ParentShift

This book offers a foundational defense of the rights of parents as primary educators of their children. Now in the Ninth Edition, Jerry Bigner's "Parent-Child Relations," the classic resource for child development professionals and parents themselves, has undergone a thorough revision anchored by the vision of the late Dr. Bigner and executed by new co-author, Clara Gerhardt. Maintaining its fundamental structure and unique approach, the text uses family systems and systemic family development theory as a framework to explore how parent-child relations change in tandem with developmental changes occurring with children, adults, and the wider family system. Thoughtful updates and revisions were done to increase the effectiveness and currency of the text. The text continues to provide strong emphasis on various theoretical and practical models pertaining to parenting. For decades now, this classic text has prepared countless teachers and practitioners by its proven and practical approach, utilizing family systems and systemic family development theory to explore how parent-child relations change in tandem with developmental changes occurring with children, adults, and the wider family system. The most comprehensive and current resource available to students as they prepare for working with parents and families, and for their roles as parents themselves, this best-selling resource carries on the essential message of its originator, Dr. Jerry Bigner, and will continue to nurture future family scholars and practitioners for years to come. Traditionally, books on parent education have focused on techniques from a certain tradition, either behavioral or humanistic, that could be applied to any problem of parenting or child behavior change. These books have used a "cook-book" approach that is frequently oblivious to environmental conditions that influence behavior or take into account the individual differences of the children or families involved. This book highlights the complexity of our society and times by exploring the problems faced by diverse types of parents, children, and parenting situations. Moreover, the sensitive issues of parenting in unique populations are handled in a caring, straight-forward way with an emphasis on research-based parent education programs along with tips and strategies for everyday use. Premier text on parent education in diverse populations Features tips, strategies, websites and support for parents Based upon "cutting edge" research in parent education Models for developing problem-specific parenting programs Step-by-step parent education programs for low-incidence problems Features violence and crisis prevention and intervention skills for families Today millions of kids are

stuck in a world that doesn't respect, support, or embrace who they really are—these are what Deborah Reber is calling the “differently wired” kids, the one in five children with ADHD, dyslexia, Asperger's, giftedness, anxiety, sensory processing disorder, and other neurodifferences. Their challenges are many. But for the parents who love them, the challenges are just as hard—struggling to find the right school, the right therapist, the right parenting group while feeling isolated and harboring endless internal doubts about what's normal, what's not, and how to handle it all. But now there's hope. Written by Deborah Reber, a bestselling author and mother in the midst of an eye-opening journey with her son who is twice exceptional (he has ADHD, Asperger's, and is highly gifted), *Differently Wired* is a how-to, a manifesto, a book of wise advice, and the best kind of been-there, done-that companion. On the one hand it's a book of saying NO, and how it's time to say no to trying to fit your round-peg kid into society's square holes, no to educational and social systems that don't respect your child, no to the anxiety and fear that keep parents stuck. And then it's a book of YES. By offering 18 paradigm shifts—what she calls “tilts”—Reber shows how to change everything. How to “Get Out of Isolation and Connect.” “Stop Fighting Who Your Child Is and Lean In.” “Let Go of What Others Think.” “Create a World Where Your Child Can Feel Secure.” “Find Your People (and Ditch the Rest).” “Help Your Kids Embrace Self-Discovery.” And through these alternative ways of being, discover how to stay open, pay attention, and become an exceptional parent to your exceptional child. This is the first book to provide a multidisciplinary, critical, and global overview of evidence-based parenting education (PEd) programs. Readers are introduced to the best practices for designing, implementing, and evaluating effective PEd programs in order to teach clients how to be effective parents. Noted contributors from various disciplines examine evidence-based programs from the U.S., Canada, Europe, Asia, Australia, as well as web-based alternatives. The best practices used in a number of venues are explored, often by the developers themselves. Examples and discussion questions encourage application of the material. Critical guidance for those who wish to design, implement, and evaluate PEd programs in various settings is provided. All chapters feature learning goals, an introduction, conclusion, key points, discussion questions, and additional resources. In addition to these elements, chapters in Part III follow a consistent