From Hacienda to Bungalow May 03 2020 What do houses tell us about the people who built or remodeled them? Adobe carefully painted to make it look like brick says as much about Anglo culture and presence in New Mexico from 1850 to 1912 as does any political history of those years. This study of domestic architecture, though, is more than a regional one; it addresses issues basic to an understanding of how one culture transports its social mores, cultural values, and material goods to a frontier where they can take hold.

Hagia Sophia, 1850-1950 Jan 11 2021 Hagia Sophia, the Church of Holy Wisdom, sits majestically atop the plateau that commands the straits separating Europe and Asia. Located near the acropolis of the ancient city of Byzantium, this unparalleled structure has enjoyed an extensive and colorful history, as it has successively been transformed into a cathedral, mosque, monument, and museum. In *Hagia Sophia, 1850-1950*, Robert S. Nelson explores its many lives. Built from 532 to 537 as the Cathedral of Constantinople, Hagia Sophia was little studied and seldom recognized as a great monument of world art until the nineteenth century, and Nelson examines the causes and consequences of the building's newly elevated status during that time. He chronicles the grand dome's modern history through a vibrant cast of characters—emperors, sultans, critics, poets, archaeologists, architects, philanthropists, and religious congregations—some of whom spent years studying it, others never visiting the building. But as Nelson shows, they all had a hand in the recreation of Hagia Sophia as a modern architectural icon. By many means and for its own purposes, the West has conceptually transformed Hagia Sophia into the international symbol that it is today. While other books have covered the architectural history of the structure, this is the first study to address its status as a modern monument. With his narrative of the building's rebirth, Nelson captures its importance for the diverse communities that shape and find meaning in Hagia Sophia. His book will resonate with cultural, architectural, and art historians as well as with those seeking to acquaint themselves with the modern life of an inspired and inspiring building.

Hijos Del Pueblo Apr 13 2021 The everyday lives of indigenous and Spanish families in the countryside, a previously under-explored segment of Mexican cultural history, are now illuminated through the vivid narratives presented in *Hijos del Pueblo* ("offspring of the village"). Drawing on neglected civil and criminal judicial records from the Toluca region, Deborah Kanter revives the voices of native women and men, their Spanish neighbors, muleteers, and hacienda peons to showcase their struggles in an era of crisis and uncertainty (1730-1850). Engaging and meaningful biographies of indigenous villagers, female and male, illustrate that no scholar can understand the history of Mexican communities without taking gender seriously. In legal interactions native plaintiffs and Spanish jurists confronted essential questions of identity and hegemony. At once an insightful consideration of individual experiences and sweeping paternalistic power constructs, *Hijos del Pueblo* contributes important new findings to the realm of gender studies and the evolution of Latin America.

Facing Facts Aug 18 2021 Shi provides a comprehensive history of the rise of realism in American culture, vividly capturing the character and sweep of this all-encompassing movement, from Winslow Homer to the rise of the Ash Can school, and from Whitman to Theodore Dreiser.

On the Publishing and Dissemination of Music, 1500-1850 Dec 10 2020 Here published for the first time, is the final book written by the late Hans Lenneberg, respected scholar and longtime head of the music library at the University of Chicago. In it, the author pursues the impact of printing technologies, methods of distribution, government regulations, and evolving business practices as they affect music and musical life. Written with insight and humor, this book surveys a changing industry, century by century, pulling together information from many specialized studies and pointing out previously unnoticed trends and remaining puzzles.

