Genital Infections and Infertility Feb 06 2021

This book highlights the impact of genital tract infections on female infertility, male infertility, and even veterinary infertility. A comprehensive source on genital infections essential for all infertility specialists is now at your hands.

Contemporary Ob/gyn Nov 05 2020

American Journal of Obstetrics and Gynecology

May 31 2020

Year Book of Obstetrics, Gynecology, and Women's Health, Feb 18 2022 The Year Book of Obstetrics, Gynecology, and Women's Health brings you abstracts of the articles that reported the year's breakthrough developments in obstetrics, gynecology and women's health,

carefully selected from more than 500 journals worldwide. Expert commentaries evaluate the clinical importance of each article and discuss its application to your practice. There's no faster or easier way to stay informed! Topics in this annual edition include obstetrics, reproductive endocrinology and infertility, and cancer/neoplasia.

Reproductive Injustice Aug 27 2022 A troubling study of the role that medical racism plays in the lives of black women who have given birth to premature and low birth weight infants Black women have higher rates of premature birth than other women in America. This cannot be simply explained by economic factors, with

poorer women lacking resources or access to care. Even professional, middle-class black women are at a much higher risk of premature birth than low-income white women in the United States. Dána-Ain Davis looks into this phenomenon, placing racial differences in birth outcomes into a historical context, revealing that ideas about reproduction and race today have been influenced by the legacy of ideas which developed during the era of slavery. While poor and low-income black women are often the “mascots” of premature birth outcomes, this book focuses on professional black women, who are just as likely to give birth prematurely. Drawing on an impressive array of interviews with nearly fifty mothers, fathers, neonatologists, nurses, midwives, and reproductive justice advocates, Dána-Ain Davis argues that events leading up to an infant’s arrival in a neonatal intensive care unit (NICU), and the parents’ experiences while they are in the NICU, reveal subtle but pernicious forms of

racism that confound the perceived class dynamics that are frequently understood to be a central factor of premature birth. The book argues not only that medical racism persists and must be considered when examining adverse outcomes—as well as upsetting experiences for parents—but also that NICUs and life-saving technologies should not be the only strategies for improving the outcomes for black pregnant women and their babies. Davis makes the case for other avenues, such as community-based birthing projects, doulas, and midwives, that support women during pregnancy and labor are just as important and effective in avoiding premature births and mortality.

WHO recommendation on umbilical vein injection of oxytocin for the treatment of retained placenta Dec 31 2022 Efforts to prevent and reduce morbidity and mortality due to PPH (Postpartum haemorrhage) can help to address the profound inequities in maternal and perinatal health globally. To achieve this, skilled health personnel, health managers, policy-makers and other stakeholders need up-to-date and evidence-informed recommendations to guide clinical policies and practices. In 2019, the

Executive Guideline Steering Group (GSG) for the World Health Organization (WHO) maternal and perinatal health recommendations prioritized updating of the existing WHO recommendation: Umbilical vein injection of oxytocin for the treatment of retained placenta, in response to the availability of new evidence. The recommendation in this document thus supersedes the previous WHO recommendations on "intraumbilical vein injection of oxytocin for treatment of retained placenta" as published in the 2012 guideline, WHO recommendations for the prevention and treatment of postpartum haemorrhage.

Nurse-Midwifery Handbook Aug 15 2021 This practical handbook of prenatal and postpartum care is written for nurse practitioners, nurse-midwives, graduate students, and practicing OB/GYN nurses. It includes coverage of history taking, physical exam, laboratory tests, health education, initial and return prenatal visits, postpartum period, and family planning. Focus is

placed on physical and psychosocial well-being and health promotion. Special features include: Healthy Pregnancy Questions for differentiating between common discomforts and potential complications; Key Moments tables that summarize essential information for key gestational ages; and History Taking forms. Numerous appendices permit easy and quick reference. A must have reference for nurse practitioners and nurse-midwives.

Who's who in the South and Southwest Apr 30 2020 Includes names from the States of Alabama, Arkansas, the District of Columbia, Florida, Georgia, Kentucky, Louisiana, Mississippi, North Carolina, Oklahoma, South Carolina, Tennessee, Texas and Virginia, and Puerto Rico and the Virgin Islands.

