Vladimir Kramnik is a giant of the chess world. He firmly secured his legendary status when he won the World Championship in 2000 by defeating the previously dominant Garry Kasparov - the only player ever to do so in a match. Kramnik held on to his crown for seven years, and today he remains one of the World's elite players. In this book, former American Open Champion Cyrus Lakdawala invites you to join him in a study of his favourite Kramnik games. Lakdawala examines Kramnik's renowned skills in attack and defence, exploiting imbalances, dynamic elements, accumulating advantages and endgame play, and shows how we can all improve by learning from Kramnik's masterpieces. Move by Move provides an ideal platform to study chess. By continually challenging the reader to answer probing questions throughout the book, the Move by Move format greatly encourages the learning and practising of vital skills just as much as the traditional assimilation of knowledge. This is an excellent way to improve your chess skills and knowledge. *Learn from the games of a chess legend*Important ideas absorbed by continued practice*Utilizes an ideal approach to chess study Despite his relatively young age, Magnus Carlsen has already secured his place in chess history as a legend of the game. In a short space of time his accomplishments have been extraordinary. In December 2012 he broke Garry Kasparov's record to become the highest-rated chess player of all time. He followed up this achievement in 2013 by defeating Vishy Anand to become World Chess Champion. Carlsen's universal style, positional mastery and incredible mental strength add up to make him a formidable opponent. In this book, former American Open Champion Cyrus Lakdawala invites you to join him in a study of his favourite Carlsen games. Lakdawala examines Carlsen's skills in attack and defence, exploiting imbalances, accumulating advantages and endgame play, and shows us how we can all improve by learning from Carlsen's masterpieces. The Sicilian Dragon is a famous chess opening and is popular with players of all levels. The main lines often lead to ultra-sharp positions in which both players attack their opponent's king. Seemingly inconsequential mistakes may be punished severely, and a good knowledge of the theory and strategies is absolutely vital for success. In this book, FIDE Master Carsten Hansen invites you to join him in studying the Sicilian Dragon and its many variations. Using illustrative games, he explains the main positional and tactical ideas for both sides, provides answers to all the key questions and tells you everything you need to know about successfully playing the Sicilian Dragon.

Important ideas absorbed by continued practice

Utilizes an ideal approach to chess study "A top-class grandmaster explains step-by-step how chess games are won"--Cover. In this text, John Emms has selected 200 of the best chess moves of all time. In each case, the reader is given the chance to try to find the move, and solutions are provided, with lessons to be learned from each move. Every chess player knows that some moves are harder to see than others. Why is it that, frequently, uncomplicated wins simply do not enter your mind? Even strong grandmasters suffer from blind spots that obscure some of the best ideas during a game. What is more: often both players fail to see the opportunity that is right in front of their eyes. Neiman and Afek have researched this problem and discovered that there are actually reasons why your brain discards certain ideas. In this book they demonstrate different categories of hard-to-see chess moves and clearly explain the psychological, positional and geometric factors which cloud your brain. Invisible Chess Moves with its many unique examples, instructive explanations and illuminative tests, will teach how to discover your blind spots and see the moves which remain invisible for others. Your results at the board will improve dramatically because your brain will stop blocking winning ideas. An indispensable reference book of chess moves, perfect for any chess player, beginner or club player. This A to Z of chess tactics provides an explanation of all the key terms and jargon used in chess so you can understand them and put them into practice in your own game. From Castling to Zugzwang, from Underpromotion to Zwischenzug. Written in a clear and informative style, the book features a large section with illustrative games from past chess masters and grandmasters which show the relevant chess definition in action. Plus there are exercises that illustrate the tactic defined - these test you on your ability to recognize the tactics learned, as that is how they will appear in a match. The exercises teach you how to seize the opportunities before they disappear as well as avoiding traps your opponent may leave. Useful for all chess players, this is an essential read for those looking to improve and understand the game better. A collection of John Nunn's best games from 1994 to the