Big Data Mining for Climate Change Mar 03 2022 Big Data Mining for Climate Change addresses how to manage the vast amount of information available for analysis. Climate change and its environmental, economic and social consequences are widely recognized as the biggest, most interconnected problem facing humanity. There is a huge amount of potential information currently available...and it is growing exponentially. This book walks through the latest research and how to navigate the resources available using big data applications. It is appropriate for scientists and advanced students studying climate change from a number of disciplines, including the atmospheric sciences, oceanic sciences, geography, environment sciences, ecology, energy, economics, engineering and public policy. Provides a step-by-step guide for applying big data mining tools to climate and environmental research Presents a comprehensive review of theory and algorithms of big data mining for climate change Includes current research in climate and environmental science as it relates to using big data algorithms

Resource Management for Big Data Platforms Feb 02 2022

Serving as a flagship driver towards advance research in the area of Big Data platforms and applications, this book provides a platform for the dissemination of advanced topics of theory, research efforts and analysis, and implementation oriented on

methods, techniques and performance evaluation. In 23 chapters, several important formulations of the architecture design, optimization techniques, advanced analytics methods, biological, medical and social media applications are presented. These chapters discuss the research of members from the ICT COST Action IC1406 High-Performance Modelling and Simulation for Big Data Applications (cHiPSet). This volume is ideal as a reference for students, researchers and industry practitioners working in or interested in joining interdisciplinary works in the areas of intelligent decision systems using emergent distributed computing paradigms. It will also allow newcomers to grasp the key concerns and their potential solutions.

Big Data Oct 10 2022 Big Data is everywhere. It shapes our lives in more ways than we know and understand. This comprehensive introduction unravels the complex terabytes that will continue to shape our lives in ways imagined and unimagined. Drawing on case studies like Amazon, Facebook, the FIFA World Cup and the Aadhaar scheme, this book looks at how Big Data is changing the way we behave, consume and respond to situations in the digital age. It looks at how Big Data has the potential to transform disaster management and healthcare, as well as prove to be authoritarian and exploitative in the wrong hands. The latest offering from the authors of *Artificial Intelligence: Evolution, Ethics and Public Policy*, this accessibly written volume is essential for the researcher in science and technology studies, media and culture studies, public policy and digital humanities, as well as being a beacon for the general reader to make sense of the digital age.

The Big Book of Hacks Sep 16 2020 Ingenious (and hilarious) projects that aspiring makers will love, brought to you by the tinkerers at Popular Science magazine. From useful, doable gadgets to outlandish contraptions that you'd likely be wise to avoid, this showcase of ingenuity is an entertaining tribute to the inventive spirit. In this book from the science and technology

magazine that's been inspiring everyday people for nearly 150 years, you'll discover: **Geek Toys:** Be the life of any party with rad gaming hacks, amazing pyrotechnics, quirky DIY robots, wow-inducing projectiles, and lots of ways to make beer even better. **Home Improvements:** Pimp out your pad with a laser-security system, an improvised sous-vide cooker, and a life-sized cardboard display of anyone you want. **Gadget Upgrades:** Want to stash a flash drive in an old cassette? Use a DIY stylus on a touchscreen? Improvise a fisheye lens for your camera? With this book, you can. **Things That Go:** Give your motorbike a Tron vibe, deck out your car with an action-figure hood ornament, and keep gadgets charged on the go with a solar-powered backpack. ...and much more!

Framing Big Data Sep 09 2022 This book addresses big data as a socio-technical construct with huge potential for innovation in key sectors such as healthcare, government and business. Big data and its increasingly widespread use in such influential spheres can generate ethically controversial decisions, including questions surrounding privacy, consent and accountability. This book attempts to unpack the epistemological implications of the term 'big data', as well as the opportunities and responsibilities which come with it. The author analyses the linguistic texture of the big data narrative in the news media, in healthcare and in EU law on data protection, in order to contribute to its understanding from the critical perspective of language studies. The result is a study which will be of interest to students and scholars working in the digital humanities, corpus linguistics, and discourse studies.