structure so readers can easily compare programs—theoretical foundations and history, needs assessment and target audience, program goals & objectives, curriculum issues, cultural Implications, evidence-based research and evaluation, and professional preparation and training issues. The editor has taught parenting and family life education courses for years. This book reviews the key information that his students needed to become competent professionals. Highlights of the book's coverage include: Comprehensive summary of evidence-based PEd training programs in one volume. Prepares readers for professional practice as a Certified Family Life Educator (CFLE) by highlighting the fundamentals of developing and evaluating PEd programs. Exposes readers to models of parenting education from around the world. The book opens with a historical overview of PEd development. It is followed by 20 chapters divided in four parts. The initial six chapters focus on fundamentals of parenting education --program design, implementation, evaluation, the role of mediators and moderators, as well as the U.S. Cooperative Extension Parent Framework. The three chapters in Part II review the latest status of parenting education in Europe, Asia, and web-based alternatives. Part III presents ten stellar, evidence-based parenting programs offered around the world. In addition to the learning goals, introduction, conclusion, key points, discussion questions, and additional resources that are found in all chapters, those in Part III also consider theoretical foundations and history, needs assessment and target audience, program goals & objectives, curriculum issues, cultural Implications, evidence based research and evaluation, and professional preparation and training issues. Part IV reviews future directions. Ideal for advanced undergraduate or graduate courses in parent education, parent-child relations, parenting, early childhood or family life education, family therapy, and home, school, and community services taught in human development and family studies, psychology, social work, sociology, education, nursing, and more, the book also serves as a resource for practitioners, counselors, clergy members, and policy makers interested in evidence based PEd programs or those seeking to become CFLEs or Parent Educators. There is a dynamic and growing energy in Indonesia focusing on parenting education, particularly for low-SES families. However, little is known about parenting styles and related outcomes, much less the coverage and effectiveness of various parenting education approaches. In 2013, the Government of Indonesia commissioned the World Bank to review existing programs and make recommendations to strengthen its parenting education system. This report synthesizes international research while providing detailed information on the seven agencies currently providing parenting education programs in Indonesia, collected from

interviews, reports, and data presentations in 2013 and early 2014. Four government ministries and three non-governmental organizations currently offer programming: Ministry of Health, Ministry of Education and Culture, Ministry of Social Affairs, Family Planning Board, Plan, Save the Children, and World Vision. The report notes the commonalities in current program structures and approaches, then articulates recommendations to create a more cohesive and effective system with adequate coverage. In terms of content, authors recommend that providers choose a narrow and meaningful set of messages for respective programs, and enhance content for particularly vulnerable families, such as those with children with disabilities or dealing with chronic illness, natural disaster, conflict, and so forth. To strengthen program design and delivery, eight recommendations emerge, such as articulating measurable goals, ensuring active learning, encourage in-session practice, improving training and compensation for facilitators, and increasing the use of technology. The report includes a matrix of short-term (1-2 years) and medium-term (3-5 years) steps to build a coordinated system of parenting education that involves four areas of action: (1) create the framework; (2) develop an enabling environment; (3) conduct the research; and (4) implement and refine programming. Steps are both simultaneous and sequential and should lead to increased coverage and quality of programs within 5 years. This volume takes an international and multidisciplinary approach to understanding students' academic achievement. It does so by integrating educational literature with developmental psychology and family studies perspectives. Each of the nine chapters focuses on a particular country: China, Colombia, Italy, Jordan, Kenya, the Philippines, Sweden, Thailand, or the United States. It describes the country as a cultural context, examines the current school system and parenting in light of the school system, and provides empirical evidence from that country regarding links between parenting and students' academic achievement. The book highlights similarities and differences in education and parenting across these nine countries - all varying widely in socioeconomic and cultural factors that affect schools and families. The volume contributes to greater understanding of links between parenting and academic performance in different cultural groups. It