In this indispensable work, prominent authorities review the latest research on all aspects of ELL instruction (K–12) and identify what works for today's students and schools. Provided are best-practice guidelines for targeting reading, writing, oral language, vocabulary, content-domain literacies, and other core skill areas; assessing culturally and linguistically diverse students; and building strong school–home–community partnerships. Chapters include clear-cut recommendations for teaching adolescent ELLs and those with learning disabilities. The comprehensive scope, explicit linkages from research to practice, and guidance for becoming a culturally informed, reflective practitioner make the book an ideal course text. "The single most powerful variable in student achievement is the quality of teaching. But what does quality mean? What does it look like in real classrooms? It looks like the teaching in this book." -Steven Zemelman, Harvey "Smokey" Daniels, and Arthur Hyde Best Practice is back, and with it Steve Zemelman, Smokey Daniels, and Arthur Hyde invite you to greet today's most important educational challenges with proven, state-of-the-art teaching. Linguistic diversity, technology, Common Core, high-stakes testing—no matter the hurdle, Best Practice teaching supports powerful learning across our profession. Best Practice, Fourth Edition, is the ultimate guide to teaching excellence. Its framework of seven Best Practice Structures and cutting-edge implementation strategies are proven across the grades and subject areas. BP4 creates common ground for teachers, leaders, and principals by recommending practices drawn from the latest scientific research, professional consensus, and the innovative classrooms of exemplary teachers. BP4 puts top-quality teaching at the fingertips of individual practitioners by sharing real-life instructional scenes that define classroom excellence, increase learning, and improve students' life opportunities. It's also more valuable than ever to PLCs and school reform initiatives thanks to: plans and strategies for exceeding state and Common Core Standards cohesive principles and common language that strengthen professional collaboration classroom vignettes that show teachers and kids at work chapters on reading, writing, math, science, and social studies that support unified instructional goals special attention to technology in the classroom, special education, ELLs, struggling readers, and the arts. This new educational era demands highly-effective, high-quality instruction that makes a difference for students. Fortunately with Zemelman, Daniels, and Hyde's help every educator can be a world-class, life-changing teacher—a Best Practice teacher. Building on Best Practices is a follow-up to Best Practices for Legal Education, a project of the Clinical Legal Education Association (CLEA), authored primarily by Roy Stuckey. With contributions from more than 50 legal educators, this new volume is not a second edition, but is intended to be used in conjunction with the original volume, as the core content of Best Practices remains just as useful as when it was originally published. In the wake of new ABA Accreditation Standards, the MacCrate Report, and other changes, legal education is called upon today to respond to a broader view of what lawyers must be trained to do. Building on Best Practices identifies ten such areas and provides guidance on what and how to teach them. The demand to teach a broader range of knowledge, skills, and values presents difficult trade-offs, however, that are also considered. "To demonstrate that law schools can still add value to careers and society, legal educators must grapple with structural changes that affect every aspect of teaching, learning and researching. Building on Best Practices provides diverse expertise and useful guidance on approaching these challenges and on improving and expanding the enterprise of legal education." - Jeffrey R. Baker, Journal of Legal Education This IBM® Redbooks® publication will help you to better understand the effective use of the WebSphere® DataPower® family of appliances. It provides guidance on the best methods identified to date for building the various components that implement solutions, such as handling MQ-based message flows or creating authentication and authorization policies. The information and recommendations in this publication are the result of real world experiences using the appliances. Such experience shows that taking the time to plan a solution implementation before beginning the work yields the greatest savings in time and energy and the highest quality outcome. This publication begins with a checklist of items to consider when planning a DataPower solution. This publication is intended to provide answers or guidance to implementation problems often encountered by users of the appliance. This book is not intended to present complete solutions or templates because experience shows that every customer uses the appliance in their own unique environment with unique requirements. Thus, this publication provides a compendium of information about particular aspects of a solution. Use the Table of Contents or Index to find your current issue, and return to this publication when the next issue or question arises. Refer to the related IBM Redbooks publication entitled DataPower SOA Appliance Administration, Deployment, and Best Practices, SG24-7901 for more information. In