Twelve Steps and Twelve Traditions Trade Edition Dec 12 2022
Twelve Steps to recovery.

The Big Book of Organic Baby Food Apr 16 2023 ORGANIC YUMMINESS FOR ALL YOUR BABY'S STAGES. This baby food cookbook is the one that does it all. Natural, organic, and irresistible recipes take your baby from infant to toddler and

beyond. Ideas for purees, smoothies, finger foods, and meals abound. To top it off, you get nutritious, crave-worthy recipes to satisfy both your little one and your big ones. From Sweet Potato Puree to Pumpkin Smoothies to Maple-Glazed Salmon with Roasted Green Beans, *The Big Book of Organic Baby Food* offers over 230 healthy and wholesome recipes. This baby food cookbook will serve you for years. A baby food cookbook and more, *The Big Book of Organic Baby Food contains: Ages and Stages—Each chapter covers developmental changes and FAQs to inform your nutritional decisions. Purees, Smoothies, Finger Food—Choose from more than 115 puree recipes and over 40 smoothie and finger food ideas. Family Fare—With 70+ recipes that will please all palates, this baby food cookbook goes way beyond baby food.* *The Big Book of Organic Baby Food* is the only baby food cookbook to feed the growing needs and tastes of your entire family.

[Big Words for Little People](#) Mar 23 2021 I know some Big Words. I'll teach them to you. Although you are small, you can use Big Words too. Big Words aren't scary. They're big fun to learn. I was taught once and now it's your turn. The eighth hilarious picture book by the #1 New York Times bestselling team of Jamie Lee Curtis and Laura Cornell helps little people communicate in a big person's world. With grown-up words like cooperate, respect, patience and considerate, a big, boisterous and zany family celebrates the power of language and discovers that words—big or little—are the bridge that connects us all.

[First Big Book of Dinosaurs](#) May 17 2023 Provides pictures and brief facts about a variety of different kinds of dinosaurs.

Hydropower Licenses, Big Creek Nos. 2A, 8, and Eastwood-FERC Project No. 67, Big Creek Nos. 1 and 2-FERC Project No. 2175, Mammoth Pool-FERC Project No. 2085, Big Creek No. 3-FERC Project No. 120 Apr 23 2021

Alcoholics Anonymous Aug 20 2023 The basic text for Alcoholics Anonymous.

The Big Idea May 13 2020 Community Christian Church embraced the Big Idea and everything changed. They decided to avoid the common mistake of bombarding people with so many 'little ideas' that they suffered overload. They also recognized that leaders often don't insist that the truth be lived out to accomplish Jesus' mission. Why? Because people's heads are swimming with too many little ideas, far more than they can ever apply. The Big Idea can help you creatively present one laser-focused theme each week to be discussed in families and small groups. The Big Idea shows how to engage in a process of creative collaboration that brings people together and maximizes missional impact. The Big Idea can energize a church staff and bring alignment and focus to many diverse church ministries. This book shows how the Big Idea has helped Community Christian Church better accomplish the Jesus mission and reach thousands of people in nine locations and launch a church planting network with partner churches across the country. This book is part of the Leadership Network Innovation Series.

Twenty-five Years Big Game Hunting Jun 13 2020

Scalable Big Data Architecture Apr 04 2022 This book highlights the different types of data architecture and illustrates the many possibilities hidden behind the term "Big Data", from the usage of No-SQL databases to the deployment of stream analytics architecture, machine learning, and governance. Scalable Big Data Architecture covers real-world, concrete industry use cases that leverage complex distributed applications, which involve web applications, RESTful API, and high throughput of large amount of data stored in highly scalable No-SQL data stores such as Couchbase and Elasticsearch. This book demonstrates how data processing can be done at scale from the usage of NoSQL datastores to the combination of Big Data distribution. When the data processing is too complex and involves different processing topology like long running jobs, stream processing, multiple data sources correlation, and machine learning, it's often necessary to

