The Pediatric First Aid, CPR & AED manual is 153 pages and full-color. It covers the material included in a 6.5 to 8.5 hour course. This book is for anyone who takes care of children, including parents, daycare and other childcare workers, teachers and others. The focus is on preventing childhood injury where possible, how to recognize and act in a pediatric emergency and sustain life until professional help can arrive. Along with basic first aid components such as bleeding control and shock, the book covers child abuse and common childhood illnesses. Comprehensive information about

preventing infection and illness, preventing injuries, and making places safe for children have been added. This text has been updated to include the new 2005 guideline changes. 20-1120 Updated to reflect the new 2005 emergency cardiovascular care guidelines! Popular author, Barbara Aehlert, incorporates both prehospital and hospital management of pediatric emergencies. In a concise, easy-to-read outline format, it provides the most essential information a provider needs. It is also the approved text for the American Safety & Health Institute's (ASHI) pediatric advanced life support course. For more information on ASHI courses, call 800-246-5101 or visit www.ashinstitute.org. Instructor resources available; contact your sales representative for details. An outline format featuring bulleted lists, concise tables, and a user-friendly writing style makes this comprehensive text incredibly easy to read and understand. A Pretest and a Posttest consisting of multiple choice, true/false, fill in the blank, and essay questions tests readers' overall comprehension of the material. Updated to reflect the new 2005 emergency cardiovascular care guidelines. PALS Pearl Boxes help readers apply

information covered in the text to real-life clinical situations. Sidebars contain additional information relevant to the topics covered in the chapter, giving readers an opportunity for further learning. A laminated quick reference card gives practitioners easy access to critical information in the field or hospital. This convenient card includes essential information regarding respiratory and heart rates, blood pressure, basic life support interventions, Glasgow Coma Scale, airway size and equipment selection for intubation corresponding to the Broselow Resuscitation Tape, several pediatric algorithms, and pain assessment tools. 20-1110 This bundle contains Emergency Medical Responder: Your First Response in Emergency Care Includes Navigate 2 Essentials Access, Sixth Edition + Emergency Medical Responder: Your First Response in Emergency Care, Sixth Edition Student Workbook This New American Red Cross CPR/AED for the Professional Rescuer Participant's Manual and course reflect changes based on the 2005 Consensus on Science for CPR and Emergency Cardiovascular Care (ECC) and the Guidelines 2005 for First Aid. Changes to this program and manual include simplifications to many of the CPR

skill sequences, which helps improve retention. There have also been changes to help improve the quality of CPR. The integration of CPR skills into the operation of AEDs had changed to help improve survival from sudden cardiac arrest. Professional rescuers are now trained to use AEDs on adults and children. Information has been updated and added to this program to help professional rescuers administer epinephrine, aspirin and fixed-flow-rate oxygen. The skills learned in this course include adult, child and infant rescue breathing, conscious and unconscious choking, CPR, two-rescuer CPR and adult and child AED. Additional training can be added to this course including bloodborne pathogens training and emergency oxygen administration. While the skills and knowledge that professional rescuers use are increasing, this training will help you meet your most important responsibility as a professional rescuer- the responsibility to save lives. CPR, AED and First Aid Instructor Manual StarGuard: Best Practices for Lifeguards, Third Edition, gives you the tools you need to become a skilled and knowledgeable lifeguard in a pool, water park, waterfront, or wilderness setting. It

emphasizes the essential knowledge you need, with material o. 20-2804 The Difficult Airway provides a comprehensive textual and visual coverage of how to deal with patients who have expected or unexpected difficult airways. The text begins with a description of the incidence and importance of the difficult airway and then describes the ASA Difficult Airway Algorithm created to facilitate the management of "difficult airways." The majority of the book features a comprehensive step-by-step approach to the rescue techniques listed as part of the ASA Algorithm. Noted experts in each of the techniques have been recruited by the book editors to present the information. Figures throughout the book illustrate important points and procedures. This is a wonderful resource for professionals in the health care field including anesthesiologists, intensive care physicians, emergency room physicians, nurses, and out-of-hospital first responders. This convenient, money saving package includes the ACLS Study Guide, Third Edition and RAPID ACLS, Second Edition. StarGuard: Best Practices for Lifeguards, Fifth Edition, assists lifeguard candidates in preventing, recognizing, and responding to water emergencies in pool,