visually cataloging the endearing and enigmatic ways in which the built environment takes shape, 'Best Practices' proposes a new way of thinking about neighbourhoods, housing developments, streetscapes, and storefronts, not so much as places defined by building codes, dimensions, or geographic features, but as assemblages of ad hoc interventions and incidental ephemera. Drawing on the history of architecture, media theory, cultural anthropology, and urban studies, 'Best Practices' pairs photographic documentation with extensive captions and citations to define a territory within the margins between the sanctioned and unsanctioned, the regulated and unregulated, the tasteful and tacky, the novel and the nonsense. While not necessarily in opposition of those mechanisms, Best Practices asserts that interest, knowledge, and meaning are more often generated on the lines that divide such categories. This book advocates for a more thorough consideration of the unauthorised remodels, slap-dash handiwork, haphazard paint jobs, half-hearted do-it-yourself projects, cracked facades, contradictions, compromises, and coincidences. Best Practices in Online Program Development is a practical, hands-on guide that provides the concrete strategies that academic and administrative departments within institutions of higher learning need to develop in order to create and maintain coherent and effective online educational programs. Unlike individual courses, an online education program requires a comprehensive, inter-departmental effort to be integrated into the ongoing educational project of a college or university. This book focuses on the: Integration of online education into the institutional mission Complex faculty-related issues including recruiting, training, and teaching Multifaceted support required for student retention and success Need for multilayered assessment at the course, program, technical, and institutional levels Challenges posed to governance and by the need to garner resources across the institution Model to insure ongoing, comprehensive development of online educational programs Best Practices in Online Program Development covers the above topics and more, giving all the stakeholders in online educational programs the building blocks to foster successful programs while encouraging them to determine what role online education should play in their academic offerings. In this extensively revised and expanded second edition, we find updated descriptions of progressive teaching in six subject areas: reading, writing, mathematics, science, social studies, and the arts. Praise for Social Media for Educators "At last, a book that provides a straightforward discussion of the pedagogical reasons to use social media, and how to effectively use the tools to enhance learning experiences. A practical must-have!"—Rita-Marie Conrad, instructional strategist and technologist, Duke University School of Nursing; coauthor, Engaging the Online Learner and The Online Teaching Survival Guide "This insightful and in-depth exploration effectively makes a case for embracing the best characteristics of social media to foster deeper learning experiences, promote collaboration, and provide timely feedback. This book is a can't-miss for educators."—Amy M. Collier, associate director for technology and teaching, Center for Teaching and Learning, Stanford University "Thought about using social media in your online courses but don't know where to begin? Joosten's comprehensive hands-on book describes step-by-step how social media can add richness to your course content and have a positive impact on student outcomes."—Rosemary Lehman and Simone Conceição, eInterface; coauthors, Creating a Sense of Presence in Online Teaching and Managing Online Instructor Workload "Many faculty are hesitant to incorporate social media into their teaching for fear that it will be a distraction or too time consuming. Tanya Joosten has done a remarkable job outlining the benefits—and considerations—of doing so. Faculty who read this book will be able to make informed, educated decisions about the best

approach to take.” —John Dolan, director, digital media and pedagogy, College of the Liberal Arts, Penn State University Social Media for Educators This is a down-to-earth resource filled with strategies for designing learning activities that work toward specific outcomes. It illustrates the ways in which social media will improve learning and contains case studies that clearly demonstrate social media's ability to: Increase communication and interactivity in a course Facilitate engaging learning activities Enhance students' satisfaction, learning, and performance What if almost everything you know about creating a culture of innovation is wrong? What if the way you are measuring innovation is choking it? What if your market research is asking all of the wrong questions? It's time to innovate the way you innovate. Stephen Shapiro is one of America's foremost innovation advisors, whose methods have helped organizations like Staples, GE, Telefónica, NASA, the U.S. Air Force, and USAA. He teaches his clients that innovation isn't just about generating occasional new ideas; it's about staying consistently one step ahead of the competition. Hire people you don't like. Bring in the right mix of people to unleash your team's full potential. Asking for ideas is a bad idea. Define challenges more clearly. If you ask better questions, you will get better