[A Bowstring winter](#) Jan 06 2021 It was the code of friendship. Like a bowstring: tight. Like an arrow: straight.' When John Dkhar arrives at Kaizang restaurant, Shillong, one cold November evening, he has no premonition that his life is about to change forever. A loner by nature, and the very epitome of culture and refinement, John comes across people he will soon be involved with in a deadly game of passion and hatred, trust and treachery: James Kharlukhi, tough and uncompromising, a leader born with a lust for danger; Jennifer d'Santos, companion to James, whose love for John can only lead to tragedy; Charlie, aloof, enigmatic, and cursed with an ugly face which might prove to be his undoing; and Dor Kharkongor, ace archer, the spirit of the hills, caught between single-minded loyalty to James and paternal affection for John. Set against the lush landscape of Shillong, Dhruva Hazarika's tale of revenge and violence brilliantly evokes the sights and smells of North-East India while narrating a dynamic tale which addresses the universal themes of friendship, loyalty and the inherent loneliness of man.

English-German Nautical Terms Jun 10 2021

Alternative Treatments for Troubled Youth Nov 03 2020 The purpose of this volume is to present the whole story of our research program on alternative interventions with delinquent youth. It is our goal to describe the development of an alternative intervention model, to examine its salient processes, to provide a test of its relative effectiveness, and to give a description of its systemic impacts. The process described was based on the notion that improvement in our approaches to troubled youth lies in a systematic examination of the efficacy of innovative models. As the reader is probably aware, the history of interventions with troubled youth is more a record of failure than success. Thus, the search for alternatives is extremely critical. The book proceeds as a detailed research monograph. The first four chapters describe the historical and theoretical antecedents of the development of the research program. Chapters 5 through 11 describe research on the efficacy of alternative intervention approaches for delinquent youth, research on the impact on nonprofessional change agents, an attempt to integrate contemporary theoretical propositions about delinquency causation and the effects observed, and research examining the systemic consequences of providing innovative interventions to delinquent youth. The final chapter integrates the findings with contemporary work and provides suggestions for future work.

Model Identification and Adaptive Control Aug 13 2021 This book is based on a workshop entitled: "Model Identification and Adaptive Control: From Windsurfing to Telecommunications" held in Sydney, Australia, on December 16, 2000. The workshop was organized in honour of Professor Brian (BDO) Anderson in recognition of his seminal contributions to systems science over the past 4 decades. The chapters in the book have been written by colleagues, friends and students of Brian Anderson. A central theme of the book is the interrelationship between identification and the use of models in real world applications. This theme has underpinned much of Brian Anderson's own contributions. The book reflects on these contributions as well as making important

statements about possible future research directions. The subtitle of the book (From Windsurfing to Telecommunications) recognizes the fact that many common life experiences, such as those we encounter when learning to ride a windsurfer are models for design methods that can be used on real world advanced technological control problems. In deed, Brian Anderson extensively explored this link in his research work.

Technological Dictionary Nov 27 2022 In cases where, in one language, a particular term is applicable to several professions, industries, etc. while the foreign equivalent varies according to the industry, etc. in which it is used, the particular branch of industry is noted in parenthesis in accordance with the "Explanations of Abbreviations and Signs" given at the beginning of the book. This reference has, however, been omitted where there can be no doubt as to the industry, etc. covered by the term. Expressions which are preferred, or are used almost exclusively, in the United States, are marked (A). I would like to sincerely.

Estuaries of Australia in 2050 and beyond Jul 24 2022 The book addresses the questions: Is Australia's rapidly growing human population and economy environmentally sustainable for its estuaries and coasts? What is needed to enable sustainable development? To answer these questions, this book reports detailed studies of 20 iconic Australian estuaries and bays by leading Australian estuarine scientists. That knowledge is synthesised in time and space across Australia to suggest what Australian estuaries will look like in 2050 and beyond based on socio-economic decisions that are made now, and changes that are needed to ensure sustainability. The book also has a Prologue by Mr Malcolm Fraser, former Prime Minister of Australia, which bridges environmental science, population policy and sustainability.

