elder care. ... In addition, many of the entries include see also references that help readers easily navigate the book. Entries are written at an undergraduate level and would be useful for practitioners, students, and caregivers...Recommended."--Choice: Current Reviews for Academic Libraries This interdisciplinary clinical reference encompasses more than 310 current entries on a broad range of topics related to geriatrics and geriatric care across multiple health care disciplines. The third edition reflects the many advances in geriatrics that have occurred since the publication of the second edition in 2006. It contains the updated, evidence-based contributions of more than 260 nationally recognized geriatric healthcare professionals regarding elder-care concerns relating to society, community, caregiving, and the individual. Completely new entries address Geriatric Care Models (acute care for elders, Project BOOST), Geriatric Health Issues (diarrhea in adults, prolonged hospitalization, frailty, fronto-temporal dementia, re-hospitalization, acute urinary retention, personality and aging, primary palliative care), Technology and Aging (Smart home sensors, Telehealth, Surveillance technology), and more. The Encyclopedia is organized alphabetically and includes links to important Web-based resources and Apps. Clinical topics comprehensively address diagnosis, treatment, and disease management. Health care clinicians across the continuum will find this reference--the only one of its kind--to be a valuable guide to making appropriate referrals to social service providers, and social service professionals will be well informed by highly accessible descriptions of diagnoses, clinical syndromes, and care management. Key Features: Includes over 310 updated geriatric and geriatric care clinical entries across multiple healthcare disciplines Contains state-of-the-art contributions from over 260 nationally recognized geriatric healthcare experts Provides clinical content for social service professionals and social care information for clinicians Offers new information on multiple topics relating to Geriatric Care Models, Geriatric Health Concerns, and Technology and Aging References numerous Web-based resources and Apps
