The construction of gender roles in peer groups Mar 04
2022 Seminar paper from the year 2004 in the subject English Language and Literature Studies - Linguistics, grade: 1,3, Ernst Moritz Arndt University of Greifswald (Institut für Anglistik/Amerikanistik), course: Gender Linguistics, 9 entries in the bibliography, language: English, abstract: Same-sex peer groups are of vital importance for children's development. There they learn gender appropriate behaviour and language. In my term paper I want to explain the nature and function of peer groups and examine the language that develops in same-sex and mixed-sex peer groups. The paper will focus mainly on same-sex peer groups, because they are the basis for the differences in the development of girls

and boys. Therefore I organized my term paper the following way: Before I introduce the general concept of a peer group, I want to point out the importance of children for the reproduction of the social order in a particular society. I will also focus the attention on the linguistic significance of peer groups. After that I will sum up the different patterns of behaviour and communication of girls and boys in same-sex and mixed-sex peer groups, which I found in several papers on this topic. Then I will introduce the "Separate World Hypothesis", which should, according to my thesis, explain the turned up differences. Furthermore I will try to demonstrate difficulties of the hypothesis and give other hypotheses opposing it. Finally I will point out problems which might come up during the study of peer groups.

Under Pressure Jan 22 2021 NEW YORK TIMES BESTSELLER • An urgently needed guide to the alarming increase in anxiety and stress experienced by girls from elementary school through college, from the author of *Untangled* "An invaluable read for anyone who has girls, works with girls, or cares about girls—for everyone!"—Claire Shipman, author of *The Confidence Code* and *The Confidence Code for Girls* Though anxiety has risen among young people overall, studies confirm that it has skyrocketed in girls. Research finds that the number of girls who said that they often felt nervous, worried, or fearful jumped 55 percent from 2009 to 2014, while the comparable number for adolescent boys has remained unchanged. As a clinical psychologist who specializes in working with girls, Lisa Damour, Ph.D., has witnessed this rising tide of stress and anxiety in her own research, in private practice, and in the all-girls' school where she consults. She knew this had to be the topic of her new book. In the engaging, anecdotal style and reassuring tone that won over thousands of readers of her first book, *Untangled*,

Damour starts by addressing the facts about psychological pressure. She explains the surprising and underappreciated value of stress and anxiety: that stress can helpfully stretch us beyond our comfort zones, and anxiety can play a key role in keeping girls safe. When we emphasize the benefits of stress and anxiety, we can help our daughters take them in stride. But no parents want their daughter to suffer from emotional overload, so Damour then turns to the many facets of girls' lives where tension takes hold: their interactions at home, pressures at school, social anxiety among other girls and among boys, and their lives online. As readers move through the layers of girls' lives, they'll learn about the critical steps that adults can take to shield their daughters from the toxic pressures to which our culture—including we, as parents—subjects girls. Readers who know Damour from *Untangled* or the *New York Times*, or from her regular appearances on CBS News, will be drawn to this important new contribution to understanding and supporting today's girls. Praise for *Under Pressure* "Truly a must-read for parents, teachers, coaches, and mentors wanting to help girls along the path to adulthood."—Julie Lythcott-Haims, *New York Times* bestselling author of *How to Raise an Adult*

Peer Pressure, Peer Prevention Jul 20 2023

Criminological research has largely neglected the possibility that positive peer influence is a potentially powerful source of social control. Quantitative methods tease out cause, effect, and spuriousness in the relationship between peer delinquency and personal delinquency, but these methods do little or nothing to reveal how and why peers might influence each other toward--or away from--deviance. Costello and Hope take a first step toward uncovering the mechanisms of peer influence, drawing on quantitative and qualitative data collected from two convenience samples of university students. Their quantitative analyses showed that positive peer influence occurs most frequently among those who associate with the most deviant peers and self-report the most deviance, contrary to predictions drawn from social learning theories. Their qualitative data revealed a variety of methods of negative influence, including encouraging deviant behavior for others' amusement, a motive for peer influence never before reported in the literature.

