A startling look inside one of the most fascinating cases of last year--the murder of Terry King, the conviction of his 12 and 13-year old sons, and the pedophile who was accused of being an accessory. On November 26, 2001, Terry King was found dead in his recliner in his home in Pensacola, Florida. Though a fire had been set in an attempt to cover up the scene, the evidence was indisputable--he had been beaten to death with a baseball bat. Days later, King's two young sons, 12 and 13 and not even five feet tall each, were found hiding out in the mobile home of their close friend, Rick Chavis, a convicted pedophile who had recently become very close to 12-year old Alex. In parallel statements, Alex and Derek confessed to murdering their father, and soon, they became the two youngest people ever to stand on trial for murder in the state of Florida. But in a startling twist, the prosecution decided to do the unprecedented--try the boys for murder in one trial and Rick Chavis for murder in another, despite the boys' confessions. And in a case that gripped the state of Florida and hit headlines across the nation, convictions came down and were soon overturned. But in the end, the case became a series of missed opportunities, stunning reversals, and one of the most riveting true crime stories of the last decade. Symposium D, "Energy Critical Materials" and Symposium G, "Materials as Tools for Sustainability," were held on November 25-30 at the 2012 MRS Fall Meeting in Boston, Massachusetts. Many technologies that currently impart significant benefits to our society cannot continue indefinitely without depleting or despoiling key resources, and more sustainable paths must be sought. Sustainable development that raises global standards of living and promotes economic growth calls for materials science to develop advanced technologies and strategies to use our finite material and energy resources more efficiently. This volume presents a compilation of emerging research on sustainable development in the context of product manufacturing, catalysis, transportation, and energy-critical materials. Each paper provides a glimpse of exciting recent developments, including: critical elements for next-generation batteries, phase change materials for energy efficient buildings, weathering resistant materials, 3-D printing technologies, flame retardants with reduced toxicity, and stimulating life-cycle analysis examples in various applications. Moffatt addresses the two sides of this cycle of violence, including examples from clinical case studies and treatment options. He details crimes against children, ranging from Munchausen Syndrome by Proxy, sexual and physical abuse, neglect, filicide, and infanticide, and addresses aggression committed by children against other people, property, and self, including self-mutilation and suicide. Alex King knows he made a mistake, and as a result MI5 has been coerced into investigating the sudden and mysterious death of an MI6 operative. In the frozen wilds of Lapland at a point where Finland, Russia and Norway intersect, an isolated hotel becomes the only sanctuary from the most powerful Arctic storm in living memory. A Russian defector holds the key to

a terrifying secret. Pursued by ruthless mercenaries, who will stop at nothing to silence them, the defector heads for the hotel, unaware that the man they mean to meet has been murdered. King must intercept the defector and get the deadly secrets they hold to safety. But who can he trust? And why, after all these years has King's past finally caught up with him here? Facing attack on all sides, and battling the frozen elements, King suspects that the fight most deadly is not always the one you can see. Critical Materials takes a case-study approach, describing materials supply-chain failures from the bronze age to present day. It looks at why these failures occurred, what the consequences were, and how they were resolved. It identifies key lessons to guide responses to current and anticipated materials shortages at a time when the world's growing middle class is creating unprecedented demand for manufactured products and the increasingly exotic materials that go into them. This book serves as a guide to materials researchers and industrial end-users for finding effective approaches to shortages of specialty materials. The lessons in the book are also appropriate to those who use materials and for those involved in manufacturing supply-chain management and industrial design. Instructs the reader on how to select the most effective strategies to deal with materials supply-chain failures Discusses technical feasibility, economic viability and the political context Includes an extensive use of case studies to illustrate key concepts of criticality An ancient evil. An all too contemporary crime. In the tiny, bucolic town of Greenleaf, Claire Vaughn, beloved high school counselor, is ready to end her immortal life. As the last school day before summer vacation comes to a close, Claire walks into Room 217 with a loaded gun. Ten meticulously chosen teenagers are what she wants. The rest can leave. Now a horrifying waiting game is about to begin ... Claire has been walking the world a long time, hunting for others like her. One of her terrible tribe is right here in Greenleaf, in this very building, wearing a friendly, helpful face over the monster within. All these frightened souls. It's a feast. And a trap. A newly formed terrorist group has declared war on the world's richest people. The choice is simple. The rich can give away their wealth to escape an assassin's bullet, or they can die. When the wealthiest five people are dead, a new death list will be publicly declared. When a British billionaire is assassinated, MI5 agent Alex King is sent to investigate. With the killings carried out by a sniper of tremendous skill, King's dark past makes him the best man for the task. King soon discovers attempts to corrupt the investigation and investment links to a prominent cabinet member. Only when an attempt is made on his own life, does King suspect there is more to the group's declaration than first appeared. King faces an impossible task. With multi-billionaires giving so much of their wealth to charities, the terrorist group are regarded by many as heroes of a new world order. As King closes in, the fight becomes personal. When a deniable mission to infiltrate Albanian and Russian organised crime is compromised, the Security Service distance themselves ahead of political fallout leaving their missing operatives off the grid with no clue to their status. Alex King is re-evaluating his options after a rogue mission has cost him his career. He has sworn to leave the shadowy world he knows behind, but to do so would mean the fate of his closest friend will remain a mystery. He has questions, but the answers lie with an asset who had