This informative book introduces young readers to the defining characteristics of the various groups of animals that make up the animal kingdom. The bodies of many animals, including several types of mammals, fish, reptiles, birds, and arthropods, are described in concise and easy-to-understand text. Full-color illustrations and amazing photographs help children begin to realize the vastness of the animal kingdom. From the great winding Ganges river in India to the thick conifer forests of northern Europe, travel across the globe to discover the rich variety of animals that share our blue planet. Written by zoologist Dr. Nick Crumpton and fully illustrated throughout, this fascinating fact-filled book will be treasured for generations. Combines informational text, facts, maps, and photographs to teach children about geography, animals, habitats, endangered species, and more. Explore the animal kingdom with this pictorial atlas of the world's wildlife. Where do animals build their homes? How do they survive in very hot and cold climates? Why are so many species endangered? Discover the answers to all these questions and many more in The Animal Atlas. Learn where in the world different animal species are found; what kind of habitats they live in; what they eat; and how they find their mates. The Animal Atlas is packed with beautiful, life-like depictions of mammals, birds, reptiles, amphibians, and insects. Each species is carefully hand-drawn to show details of fur, feathers, or scales while accompanying captions reveal fascinating facts about the animal's behavior. This lavishly illustrated nature book explores the different continents and countries of the world, with helpful information on geography, climate, and vegetation. It travels through different biomes, such as forests, deserts, and lakes; and through specific regions, from the Everglades to the Galapagos, the Himalayas, and Great Barrier Reef. First published in 1992, this atlas has been updated for the 2020 edition and is a beautiful gift for a new generation of zoologists. This beautifully designed atlas will introduce young readers to Planet Earth's different continents and countries and their animal species. Each spread contains a fascinating fact about the continent depicted, as well as labeled images of different countries and creatures big and small. The process of how a globe is turned into a flat map is explained step by step on the back cover to inform young readers. The intricate illustrations and sturdy format make this a perfect gift for young explorers. Introduces the animal kingdom, describes the physical characteristics of invertebrates and vertebrates, and discusses how the different species are classified. Head off on a journey of discovery with this follow-up to the best-selling Atlas of Adventures! This book collects together nature's most unmissable events from between the two poles, including epic migrations, extraordinary behaviours, and Herculean habits. Find hundreds of things to spot and learn new facts about every animal. Meet some of the coolest land animals on Earth, and learn about their amazing abilities—from camouflage and communication to super senses and use of tools. Find out how these clever creatures and others use their smarts and skills to thrive in even the harshest environments. Explore the animal kingdom like never before with the Animal Atlas from Lonely Planet Kids. Unfold maps to reveal animals from every continent and lift the flaps to see their unique environments and habitats. Discover a world of animal facts, life-size photos and creature features - from a bear's paw and a baby turtle to an anteater's tongue and a goliath birdeater, the world's heaviest spider. EEEK! All drawn to scale so you can measure yourself against them. You'll find animals living on freezing ice caps, high on snowy mountain peaks, in parched deserts and down in the dark depths of the ocean. They fly through the air, crawl among trees, burrow into the earth, plunge through the seas, and prowl the forests - and range from the tiniest of insects too small to see without a magnifying glass to the blue whale, which is longer than three buses! The book is divided into seven sections: North America, South America, Europe, Africa, Asia, Australasia, Oceania & Antarctica - each with a map of the major environments as well as illustrated and photographic depictions of some of the animals living there. Are you ready for this round-the-world animal adventure? About Lonely Planet Kids: Lonely Planet Kids - an imprint of the world's leading travel authority Lonely Planet - published its first book in 2011. Over the past 45 years, Lonely Planet has grown a dedicated global community of travellers, many of whom are now sharing a passion for exploration with their children. Lonely Planet Kids educates and encourages young readers at home and in school to learn about the world with engaging books on culture, sociology, geography, nature, history, space and more. We want to inspire the next generation of global citizens and help kids and their parents to approach life in a way that makes every day an adventure. Come explore! This popular series continues traveling the planet to study alligators, bats, and other fascinating animals. Beautiful photos are paired with accessible text to examine the featured creature's appearance, habitat, behaviors, and life cycle. Animal Planet's definitive atlas of animal life takes readers on a continent-by-continent and habitat-by-habitat passport to adventure! Meet fierce snow leopards in the Tibetan mountains, giant helicopter damselflies in the rain forests of Central America, majestic eagles in the temperate forests of North America, and hundreds more fascinating creatures. What is a habitat? How is the North Pole's animal life different from the South Pole's? How and why do animals adapt to their environment? Is a food web different from a food chain? Animal Planet Animal Atlas answers all these questions and more in a kid-friendly, accessible format that young