Ethnomusicology Jan 24 2020 This booklet hardly needs a preface; the contents, I think, speak for themselves. It contains a short and carefully brought up to date resume of all that I, as a private University Lecturer in Amsterdam, have tried to teach my pupils. It is intended as a general introduction to ethnomusicology, before going on to the study of the forms of separate music-cultures. I sincerely hope that those, who wish to teach themselves and to qualify in this branch of knowledge, will find a satisfactory basis for self-tuition in the matter here brought together. Regarding the possibility of a new edition, any critical remarks or information as to possible desiderata would be very gratefully received. J.K. PREFACE TO THE SECOND EDITION My request for critical remarks and desiderata has not been ignored. My sincere thanks to all who took the trouble to let me know what they missed in my booklet. Through their collaboration the contents have undergone a considerable improvement and enlargement as compared to the original edition issued in 1950 by the Royal Tropical Institute, Amsterdam, under the title 'Musicologica'. I have taken care to add many particulars from non-European sources, with the result that now the book is no longer so Europe-centric as it was. Furthermore, I have done my best to mention in a special bibliography all the more important ethnomusicological publications, with the exception of those issued in the Russian, Arabic, Chinese, Indonesian, Javanese.

Navigation Systems for Aircraft and Space Vehicles Dec 05 2020 Topics covered include navigation aids for aircraft, air traffic control, automatic landing and navigation and control of space vehicles.

Treaty Series 1566 Jun 22 2022 In accordance with Article 102 of the Charter and the relevant General Assembly Resolutions, every treaty and international agreement registered or filed and recorded with the Secretariat since 1946 is published in the United Nations Treaty Series. At present, the collection includes about 30,000 treaties reproduced in their authentic languages, together with translations into English and French, as necessary. The Treaty Series, where treaties are published in the chronological order of registration, also provides details about their subsequent history (i.e., participation in a treaty, reservations, amendments, termination, etc.). Comprehensive Indices covering 50-volume-lots are published separately.

Fundamentals of Instrumentation and Measurement Dec 17 2021 This title presents the general principles of instrumentation processes. It explains the theoretical analysis of physical phenomena used by standard sensors and transducers to transform a physical value into an electrical signal. The pre-processing of these signals through electronic circuits – amplification, signal filtering and analog-to-digital conversion – is then detailed, in order to provide useful basic information. Attention is then given to general complex systems. Topics covered include instrumentation and measurement chains, sensor modeling, digital signal processing and diagnostic methods and the concept of smart sensors, as well as microsystem design and applications. Numerous industrial examples punctuate the discussion, setting the subjects covered in the book in their practical context.

Commande des procédés (3e ed.) Jan 18 2022 Cette troisième édition a été enrichie par l'introduction de nouveaux exemples et de méthodes récentes. En un volume unique, le livre propose une synthèse progressive et approfondie des principales méthodes de commande exposées sous forme théorique et illustrées sur des exemples variés de procédés : réacteurs chimiques, biologiques, de polymérisation, craqueur catalytique, colonne de distillation. Les six parties couvrent la modélisation et la commande continue monovariante, la commande multivariante par fonction de transfert, l'identification et la commande en temps discret, la commande optimale et prédictive multivariante, la commande non linéaire et les observateurs d'état. Cet ouvrage s'adresse aussi bien aux étudiants de 2e et 3e cycle qu'aux chercheurs, enseignants et ingénieurs.

A History of Fatigue Jan 06 2021 “Stress,” “burn out,” “mental overload”: the twentieth and twenty-first centuries have witnessed an unrelenting expansion of the meaning of fatigue. The tentacles of exhaustion insinuated themselves into every aspect of our lives, from the workplace to the home, from our relationships with friends and family to the most intimate aspects of our lives. All around us are the signs of a “burn-out society,” a society in which fatigue has become the norm. How did this happen? This pioneering book explores the rich and little-known history of fatigue from the Middle Ages to the present. Vigarello shows that our understanding of fatigue, the words used to describe it, and the symptoms and explanations of it have varied greatly over time, reflecting changing social mores and broader aspects of social and political life. He argues that the increased autonomy of people in Western societies (whether genuine or assumed), the positing of a more individualized self, and the ever expanding ideal of independence and freedom have constantly made it more difficult for us to withstand anything that constrains or limits us. This painful contradiction causes weariness as well as dissatisfaction. Fatigue spreads and becomes stronger, imperceptibly permeating everything, seeping into ordinary moments and unexpected places. Ranging from the history of war, religion and work to the history of the body, the senses and intimacy, this history of fatigue shows how something that seems permanently centered in our bodies has, over the course of centuries, also been ingrained in our minds, in the end affecting the innermost aspects of the self.

Correspondence of Colonel N. Hooke Aug 25 2022

Society 5.0 Mar 20 2022 Following the rapid development of connected technologies, which are now

highly sophisticated and spread across the globe, Society 5.0 has emerged and brought with it a dramatic societal shift. In 1998, Kodak, the world leader in photographic film, had 170,000 employees. It thus seemed unthinkable that just 3 years later, the majority of people would stop taking photographs to paper film and that Kodak would have disappeared. These are the stakes of this new society that is taking shape. This book, which does not seek to critique current politics, management or marketing literature, aims to fight against the excesses of this often-misunderstood Society 5.0 and to present the ideas and associated technologies that comprise it, all working towards societal improvement. Among these technologies, artificial intelligence, robotics, digital platforms and 3D printing are undoubtedly the most important, and thus receive the greatest focus.

