The creator of the hit podcast series Tides of History and Fall of Rome explores the four explosive decades between 1490 and 1530, bringing to life the dramatic and deeply human story of how the West was reborn. In the bestselling tradition of *The Swerve* and *A Distant Mirror*, *The Verge* tells the story of a period that marked a decisive turning point for both European and world history. Here, author Patrick Wyman examines two complementary and contradictory sides of the same historical coin: the world-altering implications of the developments of printed mass media, extreme taxation, exploitative globalization, humanistic learning, gunpowder warfare, and mass religious conflict in the long term, and their intensely disruptive consequences in the short-term. As told through the lives of ten real people--from famous figures like Christopher Columbus and wealthy banker Jakob Fugger to a ruthless small-time merchant and a one-armed mercenary captain--*The Verge* illustrates how their lives, and the times in which they lived, set the stage for an unprecedented globalized future. Over an intense forty-year period, the seeds for the so-called "Great Divergence" between Western Europe and the rest of the globe would be planted. From Columbus's voyage across the Atlantic to Martin Luther's sparking the Protestant Reformation, the foundations of our own, recognizably modern world came into being. For the past 500 years, historians, economists, and the policy-oriented have argued which of these individual developments best explains the West's rise from backwater periphery to global dominance. As *The Verge* presents it, however, the answer is far more nuanced. Teacher manual for the Streams of Civilization Volume 1 Textbook. Grade 9. "The Reformation" (1500—1650) provides an overview of the European world from the late-15th to the mid-17th century. From Columbus's discovery of the New World to the grisly beheading of England's Charles I, the Reformation was a period of restless exploration, and often bloody, religious and political protest. Martin Luther, William Shakespeare, Queen Elizabeth, and the Italian astronomer Galileo are among the historic figures vividly described in this richly illustrated text. Challenging map exercises and provocative review questions encourage meaningful reflection and historical analysis. Tests and answer keys included. A ten-volume set documents important people, places, and events in world history that occurred during the Reformation period from the sixteenth-century through the seventeenth-century. In an effort to bridge the gap between the often different worlds of professors and students, this exploration of Renaissance and Reformation Europe offers an accessible, engaging approach that pays sufficient attention to the roles and contributions of women. Its conversational tone and concise presentation are examples of an approach that is more representative than comprehensive--introducing historical figures and concepts as they flow through the narrative, without frequent interruption to include and define technical and foreign terms. Rather than a compendium or grand "summa," the text serves as a brief introduction to some of the major personalities, issues, events and ideas of the Renaissance and Reformation age. This comprehensive collection explores the middle centuries of the last millenium. How did a group of scared peasants from a backwater of the Roman empire – followers of an executed criminal – form the largest religion on the planet? The story of Christianity, its transformation from an illegal sect to the religion of emperors, kings and presidents, and its spread across the globe, is an endlessly fascinating one. The History of Christianity gives readers an overview of these extraordinary 2,000 years. It is a history not only of how Christianity has changed the world, but also of how the world has changed Christianity. The first half of this volume is arranged mostly chronologically to create a single narrative from the age of exploration to the late twentieth century. The second half describes the history of the church in the past hundred years or so, with each chapter focusing on a different part of the world. Boxed features throughout the volume highlight especially important figures or themes from each of these periods. The History of Christianity:The Age of Exploration to the Modern Day will be welcomed by all those wanting a lively and engaging presentation of the people, events, places, and plain curiosities that have formed the Christian story. This collection of essays seeks to redefine the discussion of Calvinism's impact on the visual arts through an exploration of Reformed artistic influences in England, France, Switzerland, Germany, Hungary, the Netherlands, and America. 200+ illustrations, many in color. This book carves the beginnings of a new path in the arguably weary discipline of economics. It combines a variety of perspectives – from the history of ideas to epistemology – in order to try to understand what has gone so wrong with economics and articulate a coherent way forward. This is undertaken through a dual path of deconstruction and reconstruction. Mainstream economics is broken down into many of its key component parts and the history of each of these parts is scrutinized closely. When the flaws are thoroughly understood the author then begins the task of reconstruction. What emerges is not a 'Grand Unified Theory of Everything', but rather a provisional map outlining a new terrain for economists to explore. The Reformation in Economics is written in a lively and engaging style that aims less at the formalization of dogma and more at the exploration of ideas. This truly groundbreaking work invites readers to rethink their current understanding of economics as a discipline and is particularly relevant for those interested in economic pluralism and alternative economics.
