Europa reformata (English Edition) Oct 31 2022 This beautifully illustrated, compact volume traces the profile of 48 European cities in early Reformation times. It transports readers across Europe from Spain to Estonia, from Scotland to Romania, passing through many fascinating cities in the Reformation heartland of this continent. With finely drawn historical paintings and abundant pictorial material, the articles by different scholars also profile the most prominent Reformers who lived and worked in each city (including six dynamic women). Supplemented by an illustrated map of Europe, local websites and reading lists, Europa Reformata will serve as a guide for pilgrims and armchair travelers alike. By highlighting so many cities and pioneers of the Reformation, it makes a timely and unique contribution to the 500th anniversary of this groundbreaking movement. Der prächtige und doch handliche Band zeichnet die reformatorischen Profile von etwa vierzig europäischen Städten nach. Die Leser werden von Spanien über Zentraleuropa bis Estland und Finnland geführt, von Schottland und England bis nach Rumänien. Profilierte Texte und reiches Bildmaterial veranschaulichen das Wirken der berühmtesten Reformatoren – sowie Reformatorinnen – und stellen die Städte mit ihren Bauten und Zeugnissen der Reformationszeit vor Augen. Ergänzt durch eine bebilderte Europakarte und die Angabe von kirchlichen Adressen und Tourismusbüros, eignet sich der Band auch als Reiseführer auf den Spuren der Reformation in Europa. An diesem perfekten Geschenk zum 500. Reformationsjubiläum sollte niemand achtlos vorübergehen.

The Numinous Legacy Feb 03 2023 Where is God in the universe if he is anywhere? Why did God make germs? Why should we be so special? Could the universe have been different? This is a book that brings home, in a somewhat uncertain fashion, the discrepancy between the universe envisaged by ancient sages and prophets and that of modern scientific cosmology, and the possibility of divine intervention looks less and less likely. Butchins demonstrates with clarity how the scientific method may be used, despite certain drawbacks, in an attempt to verify objective truth. It describes

effect of the Copernican Revolution in the seventeenth century has steadily undermined the basic structure of the three great monotheistic religions today, Judaism, Christianity, and Islam, especially with respect to their eschatological concepts. The Eastern religions, being less anthropomorphic, are less affected. The theistic argument from design is shown to be powerful enough to have caused disagreement among present-day scientists, in the strictures of Professor Dawkins. In general, the book attempts to give some sense of the structure of the universe in terms of our own concepts; it behoves the reader to consider that

This book provides a practical introduction to agent-based modelling of socio-technical systems, based on a methodology that has been developed at TU Delft and which has been deployed in a large number of case studies. The book consists of two parts: the first presents the background, theory and methodology as well as guidelines and procedures for building models.
