Plunkett's Insurance Industry Almanac 2008 Jan 14 2022 Insurance and risk management make up an immense, complex global industry, one which is constantly changing. Competition continues to heat up, as mergers and acquisitions create financial services mega-firms. As the insurance industry grows more global, underwriters see huge potential in China, the world's fastest-growing business market. Meanwhile, technology is making back-office tasks easier and more efficient, while direct selling and e-commerce are changing the shape of the insurance industry. This carefully-researched book (which includes a database of leading companies on CD-ROM) is a complete insurance market research and business intelligence tool--everything you need to know about the business of insurance and risk management. The book includes our analysis of insurance and risk management industry trends, dozens of statistical tables, an industry glossary, a database of industry associations and professional organizations, and our in-depth profiles of more than 300 of

the world's leading insurance companies, both in the U.S. and abroad.

Potential Radiation Exposure in Military Operations Mar 28 2023 In 1996, NATO issued guidance for the exposure of military personnel to radiation doses different from occupational dose levels, but not high enough to cause acute health effects-and in doing so set policy in a new arena. Scientific and technological developments now permit small groups or individuals to use, or threaten to use, destructive devices (nuclear, biological, chemical, and cyber-based weaponry, among others) targeted anywhere in the world. Political developments, such as the loss of political balance once afforded by competing superpowers, have increased the focus on regional and subregional disputes. What doctrine should guide decisionmaking regarding the potential exposure of troops to radiation in this changed theater of military operations? In 1995, the Office of the U.S. Army Surgeon General asked the Medical Follow-up Agency of the Institute of Medicine to provide advice. This report is the final product of the Committee on Battlefield Radiation Exposure Criteria convened for that purpose. In its 1997 interim report, Evaluation of Radiation Exposure Guidance for Military Operations, the committee addressed the technical aspects of the NATO directive. In this final report, the committee reiterates that discussion and places it in an ethical context.

Google Cloud Certified Associate Cloud Engineer (ACE)
Feb 27 2023 This book is targeted at efficiently teaching the skills required by the ACE certification-namely deploying applications, monitoring operations, and managing

enterprise solutions. It also helps students demonstrate those skills through certification. The certification requires candidates be able to use both the GCP console and the command-line to perform many common platform-based tasks, but this course does not require students to already have experience with either, going in. This book is also designed to give students the solid foundation of GCP capability that they will need to later build toward the Google Certified Professional Cloud Architect (PCA) certification--which was recently named as 2019 & 2020's top-paying IT certification. This book will prepare you to:

- Set-up and configure Google Cloud accounts using best practices.
- Use GCP services like Cloud Storage, Compute Engine, and Kubernetes Engine in your everyday work.
- Pass the GCP Associate Cloud Engineer certification exam.

No coding experience is required and code used for labs is provided.

International Peacekeeping: The Yearbook of International Peace Operations Dec 13 2021 "International Peacekeeping" is devoted to reporting upon and analyzing international peacekeeping with an emphasis upon legal and policy issues, but is not limited to these issues. It is recognized that in today's world there is a wealth of information available from the internet and through other sources. It is therefore the goal of this Yearbook to make this information available in one publication which both organizes and records events over the course of a year through analytical articles, a chronicle, primary documents, and a bibliography. Topics include inter alia peacekeeping, peace, war, conflict resolution, diplomacy, international law, international security, humanitarian relief, humanitarian law, and terrorism. "The Yearbook" is of scholarly quality but is not narrowly theoretical. It provides the interested public -- diplomats, civil servants, politicians, the military, academics, journalists, NGO employees, and serious citizens -- with a document of record, comment, and a starting point for further research on peacekeeping and related topics. This is achieved not only by the provision of 'basic documents' (on CD ROM), such as Security Council Resolutions and Reports of the UN Secretary- General, but also by expert commentaries on world events. Peacekeeping is treated in a pragmatic light, seen as a form of international military cooperation for the preservation or restoration of international peace and security. Attention is focused not

only on UN peacekeeping operations, but other missions as well. This Yearbook is the continuation of the journal "International Peacekeeping,"