sheds light on how school systems and parenting are embedded in larger cultural settings that have implications for students' educational experiences and academic achievement. As two of the most important contexts in which children and adolescents spend time, understanding how schools and families jointly contribute to academic achievement holds promise for advancing the international agenda of promoting quality education for all. "This text uniquely provides comprehensive coverage of the history of parenting and parent/school collaboration, current issues and immigration trends affecting American schools and communities, diverse family structures, and many techniques that teaching professionals can use to engage family members of all children more completely as partners in education. Chapters on working with families of children with special needs and on child abuse are remarkable aspects of this text."--BOOK JACKET. Small groups are a primary vehicle for effective parent learning and support, so understanding parent group process and managing group learning is a critical skill for parent education practice. Group Parent Education is devoted to training parent educators and family counsellors and represents a unique and important contribution to the growing field of parent education and support programmes. Campbell and Palm build upon the rich traditions of group parent education while incorporating contemporary theory and practice. Drawing upon their experiences as parent educators and their expertise as teacher educators, they combine different conceptual frameworks for understanding group process with practical strategies for leading parent groups that blend education and support. Group Parent Education leans toward the practical, with a skill development thrust and concrete examples as it attempts to address the complexity of working with diverse family groups. The book also includes a chapter on parent-child interaction time as a rich component that enhances parent discussion and learning in parent group settings. Campbell and Palm provide readers with resource material that should have This book reports initiatives to listen to parents and families, to ascertain what families believe and do as they seek to engage collaboratively with their children's educators, and what educators and educational systems might do to facilitate and/or establish barriers to such engagement. Parental engagement in children's learning and development has many positive benefits. However, in the current environments of accountability and performativity which are pervading early childhood education in many countries, the opportunities for parents and other family members to be part of the development of respectful, collaborative relationships with their children's early childhood educators are becoming more and more restricted. Many educators feel forced to choose between curriculum outcomes and parental engagement, as both involve their time. There is a danger that the voices of parents and families in their children's early learning and development will not always be heard, seen, or fully understood. This

volume addresses this important issue. Researchers, educators, and families will all benefit from this book, to the ultimate benefit of the young children who are the future. This book was originally published as a special issue of the European Early Childhood Education Research Journal. Award-winning education journalist Peg Tyre mines up-to-the-minute research to equip parents with the tools and knowledge necessary to get their children the best education possible. We all know that the quality of education served up to our children in U.S. schools ranges from outstanding to shockingly inadequate. How can parents tell the difference? And how do they make sure their kids get what's best? Even the most involved and informed parents can feel overwhelmed and confused when making important decisions about their child's education. And the scary truth is that evaluating a school based on test scores and college admissions data is like selecting a car based on the color of its paint. Synthesizing cutting-edge research and firsthand reporting, Peg Tyre offers parents far smarter and more sophisticated ways to assess a classroom and decide if the school and the teacher have the right stuff. Passionate and persuasive, *The Good School* empowers parents to make sense of headlines; constructively engage teachers, administrators, and school boards; and figure out the best option for their child—be that a local public school, a magnet program, a charter school, homeschooling, parochial, or private. This tells of twenty-four couples negotiating the emotional and practical journey of parenting their learning 'disabled' child. The author, a researcher, sociologist and mother of a learning disabled daughter, questions the weak inclusive education discourse and unpacks parents' narratives in relation to denial, disappointment and social exclusion. A research-based, up-to-the minute account of the current status of antenatal education, focusing on the key challenges it faces in the future, offering suggestions for how these challenges might best be met. It describes some innovative approaches to accessing vulnerable groups of parents and how collaboration between the statutory and voluntary sectors might result in a better educational service