delegate the load to Hadoop or Spark and use the No-SQL to serve processed data in real time. This book shows you how to choose a relevant combination of big data technologies available within the Hadoop ecosystem. It focuses on processing long jobs, architecture, stream data patterns, log analysis, and real time analytics. Every pattern is illustrated with practical examples, which use the different open source projects such as Logstash, Spark, Kafka, and so on. Traditional data infrastructures are built for digesting and rendering data synthesis and analytics from large amount of data. This book helps you to understand why you should consider using machine learning algorithms early on in the project, before being overwhelmed by constraints imposed by dealing with the high throughput of Big data. Scalable Big Data Architecture is for developers, data architects, and data scientists looking for a better understanding of how to choose the most relevant pattern for a Big Data project and which tools to integrate into that pattern.

Big Ten Conference Handbook Aug 16 2020 Rules of organization & procedure, rules of eligibility, agreements for men's and women's programs.

Shakespeare's Big Men Jul 27 2021 Shakespeare's Big Men examines five Shakespearean tragedies - Julius Caesar, Hamlet, Othello, Macbeth, and Coriolanus - through the lens of generative anthropology and the insights of its founder, Eric Gans.

Generative anthropology's theory of the origins of human society explains the social function of tragedy: to defer our resentment against the "big men" who dominate society by letting us first identify with the tragic protagonist and his resentment, then allowing us to repudiate the protagonist's resentful rage and achieve theatrical catharsis. Drawing on this hypothesis, Richard van Oort offers inspired readings of Shakespeare's plays and their representations of desire, resentment, guilt, and evil. His analysis revives the universal spirit in Shakespearean criticism, illustrating how the plays can serve as a way to understand the

ethical dilemma of resentment and discover within ourselves the nature of the human experience.

Sublinear Algorithms for Big Data Applications Dec 20 2020

The brief focuses on applying sublinear algorithms to manage critical big data challenges. The text offers an essential introduction to sublinear algorithms, explaining why they are vital to large scale data systems. It also demonstrates how to apply sublinear algorithms to three familiar big data applications: wireless sensor networks, big data processing in Map Reduce and smart grids. These applications present common experiences, bridging the theoretical advances of sublinear algorithms and the application domain. *Sublinear Algorithms for Big Data Applications* is suitable for researchers, engineers and graduate students in the computer science, communications and signal processing communities.

CABology: Value of Cloud, Analytics and Big Data Trio Wave Sep 28 2021

This uniquely accessible book helps readers use CABology to solve real-world business problems and drive real competitive advantage. It provides reliable, concise information on the real benefits, usage and operationalization aspects of utilizing the “Trio Wave” of cloud, analytic and big data. Anyone who thinks that the game changing technology is slow paced needs to think again. This book opens readers’ eyes to the fact that the dynamics of global technology and business are changing. Moreover, it argues that businesses must transform themselves in alignment with the Trio Wave if they want to survive and excel in the future. CABology focuses on the art and science of optimizing the business goals to deliver true value and benefits to the customer through cloud, analytic and big data. It offers business of all sizes a structured and comprehensive way of discovering the real benefits, usage and operationalization aspects of utilizing the Trio Wave.

Big Girl Jul 07 2022 In this heartfelt, incisive novel, Danielle Steel celebrates the virtues of unconventional beauty while

exploring deeply resonant issues of weight, self-image, sisterhood, and family. **BIG GIRL** A chubby little girl with ordinary looks, Victoria Dawson has always felt out of place in her family, especially in body-conscious L.A. While her parents and sister can eat anything and not gain an ounce, Victoria must watch everything she eats, as well as endure her father's belittling comments about her body and see her academic achievements go unacknowledged. Ice cream and oversized helpings of all the wrong foods give her comfort, but only briefly. The one thing she knows is that she has to get away from home, and after college in Chicago, she moves to New York City. Landing her dream job as a high school teacher, Victoria loves working with her students and wages war on her weight at the gym. Despite tension with her parents, Victoria remains close to her younger sister, Grace. Though they couldn't be more different in looks, they love each other unconditionally. So when Grace announces her engagement to a man who is an exact replica of their narcissistic father, Victoria worries about her sister's future happiness, and with no man of her own, she feels like a failure once again. As the wedding draws near, a chance encounter, a deeply upsetting betrayal, and a family confrontation lead to a turning point. Behind Victoria is a lifetime of hurt and neglect she has tried to forget. Ahead is a challenge and a risk: to accept herself as she is, celebrate it, and claim the victories she has fought so hard for and deserves. Big girl or not, she is terrific and discovers that herself.

