Representing the Other
highlights a central issue in

contemporary feminist theory - whether, and how, we should represent groups to which we do not belong. Revised edition of Feminist theory reader, 2013. Exploring the breadth of contemporary feminist research practices, this engaging text immerses the reader in cutting-edge theories, methods, and practical strategies. Chapters review theoretical work from around the globe and describe approaches to conducting quantitative, qualitative, and community-based research with participants; doing content or media analysis; and evaluating programs or interventions. Ethical issues are addressed and innovative uses of digital media highlighted. The focus is studying gender inequities as they are experienced by individuals and groups from diverse cultural, racial, and socioeconomic backgrounds, and with diverse gender identities. Delving into the process of writing and publishing feminist research, the text covers timely topics

such as public scholarship, activism, and arts-based practices. The companion website features interviews with prominent feminist researchers. Pedagogical Features *Case examples of feminist research. *Running glossary of key terms. *Boxes highlighting hot topics and key points for practice. *End-of-chapter discussion questions and activities. *End-of-chapter annotated suggested reading (books, articles, and online resources). *Sample letters to research participants. *Appendix of feminist scholars organized by discipline. Exploring the breadth of contemporary feminist research practices, this engaging text immerses the reader in cutting-edge theories, methods, and practical strategies. Feminist Measures in Survey Research book offers a new

approach for doing quantitative feminist research, demonstrating how a feminist perspective can inform virtually every aspect of the research process, from survey design, to statistical modeling, to the theoretical frameworks used to interpret results. Catherine E. Harnois makes feminist theory, particularly multiracial feminist theory, accessible and relevant to survey researchers. She assists students and researchers in incorporating these theories into survey design and analysis and shows how they this can offer substantive insights into the social world that have been underutilized to date by survey researchers. First published in 1993. Routledge is an imprint of Taylor & Francis, an informa company. This book presents MacKinnon's powerful analysis of politics, sexuality, and the law from the perspective of women. Using the debate over Marxism and feminism as a point of departure, MacKinnon develops a theory of gender centered on sexual subordination and applies it to

the state. This book highlights the relationship between feminist theory and political practice and examines the diversity of feminist visions and voices by race, class, gender, sexual orientation, and global location. It interweaves the history of feminist thought with the history of the U.S. women's movement to ground feminist perspectives in their socio-historical contexts. The relation between feminism and men is often presumed to be antagonistic, so that men are expected to resist feminism, and feminists are assumed to hate men. That pattern of opposition is disrupted, however, by the continually increasing numbers of men who are participating in feminist theory and practice, trying to integrate feminist perspectives into their scholarship, teaching, work, play, friendships, and romantic involvements. Responses to this male feminism have varied. Sometimes male feminists find some female feminists critical of men who oppose or decline to join feminist projects, but

also rebuff the few men who do undertake feminist projects. On the other hand, some women feminists have unequivocally welcomed men as allies in political, business, religious, and academic contexts. The essays in *Men Doing Feminism* reveal that there is justification for both views, the skeptical and the enthusiastic, because feminist men are as diverse as feminist women. Many of the eighteen contributors to this book--women, men, blacks, whites, gays, straights, transsexuals--use personal narrative to show ways that men's lives can shape their approaches to doing feminism and to convey the opportunities and challenges involved in integrating feminism into a man's life. Some authors argue that men's experiences prepare them to make contributions that are of crucial importance to feminist theory. Others argue that men must radically reform, or even abandon manhood and masculinity if they are to be feminists. In *Men Doing Feminism*, feminist theory is used to illuminate

men's lives, and men's lives serve as a basis for feminist theory. Contributors: Michael Awkward, Susan Bordo, Harry Brod, Tom Digby, Judith K. Gardiner, C. Jacob Hale, Sandra Harding, Patrick Hopkins, Joy James, David Kahane, Michael Kimmel, Gary Lemons, Larry May, Brian Pronger, Henry Rubin, Richard Schmitt, James P. Sterba, Laurence Mordekhai Thomas, and Thomas E. Wartenberg. The second edition of the *Handbook of Feminist Research: Theory and Praxis*, presents both a theoretical and practical approach to conducting social science research on, for, and about women. The Handbook enables readers to develop an understanding of feminist research by introducing a range of feminist epistemologies, methodologies, and methods that have had a significant impact on feminist research practice and women's studies scholarship. The Handbook continues to provide a set of clearly defined research concepts that are

devoid of as much technical language as possible. It continues to engage readers with cutting edge debates in the field as well as the practical applications and issues for those whose research affects social policy and social change. It also expands on the wealth of interdisciplinary understanding of feminist research praxis that is grounded in a tight link between epistemology, methodology and method. The second edition of this Handbook will provide researchers with the tools for excavating subjugated knowledge on women's lives and the lives of other marginalized groups with the goals of empowerment and social change. Reading *Feminist Theory: From Modernity to Postmodernity* interweaves classical and contemporary writings from the social sciences and the humanities to represent feminist thought from the late eighteenth century to the present. Editors Susan Archer Mann and Ashly Suzanne