answers. Don't think outside the box; find a better box. Instead of giving your employees a blank slate, provide them with well-defined parameters that will increase their creative output. Failure is always an option. Looking at innovation as a series of experiments allows you to redefine failure and learn from your results. Shapiro shows that nonstop innovation is attainable and vital to building a high-performing team, improving the bottom line, and staying ahead of the pack. This volume offers the first comprehensive guide to how high-impact practices (HIPs) are being implemented in online environments and how they can be adjusted to meet the needs of online learners. This multi-disciplinary approach will assist faculty and administrators to effectively implement HIPs in distance education courses and online programs. With a chapter devoted to each of the eleven HIPs, this collection offers guidance that takes into account the differences between e-learners and traditional on-campus students. A primary goal of High-Impact Practices Online is to share the ways in which HIPs may need to be amended to meet the needs of online learners. Through specific examples and practical suggestions in each chapter, readers are introduced to concrete strategies for transitioning HIPs to the online environment that can be utilized across a range of disciplines and institution types. Each chapter of High-Impact Practices Online also references the most recent and relevant literature on each HIP so that readers are brought up to date on what makes online HIPs successful. The book provides guidance on how best to implement HIPs to increase retention and completion for online learners. This book has been replaced by Best Practices in Adolescent Literacy Instruction, Third Edition, ISBN 978-1-4625-4826-2. Metadata best practices and guidelines function as an essential mechanism for metadata planning, application and management, and interoperability. There has been a rapidly growing body of digital repositories and collections; accordingly, a wide range of digital projects and initiatives have adopted various metadata standards. Because of differences in the formats and knowledge domains of the resources, it is inevitable that these digital projects and initiatives may have different needs regarding metadata. Therefore, when a metadata standard is adopted in various institutions and organizations, it may have to be modified to reflect the community needs and characteristics of given resources. The flexibility and complex structure of natural language allow for the representation of a concept in various ways. Thus, common understanding and definitions of terms in a given metadata standard is essential for quality metadata generation, management, interoperability and resource sharing. This opens up a pressing need for a systematic examination of documentation practices, an area that up to now has been relatively unexplored. This book begins to fill the research gap through an empirical assessment of metadata guidelines and best practices. This is a book published as a special issue of the Journal of Library Metadata. This IBM® Redpaper™ publication provides performance tuning tips and best practices for IBM Business Process Manager (BPM) V7.5 (all editions) and IBM Business Monitor V7.5. These products represent an integrated development and runtime environment based on a key set of service-oriented architecture (SOA) and business process management technologies. Such technologies include Service Component Architecture (SCA), Service Data Object (SDO), Business Process Execution Language for Web services (BPEL), and Business Processing Modeling Notation (BPMN). Both BPM and Business Monitor build on the core capabilities of the IBM WebSphere® Application Server infrastructure. As a result, BPM solutions benefit from tuning, configuration, and best practices information for WebSphere Application Server and the corresponding platform Java Virtual Machines (JVMs). This paper targets a wide variety of groups, both within IBM (development, services, technical sales, and others) and customers. For customers who are either considering or are in the early stages of implementing a solution incorporating BPM and Business Monitor, this document proves a useful reference. A practical and science-based approach for addressing toxicological concerns related to leachables and extractables associated with inhalation drug products Packaging and device components of Orally Inhaled and Nasal Drug Products (OINDP)—such as metered dose inhalers, dry powder inhalers, and nasal sprays—pose potential safety risks from leachables and extractables, chemicals that can be released or migrate from these components into the drug product. Addressing the concepts, background, historical use, and development of safety thresholds and their utility for qualifying leachables and extractables in OINDP, the Leachables and Extractables Handbook takes a practical approach to familiarize readers with the recent recommendations for safety and risk assessment established through a joint effort of scientists from the FDA, academia, and industry. Coverage includes best practices for the chemical evaluation and management of leachables and extractables throughout the pharmaceutical product life cycle, as well as: Guidance for pharmaceutical professionals to qualify and risk-assess container closure system leachables and extractables in drug products Principles