The Big Book of Chic Jun 18 2023 Internationally acclaimed interior design sensation Miles Redd is known for his quirky brand of cozy glamour. His unique aesthetic vision is characterized by playful *mélanges* of high and low, invigorated with whimsical splashes of color and modern gestures. Drawing on inspirations ranging from Richard Avedon fashion photographs to Rene Gruau illustrations, Redd has crafted interiors for a wide array of venues. His Trademark approach to design has brought

to life rooms infused with boldness, fantasy, and sophistication. This lavishly illustrated volume will be an inspiration to anyone interested in spirited, eclectic design.

Creating Value with Big Data Analytics May 05 2022 Our newly digital world is generating an almost unimaginable amount of data about all of us. Such a vast amount of data is useless without plans and strategies that are designed to cope with its size and complexity, and which enable organisations to leverage the information to create value. This book is a refreshingly practical, yet theoretically sound roadmap to leveraging big data and analytics. *Creating Value with Big Data Analytics* provides a nuanced view of big data development, arguing that big data in itself is not a revolution but an evolution of the increasing availability of data that has been observed in recent times. Building on the authors' extensive academic and practical knowledge, this book aims to provide managers and analysts with strategic directions and practical analytical solutions on how to create value from existing and new big data. By tying data and analytics to specific goals and processes for implementation, this is a much-needed book that will be essential reading for students and specialists of data analytics, marketing research, and customer relationship management.

100 Trails of the Big South Fork: Tennessee & Kentucky,

4th Edition Jun 25 2021 Escape with Russ Manning, the Southeast's hiking expert, into the deep gorges and rock shelters that make this area a natural utopia. He has trekked along every trail and behind every waterfall, from Yahoo Falls to the Gentleman's Swimming Hole--in 100 Trails of the Big South Fork, he guides you to and through the land's best of best!

[The Big Book of Kombucha](#) Mar 15 2023 2016 Silver Nautilus Book Award Winner Brew your own kombucha at home! With more than 400 recipes, including 268 unique flavor combinations, you can get exactly the taste you want — for a fraction of the store-bought price. This complete guide, from the proprietors of

Kombucha Kamp, shows you how to do it from start to finish, with illustrated step-by-step instructions and troubleshooting tips. The book also includes information on the many health benefits of kombucha, fascinating details of the drink's history, and recipes for delicious foods and drinks you can make with kombucha (including some irresistible cocktails!). "This is the one go-to resource for all things kombucha." — Andrew Zimmern, James Beard Award-winning author and host of Travel Channel's Bizarre Foods

Big Data Is Not a Monolith Aug 28 2021 Perspectives on the varied challenges posed by big data for health, science, law, commerce, and politics. Big data is ubiquitous but heterogeneous. Big data can be used to tally clicks and traffic on web pages, find patterns in stock trades, track consumer preferences, identify linguistic correlations in large corpuses of texts. This book examines big data not as an undifferentiated whole but contextually, investigating the varied challenges posed by big data for health, science, law, commerce, and politics. Taken together, the chapters reveal a complex set of problems, practices, and policies. The advent of big data methodologies has challenged the theory-driven approach to scientific knowledge in favor of a data-driven one. Social media platforms and self-tracking tools change the way we see ourselves and others. The collection of data by corporations and government threatens privacy while promoting transparency. Meanwhile, politicians, policy makers, and ethicists are ill-prepared to deal with big data's ramifications. The contributors look at big data's effect on individuals as it exerts social control through monitoring, mining, and manipulation; big data and society, examining both its empowering and its constraining effects; big data and science, considering issues of data governance, provenance, reuse, and trust; and big data and organizations, discussing data responsibility, "data harm," and decision making. Contributors Ryan Abbott, Cristina Alaimo, Kent R. Anderson, Mark Andrejevic,

