Tractor Mac learns that winning isn't the only thing; the Tractor Mac series by Billy Steers is perfect for fans of Bob the Builder and Thomas the Tank Engine. Tractor Mac is ready for the big tractor pull contest at the county fair, but when Big Deke, the reigning champion, shows up, Tractor Mac realizes just how tough the competition is going to be. Big Deke wins the tractor pull and Tractor Mac is disappointed. Then the carousel stops working, and Tractor Mac is just the right size to help get the ride going again. Tractor Mac may not have won the pull, but in the end, he saves the day at the fair. All the vehicles and animals on Stonybrook Farm are enlisted to help build a new swimming hole for their town's residents. It is a big job, but Tractor Mac and his pals are willing to lend a hand. But a tractor named Deke thinks he can do it all by himself--and do it better than everyone else. He soon learns that a complex job is done best when each member of a team does his or her part. Bob Roll--former Tour de France racer, well-known scribe, and race announcer--is back to cause a ruckus! Bobke II (correctly pronounced "BOOB-kuh") revisits all of the original journals of Roll's wild rides and crazy tales about cycling's uncensored side. When Bobke retired from competition, his pen continued the crazed poetic commentary, and Roll's newest additions cover both topics held reverent in cycling and also those that are hardly related to the sport. Bobke tips his cap to the classic riders and races, takes us on a grueling week of training with Lance Armstrong, tells the sport as he sees it, and entertains us with plenty of ditties and rants in between. It's a zany, often absurd, yet compelling commotion. "Highly recommended". -- Choice New Edition Since 1960, Ward's Business Directory has been a standard reference for professionals seeking an easy-to-use source of current, verified data covering 120,00 U.S. companies -- more than 90% of which are privately held. Ward's helps you analyze markets, assess competition, find clients, target promotions, examine company backgrounds, form business partnerships, recruit new talent and more. Vols. 1-3: Complete company information arranged alphabetically. Vol. 4: Geographic section lists

companies in ZIP code order by state. Vol. 5: Rankings of private and public companies by sales within four-digit SIC. Vols. 6-7: State rankings by sales within four-digit SIC. Special features include ranking of top 1,000 privately held companies, top 1,000 publicly held companies and top 1,000 employers. Tractor Mac is hard at work in the field one day when his engine starts to make a funny noise. It doesn't sound good, and it doesn't feel very good, either. Tractor Mac is scared that he has to take a trip to Dr. Lou at the tractor hospital, but with the help of his animal friends and some other machines who have stopped in for a tune-up, he learns that going to the doctor doesn't have to be scary at all. Alaska Trees and Shrubs has been the definitive work on the woody plants of Alaska for more than three decades. This new, completely revised second edition provides updated information on habitat, as well as detailed descriptions of every tree or shrub species in the state. New distribution maps reflect the latest survey data, while the keys, glossary, and appendix on non-native plants make this the most useful guide to Alaska trees and shrubs ever published. Studie over ergonomie en arbeidsomstandigheden A new series introduces Tractor Mac, whose adventures on Stony Meadow Farm are perfect for fans of Bob the Builder and Thomas the Tank Engine. Killer Kells and his infamous Border Legion set out to rob the helpless prospectors who have just made a gold strike, but Kells hadn't reckoned on a maverick who rode on the side of the law and an outlaw chief's beautiful captive. The move toward worldwide wireless communications continues at a remarkable pace, and the antenna element of the technology is crucial to its success. With contributions from more than 30 international experts, the Handbook of Antennas in Wireless Communications brings together all of the latest research and results to provide engineering professionals and students with a one-stop reference on the theory, technologies, and applications for indoor, hand-held, mobile, and satellite systems. Beginning with an introduction to wireless communications systems, it offers an in-depth treatment of propagation prediction and fading channels. It then explores antenna technology with discussion of antenna design methods and the various antennas in current use or development for base stations, hand held devices, satellite communications, and shaping beams. The discussions then move to smart antennas and phased array technology, including details on array theory and beamforming techniques. Space diversity, direction-of-arrival estimation, source tracking, and blind source separation methods are addressed, as are the implementation of smart antennas and the results of field trials of systems using smart antennas implemented. Finally, the hot media topic of the safety of mobile phones receives due attention, including details of how the human body interacts with the electromagnetic fields of these devices. Its logical development and extensive range of diagrams, figures, and photographs make this handbook easy to follow and provide a clear understanding of design techniques and the performance of finished products. Its unique, comprehensive coverage written by top experts in their fields promises to make the Handbook of

Antennas in Wireless Communications the standard reference for the field. Tractor Mac loves that he is the only tractor in his farm family. Then one day, his friend Iron Dave the train brings him to a tractor dealership and shows him a whole lot full of big red tractors that look just like him. Are these tractors his real family? Tractor Mac is excited to find a place with so many familiar faces, but sad that he might have to leave the farm to be with them. Then all of the big red tractors in the lot help him to understand that his real home is with the family he's found with the animals and machines at the farm. When the nights start to get cooler and the corn is ready for picking, it's time for autumn fun at the farm! Tractor Mac loves the fall, but he's just too big for the orchard, where he is stuck harvesting apples that Farmer Bill will make into delicious treats. Across the road, Small Fred the tractor is busy with the Pumpkin Picking Festival, but he's just too small to pull all of the people who want to go on a hayride. Working together, Tractor Mac and Small Fred figure out a way to share their chores and share the fun. This celebration of the bicycle covers everything from childhood nostalgia to high-tech mountain biking. The book is based on the "best practices" of the UT Software Quality Institute Software Project Management certificates program. Quality Software Project Management identifies and teaches 34 essential project management competencies project managers can use to minimize cost, risk, and time-to-market. Covers the entire project lifecycle: planning, initiation, monitoring/control, and closing. Illuminates its techniques with real-world software management case studies. Authors (leading practitioners) address the pillars of any successful software venture: process, project, and people. Endorsed by the Software Quality Institute.