present day, annotated in detail in the same style as the best-selling Understanding Chess Move by Move. Throughout, the emphasis is on what the reader can learn from each game, so the book is ideal study material for those seeking to progress to a higher level of chess understanding. There is also entertainment in abundance: Nunn has a direct aggressive style, and many of his opponents in these games are ambitious young grandmasters from the generation inspired by Kasparov's dynamic chess. The book also includes all of John Nunn's compositions - problems and studies - with full solutions. Jose Raul Capablanca is a chess legend, world champion and quite simply one of the greatest players in the history of the game. His achievements and seemingly effortless style of play won many admirers, and his legacy includes a treasure of instructive games. Studying Capablanca's play is a must for any aspiring chess player. For Cyrus Lakdawala, it was a key factor in his chess development and improvement, and in this book he revisits many of his favourite Capablanca games. Lakdawala examines Capablanca's skills in attack, defence, counter-attack,

exploiting imbalances, accumulating advantages and, of course, his legendary endgame play. Move by Move provides an ideal platform to study chess. Black's concept is a fearless one - he willingly accepts an isolated queen's pawn but in return seizes space in the centre and gains freedom of development for all his pieces. In this book, International Master and Tarrasch expert Sam Collins invites you to join him in examining this popular opening and its many variations. Using illustrative games, Collins highlights the typical plans and tactics for both sides, answers all the key questions and tells you everything you need to know about playing the Tarrasch Defence. *Essential guidance and training in the Tarrasch Defence *Utilizes an ideal approach to chess study *Includes repertoire options for Black This series provides an ideal platform to study chess openings. In this book, International Master Cyrus Lakdawala studies the Colle, one of his favourite opening systems. The Colle is a reliable option for White, and is easy to learn and play. White typically builds on solid foundations before unleashing an attack on the enemy king. This straightforward plan makes it particularly popular at club level, but the Colle is played successfully by Grandmasters too. Lakdawala covers both the main lines and the more aggressive Colle-Zukertort Attack, examines the key positional and tactical ideas for both sides, and tells you everything you need to know about playing the Colle. From Simon & Schuster, Logical Chess: Move By Move: Every Move Explained is Irving Chernev guide to beginners chess and the basic moves for every player to improve. In this much loved classic, Irving Chernev explains 33 complete games in detail, telling the reader the reason for every single move. Playing through these games and explanations gives a real insight into the power of the pieces and how to post them most effectively. A follow-up to Neil McDonald's incredibly successful 'Chess: The Art of Logical Thinking', this insightful book takes a close look at some of the most outstanding games from the last 6 years, commenting on every single move as the game unfolds. This time, however, the emphasis is on planning, and how players plan their strategy many moves ahead. The author's detailed approach gives you a rare opportunity to really get to the nitty-gritty of what goes through grandmasters' minds as they play. To avoid unnecessary repetition, the opening moves of each game are discussed more lightly - real discussion begins around the 10th move, which is where the planning stage really kicks in. There are more than 30 moves you can choose from a typical chess position, yet Masters regularly manage to select the best moves - and they do it faster, more confidently and with less calculation than other players. This is because Masters have shortcuts that enable them to think more efficiently. This instructive and practical guide explains these techniques, including: Using specific cues to identify good moves Streamlining analysis of the consequences of moves Using both objective and highly subjective criteria to find the right move - from any position Having learnt the basic moves, how exactly should a player improve? In this much loved classic, Irving Chernev explains 33 complete games in detail, telling the reader the reason for every single move. Playing through these games and