Patterson pay close attention to the multiplicity and diversity of feminist voices, visions, and vantage points by race, class, gender, sexuality, and global location. Along with more conventional forms of theorizing, this anthology points to multiple sites of theory production--both inside and outside of the academy-- and includes personal narratives, poems, short stories, zines, and even music lyrics. Offering a truly global perspective, the book devotes three chapters and more than thirty readings to the topics of colonialism, imperialism and globalization. It also provides extensive coverage of third-wave feminism, poststructuralism, queer theory, postcolonial theory, and transnational feminisms. This controversial book is the first systematic feminist reading of the work of Jean Baudrillard, one of the most pivotal figures in contemporary cultural theory, and is essential reading for students of feminist theory, sociology and cultural theory. Drawing on the full range of

Baudrillard's writings the author engages in a debate with: * the work of Luce Irigaray, Judith Butler and Rosi Braidotti on identity, power and desire * the feminist concern with 'difference' as an emancipatory construct * writings on transgenderism and the performance of gender * feminist concerns about the objectification of women. Through this critical engagement Grace reveals some of the limitations of some contemporary feminist theorising around gender and identity, patriarchy and power, and in so doing offers a way forward for contemporary feminist thought. The purpose of this Handbook is to provide students with an overview of key developments in queer and trans feminist theories and their significance to the field of contemporary performance studies. It presents new insights highlighting the ways in which rigid or punishing notions of gender, sexuality and race continue to flourish in systems of knowledge, faith and power which are relevant

to a new generation of queer and trans feminist performers today. The guiding question for the Handbook is: How do queer and trans feminist theories enhance our understanding of developments in feminist performance today, and will this discussion give rise to new ways of theorizing contemporary performance? As such, the volume will survey a new generation of performers and theorists, as well as senior scholars, who engage and redefine the limits of performance. The chapters will demonstrate how intersectional, queer and trans feminist theoretical tools support new analyses of performance with a global focus. The primary audience will be students of theatre/performance studies as well as queer /gender studies. The volume's contents suggest close links between the formation of queer feminist identities alongside recent key political developments with transnational resonances. Furthermore, the emergence of new queer and trans feminist

epistemologies prompts a reorientation regarding performance and identities in a 21st-century context. This book critically discusses feminist theories founded on a female understanding of sex and gender. It examines how gender is sociologically constructed within sexual abuse relations and develops a more open theoretical approach based upon the assumption that gender is created through a lifelong process of interaction. This first major study of feminist theory, revised and updated here in its fourth edition, now takes the reader into the twenty-first century. It addresses the basic question, "What is feminism?" by outlining the various strands of feminist theory: liberal, cultural, Marxist-socialist, Freudian, and radical. This fourth edition brings the discussion up-to-date, integrating the developments in feminist theory that have emerged in the last two decades, such as ecofeminism, multiculturalism,

postmodernism, and global feminism including new material since the publication of the third edition (2000). This new Reader gives students an ideal overview of the historical developments and current controversies within this dynamic area of feminist theory. Wide-ranging articles stress the interdisciplinary nature of contemporary feminist thought and include 'Sexy Bodies' and 'Performing Bodies'. Key Features*Comprehensive coverage of differing feminist approaches to the body*General critical introduction puts the issues in context*Wide range of contributors, including Donna Haraway and Elizabeth Grosz When *Feminist Theory: From Margin to Center* was first published in 1984, it was welcomed and praised by feminist thinkers who wanted a new vision. Even so, individual readers frequently found the theory "unsettling" or "provocative." Today, the blueprint for feminist movement presented in the

book remains as provocative and relevant as ever. Written in hooks's characteristic direct style, *Feminist Theory* embodies the hope that feminists can find a common language to spread the word and create a mass, global feminist movement. ". . . innovative and important thinking about the various relations between feminist theory, queer theory, and lesbian theory, as well as the possibility that liberation can be mutual rather than mutually exclusive." —Lambda Book Report When feminism meets queer theory, no introductions seem necessary. The two share common political interests—a concern for women's and gay and lesbian rights—and many of the same academic and intellectual roots. And yet, they can also seem like strangers, needing mediation, translation, clarification. This volume focuses on the encounters of feminist and queer theories, on the ways in which basic terms such as "male" and "female," "man" and "woman," "black," "white," "sex," "gender," and

