When a Beverly Hills plastic surgeon is murdered, suspicion falls on Gareth Lloyd, another plastic surgeon who was having an affair with the victim's wife. The only way Lloyd can clear himself is to find the real killer, which he proceeds to do. A first novel. Virus Thirteen is an irreverent and contagious thriller from debut author Joshua Alan Parry. Scientists James Logan and his wife, Linda, have their dream careers at the world's leading biotech company, GeneFirm, Inc. But their happiness is interrupted by a devastating bioterrorist attack: a deadly superflu that quickly becomes a global pandemic. The GeneFirm complex goes into lockdown and Linda's research team is sent to high-security underground labs to develop a vaccine. Above ground, James learns that GeneFirm security has been breached and Linda is in danger. To save her he must confront a desperate terrorist, armed government agents, and an invisible killer: Virus Thirteen. At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied. Remember when you said you never wanted to grow up? Dr. Richard Ross has discovered a cure for aging. But it comes

at a price. Everyone who wants eternal youth must undergo an operation before passing into adulthood that locks their body in the form of a preadolescent youth. When juveniles suddenly begin rapidly aging, the entire human population is set on a course of imminent extinction. Building to a chilling climax, Dr. Ross and his endocrinologist girlfriend must find and rescue the one remaining person who carries the genetic link for saving the human race... A mind-bending technothriller for fans of Michael Crichton, Robin Cook, and Tess Gerritsen. "Best science fiction book of the year." (Books, Books, and More Books)

Coma is the breakthrough novel from author and master of the medical thriller Robin Cook. It began with two patients undergoing routine 'minor surgery' in Boston's greatest hospital but Nancy Greenly, Sean Berman and a dozen others – all admitted to Boston Memorial Hospital for routine procedures – were victims of the same inexplicable, hideous tragedy on the operating table. They never regained consciousness. Up against the scorn of the medics and the hostility of the establishment, one girl

medical student starts to probe the coma cases, steadily uncovering something unbelievably hideous . . . It's spring in Buffalo, New York. At sprawling St. Paul's Hospital, new interns rush through the halls, staff doctors scramble to catch their protégés' mistakes, and everyone is aware of one unrelenting threat: A new and vicious strain of severe acute respiratory syndrome (SARS) has hit America hard and is menacing the hospital like a wolf at the door. Wrapped in spacesuit-like garb to search for every possible source of infection, the hospital staff desperately tries to protect the lives of patients—and of each other. Yet despite St. Paul's best efforts, people are dying. In this chilling medical landscape, no one notices the slight spike in the death rate in a palliative care ward. The prevailing attitude is "They're supposed to die. That's why we call them terminal." When these same patients complain of terrifying near-death experiences, the hospital staff attributes it to delirium caused by medication. But when ER chief Dr. Earl Garnet gets blamed for the unexpected death of a patient, he defies protocol and opens an independent investigation. He quickly becomes suspicious that something far more sinister than disease is killing the hospital's most vulnerable patients. For

Garnet, looking into the deaths means rattling relationships that have been built over years—relationships with several men and women he once trusted but now must doubt. With the SARS epidemic spinning out of control and a storm of suspicion, fear, and mistrust raging through the corridors of St. Paul's, the hospital is rocked by a horrifying crime: A respected researcher is found brutally murdered. And his executioner may be ready to strike again. With brilliant pacing, scalpel-sharp suspense, and an unmatched knowledge of the workings of a big-city hospital, Peter Clement is a thriller writer in a league of his own. In his new work, he takes us on a galvanizing, frightening, and constantly fascinating journey set on the front lines of medicine—where some dangers can be prevented and others can only be feared. Behind the headlines on cloning--Dr. Robin Cook blends fact with fiction in one of his most terrifying bestsellers... Chromosome 6 is a prophetic thriller that challenges the medical ethics of genetic manipulation and cloning in the jungles of equatorial Africa, where one mistake could bridge the gap between man and ape--and forever change the genetic map of our existence... Future doctor Adam Schonberg loved his wife. That was why he took a job with the giant drug firm Arolen, for the money

he needed for their coming baby. His wife, Jennifer, felt she would get the best of care at the Julian Clinic as her pregnancy progressed. It seemed a happy coincidence that the Julian Clinic was owned by Arolen...until Adam Schonberg slowly began to suspect the terrifying truth about this connection...and about the hideous evil perpetrated on the wife he loved by the doctor she helplessly trusted... New York City medical examiners Laurie Montgomery and Jack Stapleton return in this stunning new novel from the 'master of the medical thriller' (New York Times) a ripped-from-the-headlines tale of an innovative doctor's dangerous downward spiral. A doctor stumbling through life. A North Korean bioterrorist plot. The two collide in an unforgettable tale. Dr. Nicklaus Hart, a gifted trauma surgeon, searches for meaning in his life. His self-reliant spirit is broken with the death of his missionary best friend, found sacrificed at the base of a Maya Temple. Going to Guatemala to fill the shoes of his friend at the mission hospital, he discovers God's redemption and peace in the smiles of the children he cares for. But his own life is in danger as he and his team stumble onto a deadly North Korean plot. As Nick delves into the mystery of his friend's death, he exposes the very cause of the extermination of the