waterpark, and waterfront settings. Combined with hands-on, scenario-based training sessions taught by authorized StarGuard instructors, the updated text and accompanying web resource teach the essentials of lifeguarding: prevention, surveillance, response and rescue, emergency care, and workplace safety and professionalism. StarGuard: Best Practices for Lifeguards provides specific strategies for decision making. With this authoritative yet accessible guide you will learn the following:

- Strategies for reducing risk at recreational aquatic venues
- Essential skills for response and rescue, including how to perform land-based assists and water-based rescues
- How to recognize indicators of and critical events that can lead to distress and drowning
- Emergency care skills in the event of a drowning, injury, or illness, including suspected spinal injuries
- Techniques for adapting lifesaving skills for special situations, such as single-guard facilities, inflatable play structures, special events, or lifeguarding individuals with disabilities
- Proper techniques for dealing with bodily fluids and fecal contaminations to reduce the risk of recreational water illness

The

updated fifth edition contains the latest research on best practices in lifeguarding and emergency care, including the most current CPR/AED first aid content based on international guidelines. From surveillance to prevention and emergency care, StarGuard: Best Practices for Lifeguards, Fifth Edition, covers all aspects of lifeguarding in an easy-to-understand format. Together, the text, online resource, and hands-on training course prepare lifeguards with the decision-making, emergency response, and first aid skills necessary for preventing water emergencies and saving lives. Additionally, StarGuard: Best Practices for Lifeguards provides the foundation for the operational policies, procedures, and guidance delivered through the StarGuard Elite complete aquatic safety and risk management system available to aquatic facilities. Fully revised to meet the 2015 CPR/ECC Guidelines and to prepare students and professionals for PALS certification and recertification, Pediatric Advanced Life Support Study Guide, Fourth Edition, provides a clear and complete approach to managing pediatric emergencies. Designed for use by the spectrum of healthcare professionals, the Fourth Edition provides

users with the critical information needed to approach real-life pediatric emergencies. The Fourth Edition includes: End-of-chapter quizzes with answers and objectives, as well as a comprehensive posttest to gauge material comprehension Case studies at the end of appropriate chapters for practice with real-world material application Clear procedural explanations written in descriptive yet accessible language A refined Table of Contents including standalone chapters on cardiac dysrhythmias, for focused learning and study PALS Pearl boxes for text-to-everyday clinical application In-text references for deeper research if desired Product 15-1021 When an emergency strikes, knowing what to do is critical. That is why the ECSI First Aid, CPR and AED course is invaluable. First Aid, CPR, and AED Standard is the center of an integrated teaching and Providing supplemental oxygen is an essential element of emergency care. Anyone expected to use a medical oxygen device can benefit from this program. The text effectively outlines the importance and Online and blended courses are becoming increasingly prevalent in higher education settings, and the pressures to incorporate these environments highlights

the increased demand to serve a generation that prefers learning through experience or through interacting with learning tools. Challenges arise in assisting instructors in facilitating and designing blended learning environments that will provide effective learning for all students. The Handbook of Research on Blended Learning Pedagogies and Professional Development in Higher Education is a critical research publication that delves into the importance of effective professional development for educators planning and teaching online or blended courses. It also establishes the benefits of technology-mediated learning environments over traditional learning methods. Highlighting a wide array of topics such as online learning environments, active learning model, and educational development, this publication explores technology-based teaching methods in higher education. This book is targeted toward educators, educational administrators, academicians, researchers, and professionals within the realm of higher education. Rev. ed. of: First aid/CPR/AED for schools and the community. 3rd ed. c2006. This is a Pageburst digital textbook; Updated to reflect the new 2005 emergency