readers, parents, teachers, and librarians will adore. Through illustrated maps of every continent and its major biomes, full-color photographs of more than 200 animals, and illustrated animal travel guides presenting fun animal trivia, readers can track their favorite animals across the globe while learning about how animal habitats are affected by climate, food and water availability, migration, and human environmental impact. Additional special features throughout the book point out ways in which many animals on our planet share characteristics or behaviors with humans. "ROAR" sidebars discuss conservation and animal rescue efforts around the globe. R.O.A.R. (Reach Out. Act. Respond.) is Animal Planet's initiative dedicated to improving the lives of animals in our communities and in the wild. In this colorful board book, every page is bursting with interesting animals and tons of things to discover! Curious readers will love meeting Felix the mouse and his bright red airplane, who not only acts as their tour guide but also loves to hide himself in every scene. Tots will spend endless time playing seek-and-find with the sneaky Felix. For the nonreader, Felix has taken photographs of some of his favorite animals and has shared them on every page so kids can match the "photographs" with the animals on the maps, and beginning readers will enjoy learning about each continent and reading the names of 270 animals, easily labeled on every page. Structured around continents, this is the perfect first animal atlas for children, taking readers on a trip around the world to visit Europe, Africa, Asia, North America, South America, and Australia while discovering tons of extraordinary animals, from elephants, flamingos, and cows to lesser-known species like moles, tarsiers, and axolotls. Every year like clockwork, animals both big and small are driven by a natural instinct to move, in order to survive. On both land and sea, they fight the odds and the forces of nature to breed, feed, or lead and carry on for future generations. This reader is an introduction to the treacherous trek of the zebra, walrus, and Christmas Island red crab to overcome obstacles that include hungry cheetahs, stinging yellow crazy ants, and even their fellow species to make the often impossible journey of their lives. National Geographic supports K-12 educators with ELA Common Core Resources. Visit [www.natgeoed.org/commoncore](http://www.natgeoed.org/commoncore) for more information. In this beautifully illustrated guide, discover fascinating and unusual information about animals from all around the world. A delightfully quirky system of organization introduces the reader to the superlatives of the animal kingdom, from "super predators" to "expert architects." A must-have encyclopedia for any animal enthusiast! Finally, Lonely Planet has made the Atlas kids have been waiting for! With 160 pages of illustrated maps, engaging infographics, mind-blowing photography and a large dose of humour, this is the atlas that shows kids aged 8 and up what the world is really like. "Discover 250 animals from around the globe"--Back cover. What's the most dangerous animal on the planet? Which toothy hunter rules the oceans? Could you outrun a cheetah? Step into the awesome animal kingdom and discover the answers to these questions and many more in this fantastic, fact-packed board book. Bursting with incredible images and chunky fold-out pages, this book is perfect for small hands and curious minds. Discover some of the most incredible creatures on Earth in this interactive atlas of world wildlife! Featuring more than 180 animals from a variety of habitats, with flaps to lift on every spread, this stunning book offers exploration many wonders of the natural world. This stunning new atlas is your first-class pass on a world tour of the homes of Earth's most incredible animals. The latest exciting title in DK's popular Where on Earth? series maps out the habitats of the world's mammals, fish, birds, reptiles, invertebrates, and more. Whether it's plotting the range of a lion, following the flight paths of birds, tracking great white sharks in the oceans, or exploring the migration of the monarch butterfly, you will see exactly where and how more than 100 extraordinary animal species live. What makes Where on Earth? Animals unique are the maps themselves. Each one is individually commissioned in 3-D, with detail to show the habitat of each animal, as well as its geographic location. This reveals an astonishing amount of information about the behavior of these animals, from how seals are adapted to survive in freezing Antarctic seas to how beetles survive in the heat of the Sahara desert. There is also a focus on the conservation and protection of animals. Maps reveal the shrinking territories of some species, showing where they used to roam in the past compared to what's left of their range today. Whichever animal you're trying to track down, you're sure to find it in Where on Earth? Animals. Meet the amazing animals of Scotland in this beautiful book, packed full of fun facts, vibrant illustrations and maps showing where to spot these wonderful creatures. What's your favorite animal? In My Favorite Animal: Elk, students will learn amazing facts about elk. Each My Favorite Animal book features interesting non-fiction at a 2nd-grade reading level paired with questions throughout the text to check the reader's comprehension. Sample Text: A male elk, called a bull, has antlers that can grow to four feet above its head. That would make the bull nine feet tall. Only bulls have antlers. Females, called cows, are smaller. Come on a journey into the world of Australia's wildlife, exploring all the different habitats, from parched deserts to lush rainforests. DISCOVER the mammals, birds, reptiles, fish and insects that live there. SEARCH for the animals hidden in each habitat scene. FIND OUT about the fish that walks; the sixth sense of the platypus; the deadly venom of the desert death adder; the strange table manners of the sea star.
