The burning of Columbia, 1865 Jul 18 2022

Bentonville May 24 2020 The battle of Bentonville, the only major Civil War battle fought in North Carolina, was the Confederacy's last attempt to stop the devastating march of William Tecumseh Sherman's army north through the Carolinas. Despite their numerical disadvantage, General Joseph E. Johnston's Confederate forces successfully ambushed one wing of Sherman's army on March 19, 1865 but were soon repulsed. For the Confederates, it was a heroic but futile effort to delay the inevitable: within a month, both Richmond and Raleigh had fallen, and Lee had surrendered.

*Sherman and the Burning of Columbia* Jan 24 2023 In this edition of his widely acclaimed study, Marion B. Lucas tackles one of the most debated questions about the Civil War: Who burned South Carolina's capital city on Feb. 17, 1865? Before the fires had finished smoldering, Confederates and Federals accused each other of starting the blaze, igniting a controversy that has raged for more than a century. To determine the actual origin of the fire, Lucas sifts through myriad official records, newspapers and eyewitness accounts. The evidence he amasses allows him to debunk many of the myths surrounding the tragedy. Unlike generations of South Carolinians and students of the Civil War, he does not assign particular blame to William Tecumseh Sherman but implicates both Confederate and Federal troops. Lucas traces the damage not to a single blaze but to a series of fires — preceded by an equally unfortunate series of military and civilian blunders — that included the burning of cotton bales by fleeing Confederate soldiers.

**Until the Fires Stopped Burning** Jan 20 2020 Charles B. Strozier's college lost sixty-eight alumni in the tragedy of 9/11, and the many courses he has taught on terrorism and related topics since have attracted dozens of survivors and family members. A practicing psychoanalyst in Manhattan, Strozier has also accepted many seared by the disaster into his care. In some ways, the grief he has encountered has felt familiar; in other ways, unprecedented. Compelled to investigate its unique character further, he launched a fascinating study into the conscious and unconscious meaning of the event, both for those who were physically close to the attack and for those who witnessed it beyond the immediate space of Ground Zero. Based on the testimony of survivors, bystanders, spectators, and victim's friends

and families, *Until the Fires Stopped Burning* brings much-needed clarity to the conscious and unconscious meaning of 9/11 and its relationship to historical disaster, apocalyptic experience, unnatural death, and the psychological endurance of trauma. Strozier interprets and contextualizes the memories of witnesses and compares their encounter with 9/11 to the devastation of Hiroshima, Auschwitz, Katrina, and other events Kai Erikson has called a "new species of trouble" in the world. Organizing his study around "zones of sadness" in New York, Strozier powerfully evokes the multiple places in which his respondents confronted 9/11 while remaining sensitive to the personal, social, and cultural differences of these experiences. Most important, he distinguishes between 9/11 as an apocalyptic event (which he affirms it is not; rather, it is a monumental event), and 9/11 as an apocalyptic experience, which is crucial to understanding the act's affect on American life and a still-evolving culture of fear in the world.

*The Burning of Columbia, S. C* Nov 22 2022 Excerpt from *The Burning of Columbia, S. C: A Review of Northern Assertions and Southern Facts* Much discussion has been evoked on the question as to who is responsible for the burning of Columbia, and the outrages connected with that event. In South Carolina, the author of the crime is known to be Gen. William T. Sherman; but among communities outside of the State, who have not been made familiar with the facts, ignorance on the subject naturally enough prevails. At the North especially, where the press has chosen to circulate only the one sided statements of its contributors, the public affect to believe that Columbia was destroyed by the Confederate authorities; and books have been written, in which falsehoods are gravely promulgated to establish this theory. The object of the present review is to put all doubts on the subject at rest forever. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. **Sherman's Flame and Blame Campaign Through Georgia and the Carolinas** Sep 27 2020 General William T. Sherman created a new form of physical, economic and psychological "total warfare" against civilians and private property in Georgia and the Carolinas that he readily admitted would be violent and cruel. In addition to physical and economic assaults, he designed a massive psychological strategy of propaganda and blame that was designed to cripple the Confederacy, to destroy the faith of civilians in their leaders and their government and to kill the will of the people to fight for their cause. Even though Sherman openly admitted most of his strategy and his efforts to "mystify the enemy," those elements have been all but overlooked through the years. However, they were an integral part of the campaign that would help end the Civil War in 1865.

**The Vanquished Cannot Forget** Feb 19 2020 Ashton Freeman is an architecture professor at Oberlin College in Ohio. It is summer break and he wants to take his family with him (his wife Elise is an artist, their 17-year-old daughter Claire plays the violin and their 14-year-old son Christian is a history buff) to Columbia, South Carolina where he can study Robert Mills architecture. He hopes to write a book about this architect. They find out that there are many Civil War sites in Columbia. They know very little about this time in history, so they decide to study these different sites throughout the summer, so they can learn about what really happened. Christian said, "Wouldn't it be so cool if we could actually go back in time and see everything happen, and talk with the people from back then?" "That would be cool!" his sister added. "Like Back to the Future!" Their mother shook her head. "I don't know. That sounds like it might be a little dangerous!" "But thrilling, right?" their father said, smiling. Claire sighed. "It's too bad that life can't be like it is in the movies!"

Lucas sifts through official reports, newspapers, and eyewitness accounts, and the evidence he amasses debunks many of the myths surrounding the tragedy. Rather than writing a melodrama with clear heroes and villains, Lucas tells a more complex and more human story that details the fear, confusion, and disorder that accompanied the end of a brutal war. Sherman's March Through the Carolinas Mar 22 2020 In retrospect, General William Tecumseh Sherman considered his march through the Carolinas the greatest of his military feats, greater even than the Georgia campaign. When he set out northward from Savannah with 60,000 veteran soldiers in January 1865, he was more convinced than ever that the bold application of his ideas of total war could speedily end the conflict. John Barrett's story of what happened in the three months that followed is based on printed memoirs and documentary records of those who fought and of the civilians who lived in the path of Sherman's onslaught. The burning of Columbia, the battle of Bentonville, and Joseph E. Johnston's surrender nine days after Appomattox are at the center of the story, but Barrett also focuses on other aspects of the campaign, such as the undisciplined pillaging of the 'bummers,' and on its effects on local populations.