"sexuality" change meaning as they move from one body of theory to another. Along with essays by Judith Butler, Evelyn Hammonds, Biddu Martin, Kim Michasiw, Carole-Anne Tyler, and Elizabeth Weed, there are interviews: Judith Butler engages Rosi Braidotti and Gayle Rubin in separate revealing discussions. And there are critical exchanges: Rosi Braidotti and Trevor Hope exchange comments on his reading of her work; and Teresa de Lauretis responds to Elizabeth Grosz's review of her recent book. The third edition of the *Feminist Theory Reader* anthologizes the important classical and contemporary works of feminist theory within a multiracial transnational framework. This edition includes 16 new essays; the editors have organized the readings into four sections, which challenge the prevailing representation of feminist movements as waves. Introductory essays at the beginning of each section lay out the framework that brings

the readings together and provide historical and intellectual context. Instructors who have adopted the book can email SalesHSS@taylorandfrancis.com to receive test questions associated with the readings. Please include your school and location (state/province/county/country) in the email. Now available for the first time in eBook format 978-0-203-59831-3. The *Concise Companion to Feminist Theory* introduces readers to the broad scope of feminist theory over the last 35 years. Introduces readers to the broad scope of feminist theory over the past 35 years. Guides students along the cutting edge of current feminist theory. Suitable for students and scholars of all fields touched by feminist thought. Covers an exceptionally broad range of disciplines, discourses and feminist positions. Organised around concepts rather than schools of feminism. "This combination text and reader provides an introduction to contemporary feminist theory

oriented toward undergraduates as well as master;s-level students. Its organization around substantive topics and issues rather than conventional categories of feminist thinking effectively conveys the breadth and depth of feminist theorizing, demonstrating the intersections and eclecticism that have become its hallmark. It offers a strong, multicultural dimension, integrating diversity (race, ethnicity, class, and sexual orientation) within the discussion of substantive topics. As a supplement or as a main text, it will prove highly useful in courses in feminist theory and women;s studies, as well as in gender studies, sociology of women, and contemporary social/sociological theory."--
Pub desc. This is a remarkable book that embraces the challenge of rethinking communication theory. Much more inclusive than most communication volumes, this guidebook offers a rich diversity of voices, along with a conceptual framework for

remaking communication theory. Illuminating, innovative, eloquent-and transforming. -Cheris Kramarae, University of Oregon This is a book not only of and for feminist communication theory, but of and for feminists. After a preface that marks and remarks in creative ways how the personal is political, Rakow and Wackwitz offer a compelling account of the need and potential of feminist theorizing for social and structural transformation. The collection represents a range of experiences, problems, voices, and thus will be useful to scholars, students, and activists. -Linda Steiner, Rutgers University Feminist Communication Theory is a book of and for feminist communication theorists, providing the potential to help individuals understand the human condition, name personal experiences and engage these experiences through storytelling, and give useful strategies for achieving justice. Lana F. Rakow and

Laura A. Wackwitz examine the work of feminist theorists over the past two decades who have challenged traditional communication theory, contributing to the development of feminist communication theory by identifying its important contours, shortcomings, and promise. Arguing that feminist communication theory must address theories of gender, communication, and social change, Rakow and Wackwitz describe feminist communication theory as explanatory, political, polyvocal, and transformative. The book is constructed around the three keyconcepts of difference, voice, and representation to reflect on how feminist theory reshapes our thinking about gender and communication. Feminist Communication Theory represents a variety of voices from different theoretical, cultural, and geographic perspectives to illustrate the complex challenge of constructing new theoretical positions. Key Features

