Oxford Handbook of Learning and Intellectual Disability Nursing

Aug 07 2020 This new edition of the Oxford Handbook of Learning and Intellectual Disability Nursing has been fully updated, with a greater focus on older people with learning and intellectual disabilities and mental health issues, as well as bringing all recommendations in line with current guidelines. Since the first edition of this book was published, services for people with learning disabilities and their families have become more community-based, and the demography of the population of people with learning disabilities has changed to include many older people, and children and young adults with complex physical health needs. This handbook provides clear information for readers on practical steps that may be taken to actively engage with people who have learning disabilities, to enable effective care in which they are involved as much as possible with decisions that affect them. This book also covers differences in legislation and social policy across the constituent countries in the United Kingdom and Ireland, including changes that have been implemented since serious case reviews into institutional abuse. An emergencies section provides key information at critical times in practice. The chapter on practice resources has been fully revised to bring together the latest tools to support nurses, complete with links for easy access. Written by experienced practitioners who are recognised experts in their areas of speciality, the Oxford Handbook of Learning and Intellectual Disability Nursing is an invaluable guide for students, community and hospital based nurses, and all those who work

with people with intellectual disabilities as part of a multidisciplinary team.

Unrecognised Subjects in International Law Mar 26 2022 edited by Władysław Czapliński and Agata Kleczkowska The book discusses a variety of issues related to two important international law institutions: international legal personality and recognition. Respective studies concern the legal situation and classification of various categories of non-recognised entities, the obligation to recognise and not to recognise specific subjects, rights and obligations of those entities (including, for example, state immunity and obligations in respect of human rights), and international liability for unlawful recognition. The authors of the texts are both eminent scientists, recognised specialists in the field of international law, as well as young lawyers, just starting their adventure with research work. The authors come from various parts of the world and represent a diverse approach to research methodology. Authors: Maurizio Arcari, Chun-i Chen, Władysław Czapliński, Natividad Fernández Sola, Łukasz Gruszczyński, Shotaro Hamamoto, Agata Kleczkowska, Anne Lagerwall, Margaret E. McGuinness, Marcin Menkes, Enrico Milano, Stefan Oeter, Dagmar Richter, Przemysław Saganek, Galina Shinkaretskaia, María Isabel Torres Cazorla, Szymon Zaręba.

The Future Foreign Correspondent Feb 10 2021 This book articulates the skills and perspectives that future foreign correspondents need to adopt in an increasingly globalized world. By revisiting entrenched traditions in the training and practice of international reporting, *The Future Foreign Correspondent* examines the changing role of a correspondent, outlining aspects that will evolve, the skills that will continue to be pivotal and those becoming even more important, such as the need for

greater cultural understanding within the global media sphere. This book is a must read for journalists, media students and researchers interested in understanding what needs to be taken into consideration when reporting transcultural news spheres.

Next Generation Supply Chains Oct 21 2021 This open access book explores supply chains strategies to help companies face challenges such as societal emergency, digitalization, climate changes and scarcity of resources. The book identifies industrial scenarios for the next decade based on the analysis of trends at social, economic, environmental technological and political level, and examines how they may impact on supply chain processes and how to design next generation supply chains to answer these challenges. By mapping enabling technologies for supply chain innovation, the book proposes a roadmap for the full implementation of the supply chain strategies based on the integration of production and logistics processes. Case studies from process industry, discrete manufacturing, distribution and logistics, as well as ICT providers are provided, and policy recommendations are put forward to support companies in this transformative process.

