In Miniature Jun 07 2022 Bestselling, award-winning writer Simon Garfield returns with

an enthralling investigation of humans' peculiar fascination with small things—and what small things tell us about our larger world. “[Simon Garfield is] an exuberant truffle-hound of the recondite and delightful factoid.” —Sunday Times (London)

Simon Garfield writes books that shine a light on aspects of the everyday world in order to reveal the charms and eccentricities hiding in plain sight around us. After beguiling fans with books about everything from typography to time, from historic maps to the color mauve, he's found his most delightful topic yet: miniatures. Tiny Eiffel Towers. Platoons of brave toy soldiers. A doll's house created for a Queen. Diminutive crime scenes crafted to catch a killer. Model villages and miniscule railways. These are just a few of the objects you will discover in the pages of *In Miniature*. Bringing together history, psychology, art, and obsession, Garfield explores what fuels the strong appeal of miniature objects among collectors, modelers, and fans. The toys we enjoy as children invest us with a rare power at a young age, conferring on us a taste of adult-sized authority. For some, the desire to play with small things becomes a desire to

make small things. We live in a vast and uncertain world, and controlling just a tiny, scaled-down part of it restores our sense of order and worth. As it explores flea circuses, microscopic food, ancient tombs, and the Vegas Strip, *In Miniature* changes the way we perceive our surroundings, encouraging all of us to find greatness in the smallest of things.

Color and Light Jul 28 2021 Unlike many other art books only give recipes for mixing colors or describe step-by-step painting techniques, **Color and Light** answers the questions that realist painters continually ask, such as: "What happens with sky colors at sunset?", "How do colors change with distance?", and "What makes a form look three-dimensional?" Author James Gurney draws on his experience as a plain-air painter and science illustrator to share a wealth of information about the realist painter's most fundamental tools: color and light. He bridges the gap between abstract theory and practical knowledge for traditional and digital artists of all levels of experience.

The Art of the Miniature May 18 2023 For anyone who adores the art of creating small things, *The Art of the Miniature* provides a

treasure trove of practical techniques and ingenious approaches. In this captivating guide, noted artist Jane Freeman shows readers, step by step, how to use modified kit components and found and handmade objects to create intensely detailed miniature constructions. Readers will learn the entire process of creating a miniature room, structure, or landscape, from selecting a container to choosing the subject, approach, and style. Page after page of wonderful, full-color examples display astonishingly accurate "portraits" of interiors and buildings (like a Hollywood studio and a trendy New York City retail store), imaginary operas (Don Giovanni, The Magic Flute) and even the studios of famous artists. The book also features the inspirational work of several other leading miniature artists, including Susan Leopold, David Levinthal, Victoria and Richard MacKenzie-Childs, and Alan Wolfson.

Modelling and Sculpture Aug 29 2021

"Give(s) in detail every process and method of the sculptor's craft with a fullness to be found in no other works." — Encyclopedia Britannica A student of the great Edouard Lanteri and a celebrated sculptor in his own right, Albert Toft created this manual to offer students every practical detail necessary for a complete knowledge of modeling and sculpture. Both professionals and amateurs will find Toft's experienced guidance a valuable help in surmounting

difficulties and avoiding errors. Topics include: •Modelling a portrait bust •Casting •Modelling for terra-cotta, in relief, and for bronze •Modelling in clay as a prelude to working in stone and wood Thirty-six plates and eighty-two line illustrations enhance this manual, and a helpful glossary defines the most common terms.

Conceptual Art Apr 05 2022 This landmark anthology collects for the first time the key historical documents that helped give definition and purpose to the conceptual art movement. Compared to other avant-garde movements that emerged in the 1960s, conceptual art has received relatively little serious attention by art historians and critics of the past twenty-five years—in part because of the difficult, intellectual nature of the art. This lack of attention is particularly striking given the tremendous influence of conceptual art on the art of the last fifteen years, on critical discussion surrounding postmodernism, and on the use of theory by artists, curators, critics, and historians. This landmark anthology collects for the first time the key historical documents that helped give definition and purpose to the movement. It also contains more recent memoirs by

participants, as well as critical histories of the period by some of today's leading artists and art historians. Many of the essays and artists' statements have been translated into English specifically for this volume. A good portion of the exchange between artists, critics, and theorists took place in difficult-to-find limited-edition catalogs, small journals, and private correspondence. These influential documents are gathered here for the first time, along with a number of previously unpublished essays and interviews. The Nutshell Studies of Unexplained Death
May 06 2022 The Nutshell Studies of Unexplained Death offers readers an extraordinary glimpse into the mind of a master criminal investigator. Frances Glessner Lee, a wealthy grandmother, founded the Department of Legal Medicine at Harvard in 1936 and was later appointed captain in the New Hampshire police. In the 1940s and 1950s she built dollhouse crime scenes based on real cases in order to train detectives to assess visual evidence. Still used in forensic training today, the eighteen Nutshell dioramas, on a scale of 1:12, display an astounding level of detail: pencils write, window shades move, whistles blow, and clues to the crimes are revealed to those who study the scenes carefully. Corinne May Botz's lush color photographs lure viewers into every crevice of Frances Lee's models and breathe life into these

deadly miniatures, which present the dark side of domestic life, unveiling tales of prostitution, alcoholism, and adultery. The accompanying line drawings, specially prepared for this volume, highlight the noteworthy forensic evidence in each case. Botz's introductory essay, which draws on archival research and interviews with Lee's family and police colleagues, presents a captivating portrait of Lee.

