The Crow's Murder Dec 02 2022 Well, I just can't seem to catch a break, can I? None of us saw it coming, no matter what precautions we took or how many contingencies we put into play. What's the point of having all this power when everyone is out to get me? They say things are darkest before the light, and that the storm

gets worse before it clears. Trust me when I say platitudes don't do a damn bit of good when you're in the middle of it. I'm Kit Davenport, and my heart is breaking.

Now Kit needs a new recipe for her life, and Georgia’s Sugarberry Island seems to have all the ingredients. In that sleepy Southern town, Kit finds a new job running the mail-order cupcake business Babycakes...and meets the tall, dark, and adorable lawyer Morgan Westlake. Having just moved to the island to raise his goddaughter, Morgan is as mouthwatering as any of Kit's creations. There’s just one fly in the batter: Morgan hails from the very law firm that helped crush her dreams. Fortunately, Kit's new friends can assure her that Morgan is no typical Westlake--and that even lawyers, not to mention single dads, need romance. If Kit can just be persuaded to follow her appetite—her sweetest dreams just might come true. Includes irresistible recipes!

Dragons on Bird Wings Nov 01 2022 Follow the 3rd Fighter Aviation Corps along its Combat Path during the Liberation of the Motherland through the experiences of one of its units - the 812th Fighter Aviation Regiment. Drawing on a comprehensive range of archives, memoirs, and photographs, the authors describe this unit's daily combat activities in detail from its formative Rzhev - Vyazma days on the doorstep of Moscow, into the pivotal Stalingrad battles, and on through the hard-won victories along the shores of the Sea of Azov - Kuban, Myskhako, Molochnaya - and beyond. In this volume, part one of the 812th regiment's combat history reaches its climax with the ejection of the Luftwaffe from its remaining bases near the besieged fortress city of Sevastopol, while the Red Army liberates the Crimea from the grip of the Wehrmacht. We leave the 812th - General Savitskiy's "Dragons on Birds Wings" - as it regroups and prepares for the great drive through Europe where it will end the war in Berlin itself... This is the one of the first primary source derived, and by some accounts foremost, English-language histories of an operational regiment-sized VVS (Soviet Air Force) unit during the Great Patriotic War. Forward by Von Hardesty. Expert

translation from an original Russian manuscript by James Gebhardt in consultation with Dr. Ilya Grinberg. Useful appendices and comprehensively indexed. REVIEWS "Considerable amounts of care have gone into this volume, both in the research and writing by Antipov and Utkin and in the translation, editing, and production work by the team in Canada. While it should come as no surprise that a Soviet air regiment could have such an scintillating existence leading to a high quality unit history, it does seem rather remarkable that we've had to wait so long to see this kind of work from the Russian side of the Eastern Front become available in English." - Bill Stone "A rare and essential item in English... The authors have done monumental work in compiling statistical and technical information..." - Regina Pennington on Amazon.com "It shows the air war from the Russian perspective without all the death-defying patriotic lingo ('glorious', 'fascist', 'patriotic', etc.)." - Richard Ordway on Amazon.com

The Demon-Haunted World Jan 23 2022 A prescient warning of a future we now inhabit, where fake news stories and Internet conspiracy theories play to a disaffected American populace "A glorious book . . . A spirited defense of science . . . From the first page to the last, this book is a manifesto for clear thought."—Los Angeles Times How can we make intelligent decisions about our increasingly technology-driven lives if we don't understand the difference between the myths of pseudoscience and the testable hypotheses of science? Pulitzer Prize-winning author and distinguished astronomer Carl Sagan argues that scientific thinking is critical not only to the pursuit of truth but to the very well-being of our democratic institutions. Casting a wide net through history and culture, Sagan examines and authoritatively debunks such celebrated fallacies of the past as witchcraft, faith healing, demons, and UFOs. And yet, disturbingly, in today's so-called information age, pseudoscience is burgeoning with stories of alien abduction, channeling past lives, and communal hallucinations commanding growing attention and respect. As Sagan demonstrates with lucid eloquence, the siren song of unreason is not just a cultural wrong turn but a dangerous plunge into darkness that threatens our most basic freedoms. Praise for *The Demon-Haunted World* "Powerful . . . A

stirring defense of informed rationality. . . Rich in surprising information and beautiful writing.”—The Washington Post Book World “Compelling.”—USA Today “A clear vision of what good science means and why it makes a difference. . . . A testimonial to the power of science and a warning of the dangers of unrestrained credulity.”—The Sciences “Passionate.”—San Francisco Examiner-Chronicle

The Dragon's Teeth Feb 21 2022 An in-depth look at the past, present, and future of China's military. When

Mao Zedong proclaimed the People's Republic of China in 1949, China was a poor and wrecked society after years of continuous wars. For centuries, in fact, China had been seen as a sort of plunder-zone to be invaded, and then a backwater until the late 1980s—when domestic policy brought about monumental changes. The result is that China has grown to be the second largest economy in the world, and its military has grown proportionately. Successive decades of economic growth have transformed China—in addition to the weapons revolution during the computer age—so that the People's Liberation Army (PLA) has become a modern fighting force. No longer having to rely on massed infantry attacks, it now features a formidable arsenal, including nuclear submarines, ICBMs, stealth fighters, and modern battle tanks. Perhaps ominously for other maritime powers, the Chinese have also focused on beyond-the-horizon missile technology, as well as anti-aircraft systems, and have explored the possibilities of cyber-warfare. What is today's PLA really like? What are its traditions and histories, and how is it armed and equipped? How does it recruit and train? This book describes some of the lesser-known battles and wars the Chinese have undertaken and the development of their key weapons systems. The United States, having opened the door to drone warfare, has had an attentive audience for such technologies in Beijing. The last chapter provides thoughts on how the Chinese view matters of security. It is not yet known whether foreign powers can still enforce their territorial wills on China—but future attempts will meet an increased challenge.