Maya race...a virus which is about to be released upon the entire world through a bioterrorist scheme of global proportions. Will Nick and his team stop them in time? Maya Hope is the first book in a series of skillfully crafted medical thrillers. If you like fast-paced adventure, international settings, sizzling medical suspense, then you'll love this heart-pounding thriller by Timothy Browne. Buy Maya Hope to begin this exciting new series today. Doctor Peter Branstead's neurology department at St. Mark's Hospital in New York's picturesque Greenwich Village is flooded with a series of critically ill vagrants exhibiting identical symptoms. Confused and agitated upon admission, they rapidly progress into convulsions, cardiac arrest, and death. The deaths are too methodical to be a coincidence, but how—and why—are they being killed? Peter's investigation leads him into a dark underworld of international intrigue and into the center of a plot to destroy the president of the Ukraine, Anatoly Labrinska. Peter learns that his patients have been given a mysterious drug that is also being administered to President Labrinska. But tracking Peter's every move is a savage Ukrainian Mafia killer—an assassin so ruthless that the most vicious criminals on two continents live in fear of his wrath. With

the political stability of Europe hanging in the balance and the lives of those he loves in jeopardy, Peter desperately works to foil the plot and escape with his life. The world's bestselling master of the medical thriller, Robin Cook skillfully combines human drama and high-tech thrills with the latest breakthroughs and controversies of modern medicine. Now, in his most daring novel yet, a mysterious transmission from the bottom of the Atlantic Ocean leads a crew of oceanographers and divers to a phenomenon beyond scientific understanding - a discovery that will change everything we know about life on Earth... A well-known scientist, who has recently discovered an effective vaccine for cocaine addiction, dies from anaphylaxis after a routine injection in the office of his allergist, Dr. Leonard Haberman. A malpractice lawsuit ensues, fanned by a politically ambitious senator. Questions arise when it is discovered that the cocaine vaccine specifications are missing along with the head technician who worked closely with the deceased scientist. CBI Agent Ben Locke connects these events with a cold case involving the mysterious death of another scientist and a nefarious plot implicating an organized mob is exposed, placing Haberman and his family at great risk. Charles Martel is a brilliant cancer

researcher who discovers that his own daughter is the victim of leukemia. The cause: a chemical plant conspiracy that not only promises to kill her, but will destroy him as a doctor and a man if he tries to fight it... When a deadly superflu is unleashed on the world, scientist James Logan must confront a desperate terrorist, armed government agents, and Virus Thirteen to save his wife and the world. Robin Cook has always been on the cutting edge of the latest medical controversies. In *Acceptable Risk*, he confronts one of the most provocative issues of our time: personality-altering drugs and the complex moral questions they raise. Neuroscientist Edward Armstrong has managed to isolate a psychotropic drug with a strange and dark history--one that may account for the public hysteria during the Salem witch trials. In a brilliant designer-drug transformation, it is developed into an antidepressant with truly startling therapeutic capabilities. But who can be sure the drug is safe for consumers? Who defines the boundaries of "normal" human behavior? And if the drug's side effects are proven to be dangerous--even terrifying--how far will the medical community go to alter their standards of...*Acceptable Risk*. For fans of Julia Buckley and Tess Gerritsen, a debut featuring a killer in plain

sight using a microscopic murder weapon, the cutting edge gene-editing technology: CRISPR. Boston geneticist Dr. Saul Kramer is on the cutting edge of genetic disease research. Revered among clients at his IVF clinic, he harbors a dark secret. In addition to helping infertile couples conceive healthy babies, Dr. Kramer is obsessed, for his own dark reasons, with an alternate mission as well. In certain patients, he uses the gene editing technology CRISPR to tamper with embryos, not to improve the health of the embryos, but to replace a healthy gene with a deadly mutation. A young female journalist, Sammie Fuller, begins to suspect what he has done when three infants conceived at his clinic die mysteriously, all at about one year old. She and a molecular biologist work secretly in his MIT lab to identify any genetic defects in the deceased children and together make a chilling discovery. Thanks to Sammie's blockbuster stories, which go viral, Dr. Kramer is charged with murder and winds up in court. In the subsequent dramatic court scenes, his feisty defense lawyer stuns the world with her defense. Set in this uneasy time of genetic engineering with CRISPR technology, Foreman, spins a compelling tale of love, revenge, and murder. New York Times-bestselling author Robin Cook takes on the cutting-edge world of

