Ordnance Maintenance 2 1/2 Ton 6x6 Truck Technical Manual: TM 9-1819ac and to 19-75caj-4 Jan 08 2021 Commonly known as the "Deuce-

and-a-half," the M135 was a soft top 2 1/2 ton, 6x6 truck made by General Motors Corporation for the U.S. Army and Air Force. It came in a variety of configurations, including ambulance, dump truck, gasoline, water tanker and more. By far the most common variant was the cargo version which could carry a dozen soldiers or loads of supplies. A double-wheeled version designated M211, and a tractor trailer model M221 were also widely produced. All were powered by the six-cylinder GMC 270 gas engine. Most came equipped with an early automatic transmission, the 5- or 6-speed Hydramatic. Additional performance features include air assisted power brakes, a 24-volt electrical system and sealed, waterproof ignition. The suspension featured front axles with auto engage. The top speed for the M135 was 58 mph. The weight of the M135 truck is between 12,330 and 12,740 pounds depending on the additional features, which sometimes included a Power Take Off (PTO) driveshaft system. This powered a winch that was located on the front or rear of the truck. The M135 was developed from the CCKW model used in WWII. Created in 1952, this technical manual reveals a great deal about the M135's design and capabilities. Intended as a manual for those charged with maintenance, it details every major component of the truck. Originally labeled restricted, this manual was declassified long ago and is here reprinted in book form. Care has been taken to preserve the integrity of the text.

Manual Transmission Efficiency and Parasitic Loss Measurement Dec 27

2019 Because of the intense focus on fuel economy and fuel emission standards, it has become imperative to optimize vehicle drivetrains. In light of this, component efficiencies have become an important factor in the drivetrain decision-making process. It has therefore become necessary to develop a universal standard to judge transmission efficiency. This SAE Recommended Practice specifies a test procedure which maps torque transmittal efficiency and parasitic losses for manual transmissions. The application of this document is intended for manual transmissions used in light (class 4) through heavy truck applications with both simple and compound ratio structures. This document is separated into two parts. The first compares input and output torque throughout a specified input speed range in order to determine the overall transmission efficiency. This test is used to evaluate all forward gears; testing in reverse is optional. The second procedure measures parasitic losses experienced at zero output torque over a range of operating speeds. A procedure for further reduction of this data into a loaded efficiency from gear and bearing systems is also provided. Document is current and appears unlikely to be in need of revision in the foreseeable future.

Automatic Transmission Interchange Manual 1960-1972 Apr 30 2020 An automatic transmission interchange manual covering almost all makes and models of USA built cars and light trucks from 1960 thru 1972 with some going back into the 1950's and a few as new as 1974. This includes thousands of part interchanges and for many of the GM, FOMOCO, MOPAR and AMERICA MOTORS parts including many factory part numbers. Many parts interchange between different years, makes and models. For example, a part from a 68 Ford 289 may be the same as for a 68 Ford 302 or a part from a 64 Buick may be the same as a part for 65 Chevy Impala. The makes are listed below: - AMC- Buick - Cadillac- Chevrolet Car & Truck - Chrysler- Dodge Car & Truck - Ford Car & Truck- GMC - International Harvester- Lincoln - Mercury- Oldsmobile - Plymouth- Pontiac - Rambler This manual can not only save you money but can be a great resource for any restoration project. It is designed to assist in the purchase and identification of original equipment parts. It should save you many hours of time locating needed parts. With this manual you will know exactly what parts from which vehicles are identical. There may be no need to pay a high price for a supposedly rare part when it may be identical to many other vehicles parts.