for pregnant women and their families. Narratives from parents are analysed and commented upon, and underpinning the book will be an account of how the principles and practices of adult education should inform antenatal education. Demonstrates the potential for antenatal education to make a positive impact on women's experience of birth. Points the way to accessing new sources of funding for antenatal classes. Illustrates new teaching strategies with the aim of accessing groups of parents currently not involved with antenatal education. Aims to show how antenatal education can be a central, rather than peripheral part of the holistic care provided to pregnant women and their families. *Parent Education: Working with Groups and Individuals* revises *Group Parent Education*, first published in 2004, by introducing new concepts and strategies and expanding the approach for parent groups to include working individually with parents. This edition includes the earlier book's classic content on the rationale, assumptions, history, and evolution of group parent education, as well as the conceptual frameworks for understanding group dynamics and the role of the group leader. It builds on this foundation with new resources and service delivery models. It introduces a continuum of parent education services in a conceptual framework from prevention to intervention, and focuses on relationship-building between the parent educator and parents. It also examines common issues and challenges in the parent educator role. Designed to serve as a core textbook for parent and family life education classes, *Parent Education* incorporates new activities related to the content, along with video examples and discussion prompts. It is ideal for upper division and graduate level courses in parent education, social work, nursing, mental health, and early childhood education. Decades of research have demonstrated that the parent-child dyad and the environment of the family—which includes all primary caregivers—are at the foundation of children's well-being and healthy development. From birth, children are learning and rely on parents and the other caregivers in their lives to protect and care for them. The impact of parents may never be greater than during the earliest years of life, when a child's brain is rapidly developing and when nearly all of her or his experiences are created and shaped by parents and the family environment. Parents help children build and refine their knowledge and skills, charting a trajectory for their health and well-being during childhood and beyond. The experience of parenting also impacts parents themselves. For instance, parenting can enrich and give focus to parents' lives; generate stress or calm; and create any number of emotions, including feelings of happiness, sadness, fulfillment, and anger. Parenting of young children today takes place in the context of significant ongoing developments. These include: a rapidly growing body of science on early childhood, increases in funding for programs and services for families, changing demographics of the U.S. population, and greater diversity of family structure. Additionally, parenting is increasingly being shaped by technology and increased access to information about parenting. *Parenting Matters* identifies parenting knowledge, attitudes, and practices associated with

positive developmental outcomes in children ages 0-8; universal/preventive and targeted strategies used in a variety of settings that have been effective with parents of young children and that support the identified knowledge, attitudes, and practices; and barriers to and facilitators for parents' use of practices that lead to healthy child outcomes as well as their participation in effective programs and services. This report makes recommendations directed at an array of stakeholders, for promoting the wide-scale adoption of effective programs and services for parents and on areas that warrant further research to inform policy and practice. It is meant to serve as a roadmap for the future of parenting policy, research, and practice in the United States. Developed for students in child and family science courses, *An Introduction to Effective Parenting Education: Exploring Context, Content, and Strategies* provides foundational information and orients readers to professional parent education, both formal and informal. Geared specifically to those who may one day provide parenting education, the text is organized into three sections that discuss the context of parenthood in the United States, the content generally included in parenting programs, and the specific strategies parent educators use to teach adults. Readers learn about the sociology of parenthood, including demographic trends regarding parenthood, the effect of parenting on both parents and children, and the research that has produced a scientific consensus regarding effective parenting. They also review the best practices of those parenting strategies in depth. Strategies include attachment relationship formation; communication approaches such as active listening, I-messages, and win-win problem-solving; process-centered feedback to nurture a growth mindset; natural and logical consequences; and applied behavior analysis. Finally, readers explore the profession of family life education, including best practices for teaching as