gene-modification in this pulse-pounding new medical thriller. When an unidentified, seemingly healthy young woman collapses suddenly on the New York City subway and dies upon reaching the hospital, her case is an eerie reminder for veteran medical examiner Jack Stapleton of the 1918 flu pandemic. Fearful of a repeat on the one hundredth anniversary of the nightmarish contagion, Jack autopsies the woman within hours of her demise and discovers some striking anomalies: first, that she has had a heart transplant, and second, that, against all odds, her DNA matches that of the transplanted heart. Although the facts don't add up to influenza, Jack must race against the clock to identify the woman and determine what kind of virus could wreak such havoc--a task made more urgent when two other victims succumb to a similar rapid death. But nothing makes sense until his investigation leads him into the fascinating realm of CRISPR/CAS9, a gene-editing biotechnology that's captured the imagination of the medical community. . . and the attention of its most unethical members. Drawn into the dark underbelly of the organ transplant market, Jack will come face-to-face with a megalomaniacal businessman willing to risk human lives in order to conquer a lucrative new frontier in medicine--and if

Jack's not careful, the next life lost might be his own. Welcome to the hot zone! Caught in a raging pandemic, disease detectives put it all on the line to find Patient Zero. Through all the coughing, choking and misery of a killer virus on the loose, public health officials must combat Chinese secrecy, U.S. drug company interests and a criminal coverup to stop the disease in its tracks. But are they too late? Enjoy this close-up, clinical look at an unfolding disaster, with a Chinese city in crisis, relationships lost, international criminal justice in action, and a medical community's desperate search for Patient Zero. "This novel sparkles!" - author Henry D. Smith

A blockbuster Alzheimer's cure. A murder and unexplained deaths. Two aggrieved parties meet by chance. Will they expose the truth or die trying? Curt's wife is brutally murdered, and now he's struggling to raise his two kids and searching for answers. When his wife's killer suddenly dies from unexplained causes, the answers Curt sought may have perished as well. Jackie's living the dream. She's engaged to her college sweetheart and just landed an exciting job as a Pharmaceutical Rep with a company that has discovered a cure for Alzheimer's. However, her enthusiasm hits a snag when a boorish doctor with questionable ethics wants to

sample something other than the company's pharmaceuticals. Serendipity brings Curt and Jackie together, helping them uncover a shocking truth. Exposing the truth could save countless lives and reveal the possible connection to the killer's murderous actions and sudden death. However, the truth will not set them free but entangle them in a life and death crusade. He drops out due to a diabolical and mysterious disease."> A super medical thriller based on real organisms and a growing national

threat. Jae Nixon's illness soon returns and is more than Annabel, her teammates, and a bewildered infectious disease specialist can account for. As the team investigates the organisms that may be responsible, their numbers continue to grow. But meanwhile, Jae's life hangs in the balance.

Book Four in the medical and personal adventures of Dr. Annabel Tilson. *****This is the fourth book in the medical and personal adventures of Dr. Annabel Tilson, but each book can stand alone.

Book One: DEAD STILL
Book Two: DEADLY DELUSIONS
Book Three: DESPERATE TO DIE

A fast-spreading disease with no cure takes the United States by storm in Robin Cook's "most harrowing medical horror story" (The New York Times). Murder and intrigue reach epidemic proportions when a devastating plague sweeps the country. Dr. Marissa Blumenthal of the Atlanta Centers for Disease Control investigates—and soon uncovers the medical world's deadliest secret... It should have been a routine childbirth. But somehow, the mother died in the delivery, the baby was born brain-damaged, and Jeffrey Rhodes, the anesthesiologist, is running for his life. Charged with malpractice, he is found guilty of harmful intent and reckless disregard for human life. To clear his name, Rhodes must follow a fugitive trail into the heart of