Japan's Quest for Nuclear Energy and the Price It Has Paid Oct 09 2020 Japan's Quest for Nuclear Energy and the Price it has Paid: Accidents, Consequences, and Lessons Learned for the Global Nuclear Industry identifies major accidents in Japan that have happened at different stages of the nuclear fuel cycle in Japan, assesses the underlying causes of nuclear accidents, and identifies other systemic problems in the nuclear industry. It provides recommendations on how government, industry and academic institutions can work together toward achieving a zero-accident safety culture. Reviews the history of Japan's nuclear programs and commercial activities from the 1950s to the present Describes the underlying causes of major accidents that have afflicted Japan's nuclear industry, along with consequences, including technical difficulties, costs and program delays Outlines

the evolution of nuclear policies promoted by competing bureaucracies and how these rivalries influenced program priorities and impeded safety

Food Governance in India May 16 2021 This book offers insights into the issues around food security, public health, equity and global governance. With a focus on India, it highlights the complex networks of sociopolitical, economic and agricultural challenges to ensure self-sufficiency in food production. Based on field research conducted across India and an in-depth study on government agencies and multilateral fora, this book connects and juxtaposes global, national and local narratives on food security and policy. It analyses issues ranging from climate change to gaps in the nation-wide public food distribution systems. Through interdisciplinary narratives on food insecurity and poverty, the book exposes the underlying problems within policy frameworks and offers solutions for greater accessibility and distribution of food supplies while combating climate variability and agrarian distress. The volume explores global food governance norms and India's role in further shaping them. It will be of interest to students and researchers of public policy and governance, development studies, sociology, agriculture studies, public health and nutrition and economics.

World Heritage Sites Oct 01 2022 Heritage is a growing area of both tourism and study, with World Heritage Site designations increasing year-on-year. This book reviews the important interrelations between the industry, local communities and conservation work, bringing together the various opportunities and challenges for different destinations. World Heritage status is a strong marketing brand, and proper heritage management and effective conservation are vital, but this tourism must also be developed and managed appropriately if it is to benefit a site. As many sites are located in residential areas, their interaction with the local community must also be carefully considered. This book:

- Reviews new areas of development such as Historic Urban

Landscapes, Intangible Cultural Heritage, Memory of the World and Global Geoparks. - Includes global case studies to relate theory to practice. - Covers a worldwide industry of over 1,000 cultural and natural heritage sites. An important read for academics, researchers and students of heritage studies, cultural studies and tourism, this book is also a useful resource for professionals working in conservation, cultural and natural heritage management.

J. J. Abrams May 08 2023 Jeffrey Jacob "J. J." Abrams (b. 1966) decided to be a filmmaker at the age of eight after his grandfather took him on the back-lot tour of Universal Studios. Throughout his career, Abrams has dedicated his life to storytelling and worked tirelessly to become one of the best-known and most successful creators in Hollywood. The thirty interviews collected in this volume span Abrams's entire career, covering his many projects from television and film to video games and theater. The volume also includes a 1982 article about Abrams as a teen sensation whose short film *High Voltage* won the Audience Award at a local film festival and garnered the attention of Steven Spielberg. Beginning his career as a screenwriter on films like *Regarding Henry* and *Armageddon*, Abrams transitioned into a TV mogul with hit shows like *Alias* and *Lost*. Known for his imaginative work across several genres, from science fiction and horror to action and drama, Abrams's most successful films include *Mission: Impossible III*; *Star Trek*; and *Star Wars: The Force Awakens*, which went on to become the highest-grossing film of all time in the United States. His production company, *Bad Robot*, has produced innovative genre projects like *Cloverfield* and *Westworld*. Abrams also cowrote a novel with Doug Dorst called *S.*, and, most recently, he produced the Broadway run of *The Play That Went Wrong*. In conversations with major publications and independent blogs, Abrams discusses his long-standing collaborations with others in the field, explains his affinity for mystery, and describes his approach to creating

films like those he gravitated to as a child, revealing that the award-winning director-writer-producer is a fan before he is a filmmaker.