Zinc Sculpture in America, 1850-1950 Oct 20 2021 Introduced in the United States as a new material for statuary in the mid-nineteenth century, zinc has properties that allowed replication at low cost. It was used to produce modestly priced serial sculpture displayed throughout the nation on fountains, public monuments, and war memorials. Imitative finishes created the illusion of more

costly bronze, stone, or polychrome wood. This first comprehensive overview of American zinc sculpture is interdisciplinary, engaging aspects of art history, popular culture, local history, technology, and art conservation. Included is a generously illustrated catalogue presenting more than eight hundred statues organized by type: trade figures and Indians, gods and goddesses, fountain figures, animals, famous men, military figures, firemen, cemetery memorials, and religious subjects. The compilation of data on these statues will be valuable to scholars, filling the current void in research libraries. The author's experience as a conservator will also make the an essential resource for historic preservationists seeking to repair statues now damaged by years of outdoor exposure. This book has 555 illustrations, 354 of which are in color. Carol Grissom is Senior Objects Conservator at the Smithsonian's Museum Conservation Institute.

Life After Death Jul 29 2022 Lisa Wilson traces the experiences of widows in a society that was developing a new ideology of proper female behavior. Using wills, court records, almshouse registers, correspondence, and diaries to explore the lives of widows during this period, Wilson alters our understanding of the diversity of women's experiences and adds a new dimension to the "separate spheres" explanation of gender roles. For this group of early American women, family concerns rather than the dictates of femininity lay at the core of their lives.

Nativism and Slavery Jul 17 2021 Political protest against immigrants has come to a head several times in American history. The most famous and influential such protest was exemplified by the Know-Nothing Party, founded in 1854 and directed especially against Catholic immigrants. By the end of 1855 the party had elected eight governors, over one hundred Congressmen, and thousands of local officials. Prominent politicians of every persuasion joined the party, which then changed its name to the American Party. It; became a major element in the new Republican Party, which first produced a presidential candidate in 1856. The party and its influence has not attracted much attention from historians, because the events involved in the coming of the Civil War eclipsed interest in a movement that was only; peripherally involved with Civil War issues.; The Know-Nothings had a precipitous decline, starting with the 1856 election, at which their presidential candidate Millard Fillmore carried only one state. The Republican Party soon eclipsed it, too. Tyler Anbinder has written the first comprehensive history of the Know-Nothings, and his book represents a major revision of historiography in the years leading up to the Civil War.

Music in Ibero-America to 1850 Nov 08 2020 When Latin Americans think of high art they do so primarily in terms of literature and the visual arts. In addition, the study of the first three centuries has until recently taken the back seat in the standard literature dealing with the music of that part of the world. This trend must be reversed for the lands south of the border to arrive at a broader understanding of their place in the world culture. This book attempts to redress the situation by providing the curious layman and the serious researcher with the tools to further clarify the role of cultivated music in the early life of the Ibero-American countries. It surveys the available historical data on personalities, events, and institutions that shaped the history of art music in Ibero-America (that is, its Spanish-speaking countries and Brazil) between the arrival of the Europeans in 1492 and 1850. This study of Music and Music Activities in Ibero-America to 1850 emphasizes historical data rather than musical analysis. Folk and popular music are mentioned only to the extent that they have affected the cultivated strains of Ibero-American music. Of interest to music historians and students of Ibero-American culture.

Manhattan for Rent, 1785-1850 Sep 18 2021 In this interesting and wide-ranging book, Elizabeth Blackmar investigates the development of New York City's housing market from colonial times to 1850. She discusses public officials, landowners, builders, renters and tenants, and the interplay among and between these groups as the value of land in the city skyrocketed in the early nineteenth century and made renting the only possibility for most New Yorkers.--American Studies International

The Slave Catchers Nov 20 2021 In this thoroughly researched documentation of a historically controversial issue, the author considers the background,

passage, and constitutionality of the Fugitive Slave Law. The author's relation of public opinion and the executive policy regarding the much disputed law will help the reader reach a decision as to whether the law was actually a success or failure, legally and socially. From Market-Places to a Market Economy Aug 06 2020 Through innovative use of little used archival material, Rothenberg finds that the relevant economic magnitudes - farm commodity prices, wages for day and monthly farm labor, and the determinants of rural wealth holding - behaved as if they had been formed in a market. This ground breaking discovery reveals how an agricultural economy that lacked both an important export staple and technological change could experience market-led growth. To understand this impressive economic development, Rothenberg discusses a number of provocative questions.
