A written version of the Storrs Lectures delivered at Yale University during the academic year 1921-1922. "Dean Pound has given us a clear, concise introduction to the philosophy of the law. It is so concise that it is impossible to summarize it so as to give any idea of its wealth of learning....An excellent, impartial and concise presentation of the subject..." William Herbert Page, Harvard Law Review 36:115-117 cited in Marke, A Catalogue of the Law Collection at New York University (1953) 922. You became a lawyer to help people and have a great life. Instead, you're working insane hours, not making the money you had hoped, and are not fulfilled by your life as a lawyer. Ali Katz was struggling with the same issues while also being a single mom who needed control of her calendar. When she saw major flaws in the way lawyers, like herself, were taught to serve families and small business owners, she decided to do something about it. Ali developed a new way to practice law-one that puts relationships before transactions. And while that made her happy, the icing on the cake was that she started generating over \$1 million annually in just three years, all while going to her office just three days a week. Now, Ali brings this knowledge and experience to bear in The New Law Business Model. If you're a lawyer, there's no need to abandon your dreams. In this book, Ali shows how to use your most valuable asset-your law degree-for the good of families, small businesses, and most importantly, your well-being. Pulling from her own journey, Ali shares the roadmap she followed and insights she found that made her success possible. The old law business model is broken. It's time to replace it with one that works for you, your family, and your clients. It's time to take back your time, your income, and your humanity. The New Law Business Model was created to guide inspired lawyers like you into a new era. Building on earlier work in the anthropology of law and taking a critical stance toward it, June Starr and Jane F. Collier ask, "Should social anthropologists continue to isolate the 'legal' as a separate field of study?" To answer this question, they confront critics of legal anthropology who suggest that the subfield is dying and advocate a reintegration of legal anthropology into a renewed general anthropology. Chapters by anthropologists, sociologists, and law professors, using anthropological rather than legal methodologies, provide original analyses of particular legal developments. Some contributors adopt an interpretative approach, focusing on law as a system of meaning; others adopt a materialistic approach, analyzing the economic and political forces that historically shaped relations between social groups. Contributors include Said Armir Arjomand, Anton Blok, Bernard Cohn, George Collier, Carol Greenhouse, Sally Falk Moore, Laura Nader, June Nash, Lawrence Rosen, June Starr, and Joan Vincent. A compelling new look at the role of today's international courts In 1989, when the Cold War ended, there were six permanent international courts. Today there are more than two dozen that have collectively issued over thirty-seven thousand binding legal rulings. The New Terrain of International Law charts the developments and trends in the creation and role of international courts, and explains how the delegation of authority to international judicial institutions influences global and domestic politics. The New Terrain of International Law presents an in-depth look at the scope and powers of international courts operating around the world. Focusing on dispute resolution, enforcement, administrative review, and constitutional review, Karen Alter argues that international courts alter politics by providing legal, symbolic, and leverage resources that shift the political balance in favor of domestic and international actors who prefer policies more consistent with international law objectives. International courts name violations of the law and perhaps specify remedies. Alter explains how this limited power--the power to speak the law--translates into political influence, and she considers eighteen case studies, showing how international courts change state behavior. The case studies, spanning issue areas and regions of the world, collectively elucidate the political factors that often intervene to limit whether or not international courts are invoked and whether international judges dare to demand significant changes in state practices.