WHO Recommendations on Intrapartum Care for a Positive Childbirth Experience

Mar 22 2022 This up-to-date comprehensive and consolidated guideline on essential intrapartum care brings together new and existing WHO recommendations that when delivered as a package will ensure good-quality and evidence-based care irrespective of the setting or level of health care. The recommendations presented in this guideline are neither country nor region specific and acknowledge the variations that exist globally as to the level of available health services within and between countries. The guideline highlights the importance of woman-centred care to optimize the experience of labour and childbirth for women and their babies through a holistic human rights-based approach. It introduces a global model of intrapartum care which takes into account the complexity and diverse nature of prevailing models of care and contemporary practice. The recommendations in this guideline are intended

to inform the development of relevant national- and local-level health policies and clinical protocols. Therefore the target audience includes national and local public health policy-makers implementers and managers of maternal and child health programmes health care facility managers nongovernmental organizations (NGOs) professional societies involved in the planning and management of maternal and child health services health care professionals (including nurses midwives general medical practitioners and obstetricians) and academic staff involved in training health care professionals.

Obstetric Catastrophes Sep 03 2020 This book provides a comprehensive overview of critical care obstetrics. The text reviews different diseases and complications that can cause a pregnant patient to go into critical condition, while outlining treatment and management strategies for effective patient care. Critical scenarios covered include obstetric hemorrhage,

pulmonary edema in preeclampsia, cardiac arrest, septic shock, abdominal hypertension, uterine rupture, and acute renal failure. Written by experts in the field, *Obstetric Catastrophes: A Clinical Guide* is a valuable resource for critical care intensivists, obstetricians, and any practitioners involved in the treatment and management of the obstetric patient in critical condition.

Fertility-oriented Female Reproductive Surgery Mar 10 2021 In modern practice, the role of female reproductive surgery is declining apparently due to the widespread availability of assisted reproductive technology as an attractive option for infertile couples. To be more precise, prevention of female infertility should be the ultimate goal of all obstetricians and gynecologists during operating on females in the reproductive age. This book concentrates on different issues of fertility preservation both in obstetrics and gynecology. Not a matter of kindly or courtesy, but the core of obstetricians

and gynecologists' work is to restore normal anatomy and to preserve fertility for all women in the reproductive age.

Proceedings of the Third International Workshop on Diagnostic Ultrasound Imaging, Cairo, Egypt, March 1978 Jul 14 2021

WHO recommendation on routine antibiotic prophylaxis for women undergoing operative vaginal birth Jul 26 2022 “Operative vaginal birth” is the term used to describe delivery of the fetal head assisted by either vacuum extractor or forceps. The Guideline Development Group noted that the available evidence, from high-income countries, strongly supports the use of a single dose of intravenous amoxicillin (1 g) and clavulanic acid (200 mg) administered as soon as possible after birth and no more than 6 hours after birth. The effects of other antibiotics and routes of administration for this indication are unknown. The Guideline Development Group recognized that intravenous amoxicillin and clavulanic acid may not be readily available or

feasible to use in resource-limited settings and suggested that where this combination is not available, providers should consider the use of an appropriate class of antibiotics with similar spectrum of activity, based on local antimicrobial resistance patterns, safety profile (including allergies), the clinician’s experience with that class of antibiotics, availability and cost. The risk of postpartum infections and side-effects of antibiotics should be discussed with all women undergoing operative vaginal birth at the earliest time possible before or after birth. This recommendation was based on agreement by the Guideline Development Group that the improved health outcomes for women were clinically significant and outweighed the potential effects on emerging antimicrobial resistance.

WHO recommendation on advance misoprostol distribution to pregnant women for prevention of postpartum haemorrhage Nov 29 2022 In 2019, the Executive Guideline Steering Group (GSG) for World Health Organization (WHO) maternal

and perinatal health recommendations prioritized updating of the existing WHO recommendations for advance misoprostol distribution to pregnant women for prevention of PPH (Postpartum haemorrhage) in response to the availability of new evidence. The recommendation in this document thus supersedes the previous WHO recommendation for the prevention of PPH as published in the 2012 guideline, WHO recommendations for the prevention and treatment of postpartum haemorrhage.