Diagnosis and Treatment of Mitral Valve Disease - E-book Apr 01 2023 The only reference wholly dedicated to this complex topic, *Diagnosis and Treatment of Mitral Valve Disease: A Multidisciplinary Approach* provides authoritative, must-have information on the disease processes affecting the mitral valve, interpretation of diagnostic studies, and medical, transcatheter, and surgical treatments needed for mitral valve repair. Using a multidisciplinary approach, Drs. Scott Goldman and William Gray oversee a "who's who team of contributing authors who offer a holistic view of the modern treatment of mitral valve disease for today's cardiac surgeons, cardiologists, and other cardiac team members. Includes foundational chapters on anatomy and pathophysiology of the mitral valve—critically important topics when treating multiple complex and highly dynamic structures that function as a single unit. Covers diagnostic tools, medical treatments, surgical therapies, and transcatheter therapies, and provides tips for developing a successful mitral valve program (with baseline thresholds, common pitfalls, and a checklist for hospitals). Uses an accessible, quick-reference format that features takeaway chapter openers, bulleted key points, end-of-chapter summaries, a common nomenclature and glossary of terms, key references, and ample line drawings, photographs, tables, charts, and graphs throughout. Incorporates the essential role of imaging in structural transcatheter interventions, including echocardiography and transcatheter edge-to-edge repair (TEER), and their uses in diagnostic work-up, procedural planning, intra-procedural guidance, and follow-up. Features dozens of procedural videos, including transthoracic echocardiogram; cardiac MRI for mitral regurgitation; transcatheter mitral valve repair; transcatheter valvuloplasty; percutaneous mitral valve interventions; MitraClip™ positioning; and many more.

Covid-19 Metabolomics and Diagnosis Sep 01 2020 This book presents a collection of chapters on Covid-19 topics, with focus on the metabolomics and diagnosis. The chapters report on diagnostic tests for detection of

SARC-CoV-2 virus and related proteins as well as post-Covid omics. This book covers Fourier-Transform Infrared spectroscopy and spectromicroscopy applied to Covid-19 studies and Carbon Nanomaterials as Covid-19 Electrochemical sensors. Moreover, the reader will find content on 3D printing for virus diagnosis, as well as organ-on-a-chip models for viral infection proteomics interaction.

Dictionary of Science and Technology Jan 30 2023 Dorian's Dictionary of Science and Technology: English-German, Second Revised Edition focuses on the compilation of terms employed in science and technology. The book first takes a look at abduction, aberration, adhesion, abating, ablation, abscission, coupling, covering, back iron, cross-breeding, clip, cleats, channel, circuit diagram, connection, conveyors, and supercharger. The manuscript then takes a look at dabbling, dacite, dactyl, daffodil, damp, earmark, earphone, ripening, current prospecting, facilities, gaff, gablet, galaxy, gale, gait, gall, and galipot. The publication ponders on haddock, Hadley quadrant, H-bomb, habitation, habituation, hemoglobin, hailstorm, hail, halation, ichnography, iceboat, oblate, oblique, electrode structure, obesity, oatmeal, dyeing, and pachyderm. The text then explores wainscoting, waist, wale, waiver, ultrafilter, ultrahigh frequency, ulocarcinoma, elongation, vaccinal fever, vaccination, vaccine, vacancy, and vacuumeter. The text is a dependable source of data for researchers interested in the terms used in science and technology.