Digital Signal Processing Using MATLAB Dec 25 2019 This book uses MATLAB as a computing tool to explore traditional DSP topics and solve problems. This greatly expands the range and complexity of problems that students can effectively study in signal processing courses. A large number of worked examples, computer simulations and applications are provided, along with theoretical aspects that are essential in order to gain a good understanding of the main topics. Practicing engineers may also find it useful as an introductory text on the subject.

A Semiotic Landscape. Panorama sémiotique Feb 04 2021

Propagation d'ondes accoustiques et élastiques Nov 03 2020 Cet ouvrage propose une méthode de construction de schémas numériques de grande précision sur la base d'une analyse spectrale de l'erreur. Ces schémas sont appliqués à la propagation des ondes mais ils peuvent l'être à la résolution par différences finies de tout autre système d'équations aux dérivées partielles. Plusieurs formulations du problème continu sont exposées mais on retient la formulation en vitesses de déplacement et en contraintes. D'autre part, une analyse des caractéristiques des équations de la propagation conduit à faire une comparaison avec les caractéristiques des équations de la mécanique des fluides et d'indiquer les conditions de la filiation. La discrétisation des équations est basée sur les schémas en grilles décalées. On effectue des développements de Taylor à des ordres élevés et une analyse de l'erreur de discrétisation par transformée de Fourier. Puis, on introduit la notion d'approximation optimale en contraste avec les approximations basées sur l'erreur de troncature. Les schémas construits restent de type convolutif. Le calcul s'avère très efficace sur la base de l'erreur relative de discrétisation. L'algorithme de calcul des coefficients d'approximation optimale est fourni en Fortran dans une annexe. L'élévation de l'ordre en temps consiste à reporter le calcul des dérivées d'ordre élevé en temps sur des dérivées d'ordre élevé en espace. Enfin, l'analyse des conditions de stabilité et de dispersion est réalisée pour prendre en compte l'approximation optimale des dérivées pour des ordres élevés en espace et en temps.

Synthesis of Embedded Software Aug 13 2021 Embedded software is ubiquitous today. There are millions of lines of embedded code in smart phones, and even more in systems responsible for automotive control, avionics control, weapons control and space missions. Some of these are safety-critical systems whose correctness, timely response, and reliability are of paramount importance. These requirements pose new challenges to system designers. This necessitates that a proper design science, based on "constructive correctness" be developed. Correct-by-construction design and synthesis of embedded software is done in a way so that post-development verification is minimized, and correct operation of embedded systems is maximized. This book presents the state of the art in the design of safety-critical, embedded software. It introduced readers to three major approaches to specification driven, embedded software synthesis/construction: synchronous programming based approaches, models of computation based approaches, and an approach based on concurrent programming with a co-design focused language. It is an invaluable reference for practitioners and researchers concerned with improving the product development life-cycle.

Atoms in Electromagnetic Fields Jun 30 2020 This book presents a collection of papers, written during

the last 33 years by Claude Cohen-Tannoudji and his collaborators, on various physical effects which can be observed on atoms interacting with electromagnetic fields. It consists of a personal selection of review papers, lectures given at schools, as well as original experimental and theoretical papers. Emphasis is put on physical mechanisms and on general approaches, such as the dressed atom approach, having a wide range of applications. Various topics are discussed, such as light shifts, level crossing resonances, multiphoton processes, resonance fluorescence in intense laser fields, photon correlations, quantum jumps, radiative corrections, laser cooling and trapping. This volume includes short introductions by the author. Each paper presented in the volume is preceded by a short commentary giving its motivations, explaining how it fits with the general evolution of the research field, and pointing out connections existing between works done at different periods. Contents: Atoms in Weak Broadband Quasiresonant Light Fields Light Shifts — Linear Superpositions of Atomic Sublevels Atoms in Strong Radiofrequency Fields — The Dressed Atom Approach in the Radiofrequency Domain Atoms in Intense Resonant Laser Beams — The Dressed Atom Approach in the Optical Domain Photon Correlations and Quantum Jumps — The Radiative Cascade of the Dressed Atom Atoms in High Frequency Fields or in the Vacuum Field — Simple Physical Pictures for Radiative Corrections Atomic Motion in Laser Light Sisyphus Cooling and Subrecoil Cooling Readership: Laser physicists. keywords: Electromagnetic Fields; Quasiresonant Light Fields; Light Shifts; Radiofrequency Domain; Resonant Laser Beams “World Scientific has performed a service for all with an interest in the most recent history of physics by inducing Cohen-Tannoudji to bring together — and by reproducing photographically in so well-produced a volume — this selection of his scientific papers ... As the dates of publication of the papers in each section have relatively small temporal dispersion and the ordering of the sections is essentially chronologic, the volume gives the trajectory both of Cohen-Tannoudji's attention and of the development of his field.” Paul Forman Science, USA