The Benko Gambit is a popular choice for those who like to seize the initiative as Black. For the price of a pawn, Black gets tremendous queenside pressure and puts White on the defensive early in the game. Players are attracted by the fact that Black's plans are so clear cut, while White is often reduced to simply dealing with Black's threats. In this book, Benko expert Junior Tay invites you to join him in studying his favourite opening. He examines the main plans for both sides, provides a repertoire for Black and answers all the key questions. "First the idea and then the move!" Miguel Najdorf used to say in his habitually enthusiastic fashion; that statement is the perfect summary of planning in chess. Planning is of crucial importance in chess and yet this is an area that has not been well discussed or explained to ambitious players who wish to improve. A very well known saying in chess is "Better a bad plan than no plan at all". Playing without a plan - effectively staggering from one move to the next - is a recipe for disaster. It is essential to have some kind of idea of what you are trying to achieve and how to go about it. However, planning is not a straightforward matter. A good plan might be very short, lasting just two or three moves. Another plan might require almost an entire game to implement. A plan can be highly ambitious and complex or somewhat modest and simple. In chess, as in life, circumstances can change quickly and when they do, new plans are needed. How is a player expected to juggle all these different concepts while dealing with the immediate problems posed by the opponent's most recent move? In this book, grandmaster and experienced author Zenón Franco explains planning in detail. He organises material in terms of: typical structures, advantage in space, manoeuvring play, simplification and, finally attack and defence. Using games played by elite players he explains how plans are formed and carried out in these different scenarios. If you want to take your game to the next level, then Planning Move by Move will enable you to do this. In this book Crouch examines the tremendous fighting qualities of today's top grandmasters. Analysing key games from 2012, Crouch demonstrates how they give nothing away to opponents but are always alert to punish any slight errors, and crucially, how we can apply these lessons to help us in our own games. "I look one move ahead... the best!" Siegbert Tarrasch Chess is a wonderfully rich and complex game, but ultimately the goal can be simply defined as consistently finding the best move. If you are able to do this, you will win your games. However, the million dollar question is: how can we give ourselves the very best chance of doing so? Per Ostman is convinced that there are three key elements: first and foremost, a structured move-by-move thinking process; second, the desired skills to execute this process; and finally, traditional chess knowledge we can build upon. Ostman examines these three vital building blocks which form the basis of what we need to master. He describes in detail a clear thinking process he has developed over several years as a chess teacher - a process to guide us in our ultimate search to find the best move. *Improve your chess by structured move selection* Numerous examples to illustrate clear thinking processes *Covers calculation, planning and attacking skills* Includes opening, middlegame and endgame play Per Ostman is an experienced chess teacher and analyst. He has trained his son, Erik, to become one of the strongest junior players in Australia and has guided his school to continued success at state championships. He works as a Solutions Architect for Microsoft, and has also developed computer chess programs. This series provides an ideal platform to study chess openings. By continually challenging the reader to answer probing questions throughout the book, the Move by Move format greatly encourages the learning and practising of vital skills just as much as the traditional assimilation of opening knowledge. and knowledge. The Old Indian has a well-deserved reputation as a sound defence to 1 d4. Black employs an easy-to-learn system of development, seizes a firm foothold in the centre and aims to create counterplay from a solid platform. In this book, Old Indian expert Junior Tay invites you to join him in studying the opening and its many variations. Using illustrative games, Tay highlights the tactical and positional ideas for both sides, provides repertoire options for Black and offers answers all the key questions. This book will tell you everything you need to know about playing the Old Indian Defence. "The novice who plays through Logical Chess can learn an ocean of basic chess wisdom."—Leonard Barden, English chess master and broadcaster "Entertains . . . as it reinforces strategic lessons gleaned from chess titans. Illustrates effective middle-game plans."