Restoring the Earth - The next decade Feb 25 2020 This Unasylva issue aims at showcasing forest and landscape restoration (FLR) opportunities and recent developments that have the power to upscale restoration, in order to achieving the Bonn Challenge pledge and other national and international commitments (Sustainable Development Goals (SDGs), the Convention for Biological Diversity (CBD) Post-2020 Agenda, the United Nations Convention to Combat Desertification (UNCCD) Land Degradation Neutrality, Paris Agreement under the United Nations Framework Convention on Climate Change (UNFCCC)) and addressing the needs of the UN Decade 2021-2030 on Ecosystem Restoration. The content addresses thematic of relevance to various audiences: i) flagship restoration initiatives that differ from the so-called "business-as-usual" as they channel more funds, better empower local stakeholders and provide enhanced technical assistance through partners' coalitions; ii) technical advances that can spread FLR and have a huge potential to be mainstreamed for different reasons (low cost, adaptability, relevance to many ecosystems and contexts, ease of implementation...); iii) the enabling factors for restoration, i.e. coordination, policy environment, resources, knowledge and capacities, as these are the enabling conditions for action to take place on the ground.

The High Value of The North Sea Dec 29 2022 In the past land was distinguished from maritime territory by the presence of industrial and military assets that needed to be defended. This is no longer the case. As the size, diversity and importance of sea-based assets and activities increase, whether it's windmills, undersea cables or offshore rigs, so do the entry points for criminal and terrorist actions, and for disturbances and attacks by state actors. As 'sea' becomes more like 'land', guaranteeing the security of structures and processes in the North Sea warrants more attention, and could potentially necessitate new approaches. As an open economy and society, the Netherlands in particular is vulnerable not only to cyberattacks and disinformation campaigns, but also to hybrid threats to its maritime infrastructure. Its key position on the North Sea, means that its ports occupy a strategic logistical role in supplying NATO forces to the East. This could make it a potential target for hybrid attacks by states such as Russia. The focus of this report is thus to identify trends in the growth of sea-based assets in the North Sea, analyze their vulnerability to hybrid threats and interpret the impact of these developments for the Netherlands Coast Guard and the Royal Netherlands Navy.

Principles in Microbiome Engineering Jun 22 2022 Principles in Microbiome Engineering Provides an overview of the techniques and applications insight into the complex composition and interactions of microbiomes. Microbiomes, the communities of microorganisms that inhabit specific ecosystems or organisms, can be engineered to modify the structure of microbiota and reestablish ecological balance. In recent years, a better understanding of microbial composition and host-microbe interactions has led to the development of new applications for improving human health and increasing agricultural productivity and quality. Principles in Microbiome Engineering introduces readers to the tools and applications involved in manipulating the composition of a microbial community to improve the function of an eco-system. Covering a range of key topics, this up-to-date volume discusses current research in areas such as microbiome-based therapeutics for human diseases, crop plant breeding, animal husbandry, soil engineering, food and beverage applications, and more. Divided into three sections, the text first describes the critical roles of systems biology, synthetic biology, computer modelling, and machine learning in microbiome engineering. Next, the volume explores various state-of-the-art applications, including cancer immunotherapy and prevention of diseases associated with the human microbiome, followed by

a concluding section offering perspectives on the future of microbiome engineering and potential applications. Introduces a variety of applications of microbiome engineering in the fields of medicine, agriculture, and food and beverage products Presents current research into the complex interactions and relationships between microbiomes and biotic and abiotic elements of their environments Examines the use of technologies such as Artificial Intelligence (AI), Machine Learning (ML), and Big Data analytics to advance understanding of microbiomes Discusses the engineering of microbiomes to address human health conditions such as neuro psychiatric disorders and autoimmune and inflammatory diseases Edited and authored by leading researchers in the rapidly evolving field, *Principles in Microbiome Engineering* is an essential resource for biotechnologists, biochemists, microbiologists, pharmacologists, and practitioners working in the biotechnology and pharmaceutical industries.

The Fiction Collection Apr 28 2020 Collection of fiction by 20th century Indic English authors, published by Penguin Books, India commemorating its twentieth year in the publishing industry; includes English translation of fiction by 20th century authors of Indic languages.