Emerging Technologies with High Impact for Ocean Sciences, Ecosystem Management, and Environmental Conservation Jul 18 2021

The Decade in Tory Mar 02 2020 In 2020 the United Kingdom reached a bewildering milestone: ten successive years of Conservative rule. In that decade there were three prime ministers, each in turn described as the worst leader we ever had; ministerial resignations by the hundred; and an unrelenting stream of ineffectual, divisive bum-slurry oozing from 10 Downing Street. The Decade in Tory is an inglorious, rollicking and entirely true account of ten years of demonstrable lies, relentless incompetence, epic waste, serial corruption, official police investigations, anti-democratic practices, abuse of power, dereliction of duty and hundreds of thousands of avoidable deaths. With his signature scathing wit, Russell Jones breaks down the government's interminable failures year by year, covering everything from David Cameron's pledge to tackle inequality - which reduced UK life expectancy for the first time since 1841 - through the bewildering storm of lies and betrayals that led to Brexit, devastating education cuts, serial mismanagement of the NHS and Boris Johnson's calamitous response to the Covid-19 pandemic. It will leave you gasping and wondering: can things possibly get any worse?

Handbook on the United States in Asia Jul 30 2022 The centre of gravity in today's global economy arguably now resides in Asia. As a result of this, the maintenance of geopolitical and economic security in Asia has become pivotal to global stability. This indispensable Handbook examines the crucial and multifaceted role of the United States as a force in the region that has been, and continues to be, necessary for the continuation of Asian prosperity.

Backstage Practices of Transnational Law Jan 12 2021 This book explores the 'backstage' of transnational legal practice by illuminating the routines and habits that are crucial to the field, yet rarely studied. Through innovative discussion of practices often considered trivial, the book encourages readers to conceptualise the 'backstage' as emblematic of transnational legal practice. Expanding the focus of transnational legal scholarship, the book explores the seemingly mundane procedures which are often taken for granted, despite being widely recognized as part of what it means to 'do transnational law'. Adopting various methodologies and approaches, each chapter focuses on one specific practice: for example, mooted exercises for law students, international travel, transnational time, the social media activities of lawyers and legal scholars, and the networking at the ICC's annual Assembly of States Parties. In and of themselves, these chapters each provide unique insights into what happens before the curtain rises and after it falls on the familiar 'outputs' of transnational law. It does more, however, than provide a range of different practices: it takes the next step in theorizing on the importance of the marginal and the everyday for what we 'know' to be 'the law' and what the international legal field looks like. Furthermore, by interrogating undiscussed academic practices, it provides students with a candid view on the perils and promises of transnational legal scholarship, inviting them to join the discussion and to practice their discipline in a more reflexive way. Written in an accessible format, containing a readable collection of personal and recognizable accounts of transnational legal practice, the book provides an everyday insight into transnational law. It will therefore appeal to international legal scholars, alongside any reader with an interest in transnational law.

Game Changers in Labour Law Sep 19 2021 The renowned international labour law scholars contributing to this incomparable volume use the term 'game changers' to refer to

evolutions, concepts, ideas and challenges that are having, or have had, major impacts on how we must understand and approach labour law in today's global economy. The volume derives from an international conference organized by the Institute for Labour Law at the University of Leuven, Belgium in November 2017. This initiative is pursued in the spirit and with the methods of the late Emeritus Professor Roger Blanpain (1932–2016), a great reformer who continuously searched for key challenges in the world of work and looked as far as possible into the future, engaging in critical reflection and rethinking the design of labour law. While seeking to identify the main game changers, the authors explore new pathways and answers which may help to understand and shape the future of work. This is the 100th of Kluwer's Bulletin of Comparative Labour Relations, a series Professor Blanpain launched nearly fifty years ago. The contributors address, and reflect on, such vital issues and topics as the following: - the 'gig' economy; - core labour law values; - freedom of association; - non-standard employment; - the rise of the service sector; - employment and self-employment; - the European Pillar of Social Rights; - app-based work; - algorithms as controls in the workplace; - collective bargaining rights and the right to strike; - the role of temporary employment agencies; and - termination of the employment relationship. There are also chapters devoted to specific issues in France, Italy, the United Kingdom, Estonia, China and the United States. Roger Blanpain consistently reminded us that labour relations are power relations. Although this book shows that the power balance is tipped towards employers in today's world, what is nevertheless very clear is that labour law can play a crucial role in re-enlivening equitable outcomes, fairness, decent work and social justice in our contemporary and future societies, and that academia can help to understand, guide and shape that future. For this reason, this book will be invaluable to professionals in labour relations, whether in the academic, policy or legal

communities.