Gestational Diabetes During and After Pregnancy Jun 12 2021 Gestational Diabetes Mellitus is becoming an increasingly prevalent disease as obesity and other chronic diseases are on the rise. It requires careful and informed clinical management as the care received during pregnancy affects not only perinatal health but the risk of developing type 2 diabetes even decades into the future, in both the mother and the child. From epidemiology and

pathophysiology to diagnosis and management, covering recent breakthroughs in research and up-to-date developments in clinical practice, *Gestational Diabetes During and After Pregnancy* offers the reader a comprehensive and current look at Gestational Diabetes. Anyone involved in the research, public health or clinical aspects of Gestational Diabetes will find this volume a valuable aid in consolidating all recent developments regarding this disease.

WHO recommendation on uterine balloon tamponade for the treatment of postpartum haemorrhage Feb 01 2023

Reports of the Executive Officers Jan 26 2020

WHO recommendation on routes of oxytocin administration for the prevention of postpartum

haemorrhage after vaginal birth Oct 29 2022 In 2019, the Executive Guideline Steering Group (GSG) for World Health Organization (WHO) maternal and perinatal health recommendations prioritized the updating of the existing WHO recommendations for intravenous (IV) versus intramuscular (IM) oxytocin for prevention of PPH after vaginal birth in response to the availability of new evidence. The recommendation in this document thus supersedes the previous WHO recommendations for the prevention of PPH as published in the 2012 guideline: WHO recommendations for the prevention and treatment of postpartum haemorrhage.

WHO recommendation on tocolytic therapy for improving preterm birth outcomes Oct 17 2021 In 2021, the Executive Guideline Steering Group (GSG) for the World Health Organization (WHO) maternal and perinatal health recommendations prioritized updating the then current recommendations on the use of

tocolysis as published in the WHO recommendations on interventions to improve preterm birth outcomes. This decision was based on new evidence on the subject that had become available. The recommendations in this document thus supersedes the previous WHO recommendations on the use of tocolysis as published in the 2015 guidelines, WHO recommendations on interventions to improve preterm birth outcomes.

Pocket Obstetrics and Gynecology Jan 08 2021
Publisher's Note: Products purchased from 3rd Party sellers are not guaranteed by the Publisher for quality, authenticity, or access to any online entitlements included with the product. This practical, high-yield Pocket Notebook title is an ideal on-the-go reference for trainees and practitioners of obstetrics and gynecology. Written by residents with oversight from fellows and faculty experts, and perfect for initial care plans during rounds, this easy-to-use, loose-leaf resource is packed with up-to-date

information answering the clinical questions you face every day. *Pocket Obstetrics and Gynecology, Second Edition*, is an indispensable quick resource you won't want to be without! [Sex in the Senior City](#) May 24 2022
Dr. M. Maurice Abitbol has spent many years treating and interviewing patients about their sexual lives. As the chairman of obstetrics and gynecology at New York's Jamaica Hospital Medical Center and as an associate professor at the State University of New York, he has brought both practical and academic perspectives to the subject of human sexuality. Drawing on his experiences with a wide variety of senior, sexually active patients as well as his extensive knowledge of the cultural, historical and anthropological aspects of human sexual attitudes and adaptations, Dr. Abitbol gathers together both the dynamic metrics and the psychologies inherent in the often overlooked area of senior sexual activity. His care in presenting case studies which form the core of

Sex in the Senior City reflects not only an attempt to de-mystify the subject but to bring it into relation with medicine's ever-growing understanding of the nature of aging and its resilient physical and emotional evolutions. Sex in the Senior City will prove a useful source for both the casual researcher and serious medical practitioner alike.

Enhancing Success of Assisted

Reproduction Dec 19 2021 This small-sized book concentrates on highlighting some practical issues mainly related to infertility and assisted reproduction. You will find detailed answers for many controversial issues in this field.

