Turning Points Jun 28 2022 Explores twelve pivotal events in the history of Christianity ranging from the fall of Jerusalem and the coronation of Charlemagne to the Edinburgh Missionary Conference.

Stress and Adversity Over the Life Course Aug 07 2020 This book examines the influence of early stressful experiences over the life course.

Turning Points Sep 07 2020 At times of crisis and revolution such as ours, diagnoses of crucial junctures and ruptures - 'turning points' - in the continuous flow of history are more prevalent than ever. Analysing literary, cinematic and other narratives, the volume seeks to understand the meanings conveyed by different concepts of turning points, the alternative concepts to which they are opposed when used to explain historical change, and those contexts in which they are unmasked as false and over-simplifying constructions. Literature and film in particular stress the importance of turning points as a sensemaking device (as part of a character's or a community's cultural memory), while at the same time unfolding the constructive and hence relative character of turning points. Offering complex reflections on the notion of turning points, literary and filmic narratives are thus of particular interest to the present volume.

Turning Points Oct 01 2022 Is there meaning to life? Is history just random? Where does my life fit in? These are topical questions in any age, but particularly so in our postmodern era. Vaughan Roberts addresses these questions and others by examining what the Bible presents as the "turning points" in history, from creation to the end of time. This does not read like a normal history book. It does something far more important, to help you see history as God does, so that you might fit in with His plans for the world.

Turning Point Feb 05 2023 When being yourself isn't good enough, who should you be? Told in dual perspectives, this provocative and timely novel for middle-school readers by Paula Chase, the acclaimed author of *So Done* and *Dough Boys*, will resonate with fans of Jason Reynolds, Rebecca Stead, and Renée Watson. Best friends Rasheeda and Monique are both good girls. For Sheeda, that means keeping her friends close and following her deeply religious and strict aunt's every rule. For Mo, that means not making waves in the prestigious and mostly White ballet intensive she's been accepted to. But what happens when Sheeda catches the eye of Mo's older brother, and the invisible racial barriers to Mo's success as a ballerina turn out to be not so invisible? What happens when you discover that being yourself isn't good enough? How do you fight back? Paula Chase explores the complex and emotional issues that affect many young teens in this novel set in the same neighborhood as her acclaimed *So Done* and *Dough Boys*. Friendship, family, finding yourself, and standing your ground are the themes of this universal story that is perfect for fans of Jason Reynolds, Rebecca Stead, and Renée Watson.

[Turning Points at Trial](#) Apr 02 2020 Award-winning author Shane Read interviews thirteen of the greatest lawyers in the country who share the secrets from their most interesting cases. Everything is covered from depositions to trials to appeals. Learn new strategies that you can apply immediately in your practice. Additional video and audio materials discussed in the book can be found at www.TurningPointsatTrial.com.

The 9/11 Attacks Apr 14 2021 There are certain moments in history that are so significant that they become Turning Points, moments that put a bookmark in time and cause the events that follow to be measured by a different standard. From assassinations to terrorist attacks, from political revolutions to economic crashes, such times are often fraught with conflict and tension. This series puts each event in its historical context and follows the trajectory of its immediate aftermath and continuing global effects today. A timeline of important events adds further historical context, while "Pointing Out" sidebars present related topics and perspectives. A historical account of the 9/11 terrorist attacks, including the events leading up to that day, the people involved, the monumental rescue and recovery efforts, and the lingering aftermath.

Turning Points Jan 04 2023 It was like any other day on the Anna University campus in Chennai. As I was returning to my room in the evening, the vice-chancellor, Prof. A. Kalanidhi, fell in step with me. Someone had been frantically trying to get in touch with me through the day, he said. Indeed, the phone was ringing when I entered the room. When I answered, a voice at the other end said, 'The prime minister wants to talk with you.' Some months earlier, I had left my post as Principal Scientific Adviser to the Government of India to return to teaching. Now, as I spoke to the PM, Atal Bihari Vajpayee, my life was set for an unexpected change. *Turning Points* takes up the incredible Kalam story from where *Wings of Fire* left off. It brings together details from his career and presidency that are not generally known as he speaks out for the first time on certain points of controversy. It is a continuing saga, above all, of a journey - individual and collective - that will take India to 2020 and beyond as a developed nation.