—Library Journal The French Defence is a classical opening that has featured in the repertoire of many elite grandmasters. Black generally concedes a slight spacial disadvantage early but in return gains a sound structure and middlegame opportunities to undermine the white centre. A close study of the French Defence can be very rewarding for all players as the structures and themes that arise are found in numerous other openings. In this book grandmaster Damian Lemos guides the reader through the complexities of this dynamic opening and explores all the important variations. Already a very strong grandmaster, he announced his presence as a leading contender for the world title in 2014 when he scored an incredible 81/2/10 (including seven straight wins from the first seven games) in the Sinquefeld Cup in St Louis. This was an elite event where he finished an astonishing three points clear of Magnus Carlsen, whom he will challenge for the world title in late 2018. Caruana earned this right thanks to his fine victory in the Berlin Candidates where he scored 9/13 and finished a point clear of a world class field. Caruana's style is universal. He is a very dangerous attacking player who is also equally at home in quiet strategic positions or manoeuvring in an endgame. In this respect he is the epitome of the modern grandmaster, being a hard-working and determined fighter who prepares thoroughly and plays with great determination and accuracy. The Move by Move series provides an ideal format for the keen chessplayer to improve their game. While reading you are continually challenged to answer probing questions - a method that greatly encourages the learning and practising of vital skills just as much as the traditional assimilation of chess knowledge. Carefully selected questions and answers are designed to keep you actively involved and allow you to monitor your progress as you learn. This is an excellent way to study chess while providing the best possible chance to retain what has been learnt. Colin Crouch explains how chess games are won by studying more than 30 brilliant and instructive games from the new millennium, with move-by move annotations suitable for players of all levels. Here he shares his experience and knowledge of his favourite opening, presents a repertoire for Black and provides answers to all the key questions. WINNER of the ChessCafe 2008 Book of the Year Award SHORTLISTED for The Guardian 2008 Chess Book of the Year Award Why is it that the human brain so often refuses to consider winning chess tactics? Every chess fan marvels at the wonderful combinations with which famous masters win their games. How do they find those fantastic moves? Do they have special vision? And why do computers outwit us tactically? Forcing Chess Moves proposes a revolutionary method for finding winning moves. Charles Hertan has made an astonishing discovery: the failure to consider key moves is often due to human bias. Your brain tends to disregard many winning moves because they are counter-intuitive or look unnatural. It's a fact of life: computers outdo us humans when it comes to tactical vision and brute force calculation. So why not learn from them? Charles Hertan's radically different approach is: use COMPUTER EYES and always look for the most forcing move first. By studying forcing sequences according to Hertan's method you will: Develop analytical precision Improve your tactical vision Overcome human bias and staleness Enjoy the calculation of difficult positions Win more games by recognizing moves that matter. This New and Extended Fourth Edition of Hertan's award-winning modern classic includes 50 extra pages with new and instructive combinations. There is a foreword by three-time US chess champion Joel Benjamin, and a special foreword to this new edition by Swedish Grandmaster Pontus Carlsson. "This book contains chess openings in pictures, move by move. Each opening variation of up to 12 moves is presented on a single page, so that a quick reference can be accessed by any player."--Page [4] of cover. The King's Indian is a hugely popular opening at all levels of chess. Rather than attempting to secure early equality, Black is fighting for the initiative from the very first moves. White is allowed to build up an early central advantage but Black relies on the middlegame, hoping that the central installations that White has constructed will become unwieldy and vulnerable to a devastating counterattack. In many variations, White pursues material or strategic gains but in return Black has tactical and attacking opportunities. The King's Indian Defence appeals to players who arrive at the board prepared for a fight. The Move by Move series provides an ideal format for the keen chessplayer to improve their game. Bird's Opening, 1 f4, is an ideal choice for freethinking chess players who prefer to rely on their general chess knowledge and intuition rather than having to memorize and keep up to date with mainline opening theory. Bird's Opening is essentially the Dutch Defence with

an extra move, and White can choose between a number of different set-ups, including the reversed Leningrad, Classical and Stonewall variations, depending on mood and opponents' responses. In this book, International Master Cyrus Lakdawala examines all the important variations of Bird's Opening, including the sharp From's Gambit. Using illustrative games, he explains the main positional and tactical ideas for both sides, provides answers to all the key questions and tells you everything you need to know about successfully playing 1 f4.