for defining toxicological safety thresholds that are applicable to OINDP and potentially applicable to other drug products Regulatory perspectives, along with an appendix of key terms and definitions, case studies, and sample protocols Analytical chemists, packaging and device engineers, formulation development scientists, component suppliers, regulatory affairs specialists, and toxicologists will all benefit from the wealth of information offered in this important text. Reinvent best practices that have become bad habits Without meaning to, and often with the best of intentions, most organizations continually waste precious time and money on processes and activities that don't create value and no longer make sense in today's business environment. Until now, the relatively slow speed of marketplace evolution has allowed wasteful habits to continue without consequence. This reality is ending. Detonate explains how organizations built up bad habits, identifies which ones masquerade as "best practices," and suggests alternatives that can contribute to winning in the marketplace. With a focus on optimism and empowerment, it focuses on an approach and mindset which are critical to successfully compete in an era characterized by profound technological advances and uncertainty. • Core themes challenge how you think about and approach problems • Case studies illustrate the challenges you face and how to overcome them • Recommendations are pragmatic and steer clear of suggesting a brand-new, complicated wiring diagram • Actionable advice provides the first steps down an evolutionary path If you want to compete differently in today's marketplace and to challenge the things your company does which you have a nagging feeling are actually just a waste of time – and maybe value-destroying – Detonate gives you what you need to ignite change. In Best Practice Kimberly Chong provides an ethnography of a global management consultancy that has been hired by Chinese companies, including Chinese state-owned enterprises. She shows how consulting emerges as a crucial site for considering how corporate organization, employee performance, business ethics, and labor have been transformed under financialization. To date financialization has been examined using top-down approaches that portray the rise of finance as a new logic of economic accumulation. Best Practice, by contrast, focuses on the everyday practices and narratives through which companies become financialized. Effective management consultants, Chong finds, incorporate local workplace norms and assert their expertise in the particular terms of China's national project of modernization, while at the same time framing their work in terms of global "best practices." Providing insight into how global management consultancies refashion Chinese state-owned enterprises in preparation for stock market flotation, Chong demonstrates both the dynamic, fragmented character of financialization and the ways in which Chinese state capitalism enables this process. This is the Fourth Edition, written by the Deployable Training Division (DTD) of the Joint Staff J7 and published under the auspices of the Joint Staff J7. The warm and hilarious bestselling memoir by a man diagnosed with Asperger syndrome who sets out to save his marriage. At some point in nearly every marriage, a wife finds herself asking, What the @#!% is wrong with my

husband?! In David Finch's case, this turns out to be an apt question. Five years after he married Kristen, the love of his life, they learn that he has Asperger syndrome. The diagnosis explains David's ever-growing list of quirks and compulsions, but it doesn't make him any easier to live with. Determined to change, David sets out to understand Asperger syndrome and learn to be a better husband with an endearing yet hilarious zeal. His methods for improving his marriage involve excessive note-taking, performance reviews, and most of all, the Journal of Best Practices: a collection of hundreds of maxims and hard-won epiphanies, including "Don't change the radio station when she's singing along" and "Apologies do not count when you shout them." Over the course of two years, David transforms himself from the world's most trying husband to the husband who tries the hardest. He becomes the husband he'd always meant to be. Filled with humor and surprising wisdom, The Journal of Best Practices is a candid story of ruthless self-improvement, a unique window into living with an autism spectrum condition, and proof that a true heart can conquer all. The objective of APM Best Practices: Realizing Application Performance Management is to establish reliable application performance management (APM) practices—to demonstrate value, to do it quickly, and to adapt to the client circumstances. It's important to balance long-term goals with short-term deliverables, but without compromising usefulness or correctness. The successful strategy is to establish a few reasonable goals, achieve them quickly, and then iterate over the same topics two more times, with each successive iteration expanding the skills and capabilities of the APM team. This strategy is referred to as "Good, Better, Best". The application performance monitoring marketplace is very focused on ease of installation, rapid time to usefulness, and overall ease of use. But these worthy platitudes do not really address the application performance management processes that ensure that you will deploy