In his remarkable, path-breaking new book, Peter Sparkes takes stock of the development of a distinctive body of European land law, taking as his starting point the idea that methods of land-holding permitted by a legal system both shape and reflect the attitudes of the land owners and society in general. However it quickly becomes very difficult to test that idea when the society in question is

governed by an internal market composed of 30 countries (the EU-27, including Bulgaria and Romania, and the EEA-3), whose property systems differ so markedly and which reflect such widely differing cultures. Yet the internal market has already effected a gradual equalisation and standardisation across Europe as foreign capital spreads to create equality of yield. "We all become better off by joining a larger trading block but the social consequences will be profound: Brits will need to emigrate to the continent to afford a home, Bulgarians will need to make way for them along the Black Sea coast, and title deeds will be reshuffled all over Europe on a giant Monopoly board" writes the author in his preface, before embarking on a dispassionate examination of the beginning of that process of profound change. The opening chapters are devoted to an explanation of how the internal market has created a substantive European land law. Chapter 3 examines the rise of a distinctive European land law, and the development of conflicts principles applying to recovery of land. Chapters 5 to 9 on the marketing and sale of land focus upon Community competence on consumer protection. The decision to treat land as a product like any other in the Unfair

Commercial Practices Directive will have wide ranging and far reaching implications and, apart from marketing of land and of timeshares, other chapters deal with conveyancing, contracting and the emerging market in mortgage credit. The book concludes with a miscellany of conflicts rules which are gradually coalescing and form the elements from which a substantive European land law can be forged. A number of topics which it is not possible to cover in detail (VAT, other taxes, environmental controls and agriculture) are touched on briefly, and the same is true of international aspects of trusts and succession. Unlocking Land Law will help you grasp the main concepts of this core subject with ease. Containing accessible explanations in clear and precise terms that are easy to understand, it provides an excellent foundation for learning and revising land law. The information is clearly presented in a logical structure and the following features support learning, helping you to advance with confidence: clear learning outcomes at the beginning of each chapter set out the skills and knowledge you will need to get to grips with the subject; key facts summaries throughout each chapter allow you to progressively build and consolidate your

understanding; end-of-chapter summaries provide a useful check-list for each topic; cases and judgments are highlighted to help you find them and add them to your notes quickly; frequent activities and self-test questions are included so you can put your knowledge into practice; sample essay questions with annotated answers prepare you for assessment. This 7th edition has been extensively rewritten and updated to include discussion of recent changes and key developments in land law. These include the different ways in which the Covid-19 pandemic has affected property transactions, and the changes in the rules with regard to electronic signatures and the witnessing of wills, as well as coverage of key recent cases and judgments, and their effect on the law.

www.pearsoned.co.uk/lawexpress 'Modern Land Law' is a core textbook providing students with a clear understanding of the principles of the subject. It analyzes the social context of modern land law and the policy tensions to which it gives rise. In this book, Martin Bunton focuses on the way in which the Palestine Mandate was part of a broader British imperial administration - a fact often masked by Jewish immigration and land purchase in Palestine. His meticulous research reveals clear links to colonial practice in India, Sudan, and Cyprus amongst other places. He argues that land officials' views on sound land management were derived from their own experiences of rural England, and that this was far more influential on the shaping of land

policies than the promise of a Jewish National Home. Bunton reveals how the British were intent on preserving the status quo of Ottoman land law, which (when few Britons could read Ottoman or were well grounded in its legal codes) led to a series of translations, interpretations, and hence new applications of land law. The sense of importance the British attributed to their work surveying and registering properties and transactions, is captured in the efforts of British officials to microfilm all of their records at the height of the Second World War. Despite this however, land policies remained in flux. McFarlane, Hopkins, and Nield's Land Law is the most succinct, analytical textbook available in this subject area. These experienced and respected authors have used their unique approach to land law to provide a consistent structure with which students and lecturers can tackle the topics. The approach arms students with the tools needed to analyse content covered in classes and exams autonomously by demonstrating how to consider rules in isolation before looking at the full picture. This method helps students make links across topics. The concise treatment allows students to concentrate on building an in-depth, sophisticated grasp of

the core principles. The authors' direct writing style and contextual outlook guides readers through the depth and detail and gives lucidity to abstract rules. The use of significant cases to exemplify rules in practice and diagrams for visual learners gives additional clarity to concepts that are particularly difficult to imagine. Students are encouraged to test their knowledge by answering end-of-chapter questions and to widen their research by referring to the resources suggested in the further reading lists accompanying each chapter. Online resources Students can access additional supportive materials online including: - Web links to useful sites containing further information on chapter-specific topics - Self-test questions with instant feedback - Essay questions and guidance on how to answer them - Updates on legal developments in land law Ideal for students taking law modules on construction, surveying, real estate, planning and civil engineering courses, Galbraith's Construction and Land Management Law for Students is an excellent overview of the key legal issues in the built environment. Clearly written and with wide ranging coverage of key legal principles, this textbook highlights the need for students on built environment

related courses to access information on how the law relates to their profession, without getting into the heavy detail of the full-scale legal texts. Chapters provide the background to the English legal system before covering key topics such as contract law, tort, health and safety, land law, planning, landlord and tenant, dispute resolution and employment law. All chapters in this seventh edition have been updated with new case law along with statutory and regulatory changes. The improvements include: A new chapter on environmental law An explanation of the new UK/EU relationship following Brexit Details of current JCT 2016 and NEC4 construction contracts Changes to landlords' requirements on letting property The Consumer Rights Act 2015 The Localism Act 2011 The Construction (Design and Management) Regulations 2015 The Optimize series is designed to show you how to apply your knowledge in assessment.