cardiovascular care guidelines! Popular author, Barbara Aehlert, incorporates both prehospital and hospital management of pediatric emergencies. In a concise, easy-to-read outline format, it provides the most essential information a provider needs. It is also the approved text for the American Safety & Health Institute's (ASHI) pediatric advanced life support course. laminated quick reference card gives practitioners easy access to critical information in the field or hospital. This convenient card includes essential information regarding respiratory and heart rates, blood pressure, basic life support interventions, Glasgow Coma Scale, airway size and equipment selection for intubation corresponding to the Broselow Resuscitation Tape, several pediatric algorithms, and pain assessment tools. OSHA 3317-06N. First aid is emergency care provided for injury or sudden illness before emergency medical treatment is available. The first-aid provider in the workplace is someone who is trained in the delivery of initial medical emergency procedures, using a limited amount of equipment to perform a primary assessment and intervention while awaiting arrival of emergency medical service (EMS) personnel. A workplace first-aid program is part of a comprehensive safety and health management system that includes the following four essential elements: management leadership and employee involvement, worksite analysis, hazard prevention and control, safety and training. The purpose of this guide, Best Practices Guide: Fundamentals of a Workplace First-Aid Program, is to present a summary

of the basic elements for a first-aid program at the workplace. Those elements include: identifying and assessing the workplace risks that have potential to cause worker injury or illness; designing and implementing a workplace first-aid program that: aim to minimize the outcome of accidents or exposures; complies with OSHA requirements relating to first aid; includes sufficient quantities of appropriate and readily accessible first-aid supplies and first-aid equipment, such as bandages and automated external defibrillators; assigns and trains first-aid providers who: receive first-aid training suitable to the specific workplace, receive periodic refresher courses on first-aid skills and knowledge; instructing all workers about the first-aid program, including what workers should do if a coworker is injured or ill. Putting the policies and program in writing is recommended to implement this and other program elements; and providing for scheduled evaluation and changing of the first-aid program to keep the program current and applicable to emerging risks in the workplace, including regular assessment of the adequacy of the first-aid training course. This guide includes an outline of

the essential elements of safe and effective first-aid training for the workplace as guidance to institutions teaching first-aid courses and to the consumer of these courses. Welcome to the gold standard in critical care transport training. Published in conjunction with the American Academy of Orthopaedic Surgeons (AAOS) and the American College of Emergency Physicians (ACEP), and endorsed by the University of Maryland, Baltimore County (UMBC) and the International Association of Flight and Critical Care Providers (IAFCCP), Critical Care Transport, Second Edition, offers cutting-edge content relevant to any health care provider training in critical care transport. Authored by leading critical care professionals from across the country, Critical Care Transport, Second Edition, contains state-of-the-art information on ground and flight transport that aligns with the latest evidence-based medicine and practices. Content includes information specific to prehospital critical care transport, such as flight physiology, lab analysis, hemodynamic monitoring, and specialized devices such as the intra-aortic balloon pump. Standard topics such as airway management, tra This second edition is a

complete, yet concise, overview of ACLS, Acute Coronary Syndromes and Acute Stroke. Completely updated to include the new significantly changed 2000 guidelines for emergency cardiovascular care. Includes a new chapter on the "ABCUs of Emergency Cardiac Care, " a new chapter on "Acute Ischemic Stroke, " an expanded chapter on "Airway Management, " plus an all-new section of case presentations based on the 10 core algorithms of emergency cardiovascular care. Published in cooperation with the Wilderness Medical Society, this text is the definitive and essential wilderness first aid book. Ideal for use in the field and in class, this text tells how to identify Reflecting the 2010 Emergency Cardiovascular Care guidelines, this title offers a full-color overview of advanced cardiovascular life support. It features an easy-to-read approach that provides coverage ranging from airway management and rhythms and their management to electrical therapy, acute coronary syndromes, and acute stroke. The leader in the field, Emergency Medical Responder, Ninth Edition, provides clear first responder-level training for fire service, emergency, law enforcement, military, civil,