Turning Points Nov 21 2021 Thirty-five visionary educators were asked: What was your schooling like? When did you realize that there is a need for an alternative approach? What have you done since to help realize that vision? What are you doing now? *Turning Points* is an anthology of their responses, a peek into the lives and journeys of these pioneering individuals who have-and are-transforming what it means to be a teacher, a student, and a life-long learner. -- taken from front jacket flap.

Turning Point May 28 2022 The first book in Lianne Norman's *Sholan* Alliance long-running science fiction series of alien contact and interspecies conflict Cut off from Earth by alien conquerors, the human colony on Keiss was slowly building an underground resistance movement to stand against the Valtegan invaders. But for many of the colonists, it was already too late. Her twin sister Elise captured by Valtegan soldiers, Carrie telepathically and empathically linked with Elise, experiencing all the pain and terror that her sister was suffering. Only Elise's death freed Carrie from torment, though it also left her completely alone in her own mind for the first time in her life. But this mental void was unexpectedly filled when Kusac, a feline crewman of a crashed starship, touched her thoughts. Drawn to him by their shared Talent, Carrie hid the injured Kusac

from the Valtegens and in so doing found a friend and an invaluable ally. Yet though trust and understanding between Carrie and Kusac was soon unshakable, it would prove far more difficult to convince each of their races that their only hope of overthrowing the Valtegens was to band together against the common foe. And even such an alliance offered no guarantee of success, for no one on any of the settled worlds had yet found a way to defeat this warrior race ready to lay waste to any civilization they could not conquer.

Turning Points 2000 May 16 2021 This seminal volume, written by the principal author of the original report (Anthony W. Jackson) along with one of the main leaders in implementing its principles (Gayle A. Davis): Synthesizes crucial lessons learned from educators attempting to improve middle grades education across the country over the past decade. Bridges the gap between education researchers and practitioners by translating a wealth of recent research into practical guidance for front-line educators. Signals a new generation of thinking about middle grades education by emphasizing that, in addition to structural changes in classrooms and schools, educators must also make substantial, far-reaching changes in curriculum, student assessment, and instruction in order to improve student learning. Directly confronts critical questions such as how heterogeneously grouped (i.e., untracked) students can be successfully educated, why middle grades teachers must be specially licensed to teach young adolescents, and why middle grades instruction must include instruction in reading Carnegie Corporation's landmark 1989 report, *Turning Points: Preparing American Youth for the 21st Century*, focused national attention on the long-neglected needs of adolescent youth. In the following decade, hundreds of middle grades schools implemented Turning Points principles and many others adopted similar and complementary measures. Based on these experiences, *Turning Points 2000* refines the ideas contained in the original report by blending the wisdom of both the latest research and the best practice. "If [the authors'] deep understanding of what's needed and what works for adolescents were shared by every policy maker and educator, we would indeed see a major transformation in the education of our young. This book is a must-read for everyone who works with children and youth. For that matter, it's essential for everyone who cares about the health of our young people and our society...." —Linda Darling-Hammond, Stanford University "Turning Points 2000 provides a perfect blend of practical guidance and grand vision, looking with hope toward a day when the developmental needs of all children are met. The authors skillfully bridge the gap between research and practice as they share strategies for families, communities, and institutions to collaboratively prepare adolescents for life success." —Dr. James P. Comer, Maurice Falk Professor of Child Psychiatry, Yale Child Study Center

