**Musical Instrument Makers of New York** Oct 15 2021 The history of any skilled urban trade is ultimately tied to the growth and development of the city in which it is located. From its humble eighteenth-century beginnings, instrument making grew to be one of New York City's most sizable and important trades. By the 1840s, the city was the largest producer of instruments in the Western Hemisphere, and, in the decades that followed, designs and innovations pioneered by New York artisans influenced and inspired instrument makers throughout the world. Although many of these instruments survive in American museums, there existed no comprehensive guide to their makers. Nancy Groce's biographical dictionary chronicles all of these master craftsmen in colorful detail, from the obscure work of Geoffry Stafford in 1691, to the zenith of the 1890s, and on to the Great Depression of the 1930s.

**Horace Darwin's Shop, A History of the Cambridge Scientific Instrument Company 1878-1968** Apr 01 2023

Horace Darwin's Shop traces the early years of one of the most famous and best respected instrument companies in the world - the Cambridge Scientific Instrument Company, at the forefront of the industry for more than half a century. The book is largely about people, many of them famous engineers and scientists who became closely involved with "Horace's Shop", about the forging of links between industry and university and above all about the ability of one man, Horace Darwin, youngest son of Charles Darwin, to create beauty and elegance in simple, clever design. The account of the early history of the Cambridge Scientific Instrument Company is presented in two parts: the first is a historical account of those instruments particularly relevant to the growth of the Company and the second is devoted to individual instruments and topics. The book will be of interest to students of the history of instrumentation as well as to readers who may already be familiar with the Company and its products. About the authors Arthur F Wolfe began his career at the age of 14 as an office boy at the Cambridge Scientific Instrument Company, where he worked until retirement in 1966. In 1932 he became Assistant Accountant of the company and ten years later was appointed Chief Accountant and Assistant Secretary, becoming Company Secretary in 1947, a post he held for 17 years Michael J G Cattermole joined the Cambridge Instrument Company research department in Cambridge in 1959 where he worked on the design of gas analysis and industrial instruments until 1966. After a two year break he rejoined in 1968 as the head of the Muswell Hill development laboratory and was with the company during the takeovers by George Kent and Brown Boveri in 1968 and 1974. In 1970 he was appointed Technical Manager of Foster Cambridge Ltd, a post held until leaving in 1981 to become a teacher.

**Regal Musical Instruments - Volume Two: Addendum and Errata** Dec 25 2019 (Book). From the late 19th century through the 1950s, Chicago was the powerhouse of American musical instrument manufacturing. Among the most active makers was the Regal Musical Instrument Company. Descended from an Indianapolis business, Regal made a full complement of stringed instruments for a variety of brands. Along the way, the company even introduced a few new musical novelties into the market. This book is an addendum to Regal Musical Instruments: 1895-1955 and includes previously unused sources, including period catalogs and many illustrations along with color photos taken specifically for this publication.

**The Instrumental Music Director's Guide to Comprehensive Program Development** Nov 15 2021 The Instrumental Music Director's Guide to Comprehensive Program Development gives practical solutions to the many issues that confront music directors. The topics addressed include: A review of tests which can be used to develop an all-inclusive student profile identifying strengths and weaknesses as a prologue to preparing individualized curricula A discussion of the "informed approach" predicated on understanding relationships among music, logical deduction, and the acoustic sciences thereby accelerating the learning process in music, increasing the knowledge base, and developing cognitive skills that can be applied to other studies A measuring process used to accurately calculate the size of a beginning student in relation to the size of the selected instrument to ensure the two will be compatible A procedure for introducing students to the many different instruments The protocol for developing a symbiotic dealer/teacher relationship that will ensure a smooth running program fully equipped throughout the year Purchasing, renting, and caring for instruments and all administrative tasks which are the backbone of a successful school instrumental music program
