The authors visited Venezuela, Cuba, Andes, Mexico and USA where they collected the material and made extensive notes. Their joint effort to record a memoir of this great expedition is quite interesting and valuable because it contains specific documentation of their scientific observations, but it also presents an intriguing and romantic work with many poetic descriptions of nature and the people who lived in the areas he visited.**

A committee of North American merchants have waited upon his Majesty's principal Secretary of State for Foreign Affairs, to express how anxiously they wished to be informed upon this subject, repeated experience having taught them in particular, as well as the public in general, how little the authority of Congress could avail in any respect, where the interests of any one individual State was even concerned, and particularly so, where the concerns of that particular State might be supposed to militate against such resolutions as Congress might think proper to adopt. **Excerpt from Narrative and Critical History of America, Vol. 7 The debt of England in 1775 was one hundred and thirty-five million pounds sterling. But so admirably had the finances been managed that the rate of interest was but little above three per cent. The army and navy were inadequate to the protection of a dominion which in America embraced the larger part of a continent, and in Asia already extended over many populous nations. In 1774 the number of seamen was reduced to and of soldiers to Nor was it easy to raise troops. England was already the great commercial and manufacturing country of the world. Her people were brave, and ready to endure necessary hardships, but they were in the main too comfortable in their homes to be eager to serve in the ranks for the scanty pay and scantier comforts of private soldiers. **Justice League of America Vol. 5: Deadly Fable Apr 11 2020** The Might Beyond the Mirror, the great threat that Batman assembled the Justice League of America to stop, has finally arrived in the form of the Queen of Fables. However, Batman is gone, and the Queen has granted Killer Frost her fondest wish-a cure for her condition. Caitlin Snow has now switched sides, leaving the team down two members. But then the League is joined by Immateria's champion-Promethea. Can she help them, or will reality crumble at the Queen's whim? Speaking of reality, the Adjudicator, a being who lives beyond the Multiverse, has determined that the Extremists' homeworld of Angor must remain dead. Batman and Black Canary have different ideas about that, and partner with former foes Dreamslayer and Lord Havok to alter reality or die trying! All of this is prelude to the team's final mission, as the JLA must stop the time thief Chronos from killing Ahl, the god of superheroes, preventing him from seeding Earth with the concept of the hero. If the team fails, they all will cease to exist, leaving Earth vulnerable to all manner of evil. Steve Orlando (Midnighter, Supergirl) collaborates with artists including Neil Edwards, Hugo Petrus and Miguel Mendonça in what is one of the most offbeat and compelling lineups the Justice League of America has ever seen. Collects Justice League of America #22-29.

**A History of the Book in America Apr 16 2023 The fifth volume of A History of the Book in America addresses the economic, social, and cultural shifts affecting print culture from World War II to the present. During this period factors such as the expansion of government, the growth of higher education, the climate of the Cold War, globalization, and the development of multimedia and digital technologies influenced the patterns of consolidation and diversification established earlier. The thirty-three contributors to the volume explore the evolution of the publishing industry and the business of bookselling. The histories of government publishing, law and policy, the periodical press, literary criticism, and reading--in settings such as schools, libraries, book clubs, self-help programs, and collectors' societies--receive imaginative scrutiny as well. The Enduring Book demonstrates that the corporate consolidations of the last half-century have left space for the independent publisher, that multiplicity continues to define American print culture, and that even in the digital age, the book endures. **A History of Wine in America, Volume 1 Apr 04 2022 The Vikings called North  
America "Vinland," the land of wine. Giovanni de Verrazzano, the Italian explorer  
who first described the grapes of the New World, was sure that "they would yield  
excellent wines." And when the English settlers found grapes growing so thickly that  
they covered the ground down to the very seashore, they concluded that "in all the  
world the like abundance is not to be found." Thus, from the very beginning the  
promise of America was, in part, the alluring promise of wine. How that promise  
was repeatedly baffled, how its realization was gradually begun, and how at last it  
has been triumphantly fulfilled is the story told in this book. It is a story that  
touches on nearly every section of the United States and includes the whole range of  
American society from the founders to the latest immigrants. Germans in  
Pennsylvania, Swiss in Georgia, Minorcans in Florida, Italians in Arkansas, French  
in Kansas, Chinese in California—all contributed to the domestication of Bacchus in  
the New World. So too did innumerable individuals, institutions, and organizations.  
Prominent politicians, obscure farmers, eager amateurs, sober scientists: these and  
all the other kinds and conditions of American men and women figure in the story.  
The history of wine in America is, in many ways, the history of American origins  
and of American enterprise in microcosm. While much of that history has been lost  
to sight, especially after Prohibition, the recovery of the record has been the goal of  
many investigators over the years, and the results are here brought together for the  
first time. In print in its entirety for the first time, A History of Wine in America is  
the most comprehensive account of winemaking in the United States, from the Norse  
discovery of native grapes in 1001 A.D., through Prohibition, and up to the present  
expansion of winemaking in every state.**

***Barnes' Popular History of the United States of America, Vol. 2 (Classic Reprint) May 13 2020* Excerpt from Barnes' Popular History of the United States of America, Vol. 2 The situation was peculiar, unlike any other that the history of the world had shown. Most, if not all, the nations of the earth had grown up by degrees from small beginnings. Here was one that was to spring into existence, a first-class power almost from its birth. The material was ready at hand and far removed from the influence or control of the older nations. The event showed that, as God had prepared the work, so had He laborers competent to perform it. They builded, and builded even stronger than they knew. On the 23d of December, less than a month after the evacuation of New York, Washington resigned his commission as commander-in-chief of the army and returned to his home at Mount Vernon. He had given many proofs of his patriotism, but one of the greatest was his refusal to receive any compensation for his eight years of service at the head of the army. It detracts nothing from the quality of the sentiment involved that, being rich through his marriage with Mrs. Custis, he could afford this gift to his country. He simply asked the reimbursement of his expenses, an exact account of which he had kept, drawn up**

by his own hand, and now presented to the government. The situation of affairs, although peace had now come, was by no means attering to the future of the States. The Articles of Confederation, under which they had been acting during the war, were mere shadows unless sustained by a common danger or the entire willingness of all concerned. In case of any conflict of interest, they were ineffective for adjustment or control. They gave Congress authority to declare everything, but to do nothing. They did not act at all upon the people of the country, except through the several States, and it depended entirely upon the Legislatures whether the measures adopted by Congress should be carried out. Many of them were silently disregarded; many were slowly and reluctantly obeyed; and some were openly and boldly defied.