well as a review of widely used parenting programs. Focused on content that is practically applicable, and dedicated to compassionate, evidence-based parenting education, *An Introduction to Effective Parenting Education* encourages students to think deeply about all aspects of parenting. It is well-suited to courses in child and family science, human development and family studies, or parent-child relations. Kathleen Dyer earned her Ph.D. in human development and family studies at the University of Missouri, Columbia. She is an associate professor in the Department of Child, Family, and Consumer Studies at California State University, Fresno where she also serves as the department chair. Dr. Dyer has been certified as a Family Life Educator by the National Council on Family Relations since 2006. She regularly provides parenting education in a church setting as well as with a court-ordered divorce-related parenting program. Her professional writing has appeared in numerous journals including *Infant and Child Development*, the *British Medical Journal*, *Family Science Review*, *Sleep*, and the *Journal of Adult Development*. This book is based on the premise that schools and parents need to work together for the social, emotional, cognitive and academic development of children. While the school provides a leadership model, parents act as reinforcers of learning and prime movers in their children's education. The authors emphasize throughout the book that parents and educators need to celebrate the pleasure of teaching. In clear and accessible language, this work presents theories on learning and human relations. It then charts and reviews the important components of a successful school-parent partnership, giving specific recommendations on the best way to involve diverse groups of parents. Chapters are: *US Families in the Context of Change*; *The African American Experience in Family Context*; *The Hispanic American Experience in Family Context*; *The Asian American Experience in Family Context*; *Communities of Education: Concepts Defined*; *Empowerment for all Parents*; *Required: A Positive Self-Concept*; *Successful Schools: A Parents' and Educators' Partnership*; *Successful Students: Ability, Effort and Parental Involvement*; *Parents: First and Most Important Teachers*; *Recommendations for the Improvement of Parental School Involvement*; *Advocacy for School and Home Partnership*; author and subject indexes. *I Love You Rituals* offers more than seventy delightful rhymes and games that send the message of unconditional love and enhance children's social, emotional, and school success. Winner of a 1999 Parent's Guide Children's Media Award, these positive nursery rhymes, interactive finger plays, soothing games, and physically active can be played with children from infancy through age eight. In only minutes a day, these powerful rituals: Prime a child's brain for learning Help children cope with change Enhance attention, cooperation, and self-esteem Help busy families stay close Affirm the parent-child bond that insulates children from violence, peer pressure, and drugs, and much more. Easy to learn and especially effective in stressful situations, *I Love You Rituals* gives parents, grandparents, caregivers, and teachers inspiring tools to help children thrive. A cutting-edge handbook for parents from a pioneer in infant brain development *Should you really read to your baby? Can teaching a baby sign language boost IQ? Should you pipe classical music into the nursery?* Dr. Stamm translates the latest neuroscience findings into clear explanations and practical suggestions,

demonstrating the importance of the simple ways you interact with your child every day. It isn't the right "edu-tainment" that nurtures an infant's brain. It is as simple as Attention, Bonding, and Communication, and it's within every parent's ability to provide. Practical games and tips for each developmental age group will show you not only what the latest findings are but, more importantly, tell you what to do with them. "An encyclopedic exploration of the most effective methods for giving children the courage to realize their full potential." — ADELE FABER, author of *How to Talk So Kids Will Listen & Listen So Kids Will Talk* WINNER: Nautilus Book Award, Foreword Indies Award, Independent Publishers Book Award, Readers Choice Award, National Indie Excellence Award and Family Choice Award. **NEW TOOLS AND A GROUNDBREAKING FORMULA FOR SOLVING VIRTUALLY ANY PARENTING CHALLENGE WITHOUT PUNISHMENTS, REWARDS OR BRIBERY.** ParentShift is an award-winning book that marries modern research and science with the work of some of the greatest child psychologists of our time. The advice, which applies to children of any age, is built into a flexible, common-sense approach. Unlike any other parenting book on the market, ParentShift transforms families by showing parents precisely how to solve short-term challenges, prevent long-term problems and build strong relationships with kids — all at the same time. In this book, readers will learn to:

- Respond thoughtfully to outbursts and tantrums.
- Set age-appropriate limits and boundaries.
- Prepare children to meet life's challenges.
- Ensure kids become strong boundary-setters.
- Curtail power struggles and sibling rivalry.
- Move beyond timeouts, reward charts and other outdated tactics.