Called to a Different Purpose Mar 06 2023 The defining trait of the story that began with Robert Fulton is not just the creation of a good company in 1969 that has since become highly successful. What sets this story apart is his lifelong relationship with Jesus Christ and how honoring God was central to all his decisions. From the start, it called for a different kind of company culture—rooted in his faith-based principles that looked to the inherent value of each person and developing their God-given potential. That has become a hallmark of Web Industries in the fifty years of its existence. Robert Fulton shaped his company's culture believing that relationships are the very essence of life. He implemented an employee stock ownership plan because he believed the people who worked alongside him to build the company's value should share in that value. These employee-owners are at the heart of why this company has won a place of great influence and respect in the corporate world.

Focusing on Audiovisual Translation Research Jun 04 2020 The aim of this volume is to make a statement on the importance of research on Audiovisual Translation, both in its different varieties of production (dubbing, subtitling, surtitling, voice-over and e-learning) and in its relationship with language acquisition. On the whole, it is a merging of applied theory and practice, with a willingness to encourage a dialogue between scholars specialized in this field that may expand to other fields.

Antitrust Analysis of Online Sales Platforms & Copyright Limitations and Exceptions Apr 26 2022

This book gathers international and national reports from across the globe on key questions in the field of antitrust and intellectual property. The first part discusses the application of competition law to online sales platforms, which is increasingly a focus for anti-trust authorities around the world. A detailed international report explores which are the major challenges for competition law generated by the growth of online platforms. It provides an excellent comparative study of this complex and challenging subject. The second part of the book gathers contributions from various jurisdictions on the topic "To what extent do current exclusions and limitations to copyright strike a fair balance between the rights of owners and fair use by private individuals and others?" This section presents an international report, which offers an unparalleled comparative analysis of this topic, bringing together common themes and contrasting the various national provisions dealing with exceptions to copyright, amongst other things. The book also includes the resolutions passed by the General Assembly of the International League of Competition Law (LIDC) following a debate on each of these topics, which include proposed solutions and recommendations. The LIDC is a long-standing international association that focuses on the interface between competition law and intellectual property law, including unfair competition issues.

The Politics and Policies of Big Data Nov 02 2022 Big Data, gathered together and re-analysed, can be used to form endless variations of our persons - so-called 'data doubles'. Whilst never a precise portrayal of who we are, they unarguably contain glimpses of details about us that, when deployed into various routines (such as management, policing and advertising) can affect us in many ways. How are we to deal with Big Data? When

is it beneficial to us? When is it harmful? How might we regulate it? Offering careful and critical analyses, this timely volume aims to broaden well-informed, unprejudiced discourse, focusing on: the tenets of Big Data, the politics of governance and regulation; and Big Data practices, performance and resistance. An interdisciplinary volume, *The Politics of Big Data* will appeal to undergraduate and postgraduate students, as well as postdoctoral and senior researchers interested in fields such as Technology, Politics and Surveillance.