effectively, synergize on quality assurance test plans, triage accurately, and encourage collaboration across the application life cycle that ultimately lowers overall application cost and ensures a quality user experience. These are also fine platitudes but these are the ones that are of interest to your application sponsors. These are the ones for which you need to show value. This CA Press book employs this iterative approach, adapted pragmatically for the realities of your organizational and operational constraints, to realize a future state that your sponsors will find useful, predictable and manageable—and something that they will want to fund. In the meantime, you will learn the useful techniques needed to set up and maintain a useful performance management system utilizing best practices regardless of the software provider(s). This book answers a simple question: How would one redesign the American education system if the aim was to take advantage of everything that has been learned by countries with the world's best education systems? With a growing number of countries outperforming the United States on the most respected comparisons of student achievement—and spending less on education per student—this question is critical. Surpassing Shanghai looks in depth at the education systems that are leading the world in student performance to find out what strategies are working and how they might apply to the United States. Developed from the work of the National Center on Education and the Economy, which has been researching the education systems of countries with the highest student performance for more than twenty years, this book provides a series of answers to the question of how the United States can compete with the world's best. Comprehensive and on the cutting edge, Best Practices will serve as an invaluable information resource. What makes the world's top companies so adept at providing stellar customer service? How do they meet the needs of every customer and still turn healthy profits? And, most important, how can you adapt their practices to fit your business? Thanks to over six years of ongoing research and an investment of \$30 million, Arthur Andersen has created its Global Best Practices Database to uncover breakthrough thinking at world-class companies. Now, in Best Practices, Arthur Andersen for the first time shares its understanding of how more than forty best-practices companies focus on their customers, create growth, reduce cost, and increase profits. Managers of any business in any industry can adapt and apply what those companies do best. Unlike most books based merely on an author's own theories or limited anecdotal experience, Best Practices is backed up by 30,000 pages of active, documented data on hundreds of companies worldwide. This book concentrates primarily on customers and how to involve them in everything from the design of products and services to marketing, selling, and product delivery. Perhaps the greatest value of the book lies in its linking of best practices to business processes, thereby encouraging managers to expand their thinking and engage in creative problem-solving with the help of insights from companies inside or outside their own industry. For example, the manager of a clothing store chain can study how Federal Express adapted the concept of just-in-time manufacturing to its rapid delivery of parts between supplier and customer. The owner of a small coffee shop chain might learn from American Express and Peapod how to target customers by offering particular products and predicting exactly when they will make their next purchases. These and other examples will help business people diagnose the processes in place at their own companies and determine how best to improve them. Teaching software professionals how to combine assessments (qualitative information) and benchmarking (quantitative information) this text aims to encourage better software analysis. Bringing together prominent scholars, this book shows how 21st-century research and theory can inform everyday instructional practices in early childhood classrooms (PreK-3). Coverage includes foundational topics such as alphabet learning, phonological awareness, oral language development, and learning to write, as well as cutting-edge topics such as digital literacy, informational texts, and response to intervention. Every chapter features guiding questions; an overview of ideas and findings on the topic at hand; specific suggestions for improving instruction, assessment, and/or the classroom environment; and an engrossing example of the practices in action. According to recent data on women leaders across all major sectors in the United States, women are outperforming men but earning less and still hitting the glass ceiling. This book uncovers the best practices to remedy these inequities, optimize performance, and benefit both genders. • Elevates the conversation about why women's leadership is still lacking in the United States and debunks typical myths about gender disparity in the U.S. workforce • Offers strategies and best practices for companies and organizations to ensure excellence • Presents findings based on current research and analysis on thousands of positions across hundreds of companies in 14 sectors • Provides insights from interviews with representatives of several of the most successful companies in the United States about their practices that help ensure excellence