been supplying MI5 with information from within the inner circle of the Russian mafia. With the Russian mafia on one side and the Albanian brotherhood on the other, getting the asset out is just the beginning in what will be a dirty war fought against a ruthless enemy who have no limits and hold all the cards. Are we able to do everything we ought to do? According to the important but controversial Ought Implies Can principle, the answer is yes. In this book Alex King sheds some much-needed light on this principle. She argues that it is flawed because we are obligated to perform some actions that we cannot perform, and goes on to present a suggested theory for anyone who would deny the principle. She examines the traditional motivations for Ought Implies Can, and finds that they to a large degree do not support it. Using examples like gay rights, addiction, and disability, she argues that we can preserve many of the motivations that led us to the principle by thinking more about what we, as individuals or institutions, can fairly demand of ourselves and each other. For thirty-year-old Kerry her Denver townhouse is the safe zone. Everything else? Lava. There's a worn path (that might be a slight exaggeration) between her home office and the kitchen. She fritters away her days in front of

the computer and buries herself under mountains of work. Sometimes, she wears pants. And her mother expects her to abandon this suburban fortress to vault across the ocean to Greece? Not a chance. Normally Olga is force of nature. Right now she is in a little bit of a coma, but don't you worry, this coma is make-believe. She can snap out of it any time she likes. But she worries if she wakes up her son-in-law will come to finish the murder he started, so he can snatch away her beloved Hotel Kokkinou and claim it for himself. Josh goes to Greece following a woman-his woman. A broken man, Josh has a shiny new collection of regrets and one shot at redemption. But for what? While Kerry, Olga, and Josh work to save the hotel, none of them realizes how close they are to kissing death's cheek. Whatever happens, one thing is guaranteed: the whole village will be talking about it. Gina is a club singer who has come to the mansion of the influential King family to audition as a wedding singer. Even though she suffers from severe stage fright, the Kings' grandson, Alex, encourages her and helps bring out her true singing potential. The only problem is, he's already dating an extremely beautiful woman! The Accused: 13-year-old Derek King and his 12-year-old brother, Alex, Sunday school students with choirboy looks. After midnight on November 26, 2001, someone bludgeoned Terry King to death while he slept, and set his Florida home afire. By the time the firefighters extinguished the blaze, King's sons, Alex, 12, and Derek, 13, were at the home of their forty-year-old friend, Ricky Chavis, a convicted child-molester. By the next afternoon, following confessions, both boys were charged as adults in their father's slaying. Chavis was tried separately for the same crime-incredibly by the same attorney who would prosecute Alex and Derek, and argue two contradictory theories. The Victim: Their own father. When Alex divulged his sexual relationship with Chavis, the trial took a sensational turn. So did Alex and Derek, who recanted their confession and blamed Chavis to no avail. A jury convicted the boys of second-degree murder, but the judge threw the verdict out. Chavis was acquitted. But the case wasn't over. As more disturbing revelations came to light, as criminal motives became more complex, and as the line between guilt and innocence was crossed, a stunned nation watched in disbelief to learn the ultimate fate of the...Angels of Death. A fake (and very convenient) coma, an arranged marriage, and a disappearing-finger trick kick off the second book in the Women of Greece series. Twenty-eight-year-old Kiki Andreou has lived her whole life in Agria, Greece, a seaside village where old-fashioned mothers arrange marriages, and gossip moves faster than light. Kiki doesn't want to get married, so she's itching to pop the champagne cork when her fiance is a no-show at the church. Until tragedy strikes the town, and Kiki's brief splash of freedom is washed away by accusations of murder and infidelity. Soon life-long friendships are shattering, and more than one person wants Kiki to pay for a crime she didn't commit. She has no idea that an old plot twist is about to become new again, in the shape of a delicious man who is intimately-and uncomfortably-familiar with the disappearing-finger trick she showed him when she was thirteen. A man with one foot out of the country and the other in a military prison. Even if she manages to stay out of prison herself, Kiki is in very real danger of losing her heart to a man for whom staying in Greece is not an option." So now we have someone, who not only loves to kill, but takes an added, more powerful thrill of killing out of lust and sexual desire. We may know this type of killing as a lust murder. Much has been written about Alex Sanders, King of the Witches. But much more is left unsaid about the lives of the men and women who were changed forever through the work of this remarkable man. When the past finally catches up with intelligence agent Alex King, it shatters his world. His enemy has struck at the life he was building, the world he was preparing for when a mission would one day become his last. In doing so, they have not only exploited the man's one weakness, but have unwittingly released a wrath that will not be satisfied until one of them is the last man standing. Taking as its focus memorials of the First World War in Britain, this book brings a fresh approach to the study of public symbols by exploring how different motives for commemorating the dead were reconciled through the processes of local politics to create a widely valued form of collective expression. It examines how the memorials were produced, what was said about them, how support for them was mobilized and behaviour around them regulated. These memorials were the sites of contested, multiple and ambiguous meanings, yet out of them a united public observance was created. The author argues that this was possible because the interpretation of them as symbols was part of a creative process in which new meanings for traditional forms of memorial were established and circulated. The memorials not only symbolized emotional responses to the war, but also ambitions for the post-war era. Contemporaries adopted new ways of thinking about largely traditional forms of memorial to fit the uncertain social and political climate of the inter-war years. This book represents a significant contribution to the study of material culture and memory, as well as to the social and cultural history of modern warfare. One case, two realities.