Targeted Therapies for Solid Tumors Dec 17 2021 This volume provides readers a comprehensive and state-of-the-art overview about the range of applications of targeted therapies for solid tumors. The sections of the book have been structured to review the oncogene addicted tumors, the pharmacology and clinical development of new molecularly targeted agents, the use of biomarkers as prognostic, predictive and surrogate endpoints, and the evaluation of tumor response and specific malignancies treated with targeted agents. The book also covers some of the newest developments in cancer therapy that are not adequately covered by any current available literature. Written by recognized experts in the field, *Targeted Therapies for Solid Tumors: A Handbook for Moving Toward New Frontiers in Cancer Treatment* provides a unique and valuable resource in the field of molecular oncology, both for those currently in training, and for those already in clinical or research practice.

Since I Became a Terrorist Target Aug 01 2020 SINCE I BECAME A TERRORIST TARGET. Encounters and Dialogues Do I have to remain just a bystander waiting for the next terrorist attack? People keep arguing with him about this question because he's a nationally known volunteer leader. But how can he advise them about what to do that would make a difference-when he himself doesn't know what he can do that's important? But then, using a two thousand-year-old model of what makes a society strong, this charity leader starts recording and analyzing his encounters and dialogues, hoping to find an action that people now can take to strengthen their threatened country. And, at the same time, also reduce the hatred against it. He debates with business executives, street gang members, an angry Muslim man, a young mother who's given up sex, a frightened subway rider, an immigrant grandfather, college classmates at as reunion, his wife, children, friends, and many others. Then in the book's last section-twenty years into the future-as the Big War grows throughout the world, he finally understands the contribution he can make. But why does his plan risk sending him to jail?

Dictionary of Engineering and Technology: English-German Oct 03 2020

Nanomedicine Apr 20 2022 This volume in the *Methods in Enzymology* series comprehensively covers Cancer, Cardiovascular and the central nervous system of Nanomedicine. With an international board of authors, this volume is split into sections that cover subjects such as Diabetes and nanotechnology as potential therapy, Nanomedicines for inflammatory diseases, and Development and use of ceramide nanoliposomes in cancer. Comprehensively covers cancer and the cardiovascular and central nervous systems of nanomedicine An international board of authors Split into sections that cover subjects such as diabetes and nanotechnology as potential therapy, nanomedicines for inflammatory diseases, and the development and use of ceramide nanoliposomes in cancer

Rivers of Love Mar 20 2022 Through the depths of my soul, God's love imparts, Through rivers of stone like hardened hearts— God's light shines right through, My soul is quenched, my soul anew. My soul is quenched with rivers of God's love Shining with heaven's light beaming from above, Shining through the river's hard rock and stone To rivers of love in God's heavenly throne. Ren Royal is a Christian who is passionate about sharing insight from her heart and soul through poetry. In a spiritual devotional that includes original artwork by retired pastor John Braulick, Mrs. Royal shares poems that each tell an inspirational story and include relatable scriptures and prayers. Her poetry explores diverse topics such as the streams of life that constantly flow, the catastrophic storms that God leads us through, the divine treasure found on a walk, the awesome power of the Lord, and the constant reminders that God is always here. *Rivers of Love* shares poetry, prayers, scripture, and artwork that leads believers on an incredible spiritual journey to reawaken and strengthen their faith in Jesus Christ.

Biometrics and ID Management Jun 30 2020 This book constitutes the thoroughly refereed proceedings of the COST 2101 International Workshop, BIOID 2011, held in Brandenburg (Havel), Germany, in March 2011. The 25 revised full papers presented were carefully reviewed and selected from numerous submissions and are completed by an introduction on COST. The papers are organized in topical main sections on theory and systems, handwriting authentication, speaker authentication, face recognition, multibiometric authentication, and on biometrics and forensics.