- Build open, trusting parent-child bonds that keep kids turning to parents, instead of peers, for guidance.

This is the first book to provide a multidisciplinary, critical, and global overview of evidence-based parenting education (PEd) programs. Readers are introduced to the best practices for designing, implementing, and evaluating effective PEd programs in order to teach clients how to be effective parents. Noted contributors from various disciplines examine evidence-based programs from the U.S., Canada, Europe, Asia, Australia, as well as web-based alternatives. The best practices used in a number of venues are explored, often by the developers themselves. Examples and discussion questions encourage application of the material. Critical guidance for those who wish to design, implement, and evaluate PEd programs in various settings is provided. All chapters feature learning goals, an introduction, conclusion, key points, discussion questions, and additional resources. In addition to these elements, chapters in Part III follow a consistent structure so readers can easily compare programs—theoretical foundations and history, needs assessment and target audience, program goals & objectives, curriculum issues, cultural Implications, evidence-based research and evaluation, and professional preparation and training issues. The editor has taught parenting and family life education courses for years. This book reviews the key information that his students needed to become competent professionals. Highlights of the book's coverage include: Comprehensive summary of evidence-based PEd training programs in one volume. Prepares readers for professional practice as a Certified Family Life Educator (CFLE) by highlighting the fundamentals of developing and evaluating PEd programs. Exposes readers to models of parenting education from around the world. The book opens with a historical overview of PEd development. It is followed by 20 chapters divided in four parts. The initial six chapters focus on fundamentals of parenting education --program design, implementation, evaluation, the role of mediators and moderators, as well as the U.S. Cooperative Extension Parent Framework. The three chapters in Part II review the latest status of parenting education in Europe, Asia, and web-based alternatives. Part III presents ten stellar, evidence-based parenting programs offered around the world. In addition to the learning goals, introduction, conclusion, key points, discussion questions, and additional resources that are found in all chapters, those in Part III also consider theoretical foundations and history, needs assessment and target audience, program goals & objectives, curriculum issues, cultural Implications, evidence based research and evaluation, and professional preparation and training issues. Part IV reviews future directions. Ideal for advanced undergraduate or graduate courses in parent education, parent-child relations, parenting, early childhood or family life education, family therapy, and home, school, and community services taught in human development and family studies, psychology, social work, sociology, education, nursing, and more, the book also serves as a resource for practitioners, counselors, clergy members, and policy makers interested in evidence based PEd programs or those seeking to become CFLEs or Parent Educators. Written by parents who have been through the US special education system, this book cuts through the jargon to provide other parents with a no-nonsense road map full of valuable first-hand insights and tried-and-tested advice. The authors clearly describe:

- the special education process, including the school hierarchies parents are likely to encounter and etiquette to be aware of when dealing with school

personnel · the information parents should expect to see in school evaluations and Individualized Education Programs (IEPs), and what to do when this information is missing or insufficient · problems parents may encounter when the needs of the school conflict with the needs of a child, including how to deal with such situations and when to seek legal advice · the importance of organizing special education documentation and establishing a 'paper trail', and how to begin this process · why transition planning is so important, and transition services parents may want to consider for their child. Demonstrating that parents really do have the power to make special education work for their child, this empowering guide is essential reading for parents of children with disabilities who are new to the special education system in the US, as well as those who feel frustrated with the system. Readers comments: A Fabulous, Important Book, Jesper Juul provides parents with such an amazing, simple, and absolutely vital approach to raising children that it rings true on every page. Some of what he suggests we as parents do is difficult - as it is against our "knee-jerk" reactions we may have learned from our parents, but all of it is right on about how we can raise confident, healthy, whole humans, right from the start. I was thrilled to have discovered a book that allowed me to see different possibilities with child raising. Anyone with a child will gain immensely from reading this book, seeing themselves (as I did, over and over again) in his numerous examples, and learning how to move on from there. Without reservation, I am grateful for this book and