*This volume presents over 1070 coins (ca. 310 BC-AD 641) and 1320 examples of Late Roman and Early Islamic pottery. Kom al-Ahmer and Kom Wasit emerge as centers of an exchange network involving large-scale trade of raw materials to and from the central and eastern Mediterranean. Every summer, in ten small towns across Cape Cod, the finest college baseball players in the country gather in hopes of making it to "The Show." The hopes are justifiably high: The Cape Cod Baseball League is the best amateur league in the world, producing one out of every six major league players. Ten years ago, Jim Collins chronicled a season in the life of one team: the Chatham A's, perhaps the most celebrated team in the league. Set against the backdrop of a resort town on the bend of the outer Cape, the story charted the changing fortunes of a handful of players battling slumps and self-doubt in their effort to make the league playoffs and, more importantly, impress the major league scouts. Over the last decade, baseball's hard truths became evident for the Chatham stars who went on to play professionally, and the final chapter of their story can now be written. In a new afterword for the tenth anniversary, Collins explores questions that sports literature rarely touches: What does it mean to devote your life to an almost impossible goal and almost but not quite make it? Or make it only briefly before it slips away? What does a dream look like in retrospect? How does the game look now? On the June 6, 2004, while on assignment in Riyadh, BBC security correspondent Frank Gardner and cameraman Simon Cumbers were ambushed by Islamist gunmen. Simon was killed outright. Frank was hit in the shoulder and leg. As he lay in the dust, a figure stood over him and pumped four more bullets into his body at point-blank range... Against all the odds, Frank Gardner survived. Man has had a complex relationship with inland drift sands through the ages. For some centuries these landscapes were seen as a threat, especially to agriculture and housing. This book considers the processes, origin, conservation and restoration of

*this very special but harsh biotope, one that is characterised by fields of lichens with sparse grasses and heather alongside a range of special animal, fungi and plant species. This book comprises 96 peer-reviewed contributions submitted to the 10th ICAM Congress, held in Trondheim, Norway on 01-05 August 2011. Themes covered include: 1) Advanced materials, including high-performance technical ceramics and glasses, 2) Analytical techniques, instrumentation and automation, 3) Bio-mimetic mineral materials, medical mineralogy, 4) Construction materials including cement/SCMs, concrete, bricks, tiles, screeds, 5) Cultural heritage, stone artifacts and preservation, 6) Environment and energy mineralogy, including CO2 sequestration, 7) Geometallurgy and process mineralogy, and 8) Industrial minerals including gems, ore minerals, and mineral exploration.*

*"Spinifex and Sand" is a travelogue by David Wynford Carnegie. In 1896-1897, the Hon. David Wynford Carnegie, born in 1871, the youngest son of the Earl of Southesk, led one of the last great expeditions in the exploration of Australia. His route from Lake Darlôt to Halls Creek and return took thirteen months and covered over three thousand miles. Carnegie financed his expedition from the results of a successful gold strike at Lake Darlôt. The following pages profess to be no more than a faithful narrative of five years spent on the goldfields and in the far interior of Western Australia.*

*Can a Canaanite harlot who made her living enticing men be a fitting wife for a leader of Israel? Shockingly, the Bible's answer is yes. This 10th anniversary edition of Pearl in the Sand includes new features that will invite you into the untold story of Rahab's journey from lowly outcast to redeemed child of God. Rahab's home is built into a wall, a wall that fortifies and protects the City of Jericho. However, other walls surround her too, walls of fear, rejection, and unworthiness... Years of pain and betrayal have wounded Rahab's heart—she doubts whether her dreams of experiencing true love will ever come true... A woman with a wrecked past—a man of success, of faith... of pride. A marriage only God would conceive! Through the heartaches of a stormy relationship, Rahab and Salmone learn the true source of one another's worth and find healing in God. This book presents an*

archaeozoological analysis of the Early Medieval fortified settlement Sand, in Lower Austria. The work describes the exceptional socio-economic organisation of a settlement based on its animal remains, at the border between Slavic and German spheres of influence. The investigation sheds light on aspects of daily life, the interaction between consumers and providers, and the exploitation of faunal resources. The first part of the book is dedicated to the environmental setting, the site, the material, and the methods applied. The main part presents a species by species analysis of the numerous faunal remains. The final part of the book discusses the archaeozoological results within the archaeological record, as well as the historical sources.

The archaeozoological results show that the study of the faunal remains has played a decisive role in the archaeological interpretation of the site and substantially improved our understanding of historical processes and social dynamics. "I am awed by my destructive power. With a small squeeze of the gun trigger under my right index finger, I can rip the turret off a thirty-ton battle tank and throw it 200 feet across the desert, while the rest of the tank burns in an explosion of white-hot, burning phosphorescence. But the cold, morbid reality of it does not exist from where I sit and watch it happen. There's no dramatic chord. No deafening explosion. No screams suddenly stifled. The soundtrack of a pilot's war is mostly silent." The mighty, iconic A-10 Warthog was first thrust into battle in Operation Desert Storm. The men who took it through walls of flak and surface-to-air missiles to help defeat the world's fourth-largest army were as untested as their airplanes, so they relied on personal determination and the amazing A-10 to accomplish their missions, despite the odds. Hogs in the Sand is the gripping journey of one of those pilots as he fights an increasingly terrifying war, all the while attempting to win over a woman and keep control of his internal demons. For anyone who has admired the Warthog, seen it in action, or called upon it to be their salvation, this story will fulfill a desire to virtually strap into the cockpit, while gaining unprecedented understanding of the mind of a modern combat pilot. Authored by experienced construction lawyers, this manual

*is a comprehensive treatment of construction law. Chapters cover the rights and liabilities of parties to construction projects, the bid process involving public entities, trial preparation, and alternative dispute resolution and partnering. The manual addresses bankruptcy, bond, insurance, and damages issues, and includes a chapter on jury instructions for construction trials. Geomechanics of Sand Production and Control delivers a convenient resource for both academia and professionals to gain understanding and results surrounding sand production. Packed with rock mechanic fundamentals and field case studies, this reference offers theoretical knowledge, field and laboratory data, and operational methodologies. Gaining knowledge on better sand control production improves environmental impact, preventing corrosion of pipes, damage to surface production facilities, and disposal of produced sands, among other considerations. Sections are supported by field case studies, lab tests and modeling studies to explain the most environmentally supportive wellbore stability step-by-step methods. Authored by a very experienced professor, this reference helps engineers learn how to solve sand problems in various types of energy wells. Production engineers in oil and gas utilize sand production and sand control equipment in many completion methods, with a growing interest to expand these methods in wells for CO2 sequestration and geothermal areas, but knowledge on these methods is fragmented and lacks a bridge to support energy transition. This book provides the coverage needed to address this advancing field. Includes visual graphs derived from real-world fields and numerical models Covers transition methods into other energy assets, including CO2 sequestration and geothermal wells Provides solutions and examples with the inclusion of real field case studies Sequel to Winter's heart.*