Handbook on Writing Research Paper in Social Science Using Advance Tools Sep 29 2021 The book has well turned out to be a boon for researchers from academia as well as industry. The book seemly meets the requirement and encounters the dilemma of a 'first time researcher' in many ways. The basics of research paper writing are taken well care in the previous editions of the handbooks as proceedings published by Prestige Institute of Management and research, Gwalior. The previous editions focused on steps to carry out review of literature, setting objectives, developing hypothesis, selecting appropriate methods as per objectives, drawing inferences followed by referencing

styles. The book not only provides insights to a first time researcher but also introduces them with the latest tools. Part one of the book presents introduction to E views as Chapter 1. The chapter deals with step wise procedure to work with E views elaborately. E-Views is widely used numerous econometric analyses along with statistical analysis. E views provided analysis like cross-section, time series estimates and forecasts, as well as does panel data analysis simultaneously. Chapter 2 is modestly written to introduce 'Mendeley' to the researcher. 'Mendeley is expedient for copious objectives like conducting systematic literature review, research gap identification, setting objectives thereafter, and more over provides a most vital efficacy to manage research papers in a stress-free manner. 'Mendeley' is widely used amongst researchers across the globe as a referencing tool as well providing competence to incorporate any style of referencing within fraction of seconds. Thus taking research on next level. Part two of the book contains twelve research papers covering diverse domains like finance, marketing, HR and, IT. The research papers are the sample papers exhibiting the concepts of writing a well-structured paper and elaborating the procedures to be followed while writing a research paper. The research papers included in the book are developed during the 'Five Day National Research Methodology Workshop', organized by Prestige Institute of Management and research, Gwalior. The paper writing work was divided into 'before', 'during' and 'after' phases. Topic finalization, measure development, review of literature and data collection was done before the initiation of workshop among the teams of registered participants. The entire methodology, application of data analysis tools and discussion was done during the workshop. Post workshop i.e. the after phase was exclusively dedicated for

strengthening the review of literature, discussion of results and, referencing followed by improvement in the overall structure and language of the research paper. We hope the efforts put in the book will surely help readers

The influence of network peer pressure on entrepreneurial intentions Feb 15 2023 Seminar paper from the year 2016 in the subject Business economics - Business Management, Corporate Governance, grade: 1,7, Technical University of Munich (TUM School of Management), course: Advanced Seminar in Innovation & Entrepreneurship: Entrepreneurial Networks, language: English, abstract: The aim of this paper is to examine the relationship between network, peer pressure and entrepreneurial intentions. The impact of network peer pressure is investigated using the example of the entrepreneurship study program at the Center for Digital Technology and Management (CDTM) in Munich. The research is conducted as part of the seminar „Entrepreneurial networks and family businesses“ at TUM, Munich. This paper follows a qualitative case study design, well-suited in early stages of research or when a fresh perspective is needed like here in the case of observing peer pressure effects in a different context as done before. Data sources were semi structured interviews and a literature review. Whereas effects of peer pressure have been seen rather negatively in previous literature, the results of this study shows that in the case of the observed network CDTM a lot of positively perceived peer support could be noticed, inspiring entrepreneurial intentions and easing the founding process. The results of this paper could be of interest for both practitioners and scientists. By researching about the influence of entrepreneurial education, practical implications could be derived and future research on the effects of peer pressure on entrepreneurial intentions (two concepts

which have not been put into context so far) might be inspired.

The Promise of Adolescence Nov 12 2022

Adolescenceâ€"beginning with the onset of puberty and ending in the mid-20sâ€"is a critical period of development during which key areas of the brain mature and develop. These changes in brain structure, function, and connectivity mark adolescence as a period of opportunity to discover new vistas, to form relationships with peers and adults, and to explore one's developing identity. It is also a period of resilience that can ameliorate childhood setbacks and set the stage for a thriving trajectory over the life course. Because adolescents comprise nearly one-fourth of the entire U.S. population, the nation needs policies and practices that will better leverage these developmental opportunities to harness the promise of adolescenceâ€"rather than focusing myopically on containing its risks. This report examines the neurobiological and socio-behavioral science of adolescent development and outlines how this knowledge can be applied, both to promote adolescent well-being, resilience, and development, and to rectify structural barriers and inequalities in opportunity, enabling all adolescents to flourish.