highly recommend it. No Parent Should Be Without It, There are not enough superlatives to describe how helpful this book has been to our family. With tremendous wisdom and a warm, pragmatic eye, Mr. Juul helps us redefine the ways we look at a child's behavior and our relationship to our children and ultimately, each other. This is a book that doesn't offer easy answers or 'tricks' to help in the raising of your child. This is a book that helps you see with a child's eye, hear with a child's ear, and feel with a child's heart in ways that feel so natural and obvious, you will wonder why you haven't thought of them before. But trust me, you haven't. It is a book that offers day-to-day skills along with the thinking that helps generate them, leaving the reader feeling smart and well-satisfied. This groundbreaking book should be on the shelf of all parents everywhere. If you read only one book on raising your child, this is the one. I cannot recommend it highly enough. If you have children - read this book!, This is an amazing book that will surely turn upside down any thoughts you ever had about raising children. Even though you may not agree with all the views in this book, there is so much food for thought and new ideas that you will return to this book again and again for interesting and mind blowing advice. Essential reading for parents and childcare staff, This book takes a giant step forward in our knowledge of what children really need. It is based on a wealth of practical experience, but provides a profound theoretical basis for our interactions with children. And is easy to read....The book is well-written, and reveals Jesper Juul's deep wisdom, love and understanding for both children and parents, as well as a good sense of humour and perspective. Drawing on hundreds of studies in the last 20 years, the new edition of Family Policy Matters brings a fresh perspective to family policy, underscoring why it is needed, and outlining how policymaking should be approached. Author Karen Bogenschneider proposes a theoretical framework for conceptualizing policy issues in a way that holds the potential for overcoming controversy and identifying common ground. This new edition includes updates on the most current research, including: *new issues that have changed the political landscape for families (e.g. strengthening marriage initiative, same-sex marriage); *an updated section on state statutes or Governor's orders that require family impact analysis; *a new chapter on the history of family policy in this century; *a new appendix on how to conduct a family impact analysis; and *two new case studies on writing family policy newsletters for state policymakers and teaching family impact analysis to the general public. *Instructor's Manual with sample syllabi for both undergraduate and graduate courses, suggested readings, assignments, and class activities, discussion questions, daily lesson plans, instructor insights, special presentations to enrich one's class, and PowerPoint slides. The targeted audience includes researchers interested in seeing their research and ideas acted upon in the policy world; family professionals who work to connect research and policymaking; and instructors interested in making family policy come alive for undergraduate and graduate students. This book is an ideal textbook for family policy courses. When parents need the most authoritative information on raising gifted kids, they can turn to Parenting Gifted Children: The Authoritative Guide From the National Association for Gifted Children, a gifted education Legacy Award winner. This comprehensive guide covers topics such as working with high achievers and young gifted children, acceleration, advocating for talented students, serving as role models and mentors for gifted kids, homeschooling, underachievement, twice-exceptional students, and postsecondary opportunities. The only book of its kind, this guidebook will allow parents to find the support and resources they need to help

their children find success in school and beyond. Written by experts in the field of gifted education and sponsored by the leading organization supporting the education of gifted and advanced learners, this book is sure to provide guidance, advice, and support for any parent of gifted children. Texas Association for the Gifted and Talented 2011 Legacy Book Award Winner - Parenting "Reviews the broad landscape of legal and practical issues facing parents and adolescents when using smart phones and online technologies"-- This book presents good news for stressed and concerned parents: it does not require a Ph.D or unlimited hours for parents to make a difference in their children's education. An essential book for parents to help their children get the education they need to live happy, productive lives from The New York Times bestselling author of *The Element* and *Creative Schools* Parents everywhere are deeply concerned about the education of their children, especially now, when education has become a minefield of politics and controversy. One of the world's most influential educators, Robinson has had countless conversations with parents about the dilemmas they face. As a parent, what should you look for in your children's education? How can you tell if their school is right for them and what can you do if it isn't? In this important new book, he offers clear principles and practical advice on how to support