Diane E. Bailey, Mike Bailey, Mark Burdon, Fred H. Cate, Jorge L. Contreras, Simon DeDeo, Hamid R. Ekbia, Allison Goodwell, Jannis Kallinikos, Inna Kouper, M. Lynne Markus, Michael Mattioli, Paul Ohm, Scott Peppet, Beth Plale, Jason Portenoy, Julie Rennecker, Katie Shilton, Dan Sholler, Cassidy R. Sugimoto, Isuru Suriarachchi, Jevin D. West

Big Data Aug 08 2022 Learn Big Data from the ground up with this complete and up-to-date resource from leaders in the field Big Data: Concepts, Technology, and Architecture delivers a comprehensive treatment of Big Data tools, terminology, and technology perfectly suited to a wide range of business professionals, academic researchers, and students. Beginning with a fulsome overview of what we mean when we say, “Big Data,” the book moves on to discuss every stage of the lifecycle of Big Data. You’ll learn about the creation of structured, unstructured, and semi-structured data, data storage solutions, traditional database solutions like SQL, data processing, data analytics, machine learning, and data mining. You’ll also discover how specific technologies like Apache Hadoop, SQQOP, and Flume work. Big Data also covers the central topic of big data visualization with Tableau, and you’ll learn how to create scatter plots, histograms, bar, line, and pie charts with that software. Accessibly organized, Big Data includes illuminating case studies throughout the material, showing you how the included concepts have been applied in real-world settings. Some of those concepts include: The common challenges facing big data technology and technologists, like data heterogeneity and incompleteness, data volume and velocity, storage limitations, and privacy concerns Relational and non-relational databases, like RDBMS, NoSQL, and NewSQL databases Virtualizing Big Data through encapsulation, partitioning, and isolating, as well as big data server virtualization Apache software, including Hadoop, Cassandra, Avro, Pig, Mahout, Oozie, and Hive The Big Data analytics lifecycle, including business case evaluation, data preparation,

extraction, transformation, analysis, and visualization Perfect for data scientists, data engineers, and database managers, Big Data also belongs on the bookshelves of business intelligence analysts who are required to make decisions based on large volumes of information. Executives and managers who lead teams responsible for keeping or understanding large datasets will also benefit from this book.

Securing IoT and Big Data May 25 2021 This book covers IoT and Big Data from a technical and business point of view. The book explains the design principles, algorithms, technical knowledge, and marketing for IoT systems. It emphasizes applications of big data and IoT. It includes scientific algorithms and key techniques for fusion of both areas. Real case applications from different industries are offering to facilitate ease of understanding the approach. The book goes on to address the significance of security algorithms in combining IoT and big data which is currently evolving in communication technologies. The book is written for researchers, professionals, and academicians from interdisciplinary and transdisciplinary areas. The readers will get an opportunity to know the conceptual ideas with step-by-step pragmatic examples which makes ease of understanding no matter the level of the reader.

Big Thicket National Preserve, Establishment Feb 19 2021

Maangchi's Big Book of Korean Cooking Oct 18 2020 The definitive book on Korean cuisine by "YouTube's Korean Julia Child"* and the author of Maangchi's Real Korean Cooking *New York Times

Big Data Application Architecture Q&A Oct 30 2021 Big Data Application Architecture Pattern Recipes provides an insight into heterogeneous infrastructures, databases, and visualization and analytics tools used for realizing the architectures of big data solutions. Its problem-solution approach helps in selecting the right architecture to solve the problem at hand. In the process of reading through these problems, you will learn harness the power

