Sixty Years of Science at UNESCO 1945-2005 Feb 02 2023

The scientific mandate of the United Nations educational, Scientific and Cultural Organization (UNESCO) linked, from the outset, science with people, peace, societal benefits and the environment. Among others, it has also helped create numerous institutes, publications and non-governmental organizations to bring together the scientific world. This publication offers an inside perspective on the past six decades of this engagement. The volume traces through six parts the role played by UNESCO in the history of international science cooperation in an ever-changing world: I. Setting the Scene, 1945-1965; II. Basic Sciences and Engineering; III. Environmental Sciences; IV. Science and Society; V. Overviews and Analyses; and VI. Looking Ahead. It also features a list of chronological milestones set along the way.--Publisher's description.

Metaphors of Coronavirus Feb 07 2021 This book explores the metaphors used in public and media communication to ask how

language shapes our moral reasoning about the global coronavirus crisis. The author offers insights into the metaphors, metonyms, allegories and symbols of the global crisis and examines how they have contributed to policy formation and communication. Combining metaphor theory with moral foundations theory, he places metaphors in their historical contexts, and then critically questions why certain tropes might be used in particular situations to persuade and convince an audience. The book takes an integrated approach, involving ideas from cognitive linguistics, history, social psychology and literature to produce a multi-layered and thematically rich interpretation of the language of the pandemic and its social and political consequences. It will be relevant to readers with a background in these areas, as well as anyone with a general interest in the language used to make sense of this global event.

Survival February - March 2022 Mar 23 2022 Survival, the IISS's bimonthly journal, challenges conventional wisdom and brings fresh, often controversial, perspectives on strategic issues of the moment. In this issue: · The Ukraine crisis: Robert Hunter argues that the most important requirement of successful US-led negotiations with Russia is that Moscow demonstrate that it is

prepared to be a responsible international actor · Erin Sikorsky contends that climate change should have a larger role in the day-to-day national-security agendas of the United States and other countries · Stephan Frühling and Andrew O'Neil warn that current US debates about no first use tend to underplay the broader alliance implications of any shift in US nuclear policy · Rahul Roy-Chaudhury and Kate Sullivan de Estrada assess that, given the 2021 US FONOP targeting India, Washington and New Delhi need to better manage their diverse positions on global governance, especially in the maritime domain · Nien-chung Chang-Liao warns that pragmatism in Chinese foreign policy is waning and considers why Chinese diplomats have become so aggressive And nine more thought-provoking pieces, as well as our regular Book Reviews and Noteworthy column. Editor: Dr Dana Allin Managing Editor: Jonathan Stevenson Associate Editor: Carolyn West Assistant Editor: Jessica Watson