Mel Bochner Drawings Mar 24 2021 A groundbreaking examination of Mel Bochner's inventive drawing practice produced collaboratively with the artist ?Encompassing both works on paper and oversized wall drawings made from the 1960s to the present, this handsomely designed volume documents the first-ever museum retrospective of drawings by Mel Bochner (b. 1940). Drawing has long been critical to the work of this pioneering conceptual artist, and essayists explore the theoretical framework and playful experimentation of his decades-long practice. The book, conceived and designed in close collaboration with the artist, features his own writings about his philosophy of wall drawings and reflections on significant exhibitions of his work.

Bochner was a key figure of the Minimalist and Conceptual Art movements whose first exhibition in 1966 is now recognized as seminal. Today the artist is known for works in a range of media that explore the conventions of language and visual art as well as the relationships between them; his experimental works on paper, canvas, and wall--all of which are celebrated here--are a foundational facet of his practice and a critical influence on contemporary art.

Ship Models from Kits Dec 21 2020 In the past thirty years the world of model kits has undergone a veritable revolution. New techniques in injection moulding have

improved the scale accuracy and surface detail of the humble plastic kit, while many specialist companies now produce top-quality resin models, vastly broadening the range of subjects on the market. However, the really radical change has been the advent of photo-etched brass fret, which allows the finest detail to be reproduced to scale. In ship modelling, this has resulted in a new form of the hobby, mid-way between traditional build-from-the-box simplicity and the time-consuming demands of fabricating everything from scratch. These new materials have prompted innovative techniques, which are comprehensively demonstrated in this new manual. Designed for those wishing to achieve the best results from their ship kits in the 1:700 to 1:350 range of scales, it uses step by step photographs to take the reader through the building of two models, one in plastic and one in resin, from basic construction, fittings and detailing, to painting, finishing and display. Written by a highly experienced, award-winning ship modeller, the book is a showcase for the contemporary approach to the hobby.

Modelling and Sculpting Animals Apr 24 2021

"A joy to read, as well as a constant reference library. Thoroughly inspiring." — Workbench The republication of this highly valuable text by Edouard Lanteri, a renowned teacher, sculptor, and intimate friend of Rodin (Rodin called him "my dear master, my dear friend"), makes it possible for serious students to gain the requisite skills needed for figurative sculpture and to bridge the gap between artistic concept and figurative realization. *Modelling and Sculpting Animals*, together with its companion piece *Modelling and Sculpting the Human Figure*, is the classic treatise on the techniques of figurative sculpture. Representing at least three thousand years of studio lore, this readily understandable, authoritative guide is a goldmine of technical information, easily comprising a four-year sculpture curriculum unavailable elsewhere. In this reasonably priced volume, devoted almost entirely to the modelling of animals, Lanteri offers thorough step-by-step instruction for the figurative sculptor. Beginning with a description of the historical symbolism of animals in different

cultures, the author then proceeds to give meticulous anatomy for the horse, lion, and bull. Rules of motion, measurements of construction, erecting the framework, tools, materials, and other pertinent aspects of animal sculpture are covered in detail. The final section presents a comprehensive exposition of the methods of casting in plaster, including how to mix the plaster, applying successive layers and irons, opening the mold, soaping and oiling, chipping off the mold, and special precautions. A profusion of illustrations — over 200 photographs, drawings, and diagrams — clearly demonstrate every principle and method the author describes. 64 full-page photographic plates, 139 drawings and diagrams.

Systemic Creative Cognition May 26 2021

This unique book explores how the conceptual framework of science and technology studies can be applied to creativity and problem-solving research, drawing from and building on the work of Bruno Latour. Using an interdisciplinary approach, the book outlines new research practices to capture the origin of ideas. Latour enjoins researchers to adopt a resolutely ethnographic methodology to trace the process by which a creative product, be it a technological innovation or a work of art, is constructed, or instaurated. Creativity is explained in terms of the microprocesses that guide and constrain the development of a new idea. These microprocesses operate on and are triggered by material objects, be they maquettes, models, drafts or data representations. The resulting perspective is systemic, casting creativity as emerging from the interaction among heterogenous elements and actants. The book provides critical reflections on problem-solving research and stresses the importance of William James's radical empiricism and the primary role of experience. The book

redefines the concept of insight as an outcome rather than the cause of a new idea. The book uses the work of Latour to cast a new light on the field of creative cognition and will be an essential read for researchers and students of creativity and cognition. It will also be relevant for anyone interested in understanding the origin of creativity, ideas and thoughts.

So Much More Than Art Apr 12 2020

Miniatures – canoes, houses and totems, and human figurines – have been produced on the Northwest Coast since at least the sixteenth century. What has motivated Indigenous artists to produce these tiny artworks? Through case studies and conversations with artists themselves, *So Much More Than Art* convincingly dismisses the persistent understanding that miniatures are simply children's toys or tourist trinkets. Jack Davy's highly original exploration of this intricate pursuit demonstrates the importance of miniaturization as a technique for communicating complex cultural ideas between generations and communities, as well as across the divide that separates Indigenous and settler societies.

Inside the Painter's Studio Dec 01 2021

Inside an art gallery, it is easy to forget that the paintings there are the end products of a process involving not only creative inspiration, but also plenty of physical and logistical details. It is these "cruder," more mundane aspects of a painter's daily routine that motivated Brooklyn artist Joe Fig to embark almost ten years ago on a highly unorthodox, multilayered exploration of the working life of the professional artist. Determined to ground his research in the physical world, Fig began constructing a series of diorama-like miniature reproductions of the studios of modern art's most legendary painters, such as Jackson Pollock and Willem de Kooning. A desire for firsthand references led Fig to approach contemporary artists for access to their studios. Armed with a camera and a self-made "Artist's Questionnaire," Fig began a journey through the workspaces

of some of today's most exciting contemporary artists.