of new big data opportunities which various enterprises use to attain real-time profits. Big Data Application Architecture Pattern Recipes answers one of the most critical questions of this time 'how do you select the best end-to-end architecture to solve your big data problem?'. The book deals with various mission critical problems encountered by solution architects, consultants, and software architects while dealing with the myriad options available for implementing a typical solution, trying to extract insight from huge volumes of data in real-time and across multiple relational and non-relational data types for clients from industries like retail, telecommunication, banking, and insurance. The patterns in this book provide the strong architectural foundation required to launch your next big data application. The architectures for realizing these opportunities are based on relatively less expensive and heterogeneous infrastructures compared to the traditional monolithic and hugely expensive options that exist currently. This book describes and evaluates the benefits of heterogeneity which brings with it multiple options of solving the same problem, evaluation of trade-offs and validation of 'fitness-for-purpose' of the solution.

The Big Book of Dashboards Jul 15 2020 The definitive reference book with real-world solutions you won't find anywhere else The Big Book of Dashboards presents a comprehensive reference for those tasked with building or overseeing the development of business dashboards. Comprising dozens of examples that address different industries and departments (healthcare, transportation, finance, human resources, marketing, customer service, sports, etc.) and different platforms (print, desktop, tablet, smartphone, and conference room display) The Big Book of Dashboards is the only book that matches great dashboards with real-world business scenarios. By organizing the book based on these scenarios and offering practical and effective visualization examples, The Big Book of Dashboards will be the trusted resource that you open when you need to build an

effective business dashboard. In addition to the scenarios there's an entire section of the book that is devoted to addressing many practical and psychological factors you will encounter in your work. It's great to have theory and evidenced-based research at your disposal, but what will you do when somebody asks you to make your dashboard 'cooler' by adding packed bubbles and donut charts? The expert authors have a combined 30-plus years of hands-on experience helping people in hundreds of organizations build effective visualizations. They have fought many 'best practices' battles and having endured bring an uncommon empathy to help you, the reader of this book, survive and thrive in the data visualization world. A well-designed dashboard can point out risks, opportunities, and more; but common challenges and misconceptions can make your dashboard useless at best, and misleading at worst. The Big Book of Dashboards gives you the tools, guidance, and models you need to produce great dashboards that inform, enlighten, and engage.

Biscuit's Big Friend Feb 14 2023 Sam is Biscuit's newest friend. Biscuit wants to do everything that Sam does. But it sure is hard for a little puppy to keep up with such a big dog!

Highlighting the Importance of Big Data Management and Analysis for Various Applications Jan 01 2022 This book addresses the impacts of various types of services such as infrastructure, platforms, software, and business processes that cloud computing and Big Data have introduced into business. Featuring chapters which discuss effective and efficient approaches in dealing with the inherent complexity and increasing demands in data science, a variety of application domains are covered. Various case studies by data management and analysis experts are presented in these chapters. Covered applications include banking, social networks, bioinformatics, healthcare, transportation and criminology. Highlighting the Importance of Big Data Management and Analysis for Various Applications will provide the reader with an understanding of how

data management and analysis are adapted to these applications. This book will appeal to researchers and professionals in the field.

BIG DADDY CASH Apr 11 2020

The Berenstain Bears' Big Book of Science and Nature Jul 19

2023 Introduces the seasons, weather, animals, plants, the earth, machines, matter, energy, and related topics.

Machine Learning and Big Data Analytics Paradigms: Analysis, Applications and Challenges Nov 30 2021 This book is intended to present the state of the art in research on machine learning and big data analytics. The accepted chapters covered many themes including artificial intelligence and data mining applications, machine learning and applications, deep learning technology for big data analytics, and modeling, simulation, and security with big data. It is a valuable resource for researchers in the area of big data analytics and its applications.

Weber's Big Book of Grilling Nov 11 2022 Building on the tremendous success of Weber's Art of the Grill (over 100,000 copies sold!), the world's best-known and most trusted grilling experts bring us the ultimate in barbecue cookbooks. Destined to become a sauce-stained classic, it's packed with 350 of the tastiest and most reliable recipes ever to hit the grill, hundreds of mouthwatering full-color photos, and countless sure-fire, time-honored techniques and tricks of the trade guaranteed to turn anyone into a barbecue champion. For the chef who's barely flipped a burger to the local grilling guru, here's all the advice and all the fabulous food required to wow the neighborhood--and at a price that's as red hot as the coals!

