Women in roles of religious leadership represent a relatively new phenomenon within Judaism and Christianity and to some extent, a break with traditional assumptions. The study gives insight into how women are defining themselves as religious leaders and women within the context of patriarchal religion. The research is based on 50 qualitative interviews with women rabbis, Anglican priests and other Christian ministers. Some of the issues discussed concerning role, ordination and tradition are unrelated to gender. Christian interviewees describe their journeys into the ministry or priesthood predominantly as experiences of vocation whereas rabbis choose the rabbinate out of an interest in Jewish studies and in the role itself. With regard to gender women across the religious divide are facing opposition and are dealing with similar religious questions of inclusive language or the impact of traditional female roles. A textbook that combines economic concepts with empirical evidence to explain in economic terms how health care institutions and markets function. This book introduces students to the growing research field of health economics. Rather than offer details about health systems around the world without providing a theoretical context, Health Economics combines economic concepts with empirical evidence to enhance readers' economic understanding of how health care institutions and markets function. It views the subject in both microeconomic and macroeconomic terms, moving from the individual and firm level to the market level to a macroeconomic view of the role of health and health care within the economy as a whole. The book includes discussion of recent empirical evidence on the U.S. health system and can be used for an undergraduate course on U.S. health economics. It also contains sufficient material for an undergraduate or masters course on global health economics, or for a course on health economics aimed at health professionals. It includes a chapter on nurses as well as a chapter on the economics of hospitals and pharmaceuticals, which can be used in master's courses for students in these fields. It supplements its analysis with readings (both classic and current), extensive references, links to Web sites on policy developments and public programs, review and discussion questions, and exercises. Downloadable supplementary material for instructors, including solutions to the exercise sets, sample syllabuses, and more than 600 slides that can be used for class presentations, is available at http://mitpress.mit.edu/health_economics.