The Turning Point Dec 03 2022 A compelling vision of a new reality, a reconciliation of science and the human spirit for a future that will work The dynamics underlying the major problems of our time—cancer, crime, pollution, nuclear power, inflation, the energy shortage—are all the same. We have reached a time of dramatic and potentially dangerous change, a turning point for the planet as a whole. We need a new vision of reality, one that allows the forces transforming our world to flow together as a positive movement for social change. Now distinguished scientist Fritjof Capra gives us that vision, a holistic paradigm of science and spirit. "This splendid and thoughtful book is an essential guide for anyone inquiring about the place of science and metascience in our contemporary culture. Those who enjoyed Fritjof Capra's *Tao of Physics* should not expect a sequel; this is a much more ambitious book that attempts and succeeds in presenting a whole worldview from the viewpoint of a committed and experienced physicist who also writes from within the North American culture.... It is unusually detailed and thorough in its inclusion of the conventional and the alternative approaches to topics ranging from ecology through medicine and psychology to economics. It is at once scholarly and easy to read."—Jim Lovelock, *New Scientist*

Turning Points of the Civil War Oct 21 2021 James A. Rawley examines the seven turning points of the Civil War: the course of the slaveholding borderland in 1861, First Bull Run, the Trent affair, Antietam, the Emancipation Proclamation, Gettysburg and Vicksburg, and the presidential election of 1864. Among the topic unifying his book are slavery, democracy, British policy, military organization and progress, and the roles of Lincoln, McClellan, Davis, and Lee. The afterword looks at the Civil War itself as a turning point in American history. In a preface to this Bison Book editin, James A. Rawley, considers recent books that sustain the idea of turning points during the Civil War.

The Great Rupture Jul 18 2021 Do we need to be free to be innovative, prosperous, or even happy? The lessons of the last five centuries were unequivocal--without freedom, there could be no prosperity or happiness. However, does this still hold true in the Information Age? Modern technologies are disrupting our societies, altering every facet of our lives, from the nature of work and what we intrinsically value, to how we are informed, entertained, and educated--it promises to be a far deeper disruption than Industrial Revolutions. Humanity is at a major turning point, and how we respond to the merger of technology and financialization will decide our future. Will it be capitalism or communism, feudalism or despotism? By learning from the past and projecting into the future, global market strategist Viktor Shvets explores the weakening nexus between freedom and prosperity and what that means for the future of humanity. From the birth of our modern world, pivotal events in human history have led to the collapse of non-Western civilizations--Mongol warriors sweeping across Eurasian steppes; the Black Death and a re-awakening of human spirit; Zheng He's voyages and the collapse of Novgorod republic; and finally, the ban on printing in Arabic. What can we learn from these events to better prepare ourselves for the future? As we hurtle toward that uncertain future, we must decide whether our cherished individual freedoms are still necessary for success and prosperity, or if in adapting to new technologies, non-Western civilizations are now better positioned for this new world, creating illiberal orders that might no longer suffer from stagnation of ideas. For the first time in at least five centuries, we have an opportunity and tools to build a different society and economy. Will we embrace the challenge?

Turning Points Apr 26 2022 One of family therapy's wittiest and most sensible writers uses the family crisis as a launching point for discussing the entire range of events that can disrupt marriage and family life. A family crisis is heralded by symptomatic behavior, such as school phobia, adolescent rebellion, or depression, that trips up the family in its developmental path. Pittman show how the therapist can make the most of these crisis, creatively using whatever is at hand to pull the family through the chaos.

Great Turning Point May 04 2020 Many people in the Church today have the idea that "young-earth" creationism is a fairly recent invention, popularized by fundamentalist Christians in the mid-20th century. Is this view correct? In fact, scholar Terry Mortenson has done fascinating original research on this subject in England, and documents that several leading, pre-Darwin scholars and scientists, known as "scriptural geologists" did not believe in long ages for the earth. Mortenson sheds light on the following: Before Darwin, what did the Church believe about the age of the earth? Why did it believe this way? What was the controversy that rocked the Church in 19th-century England? Who were the "scriptural geologists"? What influences did the Church contend with even before Darwin's book? What is the stance of the Church today? This book is a thoroughly researched work of reference for every library - certainly every creationist library. Terry Mortenson spent much time and work on this project in both the United States and Great Britain. The history of the Church and evolution is fascinating, and it is interesting to see not only the tremendous influence that evolution has had on the Church, but on society as well.