your child through the K-12 education system, or outside it if you choose to homeschool or un-school. Dispelling many myths and tackling critical schooling options and controversies, *You, Your Child, and School* is a key book for parents to learn about the kind of education their children really need and what they can do to make sure they get it. As research in neuroscience increasingly points to the unparalleled influence of the first 1000 days of life from conception to two years of age in determining the baby's life trajectory, the need for high-quality early parenting education delivered by knowledgeable and dedicated professionals becomes ever more apparent. This book describes the global aims of early parenting education. It identifies the key areas that research suggests are important: building a relationship with the unborn and newborn baby; preparing for labour and birth; supporting parents' mental health; protecting the couple relationship across the transition to parenthood; and education for special groups such as same-sex couples, women with fear of birth, prisoners, military wives and parents from black and minority ethnic backgrounds. All practitioners providing early parenting programmes - midwives, health visitors, family link workers, children's centre staff and voluntary sector teachers - will gain new ideas for their practice in this book. Students taking midwifery and early childhood courses will find much to support their studies. Ultimately, the book provides inspiration for all those who are committed to the role of parenting education in reducing social inequalities. This book focuses on parents and teachers as adult learners, who should be growing and learning along with the children in their care. It lays out a theory of what parents and teachers need to care for children and themselves and then it shows how the author has assisted parents and teachers to put these theories into practice. McDermott relies on stories and listening to the voices of parents, teachers and children to make her case. She weaves together the latest theories and research with these stories. She uses narratives of actual school meetings, workshops, parent planning and discussion groups, testimonies, newsletters, and research of others in the field, to demonstrate applications of theory and research. She fills a gap by focusing on parents from all socioeconomic backgrounds. Key Features:

- o Focuses on parents and teachers as adult learners
- o Focuses on the dynamic process of parenting and teaching
- o Provides a theory to practice model to support parents, families and teachers
- o Provides a tool or guide for thinking through problems and finding solutions that take into consideration the needs of all involved.

In March of 2020, our daily lives were upended by the COVID pandemic and subsequent school closures. With work and school shifting online, a new and ongoing set of demands has been placed on parents as school moved to online, virtual and hybrid models of learning. Families need to balance professional responsibilities with parenting and supporting their children's education. As education professors, we find ourselves in a particular position as our expertise collides with the reality of schooling our own children in our homes during a global pandemic. This book focuses on the experiences of education faculty who navigate this relationship as pandemic professionals and pandemic parents. In this collection of personal essays, we explore parenting in the pandemic among education professors. Through our stories, we share our perspectives on this moment of upheaval, as we find ourselves confronting practical (and impractical) aspects of long held theories about what school could be, seeing up close and personally the pedagogy our children endure online, watching education policy go awry in our own living rooms (and kitchens and bathrooms), making high-stakes decisions about our children's (and other children's) access to opportunity, and trying to maintain our careers at the same time. In this collision of personal and professional identities, we find ourselves reflecting on fundamental questions about the purpose and design of

schooling, the value of our work as education professors, and the precious relationships we hope to maintain with our children through this difficult time. Praise for Parenting in the Pandemic "Lowenhaupt and Theoharis have curated a magnificent collection of essays that captures the hopes, fears, tensions, and possibilities of parenting in a time of crisis. A gift to parents and educators everywhere as we continue to process and reflect on what the pandemic has taught us about what it means to educate others, and perhaps through a renewed imagination, our very own children." - Sonya Douglass Horsford, Teachers College, Columbia University "In this powerful collection of essays, we have a rare window into how the personal and professional worlds of academics collided during the COVID-19 pandemic. What emerges from these reflections is an intimate portrait of the longstanding tensions in our lives as public intellectuals and parents that have long burned as embers, but are now set ablaze by the public health, economic, and educational crisis we have lived through during the last year. Reading these essays will help us to see questions of education policy and practice in a new, more personal light." - Matthew Kraft, Brown University