Routledge German Dictionary of Construction Worterbuch Bauwesen Oct 15 2021 This dictionary consists of some 25,000 entries in both German and English, drawn from all the major, as well as newly-developed areas in the fields of Construction including: Architecture & Building Design * Building Hardware & Interior Equipment * Building Machinery * Concrete Works * Construction Law & Building Contracts * Electronics * Environment * Heating, Ventilation & Air Conditioning * Infrastructure & Design * Insulation, Surface Works & Corrosion Structures * Material Properties * Sound & Thermal * Steel & Aluminium Structures * Stone Buildings * Timber Structures

Metallurgical Coatings and Thin Films 1990 Jul 12 2021 Metallurgical Coatings and Thin Films 1990 presents the Proceedings of the 17th International Conference on Metallurgical Coatings and 8th International Conference on Thin Films, held in San Diego, California on April 2-6, 1990. It contains 219 papers covering a wide range of topics related to metallurgical coatings and thin films, including high temperature coatings, hard coatings, diamond films, tribology, and ion beam modification. Organized into 99 chapters, this volume begins with a discussion of a thermochemical model for diamond growth from the vapor phase and an experiment in large area diamond coating using a combustion flame torch in its traversing mode. It then explores the properties of diamond films, preparation of diamond-like carbon films using various ion-beam-assisted techniques, deposition of diamond-like films by laser ablation, and coating of cubic BN films on different substrates. The book examines surface processes and rate-determining steps in plasma-induced chemical vapor deposition, and addition of rare earths to improve scale adherence on heat-resisting alloys and coatings. The reader is introduced to high temperature wear and clearance control coatings, thermal barrier coatings, and corrosion resistant coatings. The book also discusses modification of coatings/surfaces to reduce friction; the mechanics of the tribology of thin films systems; mechanochemical interactions in the tribological behavior of materials; analysis and micromechanical testing of tribological coatings; surface modification using directed ion beams; and industrial equipment and processes. This book is a valuable resource for students and researchers interested in metallurgical coatings and thin films.

Cancer Stem Cell Resistance to Targeted Therapy May 10 2021 This book represents an up-dated summary of the state of the art of the characterization of cancer stem cell/ cancer initiating cell (CSC/CIC) properties. An overview of the definition and biological properties of CSCs/CICs as well as the role of these cells in determining the resistance to standard and immune-based therapies is provided. It also discusses limitations in the achievement of a definitive biological characterization of CSCs/CICs due to their high extent of plasticity and heterogeneity that is also mutually driven by the interaction of these cells with the tumor microenvironment. The limitations in targeting CSCs/CICs with immunotherapy are also explained together with explorative combination approaches that could increase the susceptibility of these cells to the recognition by immune cells. This book is conceived for a broad audience, including students, teachers, scientific experts. The critical revision of available results in terms of immunological profile of CSCs/CICs and the efficacy in targeting these cells by immunological approaches, results in a comprehensive and up to date recapitulation of the field and provides interesting suggestions on how to focus future investigations in order to assess the role of CSCs/CICs as prognostic and predictive biomarkers of responsiveness to therapies for cancer patients.

Applications of Nanovesicular Drug Delivery Mar 08 2021 Applications of Nanovesicular Drug Delivery provides thorough insights and a complete and updated discussion on the preparation, properties and drug delivery applications of various nanovesicles. This volume will discuss target-specific drug application, such as ocular, transdermal, nasal, intravenous and oral delivery. This title is a valuable resource for academics, pharmaceutical scientists, including industrial pharmacists and analytical scientists, health care professionals and regulatory scientists actively involved in pharmaceutical products and process development of tailored-made polysaccharides in drug delivery applications. Recently, there have been a number of outstanding nanosystems in nanovesicular carrier-forms (such as nanoemulsions, self-nanoemulsifying systems, nanoliposomes, nanotransfersomes, etc.), that have been researched and developed for efficient drug delivery by many formulators, researchers and scientists. However, no previously published books have covered all these drug delivery nanovesicles collectively in a single resource. Provides thorough insights and up-to-date discussions about the various systems of nanovesicular drug delivery Covers advanced trigger-assisted systems (such as

iontophoresis, ultra-sound triggering, etc.) and how they have been used for improved drug delivery by nanovesicles Presents recent advances in drug delivery fields by global leaders and experts from academia, research, industry and regulatory agencies Includes an updated literature review of relevant key topics, good quality illustrations, chemical structures, attractive flow charts and well-organized tables
