Surveys major research into the structure, processes, and functions of the human brain, summarizing current knowledge of the organ's physiology, chemistry, and psychology One of the great advantages of rational-emotive therapy (RET) and cognitive behavior therapy (CBT) is that they frequently employ psycho educational methods--including bibliotherapy, workshops, lectures, courses, recordings, and films. I created RET at the beginning of 1955 after I had abandoned the practice of psychoanalysis because I found it to be highly inefficient and philosophically superficial. Being almost addicted to one-to-one therapy as a result of my analytic training and experience, I at first did RET only with

individual clients and found this pioneering form of CBT considerably more effective than the other therapies with which I had experimented. By 1957, however, I realized that RET could be taught to large numbers of persons through self-help books and articles and that RET-oriented writings could not only prove valuable to the general public but that they could also be successfully employed to hasten and intensify the therapy of my individual clients. I therefore wrote a number of RET self help books--especially *How to Live with a Neurotic* (1957), *Sex without Guilt* (1958), *A New Guide to Rational Living* (with Robert A. Harper; original edition, 1961), and *A Guide to Successful Marriage* (with Robert A. Harper, 1961). Most organizations are adept at using small groups - witness the widespread use of teams. Yet, how do you work with 20 to 500 people at a time? How would you involve

all stakeholders in a critical issue or the organization's future? How can you generate contributions, consensus and commitment from the bottom up? People want to contribute but often are frustrated through a lack of opportunity or means. Large Group Processes allow people to participate over things that matter to them. Participation leads to commitment and commitment to ownership. Working with large groups is relatively new, but these processes are proving very effective with positive outcomes. Audiences can be customized with stakeholders who might be inside or outside the organization, such as employees, customers, suppliers, shareholders, the general public and any other interested parties. Applications are wide-ranging, touching on almost every aspect of organizational life. The Large Group Facilitator's Manual offers you a blueprint for planning, preparing, running and reporting successful large group events. The authors walk you through six different processes from concept to step-by-step facilitation with sample invitations, checklists and even scripts. It is the first facilitator's guide to cover so many processes with such detailed instructions. An update to this best-selling treatment program for domestic violence abusers. Presented in a 26- or 52-week psychoeducational format, STOP is packed with updated skills, exercises, videos, handouts, and homework assignments that challenge men to examine themselves and develop new tools to manage their relationship issues.