medical nightmare. A trail that, for some, may end in suicide--and for others, in the most shocking conspiracy of our time... Nazi doctor Konrad Zindell flees to South America at the end of World War Two to continue the experiments he began at Auschwitz working under the infamous Dr. Josef Mengele. Forty-five years later, brilliant neurosurgeon Paul Raymond is abducted from his Seattle home. The only person who can connect the two is medical student Steve Raymond. Looking for answers to the disappearance of his father, he and his girlfriend Janet Newell suddenly find themselves in a desperate race to save their own lives as they inadvertently uncover one of the Third Reich's deadliest secrets. In this intricately woven medical thriller, Eric B. Olsen creates a shocking alternative history in the tradition of Marathon Man and The Boys from Brazil. The Fourth Reich is not in South America, but far to the north, as a young couple races against time to stop a mad man from trying to take over the world. Pediatrician Melissa Blumenthal will try any scientific method available to conceive--until the horrible secrets of an urban clinic erupt in a nightmare of staggering proportions... It was the magic and mystery of an empire long past that beautiful Erica Baron came to explore. Innocently she cast her eyes in

forbidden places and discovered the clue to a treasure beyond imagination. It was then that terror overtook her, as the most fearful curse of the ancient world and the most savage menace of the modern one threatened to destroy her. One dangerously attractive man offered Erica help...he offered her protection...he offered her love. And in this strange, exotic land of seductive evils, where no one could be trusted, desire became for Erica the deadliest snare of all... Is there a fine line between euthanasia, suicide, and murder? Medical student Annabel Tilson is deep into her internal medicine rotation when one of her patients dies of natural causes which may not be typical at all. As she undergoes a personal loss herself and is confused by the male friendships in her life, she realizes there are no easy solutions to difficult problems such as end-of-life care. Meanwhile, however, her patients' lives are at stake. Which is it? Are Machiavellian deeds being done or perpetrated on Annabel's discharged patients and those on the medical floor? Or are painful deaths and intolerable situations being circumvented for some patients by an angelic protector?*****This is Book Three in the medical and personal adventures of medical student Annabel Tilson and is also a standalone story. Book One: DEAD STILL Book Two:

DEADLY DELUSIONS Book Three: DESPERATE TO DIE

At a prestigious Florida medical center, brain cancer patients are treated with a one-hundred-percent success rate. Sean Murphy, a young medical student, finds it hard to believe. Is it a miracle cure? Or the biggest con job in the history of medicine? Isolated in a New England hospital by the Blizzard of 1978, training surgeon Timothy Voight becomes solely responsible for two injured lovers. He decides on a unique, Phoenix-like prescription but then must decide if he should succumb to threats to transfer his patient despite the storm or perform a radical operation on his own. Robin Cook is back—with a shocking story of medical conspiracy. Today, organ transplants are common miracles of science. But if the supply cannot meet the demand, how far will people go to find donors? Dr. Laurie Montgomery, a forensic pathologist, learns the terrifying answer when she investigates a series of fatal "overdose" of young professionals. Some crimes are beyond comprehension. But seeing is believing... * A Literary Guild? Dual Selection Both of them suspected that something was wrong--terribly wrong--in the great medical research center where they worked. Both of them wondered why a beautiful young woman had died on the operating table and her brain secretly

A suicide, a break-in, an ominous warning. Is it a coincidence? Or have Jackie and Curt unleashed the wrath of vengeful pharmaceutical executives? Emboldened by the support of law

enforcement officials and a prominent physician, Jackie and Curt embark on a crusade against AlzCura. They have compelling evidence of unethical business practices and countless numbers of unreported patient deaths related to their miracle cure for Alzheimer's. But when a key witness is found hanging in his office, their case against the pharmaceutical giant is significantly weakened. On top of that, Jackie's home is broken into, and an ominous warning was left on her wall. And someone posing as Curt's brother tried to pick up his kids from school. Shaken, Jackie and Curt must reassess the potential cost of continuing their fight. Would Jackie and Curt be able to garner sufficient support and evidence to bring AlzCura to justice? Or would their continued efforts bring down a reign of terror that would make them pay with their lives? *Dying to Recall* is the second book in the page-turning *Table for Four* medical thriller series. #1 New York Times bestselling author Robin Cook. George Wilson, M.D., a radiology resident in Los Angeles, is about to enter a profession on the brink of an enormous paradigm shift, foreshadowing a vastly different role for doctors everywhere. The smartphone is poised to take on a new role in medicine, no longer as a mere medical app but rather as a fully customizable personal physician capable of diagnosing and treating even better than the real thing. It is called iDoc. George's initial collision with this incredible innovation is devastating. He awakens one morning to find his fiancée dead in bed alongside him, not long after she participated in an iDoc beta test. Then several of his patients die after undergoing imaging procedures. All of them had been part of the same beta test. Is it possible that iDoc is being subverted by hackers—and that the U.S. government is involved in a cover-up? Despite threats to both his career and his freedom, George relentlessly seeks the truth, knowing that if he's right, the consequences could be lethal. From USA Today Bestselling Author, P.D. Workman!