Egypt's Desert Dreams Jul 06 2020 Egypt has placed its hopes on developing its vast and empty deserts as the ultimate solution to the country's problems. New cities, new farms, new industrial zones, new tourism resorts, and new development corridors, all have been promoted for over half a century to create a modern Egypt and to pull tens of millions of people away from the increasingly crowded Nile Valley into the desert hinterland. The results, in spite of colossal expenditures and ever-grander government pronouncements, have been meager at best, and today Egypt's desert is littered with stalled schemes, abandoned projects, and forlorn dreams. It also remains stubbornly uninhabited. *Egypt's Desert Dreams* is the first attempt of its kind to look at Egypt's desert development in its entirety. It recounts the failures of governmental schemes, analyzes why they have failed, and exposes the main winners of Egypt's desert projects,

as well as the underlying narratives and political necessities behind it, even in the post-revolutionary era. It also shows that all is not lost, and that there are alternative paths that Egypt could take.

Leach's Tax Dictionary Sep 07 2020 Leach's Tax Dictionary contains over 1,000 pages of definitions. It has three sections: the first lists definitions; the second is a list of abbreviations found in official publications, including government press releases where new abbreviations are made up almost every week; and the third gives a list of tax rates and other information which may be of use to a tax accountant/lawyer.

Global Domestic Workers Aug 19 2021 EPDF and EPUB available Open Access under CC-BY-NC licence. Drawing from the EU-funded DomEQUAL research project across 9 countries in Europe, South America and Asia, this comparative study explores the conditions of domestic workers around the world and the campaigns they are conducting to improve their labour rights. The book showcases how domestic workers' movements put 'intersectionality in action' in representing the interest of various marginalized social groups from migrants and low-income groups to racialized and rural girls and women. Casting light on issues such as subjectification, and collective organizing on the part of a category of workers conventionally regarded as unorganizable, this ambitious volume will be invaluable for scholars, policy makers and activists alike.

Russia's Liberal Media Mar 14 2021 This book examines the challenges and pressures liberal journalists face in Putin's Russia. It presents the findings of an in-depth qualitative study, which included ethnographic observations of editorial meetings during the conflict in Ukraine. It also provides a theoretical framework for evaluating the Russian media system and a historical overview of the development of liberal media in the country. The book focuses on some of Russia's most influential liberal national news outlets: "the deadliest" newspaper Novaya Gazeta, "Russia's last

independent radio station" Radio Echo of Moscow (Ekho Moskv) and US Congress-funded Radio Free Europe/Radio Liberty. The fieldwork included ethnographic observations of editorial meetings, long interviews with editors and journalists as well as documentary analysis. The monograph makes theoretical contributions to three main areas: 1. Media systems and terms of reference. 2. Journalism: cultures, role conceptions, and relationship with power, culture and society. 3. Mediatization of conflict and nationhood.

Special Duty May 04 2020 The prewar history of the Japanese intelligence community demonstrates how having power over much, but insight into little can have devastating consequences. Its postwar history—one of limited Japanese power despite growing insight—has also been problematic for national security. In *Special Duty* Richard J. Samuels dissects the fascinating history of the intelligence community in Japan. Looking at the impact of shifts in the strategic environment, technological change, and past failures, he probes the reasons why Japan has endured such a roller-coaster ride when it comes to intelligence gathering and analysis, and concludes that the ups and downs of the past century—combined with growing uncertainties in the regional security environment—have convinced Japanese leaders of the critical importance of striking balance between power and insight. Using examples of excessive hubris and debilitating bureaucratic competition before the Asia-Pacific War, the unavoidable dependence on US assets and popular sensitivity to security issues after World War II, and the tardy adoption of image-processing and cyber technologies, Samuels' bold book highlights the century-long history of Japan's struggles to develop a fully functioning and effective intelligence capability, and makes clear that Japanese leaders have begun to reinvent their nation's intelligence community.

The Evolution of Goth Culture Jan 30 2020 In this book, Spracklen and Spracklen use the idea of collective memory to

explore the controversies and boundary-making surrounding the genesis and progression of the modern gothic alternative culture. They suggest that the only way for goth culture to survive is if it becomes transgressive and radical again.