Explores key works and issues of feminist theory relevant to gender and communication
Examines a broad range, well beyond conventional wisdom, of women 's perspectives and experiences Provides tools to develop the theoretical potential of both feminist and communication theory Feminist Communication Theory is designed for undergraduate and graduate courses on feminist communication, gender and communication, communication theory, speech, rhetoric, and mass communication. The book will also be of interest to feminist scholars in a variety of disciplines, as well as students and scholars in Women 's Studies and Cultural Studies. Feminist theories and research approaches are committed to generating relevant, morally accountable knowledge and understanding, as well promoting social and political change. Through them, we have the potential to understand more fully the urgent global health concerns that individuals, families and

communities face on a daily basis. This unique text provides students across a range of health care disciplines with a clear and accessible introduction to feminist theory and conceptual frameworks, as well as how to apply them to health-specific issues. With a particular focus on students' own qualitative research activities, each chapter guides the reader through challenging and sometimes highly contentious theories with clarity and eloquence, and demonstrates the ways in which feminist theories and research approaches can be used to help analyse the wide range of contemporary issues encountered by health practitioners daily. This is a fascinating read for health science research students and practising health professionals – or indeed anyone wishing to learn more about feminist theories and concepts within health care. The phrase 'feminist pedagogy' couples the contemporary and the traditional, joining current political movements with a

concern for the transmission of knowledge more ancient than the Greek word for teaching. Now, two decades after the first Women's Studies courses appeared on campuses, their place in higher education happily needs little demonstration. *Gendered Subjects* combines a number of classic statements on feminist pedagogy from the 1970s with recent original essays making significant and original contributions to the field. As the new scholarship on women has changed the content and structure of knowledge in every field, so this collection aims to mirror this impact on feminist pedagogy, with articles ranging from broad theoretical perspectives on the realities of the classroom to international explorations on how race, gender and class, and political orientation inform feminist enquiry. *Doing Feminism* represents over 220 artists and groups with 370 colour illustrations punctuated by extracts from artists' statements, curatorial writing and critique. Tracking

networks of art practice, exhibitions, protest and critical thought over several generations, Marsh demonstrates the innovation and power of women's art and the ways in which it has influenced and changed the contemporary art landscape in Australia and internationally. The images and texts are curated by decade and contextualised to provide a broad analysis of art and feminist criticism since the late 1960s. The result of many years of research in the field and the archive, *Doing Feminism* reproduces essays by key protagonists involved in the critical debates and theoretical positions of the day, including curators writing on exhibitions that signalled major change, especially for Indigenous artists. This extraordinary work presents one of the most comprehensive collections of material ever compiled on women and the arts in Australia. Marsh guides the reader through the struggles, contestations and achievements of women and

feminism in the visual arts and argues that this is the doing of feminism with all its differences. It will become essential reading for years to come. This interdisciplinary collection is concerned with important theoretical and methodological issues facing women's studies. Drawing on feminist theory and politics it addresses a range of questions raised for women's studies by work conducted in history, literature, politics and sociology. The editors provide a context for these debates in their introductory essay which gives an overview of the development of women's studies and reflects on its current position. In their concluding chapter they also suggest a framework from which women's studies might move forward. "This is a clear and accessible exploration of feminist method, methodology and epistemology. After situating herself and her work, Gayle Letherby charts the debates concerned with the epistemological, political and practical issues involved in

doing feminist research, and places the debates within a wider consideration of the status of knowledge. The main focus of the book is then the particular and practical issues for feminist researchers. It examines how the process of research affects the results of that research and explores the relation between politics and practice in terms of research and knowledge production. Throughout the book there is a practical emphasis on specific examples of feminist research in action and, as well as summarizing current theoretical debates, Gayle Letherby adds to them." -- Back cover. As the initial book in the Feminist Constructions series, *Feminists Doing Ethics* broaches the ideas of critiquing social practice and developing an ethics of universal justness. The essays collected within explore the intricacies and impact of reasoned moral action, the virtues of character, and the empowering responsibility that comes with morality. These and other essays were taken from

Feminist Ethics Revisited: An International Conference on Feminist Ethics held in October of 1999. Waugh and DesAutels bring to light in these pages work discussed at this conference that extends our understanding of morality and ourselves. An accessible account of the varieties of feminist thought within the context of the key American texts including Kate Chopin, Alice Walker and Ann Beattie. *Differences That Matter* challenges existing ways of theorising the relationship between feminism and postmodernism which ask 'is or should feminism be modern or postmodern?' Sara Ahmed suggests that postmodernism has been allowed to dictate feminist debates and calls instead for feminist theorists to speak (back) to postmodernism, rather than simply speak on (their relationship to) it. Such a 'speaking back' involves a refusal to position postmodernism as a generalisable condition of the world and requires closer

readings of what postmodernism is actually 'doing' in a variety of disciplinary contexts. Sara Ahmed hence examines constructions of postmodernism in relation to rights, ethics, subjectivity, authorship, meta-fiction and film. In this guide to western feminist theory, Christine Beasley provides clear explanations of the many types of feminism, ranging from liberal feminism to queer theory. The Oxford Handbook of Feminist Theory provides a rich overview of the analytical frameworks and theoretical concepts that feminist theorists have developed to analyze the known world. Featuring leading feminist theorists from diverse regions of the globe, this collection delves into forty-nine subject areas, demonstrating the complexity of feminist challenges to established knowledge, while also engaging areas of contestation within feminist theory. Demonstrating the interdisciplinary nature of feminist theory, the chapters