Turning Point Jan 12 2021 A fight for what's right becomes a fight for his life. As guilt plagues him, Matthew Elliott's world begins to spiral out of control. The harder he holds on, the more it slips through his fingers, and he's helpless to stop it. Entering into the underground cage-fighting scene, he starts out fighting for what's right. The deeper he gets, the more guilt consumes him-the more pain he takes for his penance-and he's soon fighting for more than justice. He's fighting for love. He's fighting for his life.

Stone's River, the Turning-point of the Civil War Dec 31 2019

Turning Points Feb 10 2021 An accessible introduction to core concepts in evolution for lay readers, which shows that random events have played a critical role in the development of life. Critical historical events--or turning points--have shaped evolution and continue to have a decisive effect on individual lives. This theme is explored and explained in this lucid, accessible book for lay readers. The author argues that, although evolution is the result of unpredictable events, these events have profound influences on subsequent developments. Life is thus a continuous interplay between unforeseeable events and their decisive consequences. As one example, the author cites the fusing of two chromosomes, which differentiated the human species from our closest animal relatives about 4 to 5 million years ago. This event was not predictable, but it had a profound effect on the evolution of our species thereafter. By the same token, certain unpredictable circumstances in the past enabled only Homo sapiens to survive to the present day, though we now know that other human-like species also once existed. The author contrasts such scientific concepts grounded in solid evidence with prevalent misconceptions about life: specifically, the religious notion that there is a plan and purpose behind life, the widespread perception that intelligent design governs the workings of nature, the persistent belief in destiny and fate, and the attribution of an overly deterministic role to genes. This excellent introduction for laypersons to core ideas in biology goes a long way toward dispelling such misconceptions and presents current scientific research in clearly understandable, jargon-free terms.

Turning Points in Dynamic Psychotherapy Jan 30 2020 This book addresses five areas of difficulty in psychotherapy: initial assessment, boundaries, money, disruptions, and suicidal crises. It outlines the conceptual issues and the technical details of each of the concept in detail.

Global Turning Points Sep 19 2021 The twenty-first century is replete with uncertainty and complexity: game-changing events and trends are transforming the world beyond recognition. For the first time in human history more people live in cities than in the countryside and greater numbers suffer from obesity than from hunger. Emerging economies now represent half of the global economy and during the next few decades India will be the biggest country in terms of population, China the largest in output and the United States the richest among the major economies on a per capita income basis. Food and water shortages will likely become humankind's most important challenge. In this accessible introduction, Mauro Guillén and Emilio Ontiveros deploy the tools of economics, sociology and political science to provide an analytical perspective on both the problems and opportunities facing business in the modern world.

Turning Point Nov 02 2022 #1 NEW YORK TIMES BESTSELLER • In Danielle Steel's powerful new novel, four trauma doctors—the best and brightest in their field—confront exciting new challenges, both personally and professionally, when given an unusual opportunity. Bill Browning heads the trauma unit at San Francisco's busiest emergency room, SF General. With his ex-wife and daughters in London, he immerses himself in his work and lives for rare visits with his children. A rising star at her teaching hospital, UCSF at Mission Bay, Stephanie Lawrence has two young sons, a frustrated stay-at-home husband, and not enough time for any of them. Harvard-educated Wendy Jones is a dedicated trauma doctor at Stanford, trapped in a dead-end relationship with a married cardiac surgeon. And Tom Wylie's popularity with women rivals the superb medical skills he employs at his Oakland medical center, but he refuses to let anyone get too close, determined to remain unattached forever. These exceptional doctors are chosen for an honor and a unique project: to work with their counterparts in Paris in a mass-casualty training program. As professionals, they will gain invaluable knowledge from the program. As ordinary men and women, they will find that the City of Light opens up incredible new possibilities, exhilarating, enticing, and frightening. When an unspeakable act of mass violence galvanizes them into action, their temporary life in Paris becomes a stark turning point: a time to face harder choices than they have ever made before—with consequences that will last a lifetime.

