This undergraduate textbook introduces English literature students to the application of linguistics to literary analysis. The centuries just after the Norman Conquest are the forgotten period of English literary history. In fact, the years 1066-1300 witnessed an unparalleled ingenuity in the creation of written forms, for this was a time when almost every writer was unaware of the existence of other English writing. In a series of detailed readings of the more important early Middle English works, Cannon shows how the many and varied texts of the period laid the foundations for the project of English literature. This richness is for the first time given credit in these readings by means of an innovative theory of literary form that accepts every written shape as itself a unique contribution to the history of ideas. This theory also suggests that the impoverished understanding of literature we now commonly employ is itself a legacy of this early period, an attribute of the single form we have learned to call 'romance'. A number of reading methods have lately taught us to be more generous in our understandings of what literature might be, but this book shows us that the very variety we now strive to embrace anew actually formed the grounds of English literature—a richness we only lost when we forgot how to recognize it. *Literature in English: How and Why* is an accessible guide for students. It deals with the fundamental concepts of literary form and genre; the history of English-language literature from the medieval period to the present; relations between the study of literature and other disciplines; literary theory; researching a topic; and writing a paper. This new edition contains a brand new chapter which takes literary theory to another level, using it to link literature to the issues that concern us most, whether in our own lives or in the UN's Sustainable Development Goals. The book has also been fully

updated throughout, with significant additions to the introduction and further reading sections. Overall, *Literature in English*:

- Grounds the study of literature throughout by referencing a selection of well-known novels, plays and poems
- Examines the central questions that readers ask when confronting literary texts, and shows how these make literary theory meaningful and necessary
- Links British, American and postcolonial literature into a coherent whole
- Discusses film as literature and provides the basic conceptual tools needed to study film within a literature-course framework
- Places particular emphasis on interdisciplinarity by examining the connections between the study of literature and other disciplines
- Links literary theory to current global challenges, placing special emphasis on new and evolving approaches such as ecocriticism, new materialism and the spatial turn
- Provides extensive guidance on further reading.

Studying English Literature is a unique guide for undergraduates beginning to study the discipline of literature and those who are thinking of doing so. Unlike books that provide a survey of literary history or non-subject specific manuals that offer rigid guidelines on how to write essays, Studying English Literature invites students to engage with the subject's history and theory whilst at the same time offering information about reading, researching and writing about literature within the context of a university. The book is practical yet not patronizing: for example, whilst the discussion of plagiarism provides clear guidelines on how not to commit this offence, it also considers the difficulties students experience finding their own 'voice' when writing and provokes reflection on the value of originality and the concepts of adaptation, appropriation and intertextuality in literature. Above all, the book prizes the idea of argument rather than insisting upon formulaic essay plans, and gives many ways of finding something to say as you read and when you write, in chapters on Reading, Argument, Essays, Sentences and References.