Artificial Intelligence for Big Data Jan 21 2021 Build next-generation Artificial Intelligence systems with Java Key Features Implement AI techniques to build smart applications using Deeplearning4j Perform big data analytics to derive quality insights using Spark MLlib Create self-learning systems using neural networks, NLP, and reinforcement learning Book

Description In this age of big data, companies have larger amount

of consumer data than ever before, far more than what the current technologies can ever hope to keep up with. However, Artificial Intelligence closes the gap by moving past human limitations in order to analyze data. With the help of Artificial Intelligence for big data, you will learn to use Machine Learning algorithms such as k-means, SVM, RBF, and regression to perform advanced data analysis. You will understand the current status of Machine and Deep Learning techniques to work on Genetic and Neuro-Fuzzy algorithms. In addition, you will explore how to develop Artificial Intelligence algorithms to learn from data, why they are necessary, and how they can help solve real-world problems. By the end of this book, you'll have learned how to implement various Artificial Intelligence algorithms for your big data systems and integrate them into your product offerings such as reinforcement learning, natural language processing, image recognition, genetic algorithms, and fuzzy logic systems. What you will learn

- Manage Artificial Intelligence techniques for big data with Java
- Build smart systems to analyze data for enhanced customer experience
- Learn to use Artificial Intelligence frameworks for big data
- Understand complex problems with algorithms and Neuro-Fuzzy systems
- Design stratagems to leverage data using Machine Learning process
- Apply Deep Learning techniques to prepare data for modeling
- Construct models that learn from data using open source tools
- Analyze big data problems using scalable Machine Learning algorithms

Who this book is for This book is for you if you are a data scientist, big data professional, or novice who has basic knowledge of big data and wish to get proficiency in Artificial Intelligence techniques for big data. Some competence in mathematics is an added advantage in the field of elementary linear algebra and calculus.

Managing and Processing Big Data in Cloud Computing Jun 06 2022 Big data has presented a number of opportunities across industries. With these opportunities come a number of challenges associated with handling, analyzing, and storing large data sets.

One solution to this challenge is cloud computing, which supports a massive storage and computation facility in order to accommodate big data processing. *Managing and Processing Big Data in Cloud Computing* explores the challenges of supporting big data processing and cloud-based platforms as a proposed solution. Emphasizing a number of crucial topics such as data analytics, wireless networks, mobile clouds, and machine learning, this publication meets the research needs of data analysts, IT professionals, researchers, graduate students, and educators in the areas of data science, computer programming, and IT development.

The Big Ball of String Jan 13 2023 A big, green ball of string becomes a most unusual soccer ball in this imaginative and enchanting picture book. Wanting to play soccer but lacking a ball, George makes do with the titular big ball of string. Rhythmic, read-aloud text describes George's dribbling adventures around town, from his home, to main street, to the park, and back again. Charming watercolor illustrations trace George's fun with his makeshift toy as the bright green string unravels while he plays, encouraging children to see ordinary household objects in new ways while they follow George's sporting fun.

The Big Book of Minecraft Nov 18 2020 Brought to you by the authors and editors that created the *Minecrafter* and *Minecrafter 2.0 Advanced* guide books, *The Big Book of Minecraft* features more of everything—more mods, more mining, more mobs, and more Minecraft! Up to date for the 2014 holiday season, *The Big Book of Minecraft* is packed with the most recent training, tools, and techniques to help readers get more out of their favorite sandbox game. 2014 was a pivotal year for Minecraft, and this book captures all the latest and greatest things that have happened to one of the most brilliant and immersive games in video game history. From a brief overview of the game to advanced farming, mining, and building techniques, this guide

touches on everything Minecraft enthusiasts could ever ask for. Featuring authoritative and engaging content from our internal experts, TheBig Book of Minecraft also highlights some of the most influential builders in the Minecraft community today and examines their creations and techniques that catapulted them to fame.