Turning Points Mar 26 2022 In this remarkable book, Professor Diego De Leo, distinguished Italian psychiatrist and world leading researcher into suicide prevention, takes us on a revealing journey into the suicidal mind. Told in the form of letters, twelve life stories disclose much about the human spirit, as well as the deep complexities of suicidal behaviour and the struggle for science to understand - in the words of the author - "the worst of all human tragedies". Diego adds his own honest interpretations and comments as a roadmap to guide the reader on the many messages these stories entail.

Turning Pointe Jul 30 2022 A reckoning with one of our most beloved art forms, whose past and present are shaped by gender, racial, and class inequities—and a look inside the fight for its future. Every day, in dance studios all across America, legions of little children line up at the barre to take ballet class. This time in the studio shapes their lives, instilling lessons about gender, power, bodies, and their place in the world both in and outside of dance. In *Turning Pointe*, journalist Chloe Angyal captures the intense love for ballet that so many dancers feel, while also grappling with its devastating shortcomings: the power imbalance of an art form performed mostly by women, but dominated by men; the impossible standards of beauty and thinness; and the racism that keeps so many people of color out of ballet. As the rigid traditions of ballet grow increasingly out of step with the modern world, a new generation of dancers is confronting these issues head on, in the studio and on stage. For ballet to survive the twenty-first century and forge a path into a more socially just future, this reckoning is essential.

Turning Point Jun 04 2020 This is a book of inspirational poetry, written from the viewpoint of a person who sees life from all angles. The author is hoping that he can reach out and touch the hearts and souls of the reader to help uplift them out of the darkness and into the light and into the "Turning Point" of their life.

Turning Point Mar 06 2023 Artificial Intelligence is here, today. How can society make the best use of it? Until recently, "artificial intelligence" sounded like something out of science fiction. But the technology of artificial intelligence, AI, is becoming increasingly common, from self-driving cars to e-commerce algorithms that seem to know what you want to buy before you do. Throughout the economy and many aspects of daily

life, artificial intelligence has become the transformative technology of our time. Despite its current and potential benefits, AI is little understood by the larger public and widely feared. The rapid growth of artificial intelligence has given rise to concerns that hidden technology will create a dystopian world of increased income inequality, a total lack of privacy, and perhaps a broad threat to humanity itself. In their compelling and readable book, two experts at Brookings discuss both the opportunities and risks posed by artificial intelligence--and how near-term policy decisions could determine whether the technology leads to utopia or dystopia. Drawing on in-depth studies of major uses of AI, the authors detail how the technology actually works. They outline a policy and governance blueprint for gaining the benefits of artificial intelligence while minimizing its potential downsides. The book offers major recommendations for actions that governments, businesses, and individuals can take to promote trustworthy and responsible artificial intelligence. Their recommendations include: creation of ethical principles, strengthening government oversight, defining corporate culpability, establishment of advisory boards at federal agencies, using third-party audits to reduce biases inherent in algorithms, tightening personal privacy requirements, using insurance to mitigate exposure to AI risks, broadening decision-making about AI uses and procedures, penalizing malicious uses of new technologies, and taking pro-active steps to address how artificial intelligence affects the workforce. Turning Point is essential reading for anyone concerned about how artificial intelligence works and what can be done to ensure its benefits outweigh its harm.

Biography and turning points in Europe and America Mar 14 2021 This sociological collection advances the argument that the concept of a turning point expands our understanding of life experiences from a descriptive to a deeper and more abstract level of analysis. It addresses the conceptual issue of what distinguishes turning points from life transitions in general and raises crucial questions about the application of turning points as a biographical research method. Biography and turning points in Europe and America is all the more distinctive and significant due to its broad empirical database. The anthology includes authors from ten different countries, providing a number of contexts for thinking about how turning points relate to constructions of meaning shaped by globalization and by cultural and structural meanings unique to each country. The book will be useful across a wide range of social sciences and particularly valuable for researchers needing a stronger theoretical base for biographical work.
