Excerpt from The Texas Mathematics Teachers' Bulletin, 1918, Vol. 4 If you do not know the people named, it will be worth your while to come and meet them. If you do know them, you will need no urging to come. There is not. A subject on this list that is not of interest to. Every teacher of mathematics, and there is not a subject named that any high school teacher of mathematics cannot understand. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at www.forgottenbooks.com This book is a reproduction of an important historical work. majority of imperfections successfully; any imperfections that remain are intentionally left to preserve the state of such historical works. Excerpt from *The Bulletin of the National Tax Association*, Vol. 4: October, 1918-June, 1919 These measures are just about to be presented to the legislature, and by the time this reaches our readers there will have been plenty of discussion in Albany. The abomination of politics enters into the situation and is one of the discouragements, the prevalent irritation over the federal income tax being used to defeat any further extension of that sort of a tax. The advent of a democratic governor has brought a democratic member to the tax commission in place of Commissioner Thomas, whose term expired. The vacancy was filled by the appointment of Michael J. Walsh, postmaster of Yonkers. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Excerpt from *The Journal of Parasitology*, 1918, Vol. 4: A Quarterly Devoted to Medical Zoology For many years I have been engaged in the study of parasitic worms from North' American freshwater hosts, mostly fish; during this time I have had opportunity to examine and compare material from a large number of localities embracing many widely separated points. In this work I have been aided very greatly by studies on individual groups undertaken and published under my direction by various graduate students to whom my Obligation is freely expressed here. In connection with this work it has been necessary to examine critically all original records of parasites from similar hosts and to endeavor to reach a positive determination of the parasite under discussion in each case. This is not a Simple matter, as the records were Often made on the basis of a rapid preliminary examination; furthermore, the total lack of Special reference works on these groups led to the recording of parasitic species under general names taken from the older European writers, and these names are often wanting in definite significance. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at www.forgottenbooks.com This book is a reproduction of an important historical work. Excerpt from *O. A. C. Year Book*, 1918, Vol. 4 Hen a famous sculptor was asked which of his works he was most interested In he replied, I am most interested in the statue I am going-to carve next. This should be the point of view of every good workman, and to the graduates of the class of 1918 the question may very properly be put, What are you most interested in? And now that you have graduated, what statue are you going to carve. Next? Your four years of College life are over! What about the next four years? From you, as graduates of this College, much more will be expected than from those who have not had the benefit of scientific training. Your failure, will cast discredit upon scientific methods; your success will encourage others to follow your example. It is by your success or failure, rather than by any printed course of study in the calendar that the farming community will judge the work of this college. It is to you also that the community in which you live will look for

leadership in everything that makes for rural progress. And, most important of all, it is to you that the nation will look for the open mind, the breadth of vision, and the scientific accuracy which will help in the problems of reconstruction which we must resolutely face in the years to come. Never has a graduating class. In the history of this College had to face problems and bear responsibilities such as the class of 1918 is called upon to meet. Before some of you lies the stern discipline of training camps, and the still greater tests of endurance and skill which fall to the lot of the soldier overseas. And for those of you who are not privileged to take your place in the front line trenches, there lie before you duties and responsibilities no less grave. Never has the need been greater than at the present time for young men and young women of clear vision and accurate knowledge to help solve the problems of increased production and conservation of the products of the farm. To such a task every young man and young woman must devote the best skill and energy that is in them. If books have been closed in the College class-rooms, it is only to open them with keen minds and fresh enthusiasm in the world of practical affairs which you are about to enter. In that school, students and investigators are needed, - broad-minded men and women who are able to meet great problems and who have patience to overcome strong prejudices. Let it not be said of the young men and women of the class of 1918 that when the testing time came they failed in their task. Be strong and quit yourselves like men!