Wetland and Stream Rapid Assessments Dec 11 2020

Wetland and Stream Rapid Assessments: Development, Validation, and Application describes the scientific and environmental policy background for rapid wetland and stream assessments, how such assessment methods are developed and statistically verified, and how they can be used in environmental decision-making—including wetland and stream permitting. In addition, it provides several case studies of method development and use in various parts of the world. Readers will find guidance on developing and testing such methods, along with examples of how these methods have been used in various programs across North America. Rapid wetland and stream functional assessments are becoming frequently used methods in federal, state and local environmental permitting programs in North America. Many governments are interested in developing new methods or improving existing methods for their own jurisdictions. This book provides an ideal guide to these initiatives. Offers guidance for the use and evaluation of rapid assessments to developers and users of these methods, as well as students of wetland and stream quality Contains contributions from sources who are successful in academia, industry and government, bringing credibility and relevance to the content Includes a statistically-based approach to testing the validity of the rapid method, which is very important to the usefulness and defensibility of assessment methods

The Elgar Companion to Post-Conflict Transition Feb 05 2023

What are the main drivers of political transition and regime change? And to what extent do these apparently seismic political changes result in real change? These questions are the focus of this comparative study written by a mix of scholars and practitioners. This state-of-the-art volume identifies patterns in

political transitions, but is largely unconvinced that these transitions bring about real change to the underlying structures of society. Patriarchy, land tenure, and economic systems often remain immune to change, despite the headlines.

HUDCO has enjoyed the appreciation of the properties which are worth more than Rs. 5000 Crores. HUDCO has enjoyed Rs. 68,70,63,533/- from the date of payments by earning interest @18% compounded quarterly by lending the same amount to the lenders.

Identification and Citizenship in Africa Jan 04 2023 In the context of a global biometric turn, this book investigates processes of legal identification in Africa 'from below,' asking what this means for the relationship between citizens and the state. Almost half of the population of the African continent is thought to lack a legal identity, and many states see biometric technology as a reliable and efficient solution to the problem. However, this book shows that biometrics, far from securing identities and avoiding fraud or political distrust, can even participate in reinforcing exclusion and polarizing debates on citizenship and national belonging. It highlights the social and political embedding of legal identities and the resilience of the documentary state. Drawing on empirical research conducted across 14 countries, the book documents the processes, practices, and meanings of legal identification in Africa from the 1950s right up to the biometric boom. Beyond the classic opposition between surveillance and recognition, it demonstrates how analysing the social uses of IDs and tools of identification can give a fresh account of the state at work, the practices of citizenship, and the role of bureaucracy in the writing of the self in African societies. This book will be of an important reference for students and scholars of African studies, politics, human security, and anthropology and the sociology of the state.

Belt And Road Initiative, The: Implications For The International Order Jun 16 2021 This book showcases how the People's Republic of China (PRC) has been utilizing the Belt and Road Initiative (BRI) to reshape the global order. Dissecting China's increasingly assertive international behaviour, the book demonstrates how the PRC projects its self-perception onto the international order. The book outlines five aspects of China's international role projection, which the PRC applies selectively, depending on its target audience: (1) The bearer of traditional Chinese culture; (2) The humiliated nation; (3) The socialist state with Chinese characteristics; (4) The developing state and promoter of international development; (5) The authoritarian globalization optimist. Drawing on an in-depth analysis of hundreds of primary BRI documents, the book offers a comprehensive overview of China's most crucial foreign policy agenda item. It demonstrates how, through the BRI, the PRC has introduced mechanisms to the international level, which reflect its domestic policy-making mode. In addition, the PRC has institutionalized the initiative by establishing China-centered BRI networks across a wide range of policy areas. Within those emerging China-centered BRI networks, the PRC systematically increases its international discursive power, for example, by inserting Chinese vocabulary into UN resolutions or by promoting Beijing's approaches vis-à-vis 'the rule of law' across a range of developing states. This book also further discusses the implications of the BRI for the international legal order.