and industrial personnel. The new ninth edition retains many successful features from previous editions and includes new topics and concepts that have recently become part of most Emergency Medical Responder programs. The foundation of this text is the new National Emergency Medical Services Education Standards for Emergency Medical Responder, and it also includes the 2010 American Heart Association guidelines for Cardiopulmonary Resuscitation and First Aid. Product 90-1074 Updated to reflect the new 2010 Emergency Cardiovascular Care guidelines, this concise, easy-to-read guide provides the most essential information on prehospital and hospital management of pediatric emergencies. It is also the approved text for the American Safety & Health Institute's (ASHI) pediatric advanced life support course. New to this edition: Updated content reflects the new 2010 Emergency Cardiovascular Care guidelines, as well as current industry standards. 20-1100 Take the right steps to protect young lives Whether it's a simple cut or bruise or a life-threatening emergency, no one wants to see a child hurt. We have adapted all of the topics from our NSC® First Aid, CPR & AED course to meet the special needs of infants

and children in our pediatric first aid course. This course meets 2010 CPR and ECC Guidelines. What you will learn Taking action in an emergency Basic life support Bleeding and wound care Shock, burns and poisoning Sudden illness Cold and heat emergencies Children with disabilities 20-1118 Product 90-1011 The fourth edition of StarGuard: Best Practices for Lifeguards presents the essentials of lifeguarding, helping lifeguard candidates become skilled and proactive. This resource contains the latest research in lifeguarding and lifesaving, including the most current CPR/AED and first aid content. Integrating each of these components into an experiential methodology of training lifeguards is a hallmark of the StarGuard certification program. Written in a conversational style, the 3rd edition of the ACLS Study Guide features unique, user-friendly, and easy to remember treatment algorithms - totally revised to reflect the 2005 emergency cardiac care guidelines. Full-color throughout, it offers a complete, concise overview of advanced cardiovascular life support (ACLS), acute coronary syndromes, and acute stroke. It also features easy-to-access information with

Stop and Review quizzes in each chapter and a comprehensive pretest and posttest. New to this edition are a handy ACLS quick-reference fold-out card, a heart rate ruler, and more! In addition to being an outstanding study tool, the ACLS Study Guide, 3rd Edition is the official text for the American Safety and Health Institute ACLS certification course. For more information on ASHI courses, call 800-246-5101 or visit www.ashinstitute.com. A pretest and posttest, each containing 50 questions with answers and rationales, provide readers with opportunities to check comprehension prior to and after study. Chapter Objectives allow readers to preview the main points in each chapter. Quick Review boxes throughout the chapters and Stop and Review sections at the end of the chapters test reader comprehension of the material. Chapters 1-8 comprise a Preparatory section to provide the foundation for the case presentations in the second section. Ten case studies present real-life clinical situations enabling the reader to make decisions based on information in the Preparatory section. Consistent organization of case studies include Objective, Skills to Master, Rhythms

to Master, Medications to Master, Related Text Chapters, Questions, Answers, Essential Actions, and Unacceptable Actions to aide in the study and mastery of material. Unique treatment algorithms - totally revised to reflect the 2005 emergency cardiac care guidelines - simplify the new treatment guidelines, making them easier to use and remember. Chapter on Stroke has now been expanded to include Special Resuscitation Situations. ACLS Pearl boxes contain key points and useful tips for clinical practice. Keeping it Simple boxes contain essential information in a clear and concise manner. A heart rate ruler is included to help determine heart rate while practicing ECG recognition. A 4 x 6 pocket-size quick-reference card with key ACLS algorithms is included for field-use. Vascular Access and Medications combined into one chapter to present venous circulation information with all relevant common medications used during a cardiac-related emergency.