Excerpt from *Readers' Guide to Periodical Literature (Cumulated)*, 1915-1918, Vol. 4: An Author and Subject Index to 104 Periodicals and Reports His fourth cumulation of the readers' guide includes a period of four years instead of five, a change of plan which has met with general approval. The present volume, covering as it does the years 1915-1918, is almost coincident with the European war period, and except for eleven pages in volume III, includes references to all the contemporary periodical literature of the war published in the magazines indexed by the guide. The entries in Volume IV under the heading European war fill 96 pages and it is impossible to estimate the references touching less directly on the subject. The battles of Belleau Wood and Soissons in June and July of 1918 marked a turning point in World War I and in the stature of the US Marine Corps, whose fighting proved so critical in repelling the Germans that the French would later rename Belleau "Bois de la Brigade de Marine." In this book J. Michael Miller, a historian of the Marine Corps and veteran chronicler of battle, takes us to the battlefields of Belleau Wood and Soissons, immersing us in the experience of a single brigade of marines at the forefront of the fighting. Through a close-up look at the doughboys' singular impact on Allied victory in 1918, his work illuminates America's bloody sacrifice during World War I. The 4th Marine Brigade at Belleau Wood and Soissons for the first time treats these two battles as one campaign and demonstrates why it is impossible to fully understand one without the other. Miller outlines the company and platoon levels of combat throughout the campaign, establishing a basic tactical understanding of the fighting; he also draws on letters, diaries, memoirs, and interviews to create a vivid and personal reconstruction of the battles. His use of French and German sources, also a first, adds unprecedented

insights to this boots-on-the-ground account. The book includes detailed mapping of both battlefields, with a thirty-six-stop guide linking the text with the actual terrain. For each of these stops Miller gives GPS coordinates to provide a virtual tour of the sites he discusses. With its strategic overview and ground-level perspective, Miller's work suggests a new interpretation and offers a new experience of an iconic moment in American military history—and in the story of the Marine Corps. Excerpt from Tennessee Historical Magazine, Vol. 4: March December, 1918 About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Excerpt from California Fish and Game, Vol. 4: July, 1918 In the year 1910, the Bureau of Soils of the United States Department of Agriculture, called the attention of the public to the giant kelps lining much of the west coast of America. New requirements for fertilizers and an extending market had caused the Bureau of Soils to look for other sources of supply, and from information at hand at that time, it seemed that the giant kelps might prove to be such a source. More intensive study of the plant and the extent of its distribution confirmed the idea, and consequently a great industry is being developed. We do, however, repair the vast majority of imperfections successfully; any imperfections that remain are intentionally left to preserve the state of such historical works. Excerpt from The Training School Quarterly, Vol. 4: January, February, March, 1918 The public schools in Pitt County are trying to do their part toward helping to win the war. Numerous letters have been sent out urging the teachers to get in behind all the war measures. This note has been struck at every meeting held. Every school in the county has been visited by the Food Conservation Committee or its representatives, and the children enlisted in this movement. The Food Administration and the County Superintendent worked in close harmony on this drive. The cause Of the second Liberty Loan Bond was presented to every school in the county that had begun work on Liberty Loan Day. The work was done by teams sent out by the central committee. Quite a number Of bonds were taken by school children. Fully 90 per cent of the Red Cross meetings in the county have been held in schoolhouses. Red Cross rooms at Bethel, Grimesland, and Grifton are located in the school buildings. The sewing class in the Grifton High School is conducted practically as an adjunct of the Red Cross. The work Of the Junior Red Cross has been recently presented to the teachers, and results are expected from this campaign. About the Publisher Forgotten Books publishes hundreds of thousands of

We do, however, repair the vast majority of imperfections successfully; any imperfections that remain are intentionally left to preserve the state of such historical works. Excerpt from *Social Hygiene*, Vol. 4: 1918 The members of the American Social Hygiene Association are to be congratulated upon securing the leadership of Professor William Henry Welch at this time of national need when the demand for the services of the Association is so great. No other man of international reputation in medicine, public health, and social welfare activities could have been selected who could serve the Association so well through his knowledge of the social hygiene movement and his personal acquaintance with citizens and governmental officers whose cooperation is vitally essential. In addition to the memorandum quoted below concerning some of the interesting activities in Professor Welch's career, it should be stated that he has recently been appointed Director and Professor of Immunology of the new School of Hygiene and Public Health of Johns Hopkins University and is on active duty as Lieutenant Colonel in the medical corps of the United States army and one of the chief advisers of the Surgeon General and of the government in all matters which pertain to the conservation of health of both the military and civil populations. Excerpt from *The Little Review*, Vol. 4: May, 1917 April, 1918 When Mark Twain first wrote *Huckleberry Finn* this land was swept with a gale of laughter. When he wrote *The Innocents Abroad* even Europe laughed at it itself! But one day there appeared a new book from his pen, so spiritual. So true, so lofty that those who did not know him well were amazed. Joan of Arc was the work of a poet a historian - a seer. Mark Twain was all of these. His was not the light laughter of a moment's fun, but the whimsical humor that made the tragedy of life more bearable.