offer innovative analyses of topics central to social and political science, cultural studies and humanities, discourses associated with medicine and science, and issues in contemporary critical theory that have been transformed through feminist theorization. The handbook identifies limitations of key epistemic assumptions that inform traditional scholarship and shows how theorizing from women's and men's lives has profound effects on the conceptualization of central categories, whether the field of analysis is aesthetics, biology, cultural studies, development, economics, film studies, health, history, literature, politics, religion, science studies, sexualities, violence, or war. What is feminist transdisciplinary research? Why is it important? How do we do it? Through 19 contributions from leading international feminist scholars, this book provides new insights into activating transdisciplinary feminist theories, methods and

practices in original, creative and exciting ways - ways that make a difference both to what research is and does, and to what counts as knowledge. The contributors draw on their own original research and engage an impressive array of contemporary theorising - including new materialism, decolonialism, critical disability studies, historical analyses, Black, Indigenous and Latina Feminisms, queer feminisms, Womanist Methodologies, trans studies, arts-based research, philosophy, spirituality, science studies and sports studies - to trouble traditional conceptions of research, method and praxis. The authors show how working beyond disciplinary boundaries, and integrating insights from different disciplines to produce new knowledge, can prompt important new transdisciplinarity thinking and activism in relation to ongoing feminist concerns about knowledge, power and gender. In doing so, the book attends to the multiple lineages of feminist theory and practice

and seeks to bring these historical differences and intersections into play with current changes, challenges and opportunities in feminism. The book's practically-grounded examples and wide-ranging theoretical orbit are likely to make it an invaluable resource for established scholars and emerging researchers in the social sciences, arts, humanities, education and beyond. *Performing Feminisms* introduces a relatively new field, one sure to provoke discussion in both disciplines. In this rewarding book, Laurie A. Finke challenges assumptions about gender, the self, and the text which underlie fundamental constructs of contemporary feminist theory. She maintains that some of the key concepts structuring feminist literary criticism need to be reexamined within both their historical context and the larger framework of current theory concerning language, representation, subjectivity, and value. Feminist approaches

within the social sciences have expanded enormously since the 1960s. In addition, in recent years, geographic perspectives have become increasingly significant as feminist recognition of the differences between women, their diverse experiences in different parts of the world and the importance of location in the social construction of knowledge has placed varied geographies at the centre of contemporary feminist and postmodern debates. *Gender, Identity and Place* is an accessible and clearly written introduction to the wide field of issues that have been addressed by geographers and feminist scholars. It combines the careful definition and discussion of key concepts and theoretical approaches with a wealth of empirical detail from a wide-ranging selection of case studies and other empirical research. It is organized on the basis of spatial scale, examining the relationships between gender and place from the body to the nation, although the links

between different spatial scales are also emphasized. The conceptual division and spatial separation between the public and private spheres and their association with men and women respectively has been a crucial part of the social construction of gendered differences and its establishment, maintenance and reshaping from industrial urbanization to the end of the millennium is a central linking theme in the eight substantive chapters. The book concludes with an assessment of the possibilities of doing feminist research. It will be essential reading for students in geography, feminist theory, women's studies, anthropology and sociology. Recent commentators have portrayed feminist critics as grim-faced ideologues who are destroying the study of literature. Feminists, they claim, reduce art to politics and are hostile to any form of aesthetic pleasure. *Literature after Feminism* is the first work to comprehensively rebut such caricatures, while also offering

a clear-eyed assessment of the relative merits of various feminist approaches to literature. Spelling out her main arguments clearly and succinctly, Rita Felski explains how feminism has changed the ways people read and think about literature. She organizes her book around four key questions: Do women and men read differently? How have feminist critics imagined the female author? What does plot have to do with gender? And what do feminists have to say about the relationship between literary and political value? Interweaving incisive commentary with literary examples, Felski advocates a double critical vision that can do justice to the social and political meanings of literature without dismissing or scanting the aesthetic. In *Doing Time*, Rita Felski argues that it makes little sense to think of the modern and postmodern as antithetical ideas. Rather, we need a historical perspective attentive to the leaky boundaries between different times as well as the many

cultural and political differences within a single time.