Hysterectomy Mar 02 2023 This book initiates the descriptions of the practical performance of different hysterectomies with conventional and robotically assisted laparoscopy, laparotomy and vaginal surgery. Laparoscopic hysterectomy has been out as an additional technique for hysterectomies for the last couple of decades. As

the necessary light, augmentation and advanced skill has only been introduced into this already 200 year old surgical procedure within the last few decades by laparoscopy, the editors aim to look at the laparoscopic procedures followed by the traditional techniques of hysterectomy with laparotomy and vaginal surgery.

Local Babies, Global Science Sep 27 2022 In the late 1990s, Egypt experienced a boom period in in vitro fertilization (IVF) technology and now boasts more IVF clinics than neighboring Israel. In this book, Marcia Inhorn writes of her fieldwork among affluent, elite couples who sought in vitro fertilization in Egypt, a country which is not only at the forefront of IVF technology in the Middle East, but also a center of Islamic education in the region. Inhorn examines the gender, scientific, religious and cultural ramifications of the transfer of IVF technology from Euro-American points of origin to Egypt - showing how cultural ideas reshape the use of this technology and in turn, how the

technology is reshaping cultural ideas in Egypt.

Intra Uterine Adhesions Sep 15 2021 The book covers the entire aspect of intrauterine adhesions and Asherman's syndrome highlighting important points. It discusses etiopathogenesis to diagnosis and the current guidelines with effective treatment policies. It covers new treatment techniques, use of stem cell therapy and various scenarios with the best management of them. The book also covers pregnancy and associated complications. It takes into account the vast clinical experience of the authors all over the world clubbed with the academic evidence available to date. The book is relevant for endoscopic surgeons, hysteroscopists, infertility specialists and

obstetricians at large, and anyone who wishes to know more about this subject.

Burghardt's Primary Care Colposcopy Jul 02 2020 Like the successful first edition, the great strength of this completely revised and updated second edition of Burghardt's Primary Care Colposcopy is its oversized, high-quality color colposcopic photographs. Novice and experienced examining practitioners will appreciate the utility of these diagnostic-quality images in making confident assessments regarding the appearance of the cervix as seen in colposcopy. All requisite information for the successful implementation of this standard gynecologic procedure - histopathologic processes, fundamentals of colposcopic technique and examination, equipment, terminology, documentation, and standard guidelines - is encompassed in this concise and practical textbook and atlas. Augmentations and highlights of the second revised and updated edition: More than 350 oversized, high-quality

color colposcopic photographs and technical illustrations - 20% of which are new to the second edition Updated information on the central role of the human papillomavirus (HPV) in cervical cancer and the development of preventative HPV vaccines Essential new chapters on colposcopy of the vulva, vagina, and perianal region and the common etiology of lesions at these sites Cohesive concept, organization and presentation - produced and authored by a working team of three experts with decades of experience in gynecology and histopathology Current international guidelines and updated nomenclature formulated by the International Federation for Cervical Pathology and Colposcopy (IFCPC) with the International Society for the Study of Vulvar Disease (ISSVD) and the 2014 WHO Classification of Tumors of Female Reproductive Organs Primary care practitioners, nurse practitioners, residents/fellows-in-training in gynecologic oncology programs, and gynecologists and

obstetricians in practice will prize Burghardt's Primary Care Colposcopy as an indispensable partner in accessing colposcopic findings, in reaching the right differential diagnosis, and in achieving the best possible treatment outcomes with assurance and efficiency.

Primary Care in Obstetrics and Gynecology

Oct 05 2020 This book provides a timely revision of the definitive source for quick reference and up-to-date information on the primary health care of women. Containing contributions by leaders in obstetrics-gynecology, primary care and relevant subspecialties, the book presents the latest information from respected authorities. New case studies have been added at the end of each chapter to provide useful information for the busy clinician. New chapters include: Elderly Patients; Cardiovascular Hypertension; The Role of Applied and Genomic Molecular Biology; and Nutrition, Obesity, and Eating Disorders. This book is a must-have reference for the